For the first time in four months, the Zaporizhzhya Nuclear Power Plant was connected to a single -accessible backup transmission line, but the situation remains "extremely vulnerable" and unstable. About this [reported](#) On the IAEA site.

"Although the reconstruction of the power transmission line is positive, the situation with the external power supply of the station remains very

vulnerable, which emphasizes the unreliable situation with nuclear security and security on the facility," the Gross CEO Gross CEO.

Connection of the ZPP to a single power line 330 kilovolts(QV)Flewing from six such reserve lines to the conflict, 1 March was broken due to damage on the other bank of the Dnieper River and restored on the evening of July 1. Work on the restoration of the power line was complicated because of a complex security situation in the southern region.

The reconstruction of the 330 kV line is important because in the last few months, the ZPP has relied on a single main line of 750 kV for external electricity required to cool the reactor and other important functions of nuclear safety. Before the conflict began in February 2022, there were four lines of 750 square meters.

Currently, the 330 kV line is under voltage and is stored as a backup and ready -to -feed ZPP, if the 750 kV line becomes unavailable or damaged.

During the conflict, it has lost its power supply to the site of seven times outside the site, which causes it to temporarily use emergency diesel generators.

I wish health, dear Ukrainians, Ukrainian women!

He has just completed the conversation with Mr. French President Macron, and this is the third international negotiations for today-after talking to the Secretary-General and the Prime Minister of Sweden. The main thing is our defense, front, weapons, the capabilities of our warriors, and I am grateful to partners for understanding our needs. We have argued for new defensive packages, and, by the way, thank you, Emmanuel, for something today, and weapons, which we agreed, started to come with something. , Rockets, tanks.

But, of course, they talked about more strategic things today - about which the security foundation of Europe will be after this war and our victory.

In order for the world to come faster and be long, honest, true, Russian evil has to see what the Kremlin's ambitions are. It is we who are all free European nations, all in our Euro-Atlantic community, not Russian terrorists and any of their blackmail and aggression.

We add the content of the NATO summit daily to take place in Vilnius of the Venan Week, and I am grateful to all our partners who work together with the Alliance Strengthening, and therefore, for security in Europe, real security in

Europe. Today, talking to France, with the Prime Minister of Sweden and See and General, coordinated our steps in front of Vilnius.

He also held several meetings with government officials and our team of office internationals on training for foreign policy activities that will take place in the near future.

It is very important - about the situation at the Zaporizhzhya nuclear power plant. Now all the light is conscious that the common safety depends entirely on global consumption to the actions of the occupiers at the station. Russia must be clearly aware: it is a light to which scripts are preparing for terrorists, and the world is ready to react.

Radiation is a threat to all in the world, and the nuclear power plant must be completely supported from any radiation incidents. Today, exactly 16 months, as Russian military, fully control the territory and structures of the Zaporozhye NPPs. In different states of the world there are their own intelligence and other opportunities to accurately recognize what is happening and who is guilty of it.

Now, from our intelligence, we have information that on the roof of several Gergers of the Zaporizhzhya Nuclear Station, Russian military placedly -led with explosives. Maybe to simulate a stroke on the station. They may have some other scenario. But in any case, the world sees, and it can not feel that the only source of danger to the Zaporizhzhya nuclear power plant is exactly Russia. And no one else. To stop it is the duty of all in the world, and no one can leave the scene, because radiation leaves no one away.

I thank Mr. Macron for his attention to the situation at the ZPP and for his willingness to do everything he needed to guarantee safety.

One more.

Today, Russia has once again hit Kharkiv region, in the city of Pervomaisky. Iskander is likely. Eight ordinary high -rise buildings were damaged. More than 40 people were injured, 12 of them were children, two are babies, they have less than a year ... Staff this time rescuers, together with police, still bypassing damaged buildings. Everyone who was injured in this rocket stroke will be provided with any necessary assistance.

And for this blow the enemy will be responsible, as well as all other blows.

Russian terrorists want to become model in how they destroy their lives. We will be model in how life we protect and how life answers - fairly and inevitably - every terrorist is struck.

