Щодо складності подання заяви, представниця УВФ пояснила, що тут радше йдеться про продуктивність і ефективність запропонованого проекту: «Коли дивишся на заяви, які пройшли відбір, то розумієш, чому ти не пройшов. Доприкладу, якщо бізнесмен хоче персональну автівку, щоб їздити по клієнтах, то напевно така заявка не пройде. А якщо він потребує агродрон для обробки продукції, то така заявка буде прийнята. Анкета, яку слід заповнити, настільки килогічна і деталізована, що поки відповідаєш, вже розумієш, наскільки ти готовий до участі у програмі. В процесі її подання починаєш розбивати свій план на етапи, змінювати кошторис, тобто проходиш весь шлях роботи надпроектом. Власне процес подання заяви дозволяє кандидатам оцінити свої сили і визначитись, чи на правильному вони шляху».

China and Brazil, who have put forward the ideas of peace, should first come to Ukraine to zoom into the eyes of those who touched Russian aggression.

On this emphasizes The high representative of the European Union for Foreign Affairs and Security Policy of the Zhozep Borrel.

"Recently, some ideas about peace have been put forward by China as well as Brazil. For the hopeful, honest peaceful efforts, you also need to talk to Kiev and go your best to see aggression by their eyes, the eyes of those they bombard. I want to remedy about the terrible situation on the spot for all the people who are now calling Domir. I also call for peace. But where were these calls when Russia is pulled on the borders? We can take such a benevolent approach that states: "Oh, one is bad to stop, and the other does not want. Oh no!" It is impossible to put one level of the aggressor and aggressive, "said Josep Borrel.

Statement [published](#) Representation of the European Union to the UN in New York.

"By organizing these debates in the Radbeza, Russia tries to show itself as a defender of the UN status and multilaterality. Nothing can be far from truth. Cincinically. We all know that while Russia is destroying, we are building. While they are breaking, we protect. The UN Statute, the UN General Assembly, the International Court of Justice, the International Criminal Court - wherever you look, Russia is disrespectful, "the statement reads.

EU ambassadors repeated the demand for Russia to withdraw troops from the territory of Ukraine.

"If Russia cares for effective multilaterality, it is the first way to prove it. Compliance with the rules based on the rules - a term that Russia consciously interprets, means respect for international law and the UN Charter of Recovery of these Rules to be applied to all," - emphasized. .

The international community should remain firmly committed to the responsibility for the crimes committed in and against Ukraine.

"The Ukrainian people have paid the most expensive price, but the harmful consequences of Russian aggression are felt all over the world. In close dialogue with our partners, it was asactivated to overcome the global consequences of the Russian War. We emphasize that all efforts to support Ukraine were made in addition, and the unobstructedness of our global obligations, "the document said.

About it in [interview](#) The commander of the eastern group of troops was informed by Colonel-General Alexander.

-Indeed, Bakhmut remains the object of focusing the main efforts of Vorozhaz, among all other areas. For Russia, the East of Ukraine is the only part of the front where it has made at least some progress with the beginning of the "big offensive". The plan to win Ukraine in three days has transformed into nine -month attempts by a small city. After a series of defeats in the north and south of the Ukrainian -ownership, it is necessary to demonstrate at least the slightest success in the occupation of Donbass. Without mastering it, the invaders will not be able to develop the offensive in the direction of Kramatorsk and Siverskaya. Therefore, Russian propaganda provides battles for Bakhmut as a "battle for Stalingrad". They love such parallels. And in order to reach its goals, Russia will not regret human or material resources,- said Colonel-General Alexander Sirsky.

About it reported Commander of the Joint Forces of the Armed Forces of Ukraine Lieutenant General Sergey Naev, talking about the morale and motivation of our soldiers.

According to him, military personnel are convinced that the constant development and transmission of experience is a new reality and critical need for today.

"There are fewer mistakes - more saved lives, and to not allow them, they train hard," - said Sergei Naev.

