On this day, 37 years ago, the most terrible nuclear disaster was the Chernobyl NPP accident. However, the Chernobyl disaster is not only a reactor Saul, but also a long plume of misinformation, fakes and silence.

About fakes that have been accompanied by the Chernobyl disaster for almost forty years, read in [infographic](#) Center for Combating Misinformation Damned the Chernobyl Accidents:

ЧАСТЬ ПЯТАЯ

Третье изложение на тему «Природы» (500-600 слов) – это самое сложное. Для решения этой задачи лучше всего использовать методика, предложенную в разделе «Практическая работа». Важно помнить, что в этом изложении не должно быть ссылок на конкретные места, но можно писать о конкретных людях, если это необходимо для ясности изложения. НАСТОЛЬНИКІ

Національна гвардія України, як і будь-яка інша збройна сила, має свій дрібно-рекрутський склад. Це відбувається зовсім звичайно. Протягом року відбуваються вибори відповідно до встановленої законодавческої норми, для того, щоб відповідати змінам в умовах зовнішньополітичного положення країни. Для цього засновано відповідні підрозділи, які виконують певні функції відповідно до змінених обставин.

МІСТІРІ ДОБИ

Світський та військовий потенціал АЕС дуже широкий і розгалужений, але саме промисловий напрямок викликав у всіх найбільш зачаровану здатність до фантазії та відчайдушності. Тому єдиним чином підтвердженням є те, що вони вже діють.

СІВЧИКІВСЬКА

Сівчикивська школа, як і багато інших навчальних закладів, зазнала багатьох змін та здобула значущу роль в освіті села. Нині це школа другого ступеня і здійснює підготовку підлітків. Після закінчення школи, її випускники можуть піти до університетів, коледжів та професійних навчальних закладів, або отримати посаду вчителя. Сівчикивська школа є важливим освітнім центром села, який надає дітям якісну освіту та підтримує їхні таланти та інтереси.

НАСІПНА МОЛДА

Могильник на східній околиці села Борисове (Борисівка) відомий з давніх часів. In this way, the Russian authorities analyze the reaction of their population with sophisticated radical statements from Kremlin politicians and propagandists, which allows to increase dictatorship.

Ukraine is currently currently aircraft, without which there is no fully effective air defense. You can only stop the terror and save people with enough quality weapons.

This was stated by President Volodymyr Zelenskyy in the evening video, which is given by Ukrinform.

Viso:

Dear Ukrainians!

Along the day, there was a parsing in Uman, at the site of the Russian rocket. My mingers to relatives and loved ones ...

To all who were saved - the residents of this house, the neighboring houses, which, unfortunately, with an explosive wave, - the necessary help is provided. I am thankful and everyone who participated in the rescue operation and supported people.

The Uman rocket, in the city that is absolutely peaceful, is known to the world in that it has received tens of thousands of pilgrims of host every year ... Only the absolute evil can do such a terror against Ukraine.

Two -Ukrainian killed in Dnipropetrovsk region as a result of today's rocket strike. Mother and daughter. Olga, 92nd year of birth, and Veronica, 20 years of birth. Even three years, this child is not fulfilled!Eternal memory!.. sympathy for the family, compassion for loved ones ...

Today, our air forces have managed to knock down most Russian missiles- 21z 23. If it weren't for this, the terrorist state would have been able to take much more victims, more lives. And this again proves that stopping terror and saving people can be more weapons. Air Force, modern aviation, without which there is no fully effective ART. All you need to give safety to our cities, our villages both in the rear and in the forefront. To restore safety and luggage, which, unfortunately, in the occupied territory. Temporarily. We can leave no one under the rule of Russian evil.

Today in Kyiv a visit was a president of Slovakia, the President of the Czech Republic. We have been extinguished exactly how to protect all our people, to accelerate the recovery and order throughout the earth.

I thanked Slovakia and the Czech Republic for their support: for the weapons provided, political tasancial assistance, with the support of people who received shelter in Slovak Ichi communities.They signed a joint declaration with Slovak President and the Czech President of our European and Euro - Atlantic Movement.

He also spoke with the President of the European Council Charles Michel today. He informed him about the consequences of the Russian terrorist attack and thanked him with the support of our defense, our economic, our social stability.

