The documentary "Blackout. Christmas, which explores how a huge energy system suffered from "wounds", supported her life tauvida.

Ukrinform was reported by the creators of the film association of Ukrainian producers(OPP)та SPACE Production.

"Heroes There are Ukrainian energy. Therefore, the country opened the whole "energy front": engineers, electricians, repair crews, call centers, rescuers. They learned to act in the conditions of regular damage to the system and found the courage to bear the light, "his authors have evolved.

The film will tell about five cities: Odessa, Lviv, Pavlograd, Kharkiv, Kiev: photographer Sergei, who is looking for light in the dark capital; military and mom of five -month Elena; Surgeon Andrew, who should perform his work independently of electricity visit; Swiss light artist Gary Hoffteter, which enters Ukraine's artmas Light for Hope.

Read also: In total, 12 stories were told in the movie. They are united by the storyline of the NEC "Ukrenergo" Vitaliy Zaichenko. He was at the Center for Energy Management during every attack, every time the Russian rocket hit a Ukrainian power plant or substation. And he did his best to make the light - knowing.

"When the electricity is switched off, people have vifay and almost no mobility, and someone also has heating and water. But people continue to perform their responsibilities. This was another providence of Ukraine's indomitability and the fight against the darkness of military aggression. Flames will shine despite rocket strokes, because there is such light as the Nenikov does not go out. Putin did not become a abductor of Ukrainian Christmas, as he wanted it. Until we started shooting, I really had no idea how much energy is indifferent. Each history is an example, courage and humanity. It captures, " - said the producer of the movie" Blackout. Christmas »Ilona Schneider.

"Last year, everything is changing so quickly that we barely remember events, for example, October.(I recall that I was preparing for a nuclear war.)Blackout.Skdvo captures the period when we all who stayed in Ukraine were preparing for life without electric current. This is a movie about those who have not happened to whom this total -apocalypse happened, although rocket strokes made everything. The Russian attacks caused great harm, so great that I did not imagine what the destruction was behind the everyday "damaged network". Only in the process of shooting is it clear, what titanic work was conducted by our energy to maintain the network in working order. We will show you the people who have happened to have the Divive - Christmas lights in the Ukrainian homes, "said the author of the script, a so - scenario producer Tala Prystaytska.

"The shooting group of the movie" Black. Christmas ", without thinking, went to shoot energy and mine in Pavlograd just when Russia actively released rockets through the Ukrainian power system. They risked being in the places

where the enemy aimed to record Russia's crimes. Showing the heroic work of Ukrainian energy for the crew was more important than our own safety. And now we have learned what we had to pass energy and communications in Ukraine, "added the founder and the general production of the co -founder .

The documentary "Blackout. Christmas »was generated by Vladimir Borodyansky(OPP), Darius Legoni-Philko(Oup, Space Production)and Catherine Laskari(SPACEProduction). Знімальна група фільму «Блекаут.

"Most of their lives are hiding behind the masks of those whom they would

like to seem. Finally, it distorts their consciousness and deforms the morality that the huts are torn down," there is only a quiet horror. So, the choir genre is approaching this idea. There are also elements of grotesque, tragicomedy and drama, "said the director of Katerypura in a comment to Ukrinform.

"Lis Nikita is the best image that I could convey my beliefs to such a complex audience. He is bold, ambitious, he is lying, fools, laughs ... And this is a world in which modern teenagers live. For me, it is important to expose human vices and benefits to make the answer be obvious. Ivan So skillfully wrote out every character of this story, so boldly entangles the fox from every trap that the viewer involuntarily admires the fox, although the positiveness of this character is quite doubtful. However, this is the great conception of which I became fascinated: the world is not black and white, it is mostly black with white -white and to survive a little to the mud, " - said the surveyor.

The horizon "Lis Nikita" is designed exclusively for young viewers 14+ and their father.

The poster was created by the artificial intelligence of the art director Lesya Kovpak.

All Ukrainian sanctions synchronize with global sanctions, it is an inevitable process. The sanction pressure on anyone who is guilty of this aggression, blocking their assets and opportunities at the world level is the self-defense of the world and now all other opportunities for aggression.

