Air Forces of the Armed Forces of Ukraine on the guard of the sky.

One of the companies of the Air Forces of the Armed Forces of Ukraine, which defends the sky of Nakivshchyna is the Swedish portable anti-aircraft missile complex RBS-70.

The RBS-70 crew consists of four "virtuosos" of their business: the commander, the assistant commander of the gunner and the two archers.

In January 2023, our military personnel were trained at the RRBS-70 simulators. The Swedish instructors were incredibly impressed when our warriors were figured out with this system in action.

The account of this Swedish complex already has whipped Russian missiles and Shahda.

The Pension Fund will automatically assign housing subsidies for non - heating periodoids for most households that received a subsidy in the previous fuel season. This is possible provided that the property of the property or family composition has not changed.

Housing subsidies will also be automatically re-assigned to internally displaced persons who receive them at the registration address.

If an internally displaced person plans to reside at a different address than the place of registration, he or she must contact the Pension Fund of Ukraine and submit the relevant application and declaration of income.

Housing subsidies will be assigned on the basis of the services received from the providers on the provision of citizens with housing and communal services, including prices, tariffs and the amount of contributions/payments for the management of the household house and utilities.

In the absence of the necessary information, the housing subsidy for such services will not be determined.

Displaced persons can request a housing subsidy (<https://portal.pfu.gov.ua/sidebar/Templates/InfoSubsidy>) or by giving up to the Fund's service center at the place of actual stay.

Most of the relatives were interested in the mechanisms and ways of forming the lists of military exchange. To which the representative of the coordination headquarters described in detail the logic of Ukrainian side and the lack of logic and moments of manipulation - the Rivne.

He stressed that communication on the return of the Ukrainian soldiers who re-entered in hostile captivity is not through one entity. Negotiations constantly!

The relatives were also interested in the fate of the military who have not received confirmation now that they were captive.

On this issue, a representative of the Human Rights Commissioner in the Sector of Security Defense Oleksandr Kononenko stressed that the office of the Ombudsman was developing with the Kiev Research Institute of Judicial Expert Ministry captivity.

The Ombudsman's office understands anyone who is waiting for his son, husband, father or brother to return from captivity and calls for their return. After all, all the representatives of the coordination headquarters on the management of prisoners of war work and do not give up on a difficult way, which involves communication with the zinc and illogical Russian side.

“It is difficult for us, but it will definitely not be ashamed of your baby! I do not blame you, at least the Russian side, ” - said the woman who believes in the return of her son.

The Ombudsman's office, for its part, makes every effort to get home.

Ursula von der Leyen The General Staff of the Armed Forces on its Facebook page [quoted](#) The President of the European Commission of Ursula von Der

Lyen: "Ukraine is on the forefront of all that Europeans value: our freedom, our democracy, our vocabulary of thought and words. Ukraine courageously fights for the ideals of Europe that we celebrate today. In Russia, Putin and his regime destroyed these values. And now they are destroyed here in Ukraine. Because they are afraid of the success you put out and the example you show. And they are afraid of your path of the Doevozouz. "

Ursula von Der Lyen noted that "in this struggle, the European Union and its Member States stand side by side with Ukraine... The first task is to help providing the necessary ammunition to Ukraine. You know that we work in three directions. The fastest way is the immediate release of ammunition from the member states. We have allocated 1 billion euros, and that works. Significant ammunition was delivered or headed to Ukraine. Thus, the second-hand, which we agreed last week, provides 1 billion euros of the European Peace Fund for purchase by member states of ammunition 155 and 152 millimeters. To accelerate this work, the third track helps member states to increase production, increase production and accelerate ammunition for meeting the needs of Ukraine and Member States. "

Only the President of Russian Putin knows the direction of the war against Ukraine, writes American journalist Thomas Friedman.

His column under the heading "Vladimir Putin is the most dangerous fool of the Education" was published in the newspaper , reports Ukrinform.

