The Coordination Headquarters met with the families of the military personnel of the Marine Infantry Brigade named after Mikhail Bilynsky. The collection of

information about prisoners was harvested. All photos and videos that are published by analysts are used. They are verified. The enemy deliberately manipulates that people who return from captivity transmitted the data.

About it [reports](#) Coordinating headquarters for the issue of prisoners of war.

The staff representative stressed that only some of our captives were confirmed by the Russian side, but Ukraine is working to return everyone: both those who are considered missing and those whom the Russian Federation did not confirm, but the consciousness of captivity. And it often succeeds.

The relatives are worried about whether their defenders and defenders are submitting to exchange. A lot of hundreds of the submitted can only agree to exchange a few. The final decision to whom will be changed is made by the party that holds the prisoners. Ukrainian sales funds to return everyone - regardless of the unit or place of detention.

"The enemy spreads a lot of false data on social networks to then say that Ukraine does nothing to return its people. But if it was true, exchanges would happen after the fighting was completed, as during the previous wars. And we have already managed to return more than two thousand prisoners, "the headquarters representative said.

The Security Service has assembled a evidence base on the owner and the editor-in-chief of the Political Student Internet edition of "Political Studies" Sergei Stepanov, which is being hidden in the temporarily occupied Crimea.

About it [reports](#) Security Service of Ukraine.

SBU investigators reported the person being suspected of two articles of the Criminal Code of Ukraine:

- Part 1 of Art. 110(encroachment on territorial integrity and integrity of Ukraine);
- Part 1 v. 111(high treason).

За матеріалами слідства, перебуваючи на території українського півострова, у квітні 2014 року він створив пропагандистське інтернет-видання на користь країни-агресора.

Власний медійний ресурс Степанов використовував для поширення кремлівських нараторів та дискредитації України на міжнародній арені.

До злочинної діяльності він залучив своїх «однодумців», які потім займалися підготовкою антиукраїнських матеріалів

Для маскування злочинної діяльності псевдожурналісти діяли як позаштатні кореспонденти під вигаданими іменами і позиціонували себе «експертами».

У своїх публікаціях вони виправдовували російську збройну агресію і захоплення частини території на сході та півдні України.

Перед написанням пропагандистських текстів «автори» отримували від Степанова покрокові «інструкції» щодо підготовки матеріалів.

За поширення деструктивного контенту вони отримували від окупантів «гонорари». Гроші їм надходили через російські електронні платіжні системи.

У квітні та липні минулого року співробітники Служби безпеки затримали двох фейкових «експертів» у Києві та Вінниці. Зараз вони перебувають під вартою.

Ініційована СБУ судово-лінгвістична експертиза підтвердила факти інформаційно-підривної діяльності Степанова та його спільників.

Наразі тривають заходи щодо його притягнення до відповідальності за злочини проти державної безпеки України. Матеріали передано в суд.

Зловмиснику загрожує до 15 років ув'язнення.

Розслідування проводили співробітники СБУ у Вінницькій області за процесуального керівництва обласної прокуратури.

As informs The SBU, both hostile farmers was detained in December last year during counter -pride -bearing measures in the frontline areas of Donetsk region.

The attackers are spouses from the city of Yar. At the same time, the man had previously already served the punishment for participation in the illegal armed formations of DNR.

Last summer, they remotely went out to the Deputy Commander -in -Chief of Sparta, who participated in combatants on the Eastern Front. In correspondence with him, traitors offered their help in the war against Ukraine.

At the instructions of the aggressor, they gathered information about the places of possible base and protrusion of defense forces in the front line. First of all, they tried to find warehouses with weapons and ammunition of Ukrainian troops. Russian agents transferred to the acquisition by the occupiers through the network of "liaison" military intelligence of the Russian Federation on the captured part of Donetsk region.

On the basis of the evidence collected, the court found both aggressor associates guilty of a domestic betrayal committed in martial law.

Clip "falling on the snow" performed by the band "Nichlaw"(Frontman Andriy Podluzhny)Created under the patronage of the famous Ukrainian filmmaker Ivan Yasnia. It is important that its plot is based on the real tragic events of the Russian-Ukrainian war. The work is devoted to the memory of the fallen military personnel of the Hetman Danylo Apostle and all the dead defenders of Ukraine in the battle with the Russian Horde.

Hetman Danylo's artillery brigade has glorified herself with a roar since 2014, causing the invaders of devastating blows to predominantly dealecobic guns of large calibers.

The brigade guns have mastered all the latest artillery field and its own experience, gained during difficult years of hostilities with the aggressor. Initially, it was necessary to fight mainly by artillery systems of morally outdated Soviet models, and now in service the brigades of many more modern artillery trunks.

Former brigade commander Colonel Sergei Baranov, whose direct assistance was created by this film clip, the best of his days is in the wars when his subordinates passed his staff weapons and moved on vacation. The most part - when the unit commanders reported on human losses.

АРМІЯ INFORM

In the premises of the Kyiv City State Administration opened the exhibition "With Ukraine in the heart". The exposition is dedicated to Belarusians who gave their lives in Ukraine for European choice, European values, principles of democracy, combat against Russian aggression during the Russian-Ukrainian war, as well as who continues the armed resistance of the occupier. Special Correspondent [Armyinform](#) visited the opening.