This emphasized in his evening President Volodymyr Zelenskyy, reports Ukrinform.

Viso:

I wish health, dear Ukrainians!

He spoke with French President Macron today. There was a long conversation, almost half hours. They managed to walk on all key security issues, which is the day of the day - ours, in Ukraine, is very important, and in general in Europe.

It is a front, our ability to move, to act, to return freedom and justice in those territories that, unfortunately, are occupied by Russia.

International contacts were discussed - both ours and France. Emmanuel informed about the details and results of the visit to China. And I thank you for the clear support of those print things that combine our whole anti-war coalition.

Russia should be taken from the territory of Ukraine. All Ukraine and all occupiers. The iconic point of the UN Charter must work again - none of the Russian orders of international law can be ignored. It is on these principles that safety and tranquility will come to international relations. For this purpose, the E-Ukrainian formula of peace, absolutely realistic and quite specific, was also discussed in detail with the macron, as well as the international events that we blink this year, including the NATO Vilnius Summit.

Our common position at the Lithuanian Summit-all the participating states-can be the ambitious samette, which European security needs. I am sure of this. Safety of security for Ukraine, that is, in fact, for an international order based on the rules, it is necessary before our entry into the Alliance.

By the way, in Vilnius a meeting of the Member States of the Joint Investigative Group of Investigation of the Crimes of the invaders in Ukraine took place. One of the results of the meeting of Jugoda - it was signed yesterday. The Agreement on Joint Investigation of not only Russian military crimes, but also a crime of genocide.

We will provide at all levels, including legal, full responsibility for the Russian and Ukrainians. And I thank all the partners who assault the sentences for the occupiers - for Russian murderers and terrorists. Only one of this strike of terrorists has damaged and destroyed more than 50 residential buildings, of which more than 30 are multi-apartment ones. The wounded -more than 20

people, as of this time -the dead already 11. Among them is a very young child -the 21st year of the 21st year of birth. My condolences to my relatives, to all who have lost their close ...

None of those who are guilty of this aggression can forgive and forget anything.

Ministry of Ministry Oleksiy Reznikov states that it is necessary to reach a break on the battlefield in 2023, for this Ukraine requires rapid support in sufficient volume.

According to Ukrinform, Reznikov reported in .

“Під час насиченого візиту до Бухареста взяв участь у роботі Чорноморськоїбезпекової конференції Міжнародної Кримської

платформи. Цей майданчик став важливим елементом консолідації зусиль на підтримку України. Скористався нагодою особисто подякувати румунським партнерам, які з перших днів повномасштабного вторгнення надають Україні всебічну підтримку як добре сусіди справжні друзі", – написав він.

Резников у своєму виступі на конференції зробив акцент на п'яти рамкових тезах, які, на його погляд, мають бути в основі комплексу рішень щодо забезпечення миру, безпеки, доброчуття та розвитку у Чорноморському регіоні.

За його словами, вільний світ має змінити парадигму своїх дій у контексті відсічі агресіям. Повільні дії постфактум не працюють. "Не провокувати" – непрацює, зазначив міністр.

Він наголосив, що росіянам не потрібні провокації, щоб розв'язати війну, цевже неодноразово доведено.

In his opinion, a system of guarantees-warriors, which will bring the dominum desire to solve something by force.

"In the context of the Black Sea region, everything is obvious - there is no alternative . There is no alternative to Ukraine in NATO. We have proved their ability to strengthen the Alliance and have taken formal steps - giving an entry. The absence of movement will only continue uncertainty and risks, "the head of the Ministry of Defense emphasized. He emphasized that the question of the transformation of Russia should arise on the agenda, and the thesis of some partners that Moscow should be involved in all important officials of the region is broken by reality. "After all, with the current terrorist regime, which feeds on imperial phantom pain, some arrangements are impossible in Principles," the Minister of Defense is convinced.

"There must be a joint resistance, including - fixed through a system of powerful sanctions that, non -transformation into a true democratic

federation, Russia will not be able to restore the pensions with the civilized world," Reznikov said.