"Since the beginning of this war, there was only one place where it is possible to understand her course of dissent - in the head of Vladimir Putin.

Unfortunately, Putin does not issue a cart to his mash, "Columnist said.

Read also:

In his opinion, the Russian head began the war "almost without the participation of his capital or military command, and, of course, without mass calls from the side of the Russian people."

Putin has never had a plan B, as he thought he would capture Kyiv and continue to threaten all of Europe, Friedman says.

" He put himself in a situation, he cannot win, cannot lose and cannot stop, - the journalist said. - He can no longer capture control of all of Ukraine.

Alevodes cannot afford to be defeated after spending only Russian lives and money. Therefore, he cannot stop. "

Read also:

So Putin resorted to the shelling of Ukrainian cities and civilian infrastructure - the war for exhaustion, hoping that "he will be able to somehow deduce sufficient from Ukrainians and deplete Western allies of Kiev so much that they will give him a large enough piece of Russian -speaking Eastern Ukraine. Victory. "

Putin B plan is to mask what plan A has failed, the NYT Columnist concludes.

"If this military operation had an honest name, it would be called the surgery of" preserved face, "he said.

Read also:

The author notes that because of the fear of his own people, Putin "grabs for any reason to justify the war he began through his personal fantasy that Ukraine is not a real country, but only part of Russia."

In particular, he is scared that after the war he will be remembered by the number of victims of the Russian Federation.

Read also:

Putin also knows that the victorious leaders will not resign peacefully and will be more important to develop a plan B to justify horrible losses, adding a journalist.

The completion of Russian aggression against Ukraine is one of the key tasks for the next 18 months.

This was announced today in Brussels during a discussion under the European Chief and Defense Summit and Defense Summit, the EU High Representative Josep Borrel, Ukrinform reports.

“Putin can't win this war. This is our most powerful obligation - my personal, the entire European Union and the free world. Putin cannot win a war, and

the world must understand what is happening in Ukraine. This is another, diplomatic battle, which is no less important than the battle on the battlefield. Therefore, many leaders in the world are in a state of strategic "oscillation". I do not have them "yes, but ...". There is no "but". There is an invasion. When however, theraine invaded another, for no reason, without any excuse. Hundreds of people will be attenuated, hundreds of people. There are no "but" around this, "Josepborrell said.

Read also: [**Borrel**](#) He noted that the so -called "collective event" today belongs to all -states that support Ukraine. This name has ceased to be geographical determination, from now on it is a political position. At the same time it is necessary to avoid the new parcel between the West and the rest of the world - such a division would be very convenient for the Russia. Most countries of the world - 141 states - voted in the UN of Antrosic aggression. They do not support this aggressive war now. But the Evstrains that, according to Borrel, are not determined enough in its condemnation.

"I often hear from them - we want peace. Yes, I also want peace. And there are no people who would like peace more than Ukrainians who are bombing every day. I am a saw -in -law hospital in Spain, where many Ukrainian servicemen are treated after injuries and amputations. It is clear that the Ukrainians want a meir. But don't tell me - I want peace. Say how to achieve it, and what kind of peace should be achieved.... If the event stops supporting Ukraine, the war will end. But it will end with Ukraine, "the EU high representative said. **Read also:** [**Borrel**](#) "I am told - stop supporting Ukraine, then the talk will begin peace. But if we stop helping, Russia will continue to squeeze to win the war, this war to occupy Kiev to turn Ukraine into a second Belarus. We will have Russian troops on the Polish border, the danger will increase dramatically, but Ukraine will no longer exist as a peaceful and independent state. This can happen, "Josepborrel emphasized.

He stressed that the completion of Russian aggression against Ukraine is one of its tasks for the next 18 months. At the same time, Ukraine has to win, and Putin Russia is defeated.

Asked by the presenter on Putin's statements about the "existential" nature of the threats faced by Russia in this war, the high representative of the Ese was confirmed such a statement.