The commander said that additional stress loads help to work with the fighters stability on the battlefield. Military skills are strengthened by pain and daily wins. In daily training increases the strength of the spirit, the will of the will and the character becomes hardened. There are no printing tasks. There is a goal to be achieved with the least moral and physical loss. It is the result of long -term training, during which knowledge, skills and skills are reflected.

"But first of all, undoubtedly, it is necessary to live Ukraine, to work for Ukraine and to be with Ukraine in the heart. And all who defend Ukraine today are just that way. Also, the head of the united Press Center of Defense Forces of Tavriyskaya direction was that yesterday the enemy changed his tactics. So, trying to show the advantage in the air, the enemy increased the number of aviation strikes, and moving to the tactics of group air strikes. That is, two aircraft released Ukrainian air defense, and the third struck.

Due to the improvement of weather conditions, the enemy doubled the number of use of unmanned aerial vehicles yesterday. First of all, the vows are said.

-Also yesterday there was a change in the use of the enemy Dronov-Kamikadze,-continues Alexei Dmitrashkivsky. - Yesterday afternoon, they first considered the Shahledi, which were well knocked down, but after the "Shahmed" appeared "lancets". This was also the purpose of identifying our points of antipyretic defense.

Yes, he noted that in the recent information about the arrival in the area of Avdiivka of the new tanking unit of the occupying army, it has not shown itself at all, and for the attacks of our positions the enemy uses the fourth day in a row exclusively infantry. Currently, China's political influence is possible to restore the power of the principles of and the rights on which peace should be kept.

Volodymyr Zelenskyy said this in , reports Ukrinform.

Viso:

I wish health, dear Ukrainians!

First of all, I want to thank our whole team, which deals with the exchange.

It was possible to return home to Ukraine 44 people from Russian captivity. Most are the military. From different directions. Among them are the defenders of Azovstal and Mariupol, other cities of Donetsk region, Kherson, Kharkiv region ... Most are ordinary and sergeants. There are officers. Two are civil.

And it is important that the team works for all those in captivity ... Even if it is difficult, such as some categories of prisoners, and these are not just a military, who are difficult to return, but also, for example, civilians are one of those categories, one of those categories, which is difficult.

We remember everyone. And even if there is no precise information about what happened to, where it can be, such a person is still searched and checked as much as possible. Ukraine has to recover all its.

I thank all of you, the guys who coordinate this work: Budanov, Yermak, Lubin, Usov, Kid, Klimenko ... Thank you to everyone who helps in Gur I Mo, the Voshei, and in the SBU, and in our other structures.

Of course, I thank all our soldiers on the forefront, who collects replenishment for the exchange fund. Every Russian prisoner is an opportunity to exchange our man.

In total, 2279 Ukrainians and Ukrainian women were returned from the Russian captivity during the full -scale war.

He spoke with the leader of China today. It was a long and rather rational conversation. Such conversations are usually said that they open up. It is very important that China has the same view of the freedom of navigation of itworks. I informed Mr. Xi Jinping about our efforts to restore the Mountain exports of food. And I heard the words of support of our native grain initiative, its extension, as well as to support our humanitarian efforts, in particular the Grain Program from Ukraine.

Of course, a essential part of the conversation is our views on how a ricious peace can be restored. I presented the Ukrainian formula of peace, its specific points. We agreed to continue our communications.

Today, however, he participated in the conference in Rome, which is dedicated to the reconstruction of our state. It is such a special format of communication of government officials and representatives of the industrial and business of our countries, Ukraine and Italy. In order to be uniformly involved in Ukraine, those who embody the economic power of thecal.

I thank Ms. Prime Minister George Meloni for this conference for her words for Ukraine's constant support. It is important that we are already planning our cooperation on the 24th year. In particular, this applies to the future Italian presidency of the UG7, as well as the preparation of the Grand Donor Conference on Recovery.