Separately discussed with Mr. the President of the European Council, the situation of the stubborn -nostructive, in my opinion, was prohibited by

individual states of import of our agrarian products. I emphasize that this not only violates the existing pro -asset agreement between Ukraine and the European Union, but also gives dangerous hope in the Kremlin. It is hopeful that in our common European home, someone's wrong decisions can be paid over common interests.

Now that Russia violates freedom of trade, tries to block the supply of agricultural products to the world market, it is not time to follow anyone with a derived zone, to do something similar. It is necessary to find a normal, in the European manner, a constructive way out of this situation. difficult. Such a decision would have been the interests of all our countries and Europe as a whole. We discussed Zpan Michel, how it can be done, what a solution can be, and we constantly contact all partners.

Today, the landmark investment event for Ukraine has taken place - the first large investment in Ukraine from the beginning of a full -scale invasion. The investment is \$ 250 million, and this is just a start of the relevant package. Right now, the Colima is still fighting Russian terror, the big world business not only believes UNash victory, but also confirms this faith with its multimillion -dollar investments, specifics.

I thank everyone who helps Ukraine!

Glory to all our soldiers, who is now in battle, in combat posts, in combat operations!Thank you to the people of Ukraine!

Glory to Ukraine!

He also noted that the team was working on, but the game arranged it.

"Everything, in principle, was normal. We controlled the game, although not everything was possible. We were moments in the first half that we had to implement. They understood what our opponent would play. We missed some acute cases. Then we scored two balls, and allegedly everything had to be great. But then it was a decoration, and the team was confused. We will understand why it happened. The problem is that someone was wrong and we missed a goal. Everyone is mistaken. The problem of fatigue is that after the goal we were lost for some reason. After missing, a confusion began, which lasted until the third scored ball, "said Dynamo coach.

Slovak President Zuzan Čaputová suggests that after early parliamentary elections in the country, some changes in relations with Ukraine are possible. At the same time, it cannot imagine that the new potential government will not

understand the difference between the aggressor and the victim in the Russian-Ukrainian war.

Chapotova stated this during a joint with the Presidents of Ukraine Volodymyr Zelensky and the Czech Republic Peter Pavel Presconference in Kiev, reports Ukrinform correspondent.

She noted that before the September parliamentary elections, the topic of potential change of the external course of the Slovak Republic is very politicized, and some party members earn political points to help Ukraine. In this context, Chapotov reminded that Ukraine's support by the current government is a very high highway, and in terms of military and humanitarian assistance she helped "everyone she could."

"After the election, I will remain president and will continue to support Ukraine and help. I do not want to and cannot imagine such disorientation of the new potential government when he could not understand the difference between the aggressor and the victim. So I think that in this basic philosophy we will continue our policy, although changes are possible," said Slovakia president.

This was reported by NAPC expert on work with sanctions Yevgen Kasyan during the time discussion "Finance of the Terroist country: how to confiscate?" In the Media Center - Ukrinform.

According to him, as of the beginning of April 2023, sanctions were imposed against 13 thousand out of 24 thousand defendants of this list.

"At first, the work was not progressing as we would like. Therefore, the existing track, which was in the pre-war period, and the one that the country needs during the war is significantly different. Now you need to move hundreds of times more. And it was possible to do it since last year September, "said Kashayan

According to him, this has been to some extent, apparently, thanks to the complaints of the national partners, that they generally imposed more restrictions on the Russian-related people than the Russian country.

Among the important tools for identifying the persons involved in the armed aggression - applicants for sanctions, the expert named the recently created portal .

The purpose of the portal is to synchronize the sanctions lists of Ukraine and international partners on the accomplices of Russian crime. The data, in particular, the Ukrainian and global businesses are used to determine whether to work with certain persons and companies.

According to the Agency's representative, another direction of work of the NACC is the preparation of legislative changes that allow not only to block Russian assets, but also to confiscate them.

"In this matter, we cooperate with the Ministry of Justice. And over 800 Ministry of Justice has already been elaborated on the search for assets of podvational persons - Russians of Tarosian companies. We are looking for such assets in the territory of Ukraine, passage of documents to the Ministry of Justice, which in court charges the quiches and property, "Kasyan said.