Read also: [**Borrel**](#) "This is an existential threat to him, to Vladimir Putin, but not for Russia. We have nothing against the Russian people, who also suffers from this mad idea, to invade Ukraine. It is excluding the responsibility of a

person called Vladimir Putin. But not my business is to release how political processes will develop in Russia. My business is to support Ukraine, "Josep Borrel added.

As it was reported, since the beginning of Russian military aggression in February 2022 the European Union and its Member States began to provide Ukraine with significant political, economic, financial, humanitarian and military assistance. EU officials and member states at all levels have repeatedly stated that it would be necessary to support Ukraine in its defense against Russian aggression so much as it would be necessary.

Defense heads of the Union countries who held a meeting with the NATO format committee today identified the strategic directions for the development of the Alliance and confirmed the adamant support of Ukraine in its struggle for Russian aggression.

As [reports](#) Ukrinform, Admiral Rob Bauer, said the NATO headquarters today at a press conference at the NATO Headquarters.

NATO Military Committee is the highest body of the Alliance's military administration, which determines the needs of defense and development of the Armed Forces to ensure the collective defense of the Allies, to enforce political decisions in the country's leaders.

"The war that Russia has expected to complete in three days entered the fifteenth months. The growing determination and courage of the Ukrainian troops and the Ukrainian Narode continue to impress us. Today we have devoted a special session of the military situation in Ukraine and around it. The Ukrainian military representative provided detailed information on the situation on the ground, and outlined Ukraine to continue the struggle for what belongs to it by right, "Admiral Bauer said.

"The heads of the South Defense have confirmed their unchanged support - there is no doubt that NATO will support Ukraine for as long as it is a budget," the head of the NATO Military Committee added.

He warned against false mistakes in evaluating Russia's behavior: it will not stop Ukraine, since its ambition goes far beyond the Russian borders. This is a manifestation in Abkhazia and North Ossetia, Transnistria and more. Once after all, she tried to violate the foundations of international order based on directions. It was she who pushed NATO to strengthen collective defense. Not only the Alliance and Ukraine, but all the free democracies of the world.

"The fundamental difference between response to crisis and collective defense is that we are not in defense, but our opponent defines the time frame. We must be ready for the fact that the conflict can be manifested at any time. It has been brought to this new era for years. We have monitored trends of the increasing aggressiveness in Russia's behavior. Together, we have made the most enhancement of collective defense since the end of the Cold War. But this work is not completed, "the Alliance's military manager said. "All our efforts are focused on the political will of the Union countries with their military capabilities. This is more important now than ever before. The Russian aggressive war against Ukraine is the greatest threat to euro -

Atlantic security for decades. Last year, it has changed lightly. NATO will continue to do what is best able to join, adapt and protect," Rob Bauer said.

He recalled that the Armed Forces of the Union countries now unite 3.2 million people in military uniforms, and they all work for the same purpose-reliably protection of a billion citizens living in the Alliance, the democratic values they share. Their commitment and determination are a clear signal to the potential aggressor - NATO will protect every inch.

"It also indicates that together we are much stronger than alone," the Admiral said.

Admiral Rob Bauer. Photo: The Netherlands Defense Ministry

From the beginning of the invasion of Ukraine, Russian invaders have not created a systematic support system, have suffered heavy losses, and now forced to use outdated equipment and uninvited people in large numbers.

As [reports Ukrinform](#), the day before in Brussels, during a press conference following the meeting of the Defense of Defense of the Union countries, said the chairman of the Military Committee Nato Admiral Rob Bauer.

At the same time, Ukraine, according to him, focuses on the quality of forces and drinking of servicemen, uses weapons of Western samples, and this cut will be reflected on the battlefield over the following months.

"Any side in the war faces the same problems-loses people, has destroyed or damaged equipment, and feels a lack of ammunition. One of the award miscalculations that Russia was preparing for the three -day, "forgot" to inform the performers about its goals and could not expand the logistics system. So during the days they were left without fuel for the tank armies, "said the Dutch Admiral Bauer.

