The same applies to situations that have not yet happened. Panic and fear are the kind of enemy.

Today in his speech, President Zelensky did not say anything new.

Russia is a terrorist country, from which, as well as from a monkey with a grenade, you can think of anything. The threat was, is and will be, until we finally will not win.

However, you need to be ready. Always and to everything. Therefore, we share with you the basic safety authorities at radiation danger.

The clash of the Russian regular army with Wagner PEC showed that Russia's leadership uncontrollands the situation in its own country.

This was said in [video address](#) Presidential Iodimer Zelensky, Ukrinform correspondent reports.

Video: [Presidential Office](#) _ I wish health, dear Ukrainians!_

_ I wish health, all the people of the world!_

Today is the day when there should definitely not be silence. And leadership is definitely needed.

Today, the world saw that the owners of Russia were not controlling anything. In general. Just full chaos. The complete absence of any predictability. And it is a napan territory that is stuffed with weapons.

We all remember how in the 21st year the head of Russia threatened the world. He had some ultimatums there, he tried to show some force there.

The 22nd year showed that he confused-he confused his illusions of the Tabr, which he was fed. They are there, in the Kremlin, capable of going to any terror capable of go to any stupidity, but they cannot provide percentage control. And they are a real problem.

In one day, they lost several millionaire cities and showed all Russian bandits, mercenaries, oligarchs and anyone else, as it is easy to capture Russian cities and probably arsenals with weapons.

It is very important now that no one in the world is silent because it is afraid of this Russian chaos. All leaders' actions can now be historical. Every word journalists - by weight of gold. The source of the problem should be clearly called. And if someone in the world tries to sleep the situation, if someone in the world is exposed to illusia, as if the Kremlin is able to restore control, then only delaying the problem of a torture breakthrough of chaos - even more dangerous.

We all know the solution.

First, the world should not be afraid. We know that only our unity protects us. Ukraine will definitely protect Europe from any Russian forces, it is important who commands them. We will protect. The safety of the eastern flank of Europe will only be in our defense. And that is why every manifestation of our defense is also supporting your defense, all in the free world. Second: everything should be real. It is time for everyone in the world to say that Russia's comprehensive actions against Ukraine have been and are unprovoked. And we all have to orient our joint security priorities.

NATO is not just a word or set of formal promises. It is a reliable guarantee of all that peace will not be destroyed. Without Ukraine, such guarantees are nothing. Already in July at a summit in Vilnius - a historical chance for real decisions of loving on Russia. Any nation that borders with Russia is really supporting.

And the third.

I will say in Russian. The Kremlin's person, obviously, is sought to be very scared, and the spinning, it is not shown. Imved, which is no longer in Moscow. Welcome to something, it will work something. He knows, he was afraid, so that he himself is a creation of etourosis. All evil, all the craft, all the hatred - he is a space. And more thanks, he is a hunger over his bunkers, the topics of all, everything, everything, that is squeezed with Russia.

What will we do, Ukrainian?

And we will blame their country. We will be delayed by their freedom. We will not build, and we will not be unattended. We will run out - and this will be. Our war in this war will be unambiguously.

And what do you do?

Moreover, the army will be on the Ukrainian land, the topics of the top were shaped by the tidy of the night to Russia. What will it be a man in the Kremlin, the topics of the catastrophe.

Now I'll move on to my native.

Thank you to our soldiers! Thank you all who are beating the occupiers now!
Thank you to the air for the protection of our sky!

Glory to Ukraine!

_ Let's win!_

Kakhovskaya hydroelectric power plants have led to an ecological catastrophe and on Khortytsia, resulting in more than 10 lakes of the plate of the island and killed species.

About it on air [Ukrainian radio](#) Informed the Acting Director General of the National Reserve "Kyiv-Pechersk Lavra"(Out -of -2023)former CEO of Khortytsia National Reserve(2007—2022)Maxim Ostapenko.

According to him, this is not the first catastrophe for the reserve - it all began the development of the Kakhovka reservoir. Ostapenko stated that the construction of the Novovaakhovsky Hydroelectric Power Plant in this territory would become a third disaster for her.

He is convinced that "it is necessary to start the world scale an ecological project - the model of Chornobyl - from the restoration of this unique territory."

According to Ostapenko, " [Khortytsia](#) It now lives very difficult times, because from the southern part of the island 22-25 KMDO of the front line. Russian rockets arrive here, and shelling continues permanently. More than 23 rockets have already been hit by the island, and there is a huge threat. But what is done with a sharp descent of the Kakhovka reservoir is a hecological disaster. Because now more than 10 lakes of the smooth part of the island are destroyed and disappear on Khortyts, unique species are killed. This is unsecuted, and it is impossible to correct it. "

The Ministry of Health continues to inform how to prepare possible emergencies at the Zaporozhye NPP, which is temporarily captured by Russia.