Spent a separate telephone conversation with George. The key theme was already a defense work, the support of our soldiers. Thank you, Italy!

These days we also carry out special work with partners on the coordination of defense quotes and supply. It is very important for Ukraine that anyone who, together with us, is to protect freedom, clearly understood the prospect of our power, we can. The better we understand each other, the easier it is to work in a common victory. For obvious reasons, the details of such communication do not provide publicly.

One more.

He spoke today with the Director of the Grossi. The Chernobyl catastrophe anniversary is the day that everyone is in the world to remind you. And especially when the threat of a radiation disaster in the Zaporizhzhya nuclear stage has been stored every day and every year.

Only full control of Ukraine over the ZPP can also restore full security, and only our country, but all over Europe, all over the world.

Radiation does not recognize state borders in the same way as the Russian Federation. Or more complete compliance with the rules can guarantee safety.

I would like to thank Mr. Grossy on his initiative - a very important social organization - such a special program of medical support for the staff of all nuclear power plants. Thank you for the support of our people! **Glory to all Ukrainian soldiers who are now in battle, at combat posts and assignments!**

Glory to Ukraine!

Currently, China's political influence is possible to restore the power of the principles of and the rights on which peace should be kept.

Volodymyr Zelenskyy said this in , reports Ukrinform.

Viso:

I wish health, dear Ukrainians!

First of all, I want to thank our whole team, which deals with the exchange.

It was possible to return home to Ukraine 44 people from Russian captivity. Most are the military. From different directions. Among them are the defenders of Azovstal and Mariupol, other cities of Donetsk region, Kherson, Kharkiv region ... Most are ordinary and sergeants. There are officers. Two are civil.

And it is important that the team works for all those in captivity ... Even if it is difficult, such as some categories of prisoners, and these are not just a military, who are difficult to return, but also, for example, civilians are one of those categories, one of those categories, which is difficult.

We remember everyone. And even if there is no precise information about what happened to, where it can be, such a person is still searched and checked as much as possible. Ukraine has to recover all its.

I thank all of you, the guys who coordinate this work: Budanov, Yermak, Lubin, Usov, Kid, Klimenko ... Thank you to everyone who helps in Gur I Mo, the Voshei, and in the SBU, and in our other structures.

Of course, I thank all our soldiers on the forefront, who collects replenishment for the exchange fund. Every Russian prisoner is an opportunity to exchange our man.

In total, 2279 Ukrainians and Ukrainian women were returned from the Russian captivity during the full -scale war.

He spoke with the leader of China today. It was a long and rather rational conversation. Such conversations are usually said that they open up. It is very important that China has the same view of the freedom of navigation of itworks. I informed Mr. Xi Jinping about our efforts to restore the Mountain exports of food. And I heard the words of support of our native grain initiative, its extension, as well as to support our humanitarian efforts, in particular the Grain Program from Ukraine.

Of course, a essential part of the conversation is our views on how a ricious peace can be restored. I presented the Ukrainian formula of peace, its specific points. We agreed to continue our communications.

Today, however, he participated in the conference in Rome, which is dedicated to the reconstruction of our state. It is such a special format of communication of government officials and representatives of the industrial and business of our countries, Ukraine and Italy. In order to be uniformly involved in Ukraine, those who embody the economic power of thecal.

I thank Ms. Prime Minister George Meloni for this conference for her words for Ukraine's constant support. It is important that we are already planning our cooperation on the 24th year. In particular, this applies to the future Italian presidency of the UG7, as well as the preparation of the Grand Donor Conference on Recovery.

Spent a separate telephone conversation with George. The key theme was already a defense work, the support of our soldiers. Thank you, Italy!

These days we also carry out special work with partners on the coordination of defense quotes and supply. It is very important for Ukraine that anyone who, together with us, is to protect freedom, clearly understood the prospect of our power, we can. The better we understand each other, the easier it is to work in a common victory. For obvious reasons, the details of such communication do not provide publicly.