The Nazis tried to escape from justice. Quite a long time. But many of them have been found and are still held accountable. We catch the racists much faster.

By the way, now I will still have a meeting with the Interior Minister Klimenko
Taerivist to the baby's security service - and about new challenges to our security, a general situation. There was also a meeting today with intelligence

...

We know how to put terrorists in place.

Thank you all our soldiers!

Glory to Ukraine!

From June 30 to July 4 in Vancouver, Canada, the annual session of the Parliamentary Assembly of the Organization for Security and Cooperation in Europe took place([OSCE](#)). На сесії ухвалили резолюцію проситуацію в Молдові.

"Уперше делегати закликали всі сторони розпочати політичні дискусії, щоб замінити нинішню миротворчу місію в придністровському регіоні набагатосторонньо міжнародну цивільну місію", - йдеться в повідомленні.

Також члени Парламентської асамблеї ОБСЄ визнали, що конфлікт у придністровському регіоні Молдови, як і раніше, становить серйозну загрозу безпеці та стабільності в регіоні ОБСЄ.

Члени організації підтвердили свою прихильність досягненню мирного, всеосяжного і міцного розв'язання тривалого конфлікту за повної поваги досуверенітету, незалежності та територіальної цілісності Молдови в межах її міжнародно визнаних кордонів.

Водночас Парламентська асамблея ОБСЄ закликала Росію вивести свої війська з території Молдови та утилізувати боєприпаси, що перебувають на складі поблизусела Колбасна в придністровському регіоні Молдови.

Варто зазначити, що 2020 року президентка Мая Санду запропонувала замінити російських миротворців у невизнаному Придністров'ї на цивільну місію під егідою Організації з безпеки та співробітництва в Європі.

"Оскільки давно немає небезпеки військових дій, цю місію потрібно зробити цивільною під егідою ОБСЄ. Це - позиція Молдови, яку я підкреслю", - сказала тоді Санду.

At the next meeting, the Higher Rada Rada plans to consider the determination of the number of judges of the Kyiv City District Administrative Court, formed after the liquidation of the Kyiv District Administrative Court.

About it in [interview Ukrinform](#) The GRP Grigory Usik said.

In particular, he reported that the judges of the liquidated district administrative court of the city of Kyiv are currently in the status of judges, continue to hold the salary, but do not exercise justice.

"It is known from the State Judicial Administration that the Kyiv City Road Court will work in the premises used by the OASK. The following question is the determination of the number of judges by the High Council of Justice, which will work in the newly created court. We have previously discussed it at the meeting with the participation of the chairman and the representative of the DSAU. At one of the nearest meetings, we will make this question for consideration, "Usyk said.

"In any case, it is envisaged that this court should work until December this year," the GRP chairman said.

"There may be transfer to this court of judges who have already undergone qualifying from other district courts," the chairman [GRP] suggests(<https://www.ukrinform.ua/tag-visa-rada-pravosudda>).

According to Usik, judges "can also be submitted for transfer, but in relation to, it is probably a corresponding check."

"I do not have a clear answer who will hold it. This procedure should be prescribed in the law. There will be no questions then. In any case, I think that the OASK will not get to the newly created court without a corresponding verification, for God none of them has passed a qualifying assessment, and without it they cannot be transferred to another court. Therefore, the fears that will be automatically transferred to the new court are in vain, "the GRP chairman emphasized. As it was reported, on December 13, 2022, the Verkhovna Rada adopted a law of calculation of the district administrative court of the city of Kyiv and the formation of the city district administrative court. The Higher Rada of the Rights Supplies has established cooperation with the Security Service of Ukraine, which provides it with an information about the presence or absence of citizenship of another country in the judge of the resignation.

This was reported by the head of the GRP Grigory Usyk in [interview with Ukrinform](#). Answering questions regarding cooperation with law enforcement

agencies about judges' devices, Usik said: "They only cooperated with the Security Service of Ukraine, which provides us with information about the presence or absence of other country's judges when considering his resignation."