He noted that in the conditions of fighting on the fourth or sixth day, they are transformed into a logistics competition, and this is what happens in Ukraine now. This is closely related to other problems-with the ability to replenish stools, receive new equipment, tanks and combat vehicles, tanks and combat vehicles, tanks and combat vehicles new artillery systems and more. It is also about replenishing the personnel of the conscription or mobilization and its preparation.

"From a material point of view, the Russians began to use very old-materials and capabilities, for example, the T-54 tanks, the 1954 model, which we nibble on the battlefield. The problem is that they still have a lot of these-54. We see that the Russians are forced to focus on quantities. Including a large number of conscripts and mobilized people who are not well-known, they act on outdated materials, but in large numbers. Ukrainian, on the other hand, focused on quality, with weapons of the Western design, and as appropriate training for the military. This is a big difference that will have the manifestation of the next months, "NATO's Military Committee said."Logistics and logistics environment is a very important component(prompt - ed.)thinking. For many decades, we have neglected a large volume that would be associated with collective defense to a large -scale conflict - because we did not provide such a conflict. We planned smaller operations, which also had a significant logistics component, but were much more suitable for planning than war we see in Ukraine now, "Rob Bauer said.

He stressed that the solution of such problems is not a matter of one day, it will interfere with large -scale and long efforts and investments, including in the development of the system of providing troops and logistics, improving the system of military management, etc. All this is at the heart of updated operational concepts on the modernization of the structure of troops and their provision, which will be considered during NATO -Samite in Vilnius.

In turn, the Commander -in -Chief of the United NATO Armed Forces in the European American General Christopher Cavola noted that the Russian army should not be underestimated.

"I want to add that the degradation of the Russian Armed Forces is really unprecedented. Alevona concerns, above all, land forces, why we have very multifaceted. At the same time, it is worth remembering that in other areas, this degradation is much less noticeable, "said the US military commander.

Since the beginning of May, especially in the days declared by the occupiers of the festive tavhihid, in the temporarily occupied territories in Zaporizhzhya and Kherson region the number of cases of looting and theft of Russian servicemen has increased significantly. The property and vehicles are mainly stolen by a release of the need to ensure evacuation of the population.

About it wrote Deputy Minister of Defense Anna Malyar in Telegrams.

"In the settlements Tokmak, childbirth, Kamianka, Rozivka, Mikhailivka, Molochansk, Enerгодар, Chernihivka in the temporarily occupied territory of the Uzaporozhye region, Russian invaders, covering up with the so -called provision of mechanical measures, stolen the material values of local enterprises of Tagiv.

According to Anna Malyar, in Enerгодар at night from the territory of the private enterprise "Electropodenmontazh-10", about 20 units of transportation were stolen and the composition of material property was looted.

Also, at night, under the pretext of evacuation of the Russian occupation administration of the razing point Skadovsk in the temporarily occupied territory in the Kherson region, the invaders hastily removed the looted office equipment and other property.

"It is probably that on May 7 this year, Russian invaders will be used to move the stolen property of the temporarily occupied Crimea," Anna Malyar said.

The Russian Federation should be clearly aware that it will never be able to defeat Ukraine.

About it [stated](#) UK's military adviser Jan Stabbs.

"Over the last week, Russia has again inflicted massive rocket launchers from UAVs from settlements throughout Ukraine with minimal observance or compliance. It should be noted that on Monday, the Ukrainian red cross reported that as a result of [rocket mole](#) 1000 square meters of humanitarian aid, which kept in the large warehouse of the Odessa region, were completely destroyed. Such attacks by Russian are directed to punish the Ukrainian people and sow terror. These are the marstoky acts of revenge and the shameful manifestation of the inability of Russian military protection, "said Jan Stabbs, expressing during the OSCE meeting a strict transmission of Russia.

The UK's military adviser also emphasized the irony of false navigat of Russia on confrontation, taking into account its past actions.