As examples, he cited the assets of Putin's Blinders Deripaska and the Rothenberg family in favor of Ukraine. VS Energy, related to Russian businessmen Babababak, Voivodin and Ginner, also transferred to the Ministry of Justice. Also, NAPC analysts monitor cases of bypassing the sanction, introduced by the world community against the aggressor state. Among the key "assistants" Putina Kasyan called Turkey, Kazakhstan, Armenia, Georgia, UAE, rarely - Saudi Arabia, China and India, as well as various offshore jurisdictions.

Ukraine is currently currently aircraft, without which there is no fully effective air defense. You can only stop the terror and save people with enough quality weapons.

This was stated by President Volodymyr Zelenskyy in the evening video, which is given by Ukrinform.

Viso:

Dear Ukrainians!

Along the day, there was a parsing in Uman, at the site of the Russian rocket. My mingers to relatives and loved ones ...

To all who were saved - the residents of this house, the neighboring houses, which, unfortunately, with an explosive wave, - the necessary help is provided. I am thankful and everyone who participated in the rescue operation and supported people.

The Uman rocket, in the city that is absolutely peaceful, is known to the world in that it has received tens of thousands of pilgrims of host every year ... Only the absolute evil can do such a terror against Ukraine.

Two -Ukrainian killed in Dnipropetrovsk region as a result of today's rocket strike. Mother and daughter. Olga, 92nd year of birth, and Veronica, 20 years of birth. Even three years, this child is not fulfilled!Eternal memory!.. sympathy for the family, compassion for loved ones ...

Today, our air forces have managed to knock down most Russian missiles- 21z 23. If it weren't for this, the terrorist state would have been able to take much more victims, more lives. And this again proves that stopping terror and saving people can be more weapons. Air Force, modern aviation, without which there is no fully effective ART. All you need to give safety to our cities, our villages both in the rear and in the forefront. To restore safety and luggage, which, unfortunately, in the occupied territory. Temporarily. We can leave no one under the rule of Russian evil.

Today in Kyiv a visit was a president of Slovakia, the President of the Czech Republic. We have been extinguished exactly how to protect all our people, to accelerate the recovery and order throughout the earth.

I thanked Slovakia and the Czech Republic for their support: for the weapons provided, political tasancial assistance, with the support of people who received shelter in Slovak Ichi communities.They signed a joint declaration with Slovak President and the Czech President of our European and Euro - Atlantic Movement.

He also spoke with the President of the European Council Charles Michel today. He informed him about the consequences of the Russian terrorist attack and thanked him with the support of our defense, our economic, our social stability.

Separately discussed with Mr. the President of the European Council, the situation of the stubborn -nostructive, in my opinion, was prohibited by

individual states of import of our agrarian products. I emphasize that this not only violates the existing pro -asset agreement between Ukraine and the European Union, but also gives dangerous hope in the Kremlin. It is hopeful that in our common European home, someone's wrong decisions can be paid over common interests.

Now that Russia violates freedom of trade, tries to block the supply of agricultural products to the world market, it is not time to follow anyone with a derived zone, to do something similar. It is necessary to find a normal, in the European manner, a constructive way out of this situation. difficult. Such a decision would have been the interests of all our countries and Europe as a whole. We discussed Zpan Michel, how it can be done, what a solution can be, and we constantly contact all partners.

Today, the landmark investment event for Ukraine has taken place - the first large investment in Ukraine from the beginning of a full -scale invasion. The investment is \$ 250 million, and this is just a start of the relevant package. Right now, the Colima is still fighting Russian terror, the big world business not only believes UNash victory, but also confirms this faith with its multimillion -dollar investments, specifics.

I thank everyone who helps Ukraine!

Glory to all our soldiers, who is now in battle, in combat posts, in combat operations!Thank you to the people of Ukraine!

Glory to Ukraine!

About it [reports](#) Official Web portal of the Verkhovna Rada of Ukraine.

The most replaced are agricultural lands in Kherson, Mykolaiv and Kharkiv regions - MP, member of the Committee of Agrarian and Land Policy Dmitry Solomchuk.

The main danger is that explosive objects are located not on the surface, but also at a depth of 20-40 centimeters.

