_ on May 5 this year, according to the order of the Commander-in-Chief of the Armed Forces of Ukraine dated 24.12.2022 No. 333, in Ukraine will be celebrated for the first time the Day of Specialist and Military Cooperation of the Armed Forces of Ukraine. About the path to this special activity of Simis correspondent Army _ _inform _ _Sear of the central administration

In the Armed Forces of Ukraine, the decision to the pilot project from the CVS was made on May 5, 2014. His work was successfully started in the shortest possible time - a month later.

In the context of the Russian Federation, a hybrid warfare against Ukraine, civil-military cooperation has become an adequate response to novocardum. The need to establish interaction with civilian populations of state power, primarily in order to prevent obstruction(combat)actions, prompted to seek and embody a completely new in the Armed Forces of the Armed Forces of Ukraine, which is based on the experience of NATO's armed forces. The CVS, in fact, became the first in the landscaping, formed according to the standards of the North Atlantic Alliance, which has been successfully performing the tasks for years in a row.

-If we turn to the experience of NATO member states, then the task is mostly in the territory of other states in international contingents, but we have war in our own territory . **

-Indeed, the main feature of the direction of civil-military cooperation of Ukraine is that they work in the territory of their state and the widespread forces and the population.

At the initial stage, for the main tasks and functions that the units of the Civil-Military Cooperation of the Armed Forces of Ukraine have been laid, the basic functions of NATO CVS were based on : Organization of civilian-military interaction, support for troops(strength)and civilian objects, as well as relied on the experience of the United States Armed Forces. This fully corresponds to the challenges that have come to us.

An additional function, so to speak, is a national feature of search work and repatriation measures.

— You just told about the functions of the CVS, let us dwell on them .

-One of the main functions of the CVA in the Armed Forces is civil-military interaction, which provides for appropriate work and communication with state authorities, international non-governmental organizations and public associations of civilians.

Support for troops(strength)It is a priority function for CVD units. It is also not necessary to forget about the importance of evaluating the state of civil environment and informing commanders on the ground. This enables qualitatively predictable negative factors that can significantly affect the task with the appointments of the Armed Forces.

In turn, supporting civil entities is to minimize the negative effects of hostilities on the civilian population. From the beginner -scale invasion of the Russian Federation, the CVS units were faced with the need to provide humanitarian aid and evacuation of civilian populations(combat)actions and deoccupied territories.

Deoocuonta Lyman, October 2022, Humanitarian Aid- Since 2014, there has been an urgent need for the search and return of the bodies of the vicious Ukraine from the control of the Government of Ukraine of the territory and the occupied territories of Donetsk and Luhansk regions, and the expansion of armed aggression of the Russian Federation and from other areas where the fighting was conducted. It is a sustainable and extremely important area of work. Therefore, the Humanitarian Project of the Armed Forces of Ukraine "Evacuation 200" was started and temporary groups on transportation of the Image of the fallen soldiers were created, which was further renamed the humanitarian Project "on the shield".

Currently, the CEC of the General Staff of the Armed Forces created the management of search work and repatriation measures. This is due to the pre-suggestion of the search for the search and repatriation of missing and lacer. This activity is carried out in cooperation with expert services, law enforcement agencies and other units of security and defense forces.

It should be noted separately that only in the Armed Forces there is such specificity of work for the units of civil-military cooperation.

-the consequences of a large-scale invasion of the Russian Federation have demonstrated that civil-military cooperation should be considered primarily as a common function of all units of the Armed Forces of Ukraine. What has changed during this time?

- Thank you for such a meaningful conversation and on this occasion I congratulate you on your professional celebration!

The coronation ceremony, which is currently involved in the King of the United Kingdom of Charles III and his wife, the Consort Queen Camilla, is in a certain conclusion of the monarch's contract with the people of Great Britain and the public companion to stand on the guard of laws.

Such an explanation of the age tradition was given by the British journalist and writerin Kokrel-Fer in an interview , reports Ukrinform.

"Coronation is the conclusion of the King of the Great contract with the people. He promises us that he will do everything to stand the laws of the United Kingdom and the Anglican Church, "Kokrel -Fer said.

She drew attention to, she said, an interesting British paradox - Ukraine, which opened the world parliamentary democracy, has preserved such a most indomocratic type of government as a monarchy. "And not just kept it-he works," the writer emphasized.

In this context, she reminded that there was no such document as a constitution in the UK, but there are constitutional precedent acts.

"Without the monarch, all government acts are illegitimate, that is, in some ways the highest nosoar, which must give all legal legitimacy," Kokrel -Fhere said.

As an example, she cited the annual opening ceremony in the United Kingdom.

It is known that the United Kingdom is a unitary state and a constitutional monarchy with a parliamentary management system. There is no Constitution in the form of a single document in the Great Britain. Traditions, legislative acts of parliament and judicial precedents are constitutional.

This was emphasized by the Minister of Health of Ukraine Viktor Lyashko during the EU Member States Ministers, which included the heads of different institutions of EU Member States in the field of health care.