One more.

He spoke today with the Director of the Grossi. The Chernobyl catastrophe anniversary is the day that everyone is in the world to remind you. And especially when the threat of a radiation disaster in the Zaporizhzhya nuclear stage has been stored every day and every year.

Only full control of Ukraine over the ZPP can also restore full security, and only our country, but all over Europe, all over the world.

Radiation does not recognize state borders in the same way as the Russian Federation. Or more complete compliance with the rules can guarantee safety.

I would like to thank Mr. Grossy on his initiative - a very important social organization - such a special program of medical support for the staff of all nuclear power plants. Thank you for the support of our people! **Glory to all Ukrainian soldiers who are now in battle, at combat posts and assignments!**

Glory to Ukraine!

The Coordination Headquarters met with the families of the military personnel of the Marine Infantry Brigade named after Mikhail Bilynsky. The collection of

information about prisoners was harvested. All photos and videos that are published by analysts are used. They are verified. The enemy deliberately manipulates that people who return from captivity transmitted the data.

About it [reports](#) Coordinating headquarters for the issue of prisoners of war.

The staff representative stressed that only some of our captives were confirmed by the Russian side, but Ukraine is working to return everyone: both those who are considered missing and those whom the Russian Federation did not confirm, but the consciousness of captivity. And it often succeeds.

The relatives are worried about whether their defenders and defenders are submitting to exchange. A lot of hundreds of the submitted can only agree to exchange a few. The final decision to whom will be changed is made by the party that holds the prisoners. Ukrainian sales funds to return everyone - regardless of the unit or place of detention.

"The enemy spreads a lot of false data on social networks to then say that Ukraine does nothing to return its people. But if it was true, exchanges would happen after the fighting was completed, as during the previous wars. And we have already managed to return more than two thousand prisoners, "the headquarters representative said.

The Security Service has assembled a evidence base on the owner and the editor-in-chief of the Political Student Internet edition of "Political Studies" Sergei Stepanov, which is being hidden in the temporarily occupied Crimea.

About it [reports](#) Security Service of Ukraine.

SBU investigators reported the person being suspected of two articles of the Criminal Code of Ukraine:

- Part 1 of Art. 110(encroachment on territorial integrity and integrity of Ukraine);
- Part 1 v. 111(high treason).

За матеріалами слідства, перебуваючи на території українського півострова, у квітні 2014 року він створив пропагандистське інтернет-видання на користь країни-агресора.

Власний медійний ресурс Степанов використовував для поширення кремлівських нараторів та дискредитації України на міжнародній арені.

До злочинної діяльності він залучив своїх «однодумців», які потім займалися підготовкою антиукраїнських матеріалів

Для маскування злочинної діяльності псевдожурналісти діяли як позаштатні кореспонденти під вигаданими іменами і позиціонували себе «експертами».

У своїх публікаціях вони виправдовували російську збройну агресію і захоплення частини території на сході та півдні України.

Перед написанням пропагандистських текстів «автори» отримували від Степанова покрокові «інструкції» щодо підготовки матеріалів.

За поширення деструктивного контенту вони отримували від окупантів «гонорари». Гроші їм надходили через російські електронні платіжні системи.

У квітні та липні минулого року співробітники Служби безпеки затримали двох фейкових «експертів» у Києві та Вінниці. Зараз вони перебувають під вартою.

Ініційована СБУ судово-лінгвістична експертиза підтвердила факти інформаційно-підривної діяльності Степанова та його спільників.

Наразі тривають заходи щодо його притягнення до відповідальності за злочини проти державної безпеки України. Матеріали передано в суд.

Зловмиснику загрожує до 15 років ув'язнення.

Розслідування проводили співробітники СБУ у Вінницькій області за процесуального керівництва обласної прокуратури.