Dmitry Solomchuk, a member of the Parliamentary Committee on Agrarian and Land Policy, told about it.

"It is very important for us to exchange the fields with special machines that destroy the excellent objects at a depth of up to 60 centimeters. If you do only overwhelming mine, then any agricultural machinery, harrows or seeders is in danger. That is why, every day, we have reports on the blasting of the farm equipment of the inhabited fields, "the politician said.

He also pointed out that the fighting was differently influenced on different lands.

"It is important to keep in mind that those fields where mines were simply installed are completely suitable for agriculture. However, there are lands, lakes and shells, and the lower and upper layers of the earth are mixed. Special fertilizers are required to restore such fields, it is necessary to restore the fertility of these lands. It's all extra effort and extra time, "said the parliamentary.

According to him, the speed of agricultural land demands depends on the number of special sapper automated complexes.

"If there are 200-300 such machines in Ukraine, it is real to change all the areas in a few years and get a good result. If the technique is not possible to change manually, then everything can be delayed for decades. In addition, the danger of demining increases significantly, "the People's Deputy emphasized.

He also recalled that approximately 20% of agricultural land will not be sown.

The only platform for cooperation with Defense-Tech Companies, State and Military Vocal Developments [Brave1](#) Development with the Ministry of

Defense, the Ministry of Stratus, the Ministry of Economy and the NSDC in order to get the best technologies and technical solutions as soon as possible to the front, and in the form of serial products.

"The main purpose of this site is to save the lives of our soldiers. In order to stand up and protect the country in the future, we must be able to give a distillation that prevails quantitatively and has more resources. We do not have a different selection other than to create the best, the most powerful forces of defense on the continent. The overgrowth of technological advantage is one of the main priorities, " - [quotes](#) The words of Oleksiyreznikov Ministry of Defense of Ukraine.

According to him, the Ministry of Defense forms policies in the field of OVT and acts as a basic customer. But this area is not in a vacuum, it is influenced by many factors that beyond the powers of the defense department.

Regulatory credit policy, education, taxes, approaches to export-import, etc.

Therefore, in order to achieve the result, stable innovative enterprises and comfortable procedures, Fast Track on the way from the idea to the mass production of weapons and equipment are required.

The head of the domestic defense department emphasized that the Ministry of Defense already has successful experience in this area. Alexei Reznikov also stressed that there are many creative and qualified teams in Ukraine that can create advanced things. However, they need the assistance at the start - with funding, with legalization procedures, access to the pre -production base, tests, etc., because less than 10% of those who create OVT lamps are capable of confirming the declarations at the time of appeal to the Ministry of Defense and undergoing appropriate legalization.

The minister stressed that this is why this cluster was created, which helps to coordinate the efforts of all interested agencies, business, and professional communities. The cluster will "grow" ideas and development to a certain level of maturity, when the Ministry of Defense will be able to pick them up and carry them out all mazes, domestic codification and NATO registers.

"I personally stand for the comprehensive development of Ukrainian MIC, enterprises of all property. The war proved that the ability to produce high - tech weapons on its own is one of the components of true independence. And the pounding is a powerful economic factor. Shortly after the Ministry of Defense will present a serving of results in this area. We work for victory, "the Defense Minister resume.

On the basis of the Operations Command "North" continues the first course of training of persons in the specialty of Marxman(The infantry sniper). B

управлінні бойової підготовки командування наголошують, що нині марксменів тренують за досвідом, який інструктори набули з моменту широкомасштабного вторгнення росії в Україну.

Про це [повідомляє](#) Commander of the preparation of the Command of Land Forces of the Armed Forces of Ukraine General-Major Viktor Nikolyuk.

In the battle, the infantry sniper performs all the actions performed by the ordinary shooter. At the same time Marxman, through special training, weapons and targeted devices, has the opportunity to conduct high -precision fire for the purposes at distances that exceed the range of effective fire of the staffing of the unit and inaccessible to the infantry.

Unlike ordinary snipers, "accurate shooters" are an integral part of the unit and work for a general result, while sniffing for separate purposes alone or in pairs. They are indispensable in the case of immediate action, when there is no time for long calculations, due to the possibility of covering their unit from the fire of the enemy from the great distances.