According to Ukrinform, the MoH was published in [telegram](#) Tips for the content of home first aid kits of the inhabitants of the 50-kilometer-long zone around the ZPP.

The message stresses that this information applies only to residents of the 50-kilometer zone around ZPES. And it is not relevant for people living outside this radius.

The Ministry of Health is advised to make sure that there is potassium iodide in the first aid kit, which is useful to reduce the negative impact of radioactive iodine into the thyroid in the event of a nuclear object.

It is necessary to take the required dose of iodide potassium only after official alert!

Read also: [Vereshchuk on Risks on ZPP : It is not necessary to be afraid of Russians, but their cephalopods](#) It is optimal to take the drug after alerting for 6 or less hours of overcoming the radioactive cloud, but potassium iodide remains effective with the receipt of the "cloud" and 6 hours after it.

The drug is not recommended 24 hours after the cloud is received.

Aluminum-antacid sorbents should also be in the first aid kit. Such a group of means will contain the active substance hydroxide of aluminum and are used to accelerate the neutralization, binding and excretion of radionuclides from the body and, thus, a decrease in the risk of health due to their receipt.

In addition, it is necessary to take care of the presence of alginate, the active substance - sodiumalginate. It creates a protective barrier on the surface of the liquid stomach content. This barrier prevents the body from being absorbed.

Also in the first aid kit should be put sodium bicarbonate, a remedy for the restoration of alkaline blood and correction of metabolic acidosis(a condition characterized by a breaking of chemical balance of acids and alkali in the blood).

In the first aid kit must be a mask, which is a means of physical protection of the hazard to reduce the ingress of dangerous substances.

As reported by Ukrinform, the risk that the Russians will commit another terrorist attack by the Nazaposhi NPP remains high. [In the case of radiation hazard](#) It is necessary to get a job as soon as possible and follow the instructions of the SES and local authorities.

The International Conference on the Restoration of Ukraine in London emphasized the priority of supporting small and medium -sized businesses.

About it on air [Ukrainian radio](#) Romanvashchuk told the business ombudsman.

He noted that, according to the World Bank, there are 5 directions in Ukraine that are re -rebellious. Next year, more than 14 billion dollars are required. The fifth point is the economic support of small and medium -sized businesses.

"Can be rebuilt for people housing , you can additionally visit a school with shelter, but if there is no bakery, a pharmacy or a grocery store in a town or in a village, then people will not return there. So, the reconstruction of small and medium -sized businesses is commemorative for the life of communities.

Many at the conference spoke about decentralization, not only to focus on the temporary military centralization of funds, but to return to the money to go to the places where they can be best distributed. And it seems to me that it will be one of the accents in the approach to this question, " - summarizes Vashchuk.

At the same time, in the belief of a business ombudsman, before launching programs of support that costs money, and they are not currently lacking, it is necessary to stop doing something that damages the business. "For example, how taxes and customs in Ukraine should continue to change in favor of business. That is: fewer stops, less non -neus inspections, less determination of arbitrary customs value, so as to simply perceive an account from the EU country and the declaration of its customs service for a clean coin. It is necessary for business to be able to spend time and energy to help, to help, to develop, not to reflect from all kinds of official encroachments. The first steps are already scheduled, in particular in the tax sphere. In a conferences in the presentations of the Ministry of Economy and Economic Deputy Fire of the President. Changes in these areas. We need to see that we will see in these areas over the next months, "he said.

Germany's intention to transfer to Ukraine additional self -propelled artillery systems (Healthy) Gepard and will work to strengthen her air defense.

About it in an interview [Welt](#) The head of the special staff on Ukraine at the Ministry of Defense of Germany Bradygadniegner Christian Freuding reported, Ukrinform reports.

The general called air defense a key weakness in the current contrast of the Armed Forces.

"We do our best to support the best. We put into Ukraine two SLM Iris-T, two more-this year, four more-in 2024. We put 34 Gepard anti -aircraft tanks, 15 more - the next weeks. In addition, by the end of the year we want to put up to 30 Gepard SAU in cooperation with the United States. We also gave the Patriot Complex as one of the three nations. We do what we can. But this is the case, whether Ukraine has enough air defense? It is clear that no!"Freuding said.

He called the "treachery of the Russian strategy" that they continue to attach settlements to force Ukrainians to concentrate a anti -air defense around cities. But the offensive would need air defense, All is currently not in the right amount. Ukraine cannot leave this dilemma, the general admitted. At each meeting of partners in the so -called Ramstaynu -Ukrainians format three priorities: [air defense](#) , Air defense, aircraft, he reminded.

