"The warriors of the three elements - the earth, water and heaven today celebrate their day. A day of night horror in the berets of the color of the storm wave, "Oleksireznikov wrote.

He recalled that during the years of ATO/OOS, Ukrainian Marines argued every time: where they have a position they are - there will be non - conversations.

"The start of the large -scale war was met at the forefront, where the titanic courage was shown and the enemy was difficult to describe the enemy. And today they are in the release of Ukrainian land from invaders. The enemy should be thoughtful: even at such a difficult time, we form new units of infantry, which will inevitably bring them closer to the Cobzon concert.

It is proud that I have friends among Ukrainian marines, proud that samples of wedge weapons come to them, proud to be Ukrainian near them.

The Coordination Headquarters met with the families of the military

servicemen of the Marine Corps named after counter -admiral Mikhail Bilynsky. The prisoners of prisoners and the missing persons of the Marines communicated the representative of the coordination headquarters.

About it [reports](#) Coordinating headquarters of inquiries for the treatment of prisoners of war.

One of the issues discussed during the meeting concerned information security. The staff representative drew attention to the fact that the enemy is very active in information space and uses any available tools for manipulations and misleading Ukrainian citizens, in particular, relatives of the military. Information sites controlled by the aggressor state are replicating messages aimed at destabilizing Ukrainian socialization.

It should be very vigilant and critical of the information obtained by disobedient sources. When giving media resources comments or conducting public events, it is worth considering all possible risks and in no way disclose an information that can harm those who are still in Russian captivity.

With regard to the location of prisoners of defenders and defenders, the representative of the Staff noted that Russia does not provide official information. However, the information on the probable places of detention comes from other sources. It should be noted that the information about the location of the prisoner of war does not have a direct influence on the exchange processes. The work is also underway to return the prisoners of different places of detention, which are located both in the Russian Federation and the timely occupied Ukrainian territories.

Colonel Yuri Ignatius Air Force Command of the Air Force of Ukraine.

Colonel Yuri Ignatus in the Ether of the Televahorfon ["Unin"] told about the preparation of Ukrainian pilots abroad.(<https://www.youtube.com/watch?v=WY8sDvZdWEA>).

— Авіаційна коаліція широка, українських пілотів навчатиме низка країн. Наразі триває процес підготовки людей до навчання на F-16. Створено передові групи, які виїхали до тих країн, що надали нам навчальні майданчики. Вивчається, як саме відбуватиметься дана підготовка, кількість пілотів, часові терміни тощо. У відрядження направлятимуть не лише льотчиків, а й авіаційних інженерів та офіцерів бойових управлінь. Старт навчанню даний — і це головне, — зауваживармієць.

Він уточнив, що всіх військових пілотів одразу ж відправити не можна. Адже комусь треба забезпечувати дії Сил оборони України. За час війни льотчики здобули певних професійних висот. Тому поїдуть за кордон підготовленими.

— Кожен курсант Харківського національно університету Повітряних Сил після випуску у своєму активі вже має по 200 годин нальоту. Далі в бойових бригадах вони вже опановують різні навички пілотування. Наразі ж іде мова про їхнє перенавчання на інший тип літака. Як порівняти з радянським MiG-29, закордонний F-16 є більш автоматизованим. Але це не означає, що буде легко, — розповів речник Командування Повітряних Сил.

Говорячи про терміни підготовки на F-16, офіцер зауважив, що підготовку кожного льотчика варто розглядати індивідуально, враховуючи ті завдання, що виконуватиме його авіаційна бригада.

Minister of Defense of Ukraine Alexei Reznikov wrote Appeal to the Bashkir people and their true leaders. Next is a quote:

"When I was serving in the army, one of my best comrades was Bashkir.

Thousands of men from Bashkiria were killed or crippled.

The situation impressed me with my absurdity. And she pushed her to write a native to my friend, the whole Bashkir people and his true leaders.

Today's Ufa authorities, taking care of personal gain and working in the interests of Kremlin, send its people to death.

Bashkiri is one of the largest peoples of Russia, which is at the same time a uniform situation.

In modern Bashkiria there are three commemorative national groups - Russian, Bashkir and Tatars. The Republic of Bashkortostan has huge natural resources and developed industry. There is everything there to guarantee a high level of pre-production.

The main interest of Bashkir is obvious - to ensure national development in itself in itself, including - through the exercise of the right to self-determination of the truthful distribution of considerable resources in favor of the region.

To do this, you need to concentrate all efforts within Bashkirria and the protection of Moscow.

If you list the problems and threats to the Bashkir people, the cause of them is not Ukraine or Ukrainians. The roots of all reasons - in Moscow and in Ufa.

Instead, Bashkir is sent to die for a thousand kilometers for what.

No one but the Kremlin and its lackeys are interested in it.

This should be stopped as soon as possible.