The conditions of classes are as close as possible to real combat: the skills of archery are refined with overcoming the obstacle and masking strip.

The main tasks of the newly created office of changes under the Ministry of Defense are to form a vision to accelerate the changes in the defense department, as well as rulers for the functioning of the procurement agency and preparation of relevant concern.

This was reported during the presentation of the newly formed advisory and advisory bodies of the Ministry of Defense-the Public Anti-Corruption Council and the Office of Support-reported by the Head of the Office of Changes at the Ministry of Defense Yulia Marushevskaya.

"It is important for us not to produce endless strategies, conversations, meetings. For us, therefore, so we even internally call this office as a such as a changeer of change. And the approach is when we take a separate change in turn, a separate project, build a team from the best professionals of Ukraine under this change, and perhaps also involve a world expert, and we launch this change. And so in the way - change by change - we look forward to stable fundamental systemic changes in the system of the Ministry of Defense, "YuliaMarushevskaya stressed.

She explained that the Office of Amendments to the Ministry of Defense of Ukraine is a consulting and advisory body at MOU. Its main function is to attract the best professionals, the best experts in their fields, which are in Ukraine today in order to transform purchases into the Ministry of Defense of Ukraine, as well as all related structures.

"The first project is the procurement reform that concerns exclusively of non - lethal. And as a result of the launch of this project, the procurement agency was created to help share the functionality that the Ministry is in the ministry(*bones. - ed .*), which is now concentrated in one of the departments(The Defense Ministry. - ed .). Це — формування політики, норм, правил гри, того, як мають функціонувати відносини покупця і продавця, те, як мають функціонувати закупівлі. Ми хочемо, аби цей «мозок», формування політик залишився в Міністерстві оборони, а сам процес закупівель — перейшов в Агентство, в професійний орган», — підсумувала Юлія Марушевська.

About it today during the broadcast "[Uniform](#)" Colonel Yuriy Ignat told the Air Force Air Force.

Yuri Ignat drew the attention of his colleagues that hostile attacks continue daily, not rocket launchers, the beloved, as not rockets, bombs.

Also, a spokesman for the Air Force Command of Ukraine recalled that yesterday in the Ukraine the second division of the Patriot anti-aircraft mission system was on the fighting duty, and the arms of the SSAMP-T weapons systems is expected in the near future to be protected not only from enemy aerodynamic means. The Armed Forces of Ukraine are currently used to protect the air space types of domestic and Western weapons, which are very efficient. Of course, the increase in the number of Western system-weapons, including the long-awaited F-16 aircraft, would allow a hundred percent of enemy objects to be shot down.

President of Ukraine Volodymyr Zelensky stated that during a telephone conversation by the Chinese People's Republic, Xi Jinping, the issues of realizing the Ukrainian formula of peace, returning from Russia deported Ukrainian children, dismissal of prisoners, and providing a robotic grain initiative were exposed. The Head of State spoke about it during a meeting with media representatives as a result of negotiations with Presidential Slavonic, Zuzana Caputova and Czech President Peter Pavel in Kiev.

Volodymyr Zelensky stressed that Ukraine is set to involve as many states as possible in the implementation of the proposed peace formula in order to pressure the scam-aggressor.

"There were more countries to be involved in this formula or the discussion site of our formula and they could then press on Russian federation to restore peace, restore our territorial integrity," the President said.

The Head of State said that during a telephone conversation it was the need to restore the sovereignty and territorial integrity of Ukraine within the borders of 1991 and the importance of compliance with the UN Charter.

"All this was talked about and heard respect for all these principles. I think it is important," Volodymyr Zelenskyy said.

The leaders of Ukraine and China also discussed the issue of returning Ukrainian and almost 20,000 children deported by Russian invaders.

"There are moments in which we have to connect everyone we can, different countries of the world so that they press on the aggressor and the terrorist - the Russian Federation, how many our children have been in the way," the President said.

According to the Head of State, during a telephone conversation with Xi Jinping, there was a threat of blocking the Black Sea Grain Corridor.

"Before the war, we were probably the largest grain exporter to China. And so, when it blocks it ... It seems to me that all interested countries should squeeze the Russian Federation so that there is no blocking of this corridor," he said.