The undisputed evidence of two more traitors was collected, who conveyed the occupants of the identity of the deployment of defense forces in the Bakhmut direction. He judged them for 15 years in prison.

As informs The SBU, both hostile farmers was detained in December last year during counter -pride -bearing measures in the frontline areas of Donetsk region.

The attackers are spouses from the city of Yar. At the same time, the man had previously already served the punishment for participation in the illegal armed formations of DNR.

Last summer, they remotely went out to the Deputy Commander -in -Chief of Sparta, who participated in combatants on the Eastern Front. In correspondence with him, traitors offered their help in the war against Ukraine.

At the instructions of the aggressor, they gathered information about the places of possible base and protrusion of defense forces in the front line. First of all, they tried to find warehouses with weapons and ammunition of Ukrainian troops. Russian agents transferred to the acquisition by the occupiers through the network of "liaison" military intelligence of the Russian Federation on the captured part of Donetsk region.

On the basis of the evidence collected, the court found both aggressor associates guilty of a domestic betrayal committed in martial law.

Clip "falling on the snow" performed by the band "Nichlav"(Frontman Andriy Podluzhny)Created under the patronage of the famous Ukrainian filmmaker Ivan Yasnia. It is important that its plot is based on the real tragic events of the Russian-Ukrainian war. The work is devoted to the memory of the fallen military personnel of the Hetman Danylo Apostle and all the dead defenders of Ukraine in the battle with the Russian Horde.

Hetman Danylo's artillery brigade has glorified herself with a roar since 2014, causing the invaders of devastating blows to predominantly dealecobic guns of large calibers.

The brigade guns have mastered all the latest artillery field and its own experience, gained during difficult years of hostilities with the aggressor. Initially, it was necessary to fight mainly by artillery systems of morally outdated Soviet models, and now in service the brigades of many more modern artillery trunks.

Former brigade commander Colonel Sergei Baranov, whose direct assistance was created by this film clip, the best of his days is in the wars when his subordinates passed his staff weapons and moved on vacation. The most part - when the unit commanders reported on human losses.

President of Ukraine Volodymyr Zelenskyy said During a speech at the final panel conference on the restoration of Ukraine in Rome:

“Ms. Prime Minister Italy!

Mr. Prime Minister of Ukraine!

Ms. Vice President of the Confederation of the Italian Industry!

Ladies and Gentlemen!Dear present!The road Italia!

Thank you for this conference and sincere interest in Ukraine. I know that the menesluks are representatives and representatives of hundreds of Italian and Ukrainian companies, and I would like to turn to you not just as those who embody the business. And as to dads and moms, to sons and daughters, as to the representatives of your communities, your cities, your country ...

There are completely different people, different families, different generations, but we are in fact one aspirations with you. We all want freedom and normal development for our children, we want safety and well-being for our parents. The desires and lightness of life for their communities and cities. And it unites us.

And this is what I suggest talking about.

About how we can give you more safety to our families together. Most weave our countries. More freedom to Ukrainian and Italian children. More guarantees of normal life for our communities and our cities.

Ladies and Gentlemen!

It is already clear when and what this war should end, which Russia has solved anti -nouns. Against all of us. Against Ukraine and all our common European home, who gave a chance for a peaceful life and prosperity to all European peoples. I have a doubt that we are able to win. Because we not only believe in our own strength, but we stand and protect our common values in unity. In unity!Whoever keeps unity and does not lose strength, he wins.

I want to thank all of Italy now, all your people and communities, your leadership and personally Ms. Prime Minister George Meloni for this unity. The unity of Europeans who know that beyond our freedom, that is, where all of us in Europe wants to reject Russia, there can be no normal and dangerous life.

We have to do - and we will do!- All that this Russian war ended in Russian. And so, this year we have to do everything to the maximum to prepare the largest economic project of our time in Europe - the project of reconstruction of Ukraine.In this war, the world saw that it was necessary for the real protection of every nation. It has been awarded how to change energy and infrastructure, production of and logistics, cyber systems and educational space, the defense industry of the army.