"And finally. Time. The right medicines used late, with late, may not work. Delaying or "freezing" of war is contrary to the interests of the region. The region will lose dynamics as others develop. Therefore, the joint interest is to achieve a break in the battlefield in 2023. For this purpose, Ukraine is sufficiently sufficient for Ukraine, "Reznikov said.

He added that there are a number of very specific steps to develop these positions that Ukraine now discusses with partners and prepares for implementation or already embodied.

According to Reznikov, the Black and Azov seas will be a spacious peace, and Crimean will turn home.

All Ukrainian sanctions synchronize with global sanctions, it is an inevitable process. The sanction pressure on anyone who is guilty of this aggression, blocking their assets and opportunities at the world level is the self-defense of the world and now all other opportunities for aggression.

This emphasized in his evening President Volodymyr Zelenskyy, reports Ukrinform.

Viso:

I wish health, dear Ukrainians!

He spoke with French President Macron today. There was a long conversation, almost half hours. They managed to walk on all key security issues, which is the day of the day - ours, in Ukraine, is very important, and in general in Europe.

It is a front, our ability to move, to act, to return freedom and justice in those territories that, unfortunately, are occupied by Russia.

International contacts were discussed - both ours and France. Emmanuel informed about the details and results of the visit to China. And I thank you for the clear support of those print things that combine our whole anti-war coalition.

Russia should be taken from the territory of Ukraine. All Ukraine and all occupiers. The iconic point of the UN Charter must work again - none of the Russian orders of international law can be ignored. It is on these principles that safety and tranquility will come to international relations. For this purpose, the E-Ukrainian formula of peace, absolutely realistic and quite specific, was also discussed in detail with the macron, as well as the international events that we blink this year, including the NATO Vilnius Summit.

Our common position at the Lithuanian Summit-all the participating states-can be the ambitious samette, which European security needs. I am sure of this. Safety of security for Ukraine, that is, in fact, for an international order based on the rules, it is necessary before our entry into the Alliance.

By the way, in Vilnius a meeting of the Member States of the Joint Investigative Group of Investigation of the Crimes of the invaders in Ukraine took place. One of the results of the meeting of Jugoda - it was signed yesterday. The Agreement on Joint Investigation of not only Russian military crimes, but also a crime of genocide.

We will provide at all levels, including legal, full responsibility for the Russian and Ukrainians. And I thank all the partners who assault the sentences for the occupiers - for Russian murderers and terrorists. Only one of this strike of terrorists has damaged and destroyed more than 50 residential buildings, of which more than 30 are multi-apartment ones. The wounded -more than 20

people, as of this time -the dead already 11. Among them is a very young child -the 21st year of the 21st year of birth. My condolences to my relatives, to all who have lost their close ...

None of those who are guilty of this aggression can forgive and forget anything.

Today, two other sanctions against persons and companies have been published or helping the blame for this terror. In particular, these are the sanctions of persons who promote the terrorist state are covered by sports. Again, who is associated with its officials. A separate list is IT companies, quality terror, or give digital opportunities to continue aggression.

All Ukrainian sanctions synchronize with global sanctions, this is an inevitable process. I thank all in international institutions and partner states, who work with us, with government officials, with NSDCs, specialists, with our office.

The sanction pressure on anyone who is guilty of this aggression, blocking their assets at the level of the world is the self-defense of the world and now from any other opportunities for aggression.

The return of peace and its stability have no alternatives.

Thank you all who help us, Ukraine! Glory to all our soldiers who are in the battle of terrorists!

Let us return justice as a decent memory of all whose life was taken by Russia Terror ...

Glory to Ukraine!

The Kyiv Academic Theater of the Young Viewer has prepared the premiere of the performance-choir according to the works of Frank.

Ukrinform was reported in the theater.

"The works of Ivan Franko will be presented for the first time in the choir genre. In the play by the works of Ivan Franko's works "Lis Nikita" and "Painted Fox", the animals who live a peaceful socio-political life, occupy

positions, are in family relations, have their own state structure, sue, quarrel, rejoice and cry. In their everyday life, animals are very similar to humans. The life is an eternal struggle for survival, and in this struggle everyone does, " - said in the theater a new performance.