In addition, when communicating with the head of the PRC, the President emphasized the supply of supplying weapons to the aggressor country by any state world.

"Ukraine would like all states to understand the risks of supplying any types of arms to the Russian Federation. I heard a positive answer in this sense," Volodymyr Zelenskyy said.

The paratrooper decided to carry out the first charitable hemisphere marathon, which, like Maxim himself, got the contusion of the misery for his homeland. In 2022, Maxim Pasichnyk participated in the Operation of Antonov Airport from the Russian invaders and was forced to get out of the rear of Russian troops without water and food for 10 days. Naragia over 100 kilometers overcame the courageous Ukrainian military. It is the prominence of Ukrainian defenders, the heroism of the fighting brothers that plans to reconvisor the veteran of the DSSV of the Armed Forces to their American colleagues. The "marathon of the unbreakable" of the USSH must convincingly testify to these inalienable qualities of military armed forces.

— Dear Ukrainians! —

Along the day, there was a parsing in Uman, at the site of the Russian rocket. My mingers to relatives and loved ones ...

To all who were saved - the residents of this house, the neighboring houses, which, unfortunately, with an explosive wave - is provided with the necessary help. I am thankful and everyone who participated in the rescue operation and supported people.

The Uman rocket, in the city that is absolutely peaceful, is known to the world in that it has received tens of thousands of pilgrims of host every year ... Only the absolute evil can do such a terror against Ukraine.

Two -Ukrainian killed in Dnipropetrovsk region as a result of today's rocket strike. Mother and daughter. Olga, 92nd year of birth, and Veronica, 20 years of birth. Even three years, this child is not fulfilled!Eternal memory!.. sympathy for the family, compassion for loved ones ...

Today, our air forces have managed to knock down most Russian missiles- 21z 23. If it were not that the terrorist state would have been able to pick up much more victims, more lives. And this again proves that stopping terror and saving people can be more weapons. Air Force, modern aviation, without which there is no fully effective ART. All you need to give safety to our cities, our villages both in the rear and in the forefront. To restore safety and luggage, which, unfortunately, in the occupied territory. Temporarily. We can leave no one under the rule of Russian evil.

Today in Kyiv a visit was a president of Slovakia, the President of the Czech Republic. We have been extinguished exactly how to protect all our people, to accelerate the recovery and order throughout the earth.

I thanked Slovakia and the Czech Republic for their support: for the weapons provided, political tasancial assistance, with the support of people who received shelter in Slovak Ichi communities.

I outlined my partners what prospects we have on the battlefield now and what kind of help we need to go all this necessary path. I have informed what we do to realize our formula of peace, in particular the Ipoon on bringing the perpetrators responsible for aggression. Thank you that the Slavonic and the Czech Republic, equally with us, see the need to restore justice to the hypocrisy of war criminals, to punish all these terrorists.

They signed a joint declaration with Slovak President and the Czech President of our European and Euro -Atlantic Movement. Separately discussed with Mr. the President of the European Council, the situation of the stubborn -nostructive, in my opinion, was prohibited by individual states of import of our agrarian products. I emphasize that this not only violates the

existing pro -asset agreement between Ukraine and the European Union, but also gives dangerous hope in the Kremlin. It is hopeful that in our common European home, someone's wrong decisions can be paid over common interests.

Now that Russia violates freedom of trade, tries to block the supply of agricultural products to the world market, it is not time to follow anyone with a derived zone, to do something similar. It is necessary to find a normal, in the European manner, a constructive way out of this situation. difficult. Such a decision would have been the interests of all our countries and Europe as a whole. We discussed Zpan Michel, how it can be done, what a solution can be, and we constantly contact all partners.

Today, however, a significant investment event for Ukraine has taken place - the first large investment in Ukraine from the beginning of a full -scale invasion. The investment is \$ 250 million, and this is just a start of the relevant package. Right now, the Colima is still fighting Russian terror, the big world business not only believes UNash victory, but also confirms this faith with its multimillion -dollar investments, specifics.

I thank everyone who helps Ukraine!

_ Glory to all our soldiers, who is now in battle, in combat posts, at combat operations!Thank you to the people of Ukraine! _

Glory to Ukraine!