The emergence of a number of so -called private military companies in the temporarily occupied Crimea is primarily associated with the increase in fear

among the Russian occupiers of the hardware of the Armed Forces of Ukraine.

The representative of the Main Directorate of Intelligence of the Ministry of Defense of Ukraine Andriy Chernyak told about it, [reports](#) GUR MOU.

"The invaders clearly understand that the fighting in the Crimea will be, and they will build fortifications, defensive lines - not only in the Crimea, but also in the Soviet Farms," - explained Andrey Chernyak.

The representative of the Ministry of Defense of Ukraine added that the leaders of the occupying power to the peninsula will worry because of disappointment by the Russian army: who knows whether it will be waded to protect their families and looted property in Crimea.

"These private armies have been designed to protect occupation administrations because of the realization that Russia's armed forces will be able to protect them. And secondly, they are not sure of the integrity of the Russian Federation. If Russia begins to "fall", then they will have "PVC", which will protect their wealth, families, " - said a representative of Ukraine's military intelligence.

According to Andriy Chernyak, the so -called Crimean PECs from various sources are financed: for example, the leader of the occupation administration of Crimea was collected by Aksyonov there and forced money to allocate money for his private army.

"On the one hand, Crimean businessmen are forced to do it, but on the other, they also want to protect themselves and their wealth. The invaders guarantee them that they are evacuated if they are evacuated, and everything will be well, "Andrey Chernyak said.

The representative of the GUR of the Ministry of Defense of Ukraine reported that the so-called "Aksionovtsi" fighters receive from 200 to 250 thousand rubles a month, train mainly on the bases of preference and temporarily occupied Kherson region, and the instructors for them are professionally trained by Russian military with combat experience: Several times a higher salary - from \$ 5,000 or more.

Novens to the Crimean PVC are recruited so as not to compete with his "Wagner": "They are recruited among the mobilized, created double - constraints with PVK and the Ministry of Defense. They are trying to attract the Krym population first, but in addition, they take measures throughout Russia, " - said the representative of the GUR of Ukraine."In totalitarian Russia, there

can be no paramilitary formations that would be subordinate to the power structures," the representative of Ukraine's military intelligence emphasized.

The spokesman of the Eastern Group of the Armed Forces Colonel Sergeycheriev on the broadcast of the TEMACHONPON told this "[Unin](#)".

— На Бахмутському напрямку протягом минулої доби було лише три бойові зіткнення. Щоправда, ворог був активний у плані артилерійських ударів — 404 рази. Тож про снарядний голод у них не йдеться. У цих боях було знищено 79 окупантів, дві самохідні артустановки «Гацінт» та

«Гвоздика», а також 9 гармат типу «Мста», Д-20 і Д-30. Окрім цього, знищено 7 БПЛА різних типів, —повідомив офіцер.

Він уточнив, що «вагнерівці» щодня зазнають величезних втрат: до 100 осіб вбитими та стільки ж — пораненими. Тому вони давно б відступили, але їхні ватажки гонять їх на українські кулі, виставляють за ними «загороджуvalльнізагони» тощо. Тож усі гучні «заяви» євгена пригожина слід розглядати в контексті гри на публіку.

— Усі ці місяці ми проводили ефективну оборонну операцію зі сточуванням можливостей ворога, знищували його бойовий потенціал. Не маючи переваги в особовому складі, ми успішно використовували слабкі місця ворога, нестандартні тактичні прийоми. В ході такої активної оборони за найменшої можливості міконтратакували противника. Іноді ми просувалися на 250–1000 метрів, але це був реальний успіх, а не вигадана пропагандистська брехня, як в окупантів, —зауважив полковник Сергій Череватий.

The first Ukrainian F-16 will become one of the strongest signals from the world that Russia will only lose its aggression-it will be weaker, it will become even more isolated.

He emphasized this in the evening President Volodymyr Zelenskyy, reports Ukrinform.

*Viso:*

**I wish health, dear Ukrainians!**

Today, the first meeting meeting after all important visits, a meeting of decisions - defensive decisions, which we worked for a long time and we have them in cooperation with partners.

First of all, it concerns the aviation coalition - coalitions of modern fighters for Ukraine.

We do our best to reduce the time to the result, before the appearance of Ukrainian pilots in the Ukrainian non -Ukrainian and powerful planes.

It is clear that this global step will enhance our defensiveness. For only with powerful The air defense system becomes complete.

On the other hand, the first Ukrainian F-16 will become one of the strongest signals from the world that Russia will only lose its aggression because of its aggression-it will become even more isolated.

It will be a signal that Russian terror has lost, and our world, which is based on the substitute for independent nations and to the right of peoples to choose their own way, has stood.

We will prepare all the necessary base so that such aircraft transition happens measuresly quickly and efficiently.