"Most of their lives are hiding behind the masks of those whom they would

like to seem. Finally, it distorts their consciousness and deforms the morality that the huts are torn down," there is only a quiet horror. So, the choir genre is approaching this idea. There are also elements of grotesque, tragicomedy and drama, "said the director of Katerypura in a comment to Ukrinform.

"Lis Nikita is the best image that I could convey my beliefs to such a complex audience. He is bold, ambitious, he is lying, fools, laughs ... And this is a world in which modern teenagers live. For me, it is important to expose human vices and benefits to make the answer be obvious. Ivan So skillfully wrote out every character of this story, so boldly entangles the fox from every trap that the viewer involuntarily admires the fox, although the positiveness of this character is quite doubtful. However, this is the great conception of which I became fascinated: the world is not black and white, it is mostly black with white -white and to survive a little to the mud, " - said the surveyor.

The horizon "Lis Nikita" is designed exclusively for young viewers 14+ and their father.

The poster was created by the artificial intelligence of the art director Lesya Kovpak.

The documentary "Blackout. Christmas, which explores how a huge energy system suffered from "wounds", supported her life tauvida.

Ukrinform was reported by the creators of the film association of Ukrainian producers(OPP)та SPACE Production.

"Heroes There are Ukrainian energy. Therefore, the country opened the whole "energy front": engineers, electricians, repair crews, call centers, rescuers. They learned to act in the conditions of regular damage to the system and found the courage to bear the light, "his authors have evolved.

The film will tell about five cities: Odessa, Lviv, Pavlograd, Kharkiv, Kiev: photographer Sergei, who is looking for light in the dark capital; military and mom of five -month Elena; Surgeon Andrew, who should perform his work independently of electricity visit; Swiss light artist Gary Hoffteter, which enters Ukraine's artmas Light for Hope.

Read also: In total, 12 stories were told in the movie. They are united by the storyline of the NEC "Ukrenergo" Vitaliy Zaichenko. He was at the Center for Energy Management during every attack, every time the Russian rocket hit a Ukrainian power plant or substation. And he did his best to make the light - knowing.

"When the electricity is switched off, people have vifay and almost no mobility, and someone also has heating and water. But people continue to perform their responsibilities. This was another providence of Ukraine's indomitability and the fight against the darkness of military aggression. Flames will shine despite rocket strokes, because there is such light as the Nenikov does not go out. Putin did not become a abductor of Ukrainian Christmas, as he wanted it. Until we started shooting, I really had no idea how much energy is indifferent. Each history is an example, courage and humanity. It captures, " - said the producer of the movie" Blackout. Christmas »Ilona Schneider.

"Last year, everything is changing so quickly that we barely remember events, for example, October.(I recall that I was preparing for a nuclear war.)Blackout.Skdvo captures the period when we all who stayed in Ukraine were preparing for life without electric current. This is a movie about those who have not happened to whom this total -apocalypse happened, although rocket strokes made everything. The Russian attacks caused great harm, so great that I did not imagine what the destruction was behind the everyday "damaged network". Only in the process of shooting is it clear, what titanic work was conducted by our energy to maintain the network in working order. We will show you the people who have happened to have the Divive - Christmas lights in the Ukrainian homes, "said the author of the script, a so - scenario producer Tala Prystaytska.

"The shooting group of the movie" Black. Christmas ", without thinking, went to shoot energy and mine in Pavlograd just when Russia actively released rockets through the Ukrainian power system. They risked being in the places

where the enemy aimed to record Russia's crimes. Showing the heroic work of Ukrainian energy for the crew was more important than our own safety. And now we have learned what we had to pass energy and communications in Ukraine, "added the founder and the general production of the co -founder .

On his Facebook page, the Minister of Defense of Ukraine [noted](#) On the eve of the meeting in Ramstay, which will be stage - after all this format -Kremlin

coalition turns a year, worked out a very intensive cut in terms of international contacts.

"In 10 days, they visited Athens, Nicosia, Madrid and Bucharest with the team.