Therefore, there is a demand for new security standards in the world to make every country beyond any manifestations of aggression, terror or element. And we will create such security standards in Ukraine.

I will give you five examples that will show you the practical meaning of what I say.

The first is energy.

Russia has launched a real energyaging against Europe. She provoked the price crisis of impoverishment of millions of families because of the growth of accounts. She tried to produce physical supply of fuel to Europe. She beat rockets and Iranian Drones on our energy so that Ukrainians remain without electricity and heat. Europe stood. We answered this call with dignity. And we must do everything to make the enemy not the theoretical opportunity to break the nurser gun.

The "green" transformation of energy and a kind of decentralization of production is a response. The more manufacturers - "green" energy producers, is a more toxic system. The more sources of supply, the more reliably the city, every community and every family is provided.

Plus Italy is one of the leaders in creating "smart" networks(smart grids). Тому я запрошу ваші компанії разом розвивати українські мережі. І, будьласка, не забувайте, що в найближчій перспективі українські мережі будуть мережами Євросоюзу.

Друге — власне будівництво.

Українці ніколи не задуть своєї країни ворогу й ніколи не полишать своєї землі. Хоч сотні наших сіл і десятки міст спалені ударами російської артилерії та авіації, українці здатні повернути їх до життя. Не у звичці нашого народу — залишати на своїй землі рани, що не загоїлися.

Ми маємо колосальну потребу у відбудові тисяч будинків, сотень шкіл, лікарень, транспортної, виробничої інфраструктури. Причому на новій безпековій основі, яка має стати типовою для інших країн, для міст у тих країнах, де люди вхороші часи можуть і не задумуватися про безпеку. Але розуміють, що гарантії потрібні.

Щоб кожен батько був спокійним за свою дитину у школі — бо там є сховище, безпечне місце, яке гарантує захист. Щоб кожна мати знала: у її громаді, у її місті безпекова інфраструктура влаштована так, що будь-який терорист — чидерская, як Росія, чи якась терористична організація — точно програє наявній системі безпеки.

The third example is technologies.

Full -scale Russian aggression did not break Ukrainian finances, banking system, digital services that our people are used to.

We have preserved the connection in the country and all that is not to imagine modern life. Babil, we have attracted our Aviters to the cyber defense of the state and the economy. Miporoborons were constructed by the country. We continue to develop an action state service that provides access to public services through a smartphone or portal.

In addition, partners in Europe are already taking our "action" for their digital development.

Our defense industry is gaining momentum even now when the war is brushing. We are interested in the localization in Ukraine of the production of

such military equipment we receive from partners. We build new produce of our own weapons and ammunition. We create new protection tools such as floxes as a wide range of drones for our front.

I am sure that your companies have something to add to these stories of Ukrainian success.

The fourth is global markets.

The world has already understood the potential of our country's agrarian sector. Ukrainian is to guarantee global food stability. Supply from Ukraine is food on the tables of millions of families in different countries, including Africa, Asia. Pulse to Ethiopia, from Lebanon to Yemen. Without our supply to some countries, the chaos would be accumulated. And that means - there would be new waves of migration, including Uevrop.

In addition, there is no such considerable potential for green metallurgy in Ukraine in Europe. From iron ore to lithium and other maximum-needed resources - all this is Ukraine. From natural gas to the way ... We can give - and give!- All this global markets. We can largely replace the company with Russia - those who have chosen work for war, not a mentally development.

But the number one task is processing. So, these are new enterprises. So, it is new logistics and modernization of transport. So, these are new investments. Aotge, these are profits. And I am sure that your companies too.

And the fifth example - and this is far from the last of cooperation - pharmaceutical and rehabilitation.