Our warriors have already proven that they can capture modern weapons as effective as they did not even expect us. With planes, I'm sure it will be as successful.

The main thing is the speed of training and supply, that is, the time that will pass by the interruptions and the real protection of our sky.

Today, as always, he heard the reports of the commander, the head of the GUR, the head of the GUR about the current situation at the front, our counteraction to the occupier and the quietness that Russia is about to use against us.

We know what to answer. In particular, this applies to the rocket threat and the constant terror Droam-Kamikadze.

Now Russia is increasingly resorting to the so -called combined blows - different types of rockets, different types of drones.

I thank our air forces, all our defenders of the sky, our intelligence - but that our protection is being improved faster than Russia has time to change its

tactics of terror. And we are constantly looking for tools to make the amount of Iranian drone.

But today, given that such strokes continue constantly, he wanted to blink directly to the Iran people. To all - to society, Doiran ulma, to every Iranian family, to those people who are able to bring to government decisions in Iran. A simple question: why do you have been the participants of Russian terror? Why are you on the side of the state?

The world sees what is happening and you see all in Iran. Support is denying the support.

Although we have learned to knock down most of your Kamikadze drones, which you are transmitting, but there is still a hit.

When the Iranian drone kills a pregnant Ukrainian girl with her husband at home, why is it for you, mothers and parents in Iran? When your "shahad" is a hostel with our students, people die, a fire begins, rescuers are harvested on the location, and in a few minutes the second "Shahped" beats, taking away the life of those who saved the lives Hands of Russia, but yours, your weapon.

What do you get from this, people in Tehran, or in Shiraz, or Saccoon, or any other city of your country?

Unfortunately, even greater isolation from the world, even greater problems.

For Russia, target is absolutely everything. Housing, schools, hospitals, prayer houses, churches, power plants, markets, even the issuance of humanitarian aid tape stops ... There are already thousands of such examples. Iran people! Russia beats everything without disassembling. Artillery and mortars, rockets and drones are what they are and what they give on your behalf.

I am sure you have to be on the other side of history - not with evil.

Russia began this war for enslavement. It is the war of the colonizer of the dispossessed nation. Russia even steals people - our children! Thousands and thousands ... Only absolute evil can steal children of another people. And, going against Ukrainians, Russian invaders destroy all other national communities that will live on the land of Ukraine for centuries. Therefore, confirmation is burned by the Russians of the village of Greek-Christians and the systemic repression of Russia against the Crimean Tatar people-our Ukrainian Muslim community.

Iran's people could live quite differently if you were not put on one side with a break like Russian aggression.

Your "chess", which terrorizes Ukraine every night, means only that people are pushing even deeper and deeper on the dark side of history.

Glory to all who protect their lives! Let's be strong - we will live!

***Glory to Ukraine!***

Germany provided more than a million refugees of war from Ukraine, and record amounts were allocated for their support.

This was stated by German Chancellor Olaf Scholz at the General Assembly of German Association of Cities on Wednesday, Ukrinform correspondent reports.

"Everyone who participates, who has joined, deserves our greatest respect and support," Scholz said. Only this year, the Federal Government, according

to the head, allocated more than 15 billion euros to federal lands and municipalities on questions related to refugees, which is much more than in 2015, 2016, when the "waves" of refugees were recorded.

However, the chancellor noted, all issues with migration and refugees do not have to be raised. He emphasized the need to streamline migration, in particular, the digitalization of immigration bodies in federal lands municipalities, as well as ensuring the deportation(<https://www.ukrinform.ua/tag-nimeccina>).

"Anyone who is not entitled to stay here must leave Germany," the politician emphasized.

At the same time, legal migrants in Germany are welcome, because the country needs working -class.

"We are a developing country and we want more innovations, more renewable energy and more infrastructure," Solz said. To achieve these goals, he noted, immigration of skilled workers is required.

"With the law on qualified immigration, we create one of the most progressive norms in the world and attract talented, motivated and qualified women of icholovik," the Federal Chancellor is convinced.

The transitional period during the introduction of the newlyan calendar will protect the Orthodox church of Ukraine from internal split.

This was emphasized by the Head of the State Service for Ethnopolitics and Freedom of Soviet Saviator Helensky in a comment to Ukrinform correspondent.

"An important component of this decision(transition On the Novoyan calendar from September 1, 2023 -ed.), it is that parishioners who decide to use the old calendar will be able to do so. This circumstance is very important because all transitions to the new Calendar in Orthodox churches were accompanied by a split(For example, in Greece and in a number of countries there are old -calendars). Таким чином, ПЦУ уникнула цього, як іУГКЦ", - сказав він.

На його думку, ухвалене рішення ПЦУ є більш коректним підходом до реалізації місії християнства в світі.