Fiered meetings with my colleagues - the Minister of Defense of Greece Nicospanayotopoulos, Cyprus Minister Michalis Georgallas, Spanish Minister Margarita Robles, Romania Minister Tilvarath by their teams were held.

The purpose is unchanged - weapons and other forms of support that strengthen the forces of defense.

During visits, we meet with leaders of representative authorities, customers, from the media. To have the widest possible range of support.

Our priorities are known - the protection of the sky, the creation of a "armored fist", providing ammunition.

We work on different tracks.

We are interested in both the platforms of the Soviet model and, especially, rockets and projectile, because these weapons immediately find themselves on the battlefield and the systems of Western production, which provide quality benefits.

We are involved in assistance, we agree on production, work out the program teaching of our soldiers and more.

Such visits and meetings at the political level are very useful, because not only do it support the high general dynamics, but also contribute to the rapid use of many practical issues, which would take a week in the remote regime.

Time is very important to us. After all, it is the preserved lives of our defenders of the protesters, the protection of our peaceful cities, "Alexei Reznikov wrote.

I wish health, dear Ukrainians!

He spoke with French President Macron today. There was a long conversation, almost half hours. They managed to walk on all key security issues, which is the day of the day - ours, in Ukraine, very important, and in general in Europe.

It is a front, our ability to move, to act, to return freedom and justice in those territories that, unfortunately, are occupied by Russia.

International contacts were discussed - both ours and France. Emmanuel informed about the details and results of the visit to China. And I thank you for the clear support of those print things that combine our whole anti-war coalition.

Russia should be taken from the territory of Ukraine. All Ukraine and all occupiers. The iconic point of the UN Charter must work again - none of the Russian orders of international law can be ignored. It is on these principles that safety and tranquility will come to international relations. For this purpose, the E-Ukrainian formula of peace, absolutely realistic and quite specific, was also discussed in detail with the macron, as well as the international events that we blink this year, including the NATO Vilnius Summit.

Our common position at the Lithuanian Summit-all the participating states-can be the ambitious samette, which is needed by European security. I am sure of this. Safety of security for Ukraine, that is, in fact, for an international order based on the rules, it is necessary before our entry into the Alliance.

By the way, in Vilnius a meeting of the Member States of the Joint Investigative Group of Investigation of the Crimes of the invaders in Ukraine took place. One of the results of the meeting of Jugoda - it was signed yesterday. The Agreement on Joint Investigation of not only Russian military crimes, but also a crime of genocide.

We will provide at all levels, including legal, full responsibility for the Russian and Ukrainians. And I thank all the partners who helps to approach the sentences for the occupiers - for Russian murderers and terrorists.

In Slovian in Donbass, a search operation is still underway after a Russian - roller strike that happened yesterday. There is information that under the rubble of the houses - the cheat of the dead, unfortunately ...

Only one of this strike of terrorists has damaged and destroyed more than 50 residential buildings, of which more than 30 are multi-apartment ones. The wounded-more than 20 people, as of this time-the dead already 11. Among them is a very young child-the 21st age of the 21st year of birth. My condolences to my relatives, to all who have lost their close ...Today, two other sanctions against persons and companies have been published or helping the blame for this terror. In particular, these are the sanctions of

persons who promote the terrorist state are covered by sports. Again, who is associated with its officials. A separate list is IT companies, qualifying terror or giving digital opportunities to continue aggression.

All Ukrainian sanctions synchronize with global sanctions, this is an inevitable process. I thank all in international institutions and partner states, who work with us, with government officials, with NSDCs, specialists, with our office.

The sanction pressure on anyone who is guilty of this aggression, blocking their assets at the level of the world is the self-defense of the world and now from any other opportunities for aggression.

The return of peace and its stability have no alternatives.

Thank you all who help us, Ukraine! Glory to all our soldiers who are in the battle of terrorists!

Let us return justice as a decent memory of all whose life was taken by Russia Terror ...

Glory to Ukraine!