"I would like to emphasize the irony that this was happening by the country that invaded Georgia in 2008, illegally annexed Crimea in 2014, and has begun a large -scale invasion of Ukraine on February 24 last year," he said.

Jan Stabbs has confirmed the support of the United Kingdom of Ukraine.

"Russia must realize that it will never be able to win in Ukraine. If it continues to fight, it will continue to lose. We are not underestimating a prolonged threat from the Russian Federation, but over time Ukraine will have a reason to celebrate. Ukraine will continue to demonstrate its decisiveness and unwavering moral force, struggling for the liberation of most of the homeland. Sovereignty, territorial integrity and independence of Ukraine will be fully restored. The United Kingdom and the International Security Company will remain adamant in support - we will support Ukraine as much as it does not need it, "Jan Stabbs summarized.

- Every day the enemy produces hundreds of shells in the city and region, and, as always, objects of critical infrastructure. On their "Soviet holidays", they decide to increase the number of shelling in the city: from artillery, RSZV and mortars. The commented hour allowed to prevent losses among civilians. So, unfortunately, they are wounded, but without dead, - said the serviceman.
- The situation is difficult now, but the answer we give the enemy decent. I can say that we "congratulated" them more and more efficiently, so they were ill.

Although one of the main tasks of the military of a separate territorial defense is the provision of security in the city itself and the protection of the coastline,

because of constant hostile shelling, defenders are involved daily in the assistance of the population.

According to Artem, because of the enemy shelling in recent months, there have been multi -wealth among representatives of various types of municipal services, so the administration of the communities turned to the military.

- Now in Kherson we help repairmen, accompanying them during work. The distance to the left bank, of course, does not allow all situations, because between the exit and the arrival of time of seconds, but we, the military, do everything possible to help in the shortest time to submit the consequences of each terrorist act of the invaders, - added the defender.

Every offender who came to the Ukrainian land with the war has a name, the name of the face. Many of them are already known to Ukrainian justice. Others will not be able to sneak even in Russian swamps.

About it [stated](#) Prosecutor General of Ukraine Andreykostin.

"We will find everyone involved. No military criminal will escape punishment. Their nonsense will know the whole world. Their names will sound in the courtroom," - said.

Thus, according to Andriy Kostin, today prosecutors of the Kherson Regional Prosecutor's Office reported the suspicion of the deputy head of the Rosgvardi department of the Rostov region to the Colonel of the Russian police, who organized a serving during the occupation of Kherson. He personally gave orders to apply violence to hundreds of illegally detained civilians. Also about the suspected three of his associates.

In the captured premises of the temporary detention center from March to October 2022, these criminals kept and tortured people. In total, more than two hundred people. One hundred and sixty of them turned to the rule of law. Work on the installation of other victims is ongoing.

"These were mainly pro-Ukrainian activists, volunteers, veterans, relatives of law enforcement officers. Some were kept for hours, others. Under horrible antisanitic conditions. They were beaten and tortured, restricted in food and water, refused to provide medical care. At least 17 men used the genital organs of electric shock, "the Prosecutor General of Ukraine emphasized.

As during the NKVD, people were "knocked out" by what they did not do. They were accused of resistance traffic and demanded information about the Defense Forces of Ukraine. It is already known that at least three prisoners were tortured to death. Six - forced to be exported to temporarily occupied territories.

"This case, unfortunately, is not uncommon. Only in Kherson, 11 Katani was found 13 places of freedom. Information on illegal maintenance is checked as 1000 people, "Andrei Kostin said.

"Energoatom" received information about the preparation of Russian invaders for "evacuation" from the satellite city of Zaporizhzhya nuclear power plant(Rabbit)Almost 3100 people.

About it [reports](#) SE "NNEGС" Energoatom ".

First of all, it is about the export of 2,700 station employees who have signed a contract with the fake AO "Explaining Organization of the Zaporozhye ACE" or other Rosatom's enterprise and their families.