"На мою думку, важливо, щоб календар церкви та календар, за яким ми живемо поза храмовими стінами, були суголосними. Хоча це дискутивна проблема: хто съвважає, що плин часу у храмі має бути інакшим, аніж у світі, а хто съджає, що час у церкві та поза нею має бути одним, мовляв, ми не можемо святкувати Новий рік під час посту. Тому рішення ПЦУ, мені здається, є більш адекватним підходом до реалізації місії християнства в світі", - зауважив Єленський.

Він також додав, що розмова про переход на новий церковний календар існувала давно, але повномасштабне вторгнення стало катализатором: "релігійні спільноти України відокремлюються від усього, пов'язаного з Росією".

The Minister of Youth and Sports of Ukraine and the President of the National Olympic Committee Gutzait assessed the situation with the admission of Russian and Belarusian athletes to international competitions.

He told about it in a comment to Ukrinform correspondent.

"The situation is difficult. There are federations that have admitted Russians and Belarusians, and regret. For example, the International Judo Federation has done everything on the Olympic Committee. In contrast, it is the Fencing Federation, which was the first to return the Russians, but it works according to the conditions. Now we see as all the first numbers of the Russian national team do not fall into international competitions. The executive committee of the International Federation, in which I enter, works in detail on every sports export: we look at who works in sports clubs "CSKA" or "Dynamo", and we do not allow. Therefore, now the Federation of Fencing Russia wants to refuse a rejection to participate in international competitions. There is a weightlifting Federation that has admitted Russians and Belarusians, but prescribed such criteria that every permit should sign a declaration where he says that against war in Ukraine. We see that Russian athletes do not sign this declaration. I want to dress other federations that do not allow Russians and Belarusians to do in international competitions - these are the Federations of Athletics, Kiorling, Hockey, Basketball, Badminton, Equestrian Sports. Now the situation is difficult, but I am seeing that we are moving properly. It is necessary to work further and do everything for the Russians and Belarusians, "Gutzait said.

He also thanked the Polish partners who did not allow the Russians and Belarusian to participate in European Games.

"Because the Russians and Belarusians were not allowed to go to European games in Poland, I want to thank our brothers - Poles and the European Olympic Committee, and all of us. This is the work that we do the whole year, "Gutzait added.

"Full security guarantees could be provided in NATO, but it is not something that can happen in the midst of war ... On this issue, Ukraine's membership of Ukraine is different views among the Allies, but the only way to make decisions by VNATO - through consensus is . Consultations are currently underway on how we can respond to the ambition of Ukraine on NATO membership. The Alliances are 31, soon - 32 members, and at this stage I cannot tell what the solution of the Vilnius summit on this issue will be, "the Secretary General .

At the same time, Jens Stoltenberg again confirmed that all the Alliance countries agree with that. that Ukraine will become a member of NATO in the future. It was very clearly stated by the Madrid Summit last year, and repeated many times from the moment when the Allies first made a Teke decision in 2008 during a summit of Vbuharest.

"We all agree that NATO's doors are open to new members. This is a matter that NATO allies should resolve - when it can join. Moscow has no veto in this matter. After all, if Ukraine does not win, then there will not be a question of membership that would be possible to discuss, "the Alliance head said.

He recalled that the war is by nature unpredictable, so it is contagious to say how it would end and when. NATO Allies consistently assist Ukraine in its fight against the aggression of the Russian Federation, so the readiness of some allies to start training Ukrainian pilots F-16 is a wise solution that allows NATO combat aircraft to begin Ukraine in the future.

This was announced today in Brussels during a press conference as a result of the Zprimier Minister of Latvia Krishianis Karinsh, General's Secretary of the Jens Stoltenberg said, Ukrinform correspondent reports.

"Over the past days, several allies have announced the start of training for Ukrainian pilots. At some stage, it will also allow us to supply meltis, although when and how it happens, it must still be resolved. I think it would be wise to move forward: to start training, and to depend on the further development of this war and the situation on the ground, to make the steady decisions on the supply of aircraft, "the Alliance head said.

He noted that this new initiative is another manifestation of the steps of Ukrainian drinking, which the Alliance Allies have taken over for several past months. In particular, it is about supplying heavy weapons to Ukraine, including LEOPARD, Abrams and Challenger tanks and other equipment. Over the past week, the United Kingdom has put modern winged rockets of the Great Radius action to Ukraine, which already bring important changes in the battlefield.

All this, according to Jens Stoltenberg, is a manifestation of long -term obligations. The Allies consider it necessary to provide Ukraine with such militaryity that its armed forces are capable of restraining any further aggression.

"We must ensure that the story does not happen again and deprive Presidentaputin's opportunities to fraud with European security. In this context, the Armed Forces of Ukraine, including their air forces, is a very important part of these efforts. Therefore, the 4th generation of NATO aircraft can be part of them. So it will happen, it is difficult to say- after the war, or even during the time, depending on its course- but it will be useful in any case, "the Secretary General said .