Infographic about European green course

In 2019, the European Green Course adopted the European. Ambitious goal - by 2050 Europe will become the first climatic neutral continent. Ukraine said about 2060. In [interview](#) Correspondent Armyinform Minister of Environmental

Protection and Natural Resources Ruslan Striple told how the process of Green Recovery of Ukraine is ongoing:

"For Ukraine, green recovery is not a reconstruction by old projects. For example, when reconstruction of destroyed homes, even the location of the house will be important. After all, where the windows are directed will depend on the cost of heating in winter and for cooling in the summer. It is also important to use energy -saving materials.

Green recovery is also the restoration of industry on European standards. There is an understanding that our industry will be re -done in a mental, taking into account modern "green" technologies.

Therefore, even despite the war, the Mindovil did not stop working on the introduction of a reform of reduction and control of industrial pollution, but the actual co -modernization of industry. We have attached international experts, Czech Republic, Latvia to work. They worked together with the deputies of the profile committee of Ukraine, experts of the reform support team at Mindovquil, the Ministry of Environmental Protection of Germany and the GIZ project. As the result today we have a substantially revised draft law 6004-D.

The adoption of the bill will allow to implement the provisions of the Directive 2010/75/EC, to introduce the best available technologies and management methods, to launch industry eco -modernization and to fulfill one of the conditions for Ukraine's full membership in the European Union. When we introduce the position of this directive, built in the Soviet times and the units of the contamination of Russia will no longer be able to be restored according to old projects, but will not continue to poison the environment. Now it is a unique window to switch to modern environmental standards.

In general, since the beginning of a large -scale war, Ukraine has already adopted 9 Euro integration laws in the field of environmental. This is greater progress than a core of 5 years. In particular, we have launched reform of the waste management system, reform of the national chemical safety system, etc. Green recovery is accurately greening transport, eco-freelyarchitectural and engineering solutions. For example, even before a pandemic in Beijing, people were in masks because of smoke, because there skyscrapers there did not allow the exhaust gases from vehicles. And in European countries, external installations are installed to clean up urban air.

The world moves further, and we must catch up very quickly. This is the ideal signarter of the world and Ukraine that I would like to see. To live in such a country. "

In an interview with the correspondent, the Minister of Environmental Protection and Natural Resources of Ukraine Ruslan Strelets [told](#) About how the environment is currently monitored on the environment on frontier and deocutical territories:

" to the large -scale invasion of the Russian Federation in the territory of Ukraine worked a certainty of posts of monitoring of the state of atmospheric air. Constantly monitoring of water quality 4 laboratories: in Kyiv, Donetsk,

Odessa Taivano-Frankivsk regions. In fact, they covered the whole country. During the time, a considerable amount of equipment was destroyed. What did we do?

Within a few months since the start of a large -scale invasion of the Russian Federation, we are the hardened and mobile application "eco-zarza". Першочергово планувалося, що це буде інструментом збору інформації про воєнні злочини росіян проти українського довкілля. Кожна людина може зафіксувати такий злочин та повідомити нам через „ЕкоЗагрозу“, незалежно від місця перебування. Це може бути навіть солдат з передової.

Згодом ми розширили функціонал застосунку. Під'єднали до нього всі діючі постимоніторингу — радіаційного фону, якості повітря та води. Зараз там також відображається мапа повітряних тривог.

„ЕкоЗагроза“ є частиною створеної нами раніше „ЕкоСистеми“ — єдиної загальнонаціональної платформи, через яку ми надаємо адміністративні послуги онлайн та відкриваємо довкіллєві дані.

Запуск „ЕкоЗагрози“ — це було термінове рішення. Іде війна і наша „ЕкоСистема“ змушені була „одягнути камуфляж“. Коли війна закінчиться, „ЕкоЗагроза“ зновстане „ЕкоСистемою“. Однак і після цього через застосунок можна буде повідомляти про всі виявлені порушення довкіллєвого законодавства.

Щодо лабораторій якості води. У перші кілька місяців війни ми евакуювали певне обладнання зі сходу України. Нині ми відбираємо проби води на всій території, яка контролюється ЗСУ. Дані про якість води публікуємо на „ЕкоЗагрозі“. Іноді фіксуємо перевищення по певних показниках, але вони не критичні».