According to him, there was still no case confirmation of double citizenship in a judge.

"By the way, this issue also has its complexity, because we cannot say that we are 100% reliable. It is difficult to obtain such data, since the diplomatic level does not provide for the state that provides a citizen of the citizen of Ukraine, reported the relevant bodies of our state. And if we turn to other diplomatic institutions, the states to answer this question, they will probably give it to the aggressor state, then we will not receive the answer, "the head [GRP] said.(<https://www.ukrinform.ua/tag-visa-rada-pravosudda>).

"There was information that it had a Russian passport, but it did not confirm the official sources of the Russian Federation. Therefore, we have difficulty in obtaining information about the existence of a judge of Russian citizenship. This is an objective factor related to the fact that the aggressor does not provide us with such data, "Usik said.

He also stated that the changes in the selection of judges would be clear, and how quickly it depends on the work of the Verkhovna Rada Committee on the issues of legal policy by the Taboid Qualification Commission of Judges of Ukraine.In his opinion, "in the face of a shortage of judges, 12 months of training is a long time."

And although the CCSC, which is engaged in the selection of judges, is intended, it takes time for it to work filled, "the GRP chairman said.

According to him, in order to change the procedure for the selection of judges, it is necessary to amend the dosacon "On Judiciary and Status of Judges".

"It does not take much time, but it depends on how well the legislator will be presented, given the critical situation with the personnel in the judicial system," the GRP chairman emphasized.

At the same time, he emphasized that the topic of changing the selection of judges is "it is not just the intention of and talking in narrow circles."

"This is the position of our Western partners and the Parliamentary Committee on Law Policy. Absolutely everyone agrees that the year of study for a judge is a lot. Therefore, changes in the selection of judges will definitely be. And how quickly it depends on our joint work with the Verkhovna Rada Committee on the issues of legal policy of the CCCS. As far as I understand the speech of the CCCS chairman, the commission is now concentrated with the completion of the initial qualification assessment and the procedure of inspections - five years, - said Usyk.

Hryhoriy Usyk, the Golovna Council of Justice, believes that the inability of GRP to perform a disciplinary function is one of the causes of situations where they are judged in corruption.

He expressed this opinion in [interview Ukrinform](#). "In fact, the issue of absence of disciplinary function in the High Council of Justice - is, that is, the implementation of judges on disciplinary complaints, is extended from August 2021. For almost two years, the High Council of Justice has not performed

disciplinary function. During this time, more than 9 thousand complaints about judges have accumulated. The impossibility of the GRP to perform a disciplinary function, probably also contributing to the proceedings of situations where judges appear in corruption, " - said Usik.

He recalled that the GRP declared its willingness to consider disciplinary law on online meetings with members of the Verkhovna Rada Committee on Legal Policy, which took place immediately after the formation([https://www.ukrinform.ua/tag-visa-rada-pravosudda](https://www.ukrinform.ua>tag-visa-rada-pravosudda))Usyk noted that the draft law on the first reading of the disciplinary function of the GRP in the first reading is that during the period of reconciliation of the disciplinary inspectors, the powers of the disciplinary inspector were transferred to a member of the Disciplinary Chamber.

"This would make it possible to reduce the number of disciplinary complaints before the service itself. The Secretariat we gave an instruction earlier to inventory of all "disciplines" in order to track and analyze their resistance in the GRP, the severity of disciplinary misconduct, social intention, etc., to determine the priority of consideration, "said the GRP chairman.

According to him, this work has already begun.

"About 1700 complaints are those who came to the GRP and were not considered until August 21, 2021. And the term of attraction that disciplinary responsibility is three years, "Usik informed.

He also noted that there are currently no forecasts on the possible adoption of the bill on unblocking disciplinary function.According to him, it is proposed to create an independent competition commission with the participation of for three members of the GRP and three members recommended by international foreign organizations, which provide technical and legal assistance for the implementation of judicial reform in Ukraine for over three years.