The Government Republic approved on Wednesday the purchase of 246 tracked caterpillars of CV90 worth 59.7 billion kroons(over 2.5 billion euros).

Про це на пресконференції після засідання уряду повідомили його очільник Петрфіала та міністерка оборони Яна Чернохова, передає Укрінформ.

«Ми сьогодні ухвалили закупівлю 246 гусеничних бойових машин піхоти CV90 за 59,7 мільярда крон», - поінформував Фіала, додавши, що до проекту виробництва будуть залучені значною мірою чеські фірми.

Прем'єр зауважив, що за сучасних умов модернізація армії є пріоритетом, арешення щодо БМП назвав дуже важливим для майбутнього країни.

«Перший БМП може прибути у 2026 році, до 2030 року всі машини повинні бути укомплектовані», — сказала Чернохова.

Чехія закупить машини у компанії BAE Systems Hägglunds AB, Швеція. Довиробництва, за умовами угоди, будуть залучені близько трьох десятків чеських компаній. Частка чеських компаній у виробництві має сягати не менше 40% вартості замовлення, але, за словами Фіали, це буде навіть більше. Чорнохова додала, що ця співпраця відкриває подальші можливості для чеських компаній.

Відповідні контракти зі шведською стороною вже підписані.

Переговори почалися ще 9 років тому, від початку планувалися закупити 210 машин за 51,7 мільярда крон, однак через постійне здорожчання техніки Міноборони вирішило скористатися пропозицією закупити додатково 36 машин з певною знижкою.

Germany was a shelter of more than a million refugees of war from Ukraine, and record amounts were given in support of them.

This was stated by German Chancellor Olaf Scholz at the General Assembly of German Association of Cities on Wednesday, Ukrinform correspondent reports.

"Everyone who participates, who has joined, deserves our greatest respect and support," Scholz said. Only this year, the Federal Government, according

to the head, allocated more than 15 billion euros to federal lands and municipalities on questions related to refugees, which is much more than in 2015, 2016, when the "waves" of refugees were recorded.

However, the chancellor noted, all issues with migration and refugees do not have to be raised. He emphasized the need to streamline migration, in particular, the digitalization of immigration bodies in federal lands municipalities, as well as ensuring the deportation(<https://www.ukrinform.ua/tag-nimeccina>).

"Anyone who is not entitled to stay here must leave Germany," the politician emphasized.

At the same time, legal migrants in Germany are welcome, because the country needs working -class.

"We are a developing country and we want more innovations, more renewable energy and more infrastructure," Solz said. To achieve these goals, he noted, immigration of skilled workers is required.

"With the law on qualified immigration, we create one of the most progressive norms in the world and attract talented, motivated and qualified women of icholovik," the Federal Chancellor is convinced.

The first Zam-Ukrainian F-16 will become one of the strongest signals from the world that Russia will only lose its aggression-it will be weaker, it will become even more isolated.

He emphasized this in the evening President Volodymyr Zelenskyy, reports Ukrinform.

*Viso:*

**I wish health, dear Ukrainians!**

Today, the first meeting meeting after all important visits, a meeting of decisions - defensive decisions, which we worked for a long time and we have them in cooperation with partners.

First of all, it concerns the aviation coalition - coalitions of modern fighters for Ukraine.

We do our best to reduce the time to the result, before the appearance of Ukrainian pilots in the Ukrainian non -Ukrainian and powerful planes.

It is clear that this global step will enhance our defensiveness. For only with powerful The air defense system becomes complete.

On the other hand, the first Ukrainian F-16 will become one of the strongest signals from the world that Russia will only lose its aggression because of its aggression-it will become even more isolated.

It will be a signal that Russian terror has lost, and our world, which is based on the substitute for independent nations and to the right of peoples to choose their own way, has stood.

We will prepare all the necessary base so that such aircraft transition happens measuresly quickly and efficiently.

Our warriors have already proven that they can capture modern weapons as effective as they did not even expect us. With planes, I'm sure it will be as successful.

The main thing is the speed of training and supply, that is, the time that will pass by the interruptions and the real protection of our sky.

Today, as always, he heard the reports of the commander, the head of the GUR, the head of the GUR about the current situation at the front, our counteraction to the occupier and the quietness that Russia is about to use against us.

We know what to answer. In particular, this applies to the rocket threat and the constant terror Droam-Kamikadze.

Now Russia is increasingly resorting to the so -called combined blows - different types of rockets, different types of drones.

I thank our air forces, all our defenders of the sky, our intelligence - but that our protection is being improved faster than Russia has time to change its

tactics of terror. And we are constantly looking for tools to make the amount of Iranian drone.