"It is very important for Ukraine to support the EU countries, as it is the European region that is our key partners in response to the truthful aggression of Russia. Health care is one of the most affected by war and one of the most loaded. We will fix the growth of demand for various types of medical care and services. Today, there is no hospital in Ukrainian, which would not be affected by a Ukrainian who is affected by the war. Every sixth health care institution physically felt in its own stands, which means the so - called "precision weapons" of Russia. Attacks on health care facilities are only part of a wider picture of deliberate attacks on civilian infrastructure, including residential buildings, schools, universities, water and power supply systems, transport, warehouses, food stocks and more. All these exit are consciously, including for the purpose of pressure and intimidation of peaceful order. In more than 400 days, the aggressor did not realize that nothing would make the Ukrainians retreat. Just as no gas, energy or political hammer forced you, European partners, to deviate from the help of Ukraine to put the concessions of the country that started this war. I am grateful that the level of humanitarian support for Ukraine remains high, and the political trip to the aggressor continues to grow, "the health minister Lyashko emphasized, addressing his European colleagues.

The minister added that Russia's full -scale war against Ukraine has created critical reception on the national health care system. To date, over 1,400 facilities of medical institutions, 177 - destroyed. Also, from the beginning, Russia damaged 103 "fast", another 250 destroyed and captured 125, almost700 pharmacies were attacked. Many countries have already taken care of some of the Tazaclade regions. Currently, the process is coordinated and the implementation of ambitious plans. Representatives of the EU Member States have confirmed their complete and unquestionable support for Ukraine in the war with the aggressor, as well as expressed their readiness and gave the realization to support Ukraine and cooperate within the projects. It is about supporting refugees from Ukraine, integration of mechanists and simplification of conditions for work for them in some EU countries, providing humanitarian assistance, development of services in the field of physical tapsychological rehabilitation, participation in the reconstruction of destroyed or damaged infrastructure, medical evacuation of Ukrainians. .

The Ministry of Health is also actively working for the direction of technology into the European community. Self-screening is conducted, a table of more than 600 documents is developed in accordance with EU requirements. Our

goal is to establish a transparent system where Ukraine will be able to become a complete component of the medical space of the European region on equal terms and will be able to report these conditions.

About it [reports](#) Ministry of Veterans.

In the modern complex realities of Russia's military aggression against Ukraine, Ukrainian will have grave consequences for the physical and mental health. Therefore, special attention requires the involvement of veterans of war, defenders and defenders of wheelchairs in physical education and sports, as a component of rehabilitation, and in order to refer them to integration to active life of social and functional life and restore their work.

One of the types of physical activity that is only developing in Ukraine is Escandava walking.

Scandinavian walking is a sport in which a person walks, leaning in Nasta sticks. This technique allows you to load the muscles of the hands and

simultaneously remove the joints of the lower extremities. The muscles of the whole body are involved in the motion, which is why when walking, the wellness effect is achieved faster and easier. This is one of the reasons why the Scandinavian walking technique is becoming more and more popular and used not only for overall health, but also as a rehabilitation agent that can be engaged at any age and with any level of physical training.

Therefore, the Ministry of Veterans of Ukraine invites all those who wish veterans of the veterans to participate in the physical and health event "Marathon".

The event will take place on May 7, 2023 in Bucha, vul. Institute, 54(Central Entrance to Buchan City Park).

In 2019, the President of Ukraine signed [Decree No. 152/2019](#) Certain on May 6, infantry day. This year, he is already celebrated in the country. The decree states that this professional holiday is established "in order to honor the courage and heroism modern military traditions. "

Why are our infantry honors on May 6? After all, this day in 1648 the cosaks won the battle near the yellow waters. The battle is considered the first victorious - under the leadership of Bohdan Khmelnitsky. And on May 6, they celebrate the religious holiday - Yuri Zmievorets Day, who was one of the patrons of the Ukrainian army.

Our infantrymen, along with warriors of other families and types of troops since 2014, during the time -to -terrorist operation and operations of the Joint Forces courageously defended Ukraine.

Like last year, the day of infantry is now celebrated in the conditions of reflection of a wide -scale armed Russian aggression against Ukraine.

Under the pressure of our infantrymen in the spring of 2022, the enemy fled from Kyiv, Chernihiv and Sumy regions.

Ukrainian infantry participated in a lightning counter -offensive in Kharkiv region.

And last November, the infantry soldiers, together with other families and Vidyamivsk, liberated the regional center of Ukraine-the city of Kherson.

And for this, thousands of soldiers were awarded state awards.

Today, Ukrainian infantrymen are ready to liberate other territories of our state.

In the current difficult environment, the personnel of the mechanized and motor infantry units demonstrates the loyalty of the military oath and high responsibility.

And firing power and high mobility are something that allows modern infantrymen to destroy Russian invaders on the battlefield.

The Armyinform joins the greetings and wishes our infantry new victories!