According to him, Ukraine as a party that requires success requires a local advantage of 3: 1 or even 5: 1. The army of the Russian army, which turned out to be, do not underestimate their possibility: Russian armed forces still need to be taken seriously, they have a great potential for personnel, armored vehicles. And they still have air and naval forces, as well as in the last 15 months, the Russians have "studied, albeit to a limited extent", - said the commander. **Read also:** [About the deployment of the SAMP/T complex in Ukraine the Air Force Commander - Ignatius](#) Freuding praised the efficiency as a German weapon transferred to the Armed Forces, so they are using it. The IRIS-T SLM air defense system has, according to it, almost 100 percent accuracy. Very effective Patriot, so last week FRNNIVRIRIVRIR immediately transfer 64 missiles to this system from the Bundeswehr warehouses.

"And the Gepard, which we removed from our weapons, is experiencing the Renaissance that we could not imagine. It is especially effective in protecting from drones of icicles missiles. We will also be able to supply new production ammunition for Gepard. With regard to artillery, the Ukrainian army is convinced that Panzerhaubitze 2000 is the most effective and fastest gun that is at their discharge. And if we talk about tanks, "Leopard -2" and "Leopard -1

A5" clearly outperform Russian samples in hostilities by combat capabilities. They have the ability to night fighting, the advantage of range and the ability to lead while driving, " -said general.

He also recalled that a few weeks ago, the Bundestag allocated more than 12 billion -year -olds for military support of Ukraine, which included projects by 2032. It will guarantee that we are constantly supporting Ukraine.

The clash of the Russian regular army with Wagner PEC showed that Russia's leadership uncontrollands the situation in its own country.

This was said in [video address](#) Presidential Iodimer Zelensky, Ukrinform correspondent reports.

Video: [Presidential Office](#) _ I wish health, dear Ukrainians!_

_ I wish health, all the people of the world!_

Today is the day when there should definitely not be silence. And leadership is definitely needed.

Today, the world saw that the owners of Russia were not controlling anything. In general. Just full chaos. The complete absence of any predictability. And it is a napan territory that is stuffed with weapons.

We all remember how in the 21st year the head of Russia threatened the world. He had some ultimatums there, he tried to show some force there.

The 22nd year showed that he confused-he confused his illusions of the Tabr, which he was fed. They are there, in the Kremlin, capable of going to any terror capable of go to any stupidity, but they cannot provide percentage control. And they are a real problem.

In one day, they lost several millionaire cities and showed all Russian bandits, mercenaries, oligarchs and anyone else, as it is easy to capture Russian cities and probably arsenals with weapons.

It is very important now that no one in the world is silent because it is afraid of this Russian chaos. All leaders' actions can now be historical. Every word journalists - by weight of gold. The source of the problem should be clearly called. And if someone in the world tries to sleep the situation, if someone in the world is exposed to illusia, as if the Kremlin is able to restore control, then only delaying the problem of a torture breakthrough of chaos - even more dangerous.

We all know the solution.

First, the world should not be afraid. We know that only our unity protects us. Ukraine will definitely protect Europe from any Russian forces, it is important who commands them. We will protect. The safety of the eastern flank of Europe will only be in our defense. And that is why every manifestation of our defense is also supporting your defense, all in the free world. Second: everything should be real. It is time for everyone in the world to say that Russia's comprehensive actions against Ukraine have been and are unprovoked. And we all have to orient our joint security priorities.

NATO is not just a word or set of formal promises. It is a reliable guarantee of all that peace will not be destroyed. Without Ukraine, such guarantees are nothing. Already in July at a summit in Vilnius - a historical chance for real decisions of loving on Russia. Any nation that borders with Russia is really supporting.

And the third.

I will say in Russian. The Kremlin's person, obviously, is sought to be very scared, and the spinning, it is not shown. Imved, which is no longer in Moscow. Welcome to something, it will work something. He knows, he was afraid, so that he himself is a creation of etourosis. All evil, all the craft, all the hatred - he is a space. And more thanks, he is a hunger over his bunkers, the topics of all, everything, everything, that is squeezed with Russia.

What will we do, Ukrainian?

And we will blame their country. We will be delayed by their freedom. We will not build, and we will not be unattended. We will run out - and this will be. Our war in this war will be unambiguously.

And what do you do?

Moreover, the army will be on the Ukrainian land, the topics of the top were shaped by the tidy of the night to Russia. What will it be a man in the Kremlin, the topics of the catastrophe.

Now I'll move on to my native.