But today, given that such strokes continue constantly, he wanted to blink directly to the Iran people. To all - to society, Doiran ulma, to every Iranian family, to those people who are able to bring to government decisions in Iran. A simple question: why do you have been the participants of Russian terror? Why are you on the side of the state?

The world sees what is happening and you see all in Iran. Support is denying the support.

Although we have learned to knock down most of your Kamikadze drones, which you are transmitting, but there is still a hit.

When the Iranian drone kills a pregnant Ukrainian girl with her husband at home, why is it for you, mothers and parents in Iran? When your "shahad" is a hostel with our students, people die, a fire begins, rescuers are harvested on the location, and in a few minutes the second "Shahped" beats, taking away the life of those who saved the lives Hands of Russia, but yours, your weapon.

What do you get from this, people in Tehran, or in Shiraz, or Saccoon, or any other city of your country?

Unfortunately, even greater isolation from the world, even greater problems.

For Russia, target is absolutely everything. Housing, schools, hospitals, prayer houses, churches, power plants, markets, even the issuance of humanitarian aid tape stops ... There are already thousands of such examples. Iran people! Russia beats everything without disassembling. Artillery and mortars, rockets and drones are what they are and what they give on your behalf.

I am sure you have to be on the other side of history - not with evil.

Russia began this war for enslavement. It is the war of the colonizer of the dispossessed nation. Russia even steals people - our children! Thousands and thousands ... Only absolute evil can steal children of another people. And, going against Ukrainians, Russian invaders destroy all other national communities that will live on the land of Ukraine for centuries. Therefore, confirmation is burned by the Russians of the village of Greek-Christians and the systemic repression of Russia against the Crimean Tatar people-our Ukrainian Muslim community.

Iran's people could live quite differently if you were not put on one side with a break like Russian aggression.

Your "chess", which terrorizes Ukraine every night, means only that people are pushing even deeper and deeper on the dark side of history.

Glory to all who protect their lives! Let's be strong - we will live!

***Glory to Ukraine!***

Artifacts taken out of the Khersonstaurian National Reserve to the Russian Federation

\*\* From the temporarily occupied Crimean peninsula, Russian invaders export valuable museum exhibits to the Russian Federation. In particular, the propaganda media of the invaders spread information about the export from

the National Reserve "Chersonese Tavriysky", located in Sevastopol, artifactantian period, which were brought to the Gold of Byzantium Golden.

**The archeologist, an employee of the Institutearchyology of the National Academy of Sciences of Ukraine and an expert of the Crimean Platform Network Evelyn Kravchenko, told about what is happening in the museums of Crimea and in other temporarily occupied territories of Ukraine. Since the occupation of the Crimean Peninsulas Federation, it is closely monitored by the cultural heritage of the monuments in Crimea.**

**- Mrs. Evelyno, who and under what pretext exports exhibits from Ukrainian museums from Crimea to Russia?**

For example, they suggested that collections from the temporarily occupied Kamyanka-Dniprovska in Zaporizhzhia region. It is unknown at this time what they planned to take out, but the Russians were chaste and sought there.

Then they visited the occupied part of the Kherson region, where they also sought out that it could be taken to Russia everywhere, but almost everything was completely looted there, nothing left. And now this group reached the Crimea again and proposed to remove unique exhibits from Chersonese.

It's an export, it's not an exhibition. Everyone is well aware that the exhibition project is to be anxious for exporting things to Russia with the sight to leave them there forever.

The Coordination Staff on the management of prisoners of war took place with the families of the TRI team, during which they decided how to search for missing missing.

About it [reports](#) Coordination headquarters.

The headquarters conducts a survey of released from captivity, collecting information about those who still remained in the captivity of the enemy.

Through the Office of the Commissioner of the Verkhovna Rada, the right to the Russian side, requests are sent for confirmation and search of captivity of our missing.

"Lists to the Russian Ombudsman are submitted every two weeks, but this initiative remains unanswered by the Russian side," said the representative of the office.

Confirmation of captivity is the main search tool, which is provided by the Russian Federation through the international committee of the Red Cross.

"We visit prisoners in the places of detention, which we have access, unfortunately. This is not an official confirmation, but we report about visiting - this is important for them. We do not disclose the place of detention of the safety of the prisoner and his family. The party that holds the prisoners must inform the other side of the armed conflict, "the ICCH said.

The headquarters noted that if a person is accounted for in the National Information Bureau, it is involved in exchanges.

"All information from relatives is accounted for. Even if you send us photographers in Balaklava and say that this is your native, we will fix it: loved ones weigh that they are their defender. We also account for information from other structures, "the staff emphasized.

During the meeting, it was reported that a certain number of confirmations of captivity of defenders from the 113rd brigade from the Russian side were received through the ICRC.

During nine occupation in the Donbass and the Crimean Peninsula, Ukrainian identity is destroyed. The creation of an information and educational ghetto

occurs - in the occupied territories of Kherson, Kharkiv, Donetsk, Lugansk and Zaporizhzhya regions.