This commission will hold a competition during the period of martial law on the postdisciplinary inspectors, whose qualification requirements are also offered to change, added the GRP chairman.

reduced to 5 years. It seems to me that this change will increase the number of willing to these positions. The proposals for the first reading were drawn up in writing in writing, but their discussion, of course, is still delayed by the time of resolving the issue of "disciplines". Now it is even difficult for me to provide for the dramatic changes to this bill, as the committee will consider it after first reading. Because it is not about point amendments, but there is a significant change, "the GRP chairman emphasized.

As reported by Ukrinform, on May 30, the Verkhovna Rada approved in the first reading of the law No. 9261 on the restoration of cases on the disciplinary responsibility of judges and ensuring the work of the service of the disciplinary inspectors of the High Council of Justice.

The world is now witnessing the death agony of Russia, at the same time, the Russian Federation itself is frightening the West of its disintegration.

This opinion was expressed in an interview [Ukrainian radio](#) Eastern Europe expert, EU representation spokesman in Ukraine(2007-2019)David Strul, reports Ukrinform.

According to the expert, radical changes are already taking place in Russia, certain historical processes are ongoing - the collapse of the empire, a neolonial state, which began in the 1990s, and gradually Russia became less and less. In his thought, it is an irreversible process.

"This country has no future. There are no resources that would bring income to the budget. It seems to me that it is pre -szeroonic Aagonia of Russia. Now, when Europe and some other democratic countries cease to Russian oil and gas, there have been crazy problems in Russia. There is nothing to finance even their own state. And the elites, which are accustomed to sufficient financial support, to what could "deriban" the state budget, will now have nothing to deriban, and will begin international conflicts, "Stulik is convinced.

Read also: [**breakup Russia is a matter of time - expert**](#) According to him, budget expenditures in Russia are kept at the same level in one area - in social policy. This is due to the fear of power before the public changes and protests.

"Because it would mean that the Russians will simply demolish their power. That is, ceeteotic for the Russian leadership of the threat, but for Ukraine it is great shaft. The so -called Russian revolutions that took place in tsarist Russia, "Stulik said.

According to him, for Russia it is a very negative scenario. "When it can happen, it's hard to say. But I think it is worth considering it. Although we do not like it in the west, it's unpleasant, but it should also be reckoned with it," - said the Expert.

"This is what the Russians are accelerated through the so -called psychological information operations. That is, they make in advance so that the West is afraid to go the backstage, because Russia is quiet, through its" fifth column "suggests that the consequences will be negative.(The collapse of Russia - ed.)Allegedly chaos, it seems like additional in Russia, it is an even more refugee in European countries inevitability that will be with nuclear weapons of the Russian Federation. That is, the Russians themselves are not directly, but mediated by the event that Russia can break up and can take a long way, " - notes Stlul.

However, he disagrees with that. "The priority task is to win Russia. And it is next, let the Russians decide themselves," the expert is convinced.

Також члени Парламентської асамблеї ОБСЄ визнали, що конфлікт у придністровському регіоні Молдови, як і раніше, становить серйозну загрозу безпеці та стабільності в регіоні ОБСЄ.

Члени організації підтвердили свою прихильність досягненню мирного, всеосяжного і міцного розв'язання тривалого конфлікту за повної поваги досуверенітету, незалежності та територіальної цілісності Молдови в межах її міжнародно визнаних кордонів.

Водночас Парламентська асамблея ОБСЄ закликала Росію вивести свої війська з території Молдови та утилізувати боєприпаси, що перебувають на складі поблизусела Колбасна в придністровському регіоні Молдови.

Варто зазначити, що 2020 року президентка Мая Санду запропонувала замінити російських миротворців у невизнаному Придністров'ї на цивільну місію під егідою Організації з безпеки та співробітництва в Європі.

"Оскільки давно немає небезпеки військових дій, цю місію потрібно зробити цивільною під егідою ОБСЄ. Це - позиція Молдови, яку я підкреслю", - сказала тоді Санду.

9 years ago, on July 5, 2014, the Armed Forces of Ukraine were released from the Russian occupation of the city of Slavyansk, Kramatorsk, Druzhkivka

and Konstantinovka Nadonechyna. It was the first significant and extremely important victory over the Russian terrorism in the first year of the war.