Maybe somewhere out of place, but there in one installation can be placed in 4 mines of rockets of different types, which will work for various purposes. Because there is no need to use a rocket against ballistics in order to knock down the aerodynamic target. This is the uniqueness of this complex. Well, we have such azom. This was told during an interview with Dmitry Komarov Minister of Defense of Ukraine Oleksiy Reznikov. He noted that situational awareness on the battlefield, which would be used to UAV, is very important.

He stressed that in turn the Russians were afraid to report on the loss of the territory. They could keep it secret for several days. Therefore, when their commanders, who reported for logistics, thought they were in the rear 50-60

kilometers from the front line, and their Ukrainian military was surrounded by the Ukrainian military. They were shocked that the Ukrainian army can already be here. Proper competent planning with the use of all forces and means, situational identity gives preference.

Minister of Defense of Ukraine Alexei Reznikov [congratulated](#) Ukrainian infantrymen with a professional holiday:

“Pychotin warriors are the basis of the Ukrainian army, one of our respects!

With their blood and titanic effort, they restrain the Russian aggressor, fight fierce battles with the enemy, bite into every centimeter of Ukrainian land and fight to victory. It is now that the mechanized, infantry, mountain and assault units and units of the Land Forces of the Armed Forces of Ukraine have the greatest burden of trials. They are the first passionately meeting the enemy when they are the fortifications of the same fortifications.

The professional holiday of the Ukrainian infantry, which our warriors now celebrate in Okopakhna, in training or in battle - another opportunity to repeat:

we are proud of more defenders and defenders who serve in the infantry and take the winner every day!

We pay tribute to all the infantry soldiers who gave their lives for the sake of our non-volatility and the future!Eternal memory and eternal glory!

Glory to the Ukrainian infantry!Glory to Ukraine!".

The Commander of the Land Forces of the Armed Forces of Ukraine, the General-General of Syrsky [posted](#) In Telegram:

"Dear warriors, infantrymen!

Today we celebrate our professional holiday!

It is a holiday of steel and courageous men. Infantry is about endurance, courage, courage and heroism. And about character - it is the basis of stability.

As Karl Clausewitz wrote, the concept of "power of character" is about the firmness of beliefs. It is indifferent whether the latter are the conclusions of a foreign or own system of views, whether they arise from the principles, norms, instant impressions and any other manifestations of the mind.

Infantrymen - always where it is difficult!

In recent years of the war, you have shown that even in the most difficult situations, it is possible to break the course of events in your own benefit. And even where the enemy is numerically, it is possible to conquer the Ukrainian land.

Successful counter -offensive operations have become possible due to the clear discipline of infantry.

Today, the holiday is not only the Land Forces, but also the defenders of the territorial defense, landing troops, the Marines and all who hold the front line, where heavy fights are going on.

Eternal honor to fallen heroes who gave their lives in the fight against Pidlagressor. Glory to all who continue to fight and fearlessly destroys enemies.

I am convinced that in the near future Ukrainian infantry will lift the Ukrainian label above Deoocupovan Donetsk, Lugansk and in the Crimea.

Happy infantry, our dear defenders and defenders of Ukraine!

Glory to Ukraine!".

-If you look at the future, we definitely need to build an independent military-industrial complex. In addition, it is important to prepare a childhood from childhood, - Oleksireznikov said in an interview. - I believe that we do not need a fixed service, but there should be a better approach, perhaps an analogue of the Swiss reservist variant.

He also added that after the victory of Ukraine, it is obligatory to take place in the Nonurnberg-2, where the Russian killers will be tried.

-There must be an international court where Russian criminals, their military-political leadership should be on the defendants and obtain their sentences. It is important for history, for descendants and for them, in particular, to understand that responsibility will necessarily come, - the Minister of Defense of Ukraine emphasized. It seems symbolically to be Kharkiv or Mariupol. They should sit here, and the people they killed have to see this court from the sky.

The meeting is obliged to write in a dry official language. Standard phrases such as "the parties discussed important issues", "The meeting has passed the handset" and so on.

Now I will start picking up words to convey the real atmosphere of the meeting and not to raise the protocol.

The meeting was emotional and frank. Irene Fellin is very well aware of our war and sincerely ill for the fate of Ukraine and Ukrainians.

Irene has heard my speech at an international event in Portugal on the problems of women of icholovik in the Armed Forces, which arose from a full - scale war, and now wanted to talk about it in more detail.

Yes, there are things that can only be discussed in such a personal meeting format.

Irene Fellin is grateful for indifference and active position. "

"Today, Ukraine celebrates the courage and strength of the infantry warriors-what gives the state the most important result, the indomitability of our defense.

The state is standing because you are fighting with dignity - together with all Ukrainian forces and security!Thank you for it!

Every time Ukraine speaks with the world, the combat achievements that our warriors are being presented is an extremely convincing argument.

It is not easy to get rid of many years of illusions about Russia-the state has made a lot of the world to consider that this evil is insurmountable.

But Ukrainians, Ukrainian warriors, Ukrainian infantry warriors demonstrate how evil is over.