Currently, the educational space of the occupied Crimea is also undergoing an aggressor. The object of encroachment of Russian propagandists of the Russian Federation was even the least at the age of 5 years, that is, preschoolers.

- For all these children, a whole system of destruction of Ukrainian identity has been created, which intends to turn these children into Russians. Almost all the concepts, which have been introduced since 2014 and intensified since 2022 by the adoption of the law, propatriotic education in the Crimea, aimed at preschoolers, students, students and pupils of boarding schools, - said the expert.- Today there is only one school, near the city of Feodosia, where they currently study up to 9th grade 182 children and another 15 children study in their mother tongue. That is, in total in occupied Crimea, only 197 children are learning a generic language(of 230 thousand), - Valentina Potapova emphasized.

According to the expert, for nine years in the Crimea it is completely prohibited the history of Ukraine: neither in the educational process nor in libraries, nor in Ukrainian cultural centers of access to the history of Ukraine. In the textbook of world history, which is introduced by Russia, Ukraine does not exist, the textbooks on the history of Russia Ukraine have no subjectivity, but presented as part of the Russian Empire. Therefore, children on the peninsula do not understand that the state as Ukraine is such a people as Ukrainians.

Among the tools of propaganda of the racists - special "ideological lessons" - "Exploring about the important", "lessons of courage", which are conducted every Monday are urgent for distortion of history, splashing facts, justification of war. handling weapons.

At the same time, there is a demographic engineering by the occupier country. Ukrainian citizens with an active position are Crimean, but instead encourages the crossing of Russian citizens from the Russian Federation, in particular through the introduction of special programs "Zemsky Teacher" and "Zemsky Doctor". Discriminatory for ethnic Ukrainians and Crimean Tatars is forced to conceal the national identity.

For nine years of occupation, Ukraine has lost a whole generation of Crimean children, but today a strategic vision of demilitarization of the system of education and the return of the Ukrainian components to educational processes is needed in order to return the Ukrainian consciousness to children and young Crimea.

-The operation of "Freedom of Russia" and the Russian Volunteer Corps has a dualMeta: military and information-psychological. There are several serious strategic conclusions. Secondly, the taboo is removed, which can be carried out fighting

The three -year -old Belgian shepherd of Malina named Sirius and a two -year -old German blackberg named Besi - not new to the sapper business. Before proceeding to the tasks, four -legged assistants pass a cinema school at the center of mine activity, and then start work.

About it [reports](#) DSST.

The headquarters of the engineering-sapper battalion Andriy Bogatirenko tells that the personalities help where it is not always possible for a person to find an explosive survey, in particular in hard-to-reach places and under rubble. When the dog is suspicious, it gives a sign: either lies down or sits. Each cynologist knows in detail the habits of his ward. The place of finding is denoted, the adal is on the right.

The working day in Sirius and the Besi is shortened, because the dog is not a robot and it is necessary to take a break from loads. In the hot season,

breaks for recreation are larger. The miners use its smell when searching - and this is a large load on its nervous system. Rest, and then again work.

To protect dogs, as well as people are worn by bulletproof vests and protective oceans to avoid injury. And after a busy day, says Andriy bogatirenko, their wards take water treatments as a kind of relax. Thanks to the painstaking work of cinema calculations, the area of purified Ukrainian land is gradually increasing.

**I wish health, dear Ukrainians!**

Today, the first meeting meeting after all important visits, a meeting of decisions - defensive decisions, which we worked for a long time and we have them in cooperation with partners.

First of all, it concerns the aviation coalition - coalitions of modern fighters for Ukraine.

We do our best to reduce the time to the result, before the appearance of Ukrainian pilots in the Ukrainian non -Ukrainian and powerful planes.

It is clear that this global step will enhance our defensiveness. Because with powerful aircraft, the air defense system becomes full.

On the other hand, the first Ukrainian F-16 will become one of the strongest signals from the world that, due to its aggression, Russia will only lose it-it will become even more isolated.

It will be a signal that Russian terror has lost, and our world, which is based on the substitute for independent nations and to the right of peoples to choose their own way, has stood.

We will prepare all the necessary base so that such aircraft transition happens measuresly quickly and efficiently.

Our warriors have already proven that they can capture modern weapons as effective as they did not even expect us. With planes, I'm sure it will be as successful.

The main thing is the speed of training and supply, that is, the time that will pass by the interruptions and the real protection of our sky.

Today, as always, he heard the reports of the commander, the head of the GUR, the head of the GUR about the current situation at the front, our counteraction to the occupier and the quietness that Russia is about to use against us.

We know what to answer. In particular, this applies to the rocket threat and the constant terror Droad-Kamikadze.