In the cities of Northern Donetsk, Ukrainian soldiers returned state flags. And since then they have proudly flutter there, despite constant enemy shelling. I hope today Russian large-scale aggression is destroying what has been developed in recent years, we have no doubt that thanks to the defense of Ukraine, the people of Ukraine and the international community, all attacks will be reflected, and Russian invaders will eventually be expelled .

On July 6, 2014, Bakhmut was also released from Russian terrorists. Today, this city is one of the hottest areas of the front. Soon, if the speech of successful actions of the forces of Ukraine's security and defense forces in the Bakhmut direction will be saved, the city will be released for the second time. And again the Ukrainian flag will return to it. Will come back forever!

The Armed Forces of Ukraine continue to destroy the enemy's racists and equipment everywhere in order to release all temporarily occupied territories of Ukraine and take revenge for all -time war crimes.

This commemorative day is also honored by the memory of all military personnel of Ukraine, who died during the operation to liberate Kramatorsk Slavyansk, as well as all defenders of Ukraine and civilians, which Russia Udubilal has the beginning of a large -scale invasion.

— Сили оборони України й далі системно вибивають ворога з позицій, просуваються вперед. Динаміка не змінилася, і ми тиснемо в наступі, знищуюмо особовий склад окупантів, їхню бронетехніку. Протягом минулого доби наші підрозділи ракетних військ і артилерії виконали понад 1550 вогневих завдань. Втрати ворога в живій силі становлять 86 убитими та 162 пораненими. Зновувідзначилися наші підрозділи радіоелектронної боротьби, які протягом доби захопили дві повітряні цілі, а саме БПЛА «Орлан-10». А ще ми знищили 25 одиниць озброєння та військової техніки противника, — поінформував офіцер ЗСУ.

Він додав, що найбільше противник намагався атакувати на Мар'їнську напрямку, де зафіксовано 17 невдалих штурмів.

— Раніше росіяни практикували м'ясні штурми. Зараз, мабуть, особовий склад почав закінчуватися й вони іноді на штурм відправляють маленькі групи до 8–10 осіб. При цьому техніку також стараються берегти, — насамкінець зауважив Валерій Шершень.

According to her, the occupiers often use the creation of certain panic platforms as a platform for carrying out information and psychological operations.

-First, the condition and mood among the population can affect the decision-making, especially when it comes to a democratic country. Secondly, cepsychological destabilization of both military-political leadership and everyone who takes teachers in this war, say, fighters at the front. After all, the latter are the targets for the Russian Federation during the implementation of information and psychological operations,-said the Deputy Minister of Defense of Ukraine.

She assured that Ukraine's defenders and defenders are preparing for all probable scenarios during this war.

Returning to the events on the front, Anna Malyar reported that the Nabakhmut direction is now somewhat more active.According to her, in the Bakhmut direction, the enemy pulls up all his reserves in the same way to give up.

As for the situation in the south, everything is also in our favor.

Ukraine seeks to increase the support of peace formula by Latin American states, including Argentina, since the formula points relate to the overcoming of all crisis caused by Russian aggression. About it stated President Volodymyr Zelenskyy during a video conference with students and teaching staff of Buenos Aires and other Argentine universities.

About 400 students, heads of institutions, teaching staff, heads of foreign diplomatic representations, etc. took part in the online meeting.

"We have proposed the formula of peace and we want the countries to unite around it. Our military weapons displace the enemy, and politicians and social states can support us in various peaceful initiatives. We want Latin America to join to join Argentina. This is very important, "Volodymyr Zelenskyy said, answering students' questions.

The President emphasized that all points of the Ukrainian formula of peace are specific to overcome all those crises that Ukrainians have experienced or worried as a result of aggression of the Russian Federation

"When we talk about nuclear security, it is not only because we are afraid of a felling at the Zaporozhye NPP, as it is a challenge not only for Ukraine but for the world. We all experience these crises, unfortunately, we share this tragic realization, and we have a decision on these points. But for this we need the union of the world around these problems, the political pressure on Russia and the decisions of these crises, "he explained.