At the same time, Energoatom reminds that the employees of the NPP departure from the city of Rashistsaboronized almost from the beginning of the occupation. Also, according to the General Staff of the Armed Forces, part of the family atomic atomicians have already been taken out of Energodar to the Rostov region of the Russian Federation.

Thus, the Russian invaders prove their inability to provide the operation of the Zaporozhye Nuclear Power Plant, as it is now lacking in skilled personnel. Even those Ukrainian workers who, having signed the shameful contracts, agreed to cooperate with the ages, are going to "evacuate" in the near future. And this will exacerbate the very urgent issue of the presence of sufficient staff to ensure the safety of operations of the NPP, even in the current disconnected condition.

At the same time, Energoatom, for its part, takes all possible measures to formulate the required number of specialists who can ensure safe operation of the stations in the first period after its de -occupation. Such a team will be formed by the WEZ employees who are currently in the territory controlled by Ukraine, as well as specialists from other nuclear power plants.

"As soon as possible, the de -occupation of the Zaporizhzhya NPP, the expulsion of the racists from the energy and the transmission of control over the station of its legitimate Ukrainian operator, Energoatom, is the only way to stop the Russian disorder to tagua its further security," the statement reads.

In the office of the family doctor, in the CNAP, in the bank, in the employment center, in the tax, in the police department. And it can only be close, but flexibly. I just named only a few categories of people, but in fact every story, every tragedy, every stress, every load is unique and unique. Therefore, the system should be flexible and see not the category, alludin. For every experience, suffering, case, - added Elena Zelenskaya.

For her part, VicePremier-Minister-Minister for Reintegration of Temporarily-Coiled Territories of Ukraine **Irina Vereshchuk** told about the coordination center of psychological support at the CMU, which has recently been opened and showed practical results, as well as plans to create such centers with each state.

-The center will include heads of profile structural units, as well as representatives of other humanitarian service providers, as well as profile specialists: psychologists, lawyers, coordinators and case managers. - explained Irina Vereshchuk.

Minister for Veterans of Ukraine **Yulia Laputina** presented the project "Transition from military service to civilian life(in the part of psychic care)».

"Now wounded, military, veterans and their families need psychological assistance in the process of transition from military service to civilian life"

The greatest pressure on the psyche is now withstanding our defenders and defenders. The Minister of Defense **Alexei Reznikov** :

According to Alexei Reznikov, the recovery covers the program for a week, the huts fall into a cozy atmosphere, where there are no artillery explosions, a drinker to meet with the family, to talk in parallel, to work with military psychologists - and this gives the result of a quick restoration of the ability to perform tasks.

Alexei Reznikov: "We want to open six centers of psychological restoration today, just no more than 150-200 kilometers from the front line, which is the north, east and south of the country where the soldiers are not far away"

When it comes to large -scale changes in the consciousness of citizens, you need to contact the education system. This was emphasized by the Minister of Education and Science of Ukraine **Oksenlisli**, emphasizing the need to integrate psychosocial support for and psychological assistance at all levels of Ukrainian education.

The Minister sees the tasks of educators in the development of a system capable of helping the participants of the educational process who need it, as well as to create mechanisms to prevent such conditions.

As the primary steps of the road card, Viktor Lyashko identified, in particular, the scaling of MHGAP² training, informing patients and reducing the stigma of the inhabitant environment, updating the patient's clinical route and plane redirecting, implementation of a guaranteed package of services and secondary/outpatient/outpatient.

Following the implementation of the project, patients will have significant benefits, such as Otpsychological support for a family doctor and the availability of placement of service.

Viktor Lyashko also noted that the target audience of the recipients of psychological assistance is huge. In his opinion, children should be identified in a separate category and to introduce separate projects for them, which were discussed, in particular, during the First Lady Meeting with the President of the European Union.

The MCR participants noted that a new system of psychological assistance will not be built in a short time, for example, a year or a half, but the country should go through: for the sake of our children, for the sake of our children, for the sake of the next tonnes of Ukrainians.