Now Russia is increasingly resorting to the so -called combined blows - different types of rockets, different types of drones.

I thank our air forces, all our defenders of the sky, our intelligence - but that our protection is being improved faster than Russia has time to change its tactics of terror.

If we take, for example, only one tool of Russian terror - Iranian "Shahda", today in the account of our soldiers almost 900 of these whipped drones. In general, about 1160 "Shahmed" was used against Ukraine. Most - we get.

And we are constantly looking for tools to make the amount of Iranian drone. The world sees what is happening and you see all in Iran. Support is denying the support.

Although we have learned to knock down most of your Kamikadze drones, which you are transmitting, but there is still a hit.

When the Iranian drone kills a pregnant Ukrainian girl with her husband at home, why is it for you, mothers and parents in Iran? When your "shahad" is a hostel with our students, people die, a fire begins, rescuers are harvested on the location, and in a few minutes the second "Shahped" beats, taking away the life of those who saved the lives Hands of Russia, but yours, your weapon.

What do you get from this, people in Tehran, or in Shiraz, or Saccoon, or any other city of your country?

Unfortunately, even greater isolation from the world, even greater problems.

For Russia, target is absolutely everything. Housing, schools, hospitals, prayer houses, churches, power plants, markets, even the issuance of humanitarian aid tape stops ... There are already thousands of such examples. Iran people! Russia beats everything without disassembling. Artillery and mortars, rockets and drones - what they are, and what they give on your behalf.

I am sure you have to be on the other side of history - not with evil.

Russia began this war for enslavement. It is the war of the colonizer of the dispossessed nation. Russia even steals people - our children! Thousands and thousands ... Only absolute evil can steal children of another people. And, going against Ukrainians, Russian invaders destroy all other national communities that will live on the land of Ukraine for centuries. Therefore, the confirmation is burned by the Russians of the village of Greek-Christians and the systemic repression of Russia against the Crimean Tatar people-our Ukrainian Muslim community.

Iran's people could live quite differently if you were not put on one side with a break like Russian aggression.

Your "chess", which terrorizes Ukraine every night, means only that people are pushing even deeper and deeper on the dark side of history.

Glory to all who protect their lives!

Thank you all in the world who helps to strengthen our air defense, our aviation and the rescue people from Russian terror!

Let's be strong - we will live!

**Glory to Ukraine!**

About this Deputy Minister of Defense of Ukraine Anna Malyar [wrote](#) in telegrams.

More than a year of full -scale war.

The enormous path of vaccination against Russian info. We learned to cut and feel even between the lines of their insidiousness.

It seemed that this rule already subconsciously works for everyone - we believe in official sources.

We do not believe the impersonal sources of information - when there is neither a name nor a name of the Institution, nor other identifying features. When you just don't know who was the census.

But the larger the beacon, the more they believe.

The Russians write in telegrams that have happened to our Glavcom.

And what? Well, let them write.

We have denied it - repeatedly. He does his job. And it does not bypass fakes, as well as other commander of which enemies write inventions.

We do not substitute doubles.

The Russians just test their IPSO.

It is a certain cycle of mass and non -mass production. It is the protection of other countries, the bovens give us their strategic stocks. But not everyone is ready to make a cellar and in fact, there are many different moments. Actually, at all levels, we make sure that we need this - the note of the Minister of Defense of Ukraine during the Telephorphone "[Edinovina](#)".

In this list, key positions are a long -range weapon, the protection of the sky and combat. That is why today all Western partners are well aware that we need. Secondly, according to the dynamics of the war, they already understand all this in detail.

It is a factor that influences Russian society, by the way. We made our research in order to understand how to develop information and Russian society. And we, our experts, reach that the only thing they are afraid of there is real to die in Ukraine, it is not possible to hide it.

Their authorities hid in every possible way that they were dying here and even in such a quantity, but now it is no longer possible to hide. And indeed,

This was stated in the Ether "[Uniform](#) »Deputy Minister of Defense of Ukraine Anna Malyar.

In Bakhmat itself, our troops have active assault actions, but in the Podomstizarase - it is really the first advancement, and in the last few days it is a specialized square kilometers that we have returned and do not lose, gradually overpowered.

In the very place, the enemy concentrated a huge number of troops, people of and arms-now they again brought there landing and assault detachments, so tamcitation is complicated. But they came here like a mousetrap.

When they lose, they simply destroy all objects, equating them in a Itly way in the land - actually squeeze our armed forces with a stand -alone artillery fire. They did so in Syria. They are their style.

It must be granted that every meter, where our defenders and defenders are in Bakhmut, they are worth ten kilometers of complexity of combat missions. And ours there is moving contrary to the fact that more power is more and in the number of troops and arms.

It speaks of two things - the courage, the indomitability of our warriors, and we all have a grammatically planned command of the Bakhmut direction - Hannamaars noted.