Volodymyr Zelensky also emphasized the need to join the state of Latin America to sanctions against Russia, until he has reached his reality and until the Russian Federation ceases to be aggression.

"The leadership of Russia should feel that it is isolated. They can not be accepted by the countries of the African continent, they cannot have business of Ferry America. It is impossible to press the hand of the leader of Russia, which is in the blood. Because he gave all these orders. And here, Latin America can take an active position, "the president is convinced."We didn't want this war. The Ukrainian people are passing through the test, and this is a great tragedy. Because war is only losses. But in order to not waste everything we have, we have to win. Therefore, we begin to be destroyed so that we are not destroyed. We did not enter the territory of Russia - they brought our homes, killed, raped children, "the Head of State emphasized.

The President noted that the end of the war is the restoration of its territorial integrity and establishing justice by Ukraine by holding the reference of all guilty crimes.

"Parents who have lost children, children who lost their parents, men - women, women - their husbands, loved ones lost each other ... It is impossible to simply: that's all, we have finished, no one is shooting. The end of the war is religiousness. And first of all - the sentences of the killers. And that's when all this is built, then the war will end. We will be approaching this time. History shows that justice should be, the killers must sit for lattice, should be restored control of Ukraine over their land, the aggressor, as it was in many wars of the region, should admit that he is an aggressor," Vladimir Zelensky is convinced.

Speaking of relations with Argentina, he advocated the development of more closely.

"Ukraine can be a good partner in many areas, different areas. And it would be more to communicate, and that our governments would also work together," the head of state said.

The President also noted that Ukraine today is extremely important economic stability, and our country will welcome the steps of businessmen from all over the world, who are ready to invest in Ukraine and create jobs.

Turning to Argentine students, Volodymyr Zelenskyy emphasized that every youth should spread the truth.

"It is important for us to maintain relationships between students, to communicate with people of your war, who are very interesting to you. Constant communication is important. And when you are not afraid of heart and not afraid, you can come and see what Ukraine is like. You will draw conclusions yourself, you will see the consequences of war on your society," the Head of State said.

At the end of the meeting, Volodymyr Zelenskyy expressed his wishes for Ukraine to hear in Argentina and all Latin America.

"And I would very much like the leaders of your continent to give us more than more. I think our meeting would be very important," he said.

Currently, about 11.7 million Ukrainians are economically active in Ukraine, of whom up to 9.3 million, nearly 2.7 million are unemployed.

Such data were published by experts [Ukrainian Institute of the Future](#) (IIF) During the presentation of the Ukrainian economy forecast for 2023-2024.

"According to our estimates, there are now about 28.5 million people in Ukraine. But not the common figure, but the structure. Among all these 28.5 million we have 16.8 million it is economically Inactive population - pensioners, children. 11.7 million are economically active, but only 9-9.3 million work out of them. If you subtract this figure from the state employees, then there are 6-7 million people who, in fact, are the "harness" that brings the whole economy, " - said UIF economic programs Jan Lavryk.

She emphasized that the situation could further deteriorate. If the population is further emigrated, it will not be anyone to create GDP in Ukraine, pay taxes, and therefore - the country will not only be unable to serve the budget, but also to fulfill social obligations.

"Labor deficits will lead to taxes, because it is natural: if one working person will have two non -working ones to ensure them, you will have to increase the tax burden. Therefore, hence the economy of the economy, "the researcher emphasized.

Therefore, in her opinion, the migration policy of Ukraine, namely the issue of Ukrainians from abroad and attracting new migrants, should be the number one priority for the regulation.

As it was reported, the Ministry of Economy of Ukraine considers that the termination, economic development and reconstruction of infrastructure and housing, as well as possible employment are the main factors that will contribute to the return of Ukrainians home. And the return of our citizens is important for ensuring the rapid and sustainable economic restoration of Ukraine, because the aftermath of the need for labor resources will increase significantly.