Thank you to our soldiers! Thank you all who are beating the occupiers now!
Thank you to the air for the protection of our sky!

Glory to Ukraine!

_ Let's win!_

The political crisis in the Russian Federation was predictable and inevitable.

About this [deputy](#) The Minister of Defense of Ukraine Hannamars wrote in her telegram.

Anna Malyar emphasized that Ukrainians can regard events that have begun asleep as the inevitable degradation of the Russian state.

For Ukraine, this is a window of opportunity, but it is not necessary to relax, it is better to be careful and prepared for any scenario.

"We are working on our strengthening and victory," she said.

The Deputy Minister of Defense noted that the imperial campaign on new lands could not cover the internal problems in the state - only aggravating. What is Ivid. Whatever the state they build, they still get a "gulag", which sooner or later rebels and breaks down.

"The war in Ukraine has shown the weakest place of the Russian Empire - fear of preference. All their solutions are based on lies. They always created "air locks" for the king and believed in them themselves. This is such an imperial feature - to indulge in your own grandeur and overestimate yourself. This was prompted by a completely adequate decision - to solve the war with Ukraine without systematic truthful calculations of their own capabilities. Exclusively ambition and arrogance. The price of this non-governmental solution is the fate of Russia itself. They are fighting with us and destroying themselves, "her post reads.

Anna Malyar emphasized that if you look globally at this as an evolutionary process, then a non-viable system launched a self-destruction program. There is no conspiracy or world conspiracy. These are natural processes.

"They will destroy themselves as a state in this form, and we will naturally defeat themselves, are painfully ready to move forward. We are a nation that now creates a new type of culture in the world. To us - culture always lost barbarism. We prove that you can be strong, protect yourself and remain civilized. Therefore, the future is behind us, and Russia is the past, " - summarized.

Today, the world saw that the owners of Russia were not controlling anything. In general. Just full chaos. The complete absence of any predictability. And it is a napan territory that is stuffed with weapons.

President of Ukraine Volodymyr Zelenskyy [said](#) In your evening address.

"We all remember how in the 21st year the head of Russia threatened the world. He had some ultimatums there, he tried to show some force there.

The 22nd year showed that he confused-he confused his illusions of the Tabr, which he was fed. They are there, in the Kremlin, capable of going to any terror capable of going to any stupidity, but they cannot provide percentage control. And they are a real problem, "he said.

In one day, they lost several millionaire cities and showed all Russian bandits, mercenaries, oligarchs and anyone else, as it is easy to capture Russian cities and probably arsenals with weapons.

The head of state stressed that it is very important now that no one in the world is silent what is afraid of this Russian chaos. All leaders' actions can now be historical. Every word of journalists - by weight of gold. The source of the problem should be clear. And if someone in the world tries to sleep the situation, if someone in the world is illusion, as if the Kremlin is able to restore control, then only delaying the problem before the next breakthrough of chaos - even more dangerous. We all know the solution.

"The first: the world should not be afraid. We know that we only protect us.

Ukraine will definitely protect Europe from any Russian forces, it is important who commands them. We will protect. The safety of the eastern flank of Europe will only be in our defense. And that is why every manifestation of our defense is also supporting your defense, all in the free world.

Ukrainian warriors, Ukrainian guns, Ukrainian tanks, Ukrainian missiles are what protects Europe from such marches, as we see Natospian territory today. And when we turn to F-16 or ATACMS, we will develop common protection. Real protection. This is what you need. Now is the time of giving the necessary to protect weapons.NATO is not just a word or set of formal promises. It is a reliable guarantee of all that peace will not be destroyed. Without Ukraine, such guarantees are nothing. Already in July at a summit in Vilnius - a historical chance for real decisions of loving on Russia. Any nation that borders with Russia is really supporting, "the head of state emphasized.

The President of Ukraine also addressed Russia:

"I will say in Russian. The Kremlin's person, obviously, is sought to be very scared, and the spinning, it is not shown. Imved, which is no longer in Moscow. Welcome to something, it will work something. He knows, he was afraid, so that he himself is a creation of etourosis. All evil, all the craft, all

the hatred - he is a space. And more thanks, he is a hunger over his bunkers, the topics of all, everything, everything, that is squeezed with Russia.

What will we do, Ukrainian?

And we will blame their country. We will be delayed by their freedom. We will not build, and we will not be unattended. We will run out - and this will be. Our war in this war will be unambiguously.

And what do you do?

Moreover, the army will be on the Ukrainian land, the topics of the top were shaped by the tidy of the night to Russia. If it will be a man in the Kremlin, the topics of the catastrophe, "the address reads.

Volodymyr Zelensky thanked our soldiers and air forces for a more protected sky.