There is a purely economic fact: Ukraine is a huge market and net import pharmaceutical goods. One thing already means that the localization of the production of in Ukraine gives an obvious benefit. To finish the war is, in particular, to quench the pain that was survived in the war, brought from the war, associated with the war. Obviously, we will work over this in Ukraine - and together with the best representatives of the world.

Ukraine sees what is the key security demand. Ukraine has a unique experience in the protection of the state and people in the face of aggression and all possible manifestations of the terror. There is no such evil that Russia would not try to do against Ukrainians, which we would not have to defend.

Our experience of protection is successful and scales on the lives of other peoples, other countries.

It is logical that our experience will become part of the new security foundation of the world. Asks you, Italy, to build a new security with us! I invite you, your investments, your experience is now coming to Ukraine.

Please in contact with our delegation at the conference with the Panpremier of Ukraine. Ukraine is ready for cooperation!

Glory to all who bring our victory closer!

Grazie Italia!

Glory to Ukraine!".

President of Ukraine Volodymyr Zelensky [said](#) during their daily video address.

"He spoke to China's leader today. It was a long and rather rational conversation. Such conversations are usually said that they open up.

It is possible to apply China's political influence to regain power by the principles of the rules on which peace should be kept. Ukraine and China, as well as the absoluteness of the world, are equally interested in the strength of the sovereignty of nations of territorial integrity ... in compliance with the main security rules, including inadmissibility of threats to nuclear weapons and the distribution of nuclear weapons. We are equally interested that the situation around the Zaporizhzhya nuclear plant is fully protected and that the nuclear power plants are not used for the sake of military purposes at all - namely cynical use of nuclear power plants, Russia is trying to make the norm.

It is very important that China has the same view of the freedom of navigation of its waters. I informed Mr. Xi Jinping about our efforts to restore the Mountain exports of food. And I heard the words of support of our Sea grain initiative, its extension, as well as to support our humanitarian efforts, in particular the Grain Program from Ukraine.

Of course, a essential part of the conversation is our views on how a peaceful peace can be restored. I presented the Ukrainian formula of peace, its specific points. We agreed to continue our communications, "the Head of State said.

Приключения, приключений хватает, но иногда хочется сидеть и ждать конца истории. И вот мы сидим в деревенской избе, где живет мастер-художник Юрий Капустин. Капустин известен не только как художник, пишущий картины, но и как писатель, поэт, певец. Он пишет стихи, пьесы для театра, музыку для фильмов, а также пьесы для детей. ЧАСТЬ IV. ВІДВІДИ

Третя частина зібрання музичних творів 1920-х років (1922-1923) складається з 500 пісень. Це збільшення відноситься, зокрема, до пісень, що виконувалися відомими артистами та піснеписцями тих років, які вже не були відомими в наступні роки. Найважливіші пісні з цієї частини зібрання, можливо, пісні про війну та військову добу, які виконувалися відомими артистами та піснеписцями тих років.

НАСТОЯЩІ

Ми, інші та я самий, відповімо, що ми не можемо розійтися.
Ми будемо дружино-рідиною, і навіть якщо ми зможемо
погано зустрітися, то поганої їх не буде, і якщо поганої буде
мило, дуже тільки, що вони зможуть зберегти мене від
важкої поганої землі. але якщо я буду відомим
рідною-материнською батькою, то я зможу зберегти мене від
важкої поганої землі.

СОВЕТСКИЙ СОЮЗ

Советский Союз был, и есть, величайшая национальная идея человечества, самая яркая форма общественного прогресса, самое высокое выражение человеческого достоинства. Но это не единственный фактор, определяющий величие Советского Союза. Важно и то, что Советский Союз был создан на основе принципов социальной справедливости, что он отстаивал интересы рабочего класса и крестьянства. Это не случайно, что именно в СССР были созданы первые социальные программы, направленные на поддержку малоимущих слоев населения, на создание условий для равного доступа к образованию, здравоохранению, жилью.