At the stands of the exposition with Ukraine in the heart of Kiev and guests of the Ukrainian capital were able to see the support from the conscious Belarusians of self -dedicated to Ukrainians for their European choice and independence. During the showing of the courageous Belarusians from the screen, they told why they decided to get to Ukraine, join the Armed Forces and, risking their own lives, fight against the Russian enemy.

During the opening, numerous guests voiced the main thesis: Russia is a primordial efficiency for its neighbors, and victory over it is the main prerequisite for the acquisition of freedom and sustainable sovereignty of independent original peoples. Representatives of the Ukrainian Government, People's Deputies of Ukraine, representatives of local self-government bodies of the cities of Kyiv region, who were defending Belarusians, as well as friends and native heroes took part in the Ukrainian government.

The participants of the Belarusian military were addressed by the fighting brothers from Georgia with gratitude for the habitation and loyalty to the fighting brotherhood. The wives of the battles for Ukraine of Belarus were urged to preserve the memory of their deeds. The priests of different

denominations, together with the participants of the solemn, made a prayer service for the souls of the fallen soldiers.

- We create a museum "Free Belarus with Ukraine in the Heart", in Yacosudes information about all Belarusians who participated in the struggle of independence of both Ukraine and Belarus. Some of them have received Ukrainian citizenship, but by nationality remain Belarus, - Frantskevich reported. - In the near future, the names of the Belarusian heroes will also be named streets and squares in an independent, released from Russian Belarus. Thanks to our information activities, for example, thanks to the exhibition that has been opened today, the world must find out that the rockets are not only flying from Belarus. For peace in Ukraine today are fighting different Belarusians: historians, just drivers or former military, etc.

Alexei Frantskevich said that the museum "Free Belarus with Ukraine in the Heart" will be created in Bucha, because it was there that one of the Belarusians - Ilya Khrenov with Lytvyn "died. Ilya was an Avitets, who came to Kiev in 2014 and first publicly appealed to all Belarusians with a call for unity of Ukraine's surrounding protection from Russian aggression. Since 2014, Lytvyn has joined the Azov Azov, participated in battles in Ilovaysk, Maryanka and Shirokin.

President of Ukraine Volodymyr Zelenskyy [said](#) During a speech at the final panel conference on the restoration of Ukraine in Rome:

“Ms. Prime Minister Italy!

Mr. Prime Minister of Ukraine!

Ms. Vice President of the Confederation of the Italian Industry!

Ladies and Gentlemen!Dear present!The road Italia!

Thank you for this conference and sincere interest in Ukraine. I know that the menesluks are representatives and representatives of hundreds of Italian and Ukrainian companies, and I would like to turn to you not just as those who embody the business. And as to dads and moms, to sons and daughters, as to the representatives of your communities, your cities, your country ...

There are completely different people, different families, different generations, but we are in fact one aspirations with you. We all want freedom and normal development for our children, we want safety and well-being for our parents. The desires and lightness of life for their communities and cities. And it unites us.

And this is what I suggest talking about.

About how we can give you more safety to our families together. Most weave our countries. More freedom to Ukrainian and Italian children. More guarantees of normal life for our communities and our cities.

Ladies and Gentlemen!

It is already clear when and what this war should end, which Russia has solved anti -nouns. Against all of us. Against Ukraine and all our common European home, who gave a chance for a peaceful life and prosperity to all European peoples. I have a doubt that we are able to win. Because we not only believe in our own strength, but we stand and protect our common values in unity. In unity!Whoever keeps unity and does not lose strength, he wins.

I want to thank all of Italy now, all your people and communities, your leadership and personally Ms. Prime Minister George Meloni for this unity. The unity of Europeans who know that beyond our freedom, that is, where all of us in Europe wants to reject Russia, there can be no normal and dangerous life.

We have to do - and we will do!- All that this Russian war ended in Russian. And so, this year we have to do everything to the maximum to prepare the largest economic project of our time in Europe - the project of reconstruction of Ukraine.In this war, the world saw that it was necessary for the real protection of every nation. It has been awarded how to change energy and infrastructure, production of and logistics, cyber systems and educational space, the defense industry of the army.

Therefore, there is a demand for new security standards in the world to make every country beyond any manifestations of aggression, terror or element. And we will create such security standards in Ukraine.

I will give you five examples that will show you the practical meaning of what I say.

The first is energy.

Russia has launched a real energyaging against Europe. She provoked the price crisis of impoverishment of millions of families because of the growth of accounts. She tried to produce physical supply of fuel to Europe. She beat rockets and Iranian Drones on our energy so that Ukrainians remain without electricity and heat. Europe stood. We answered this call with dignity. And we must do everything to make the enemy not the theoretical opportunity to break the nurser gun.

The "green" transformation of energy and a kind of decentralization of production is a response. The more manufacturers - "green" energy producers, is a more toxic system. The more sources of supply, the more reliably the city, every community and every family is provided.

Plus Italy is one of the leaders in creating "smart" networks(smart grids). Тому я запрошу ваші компанії разом розвивати українські мережі. І, будьласка, не забувайте, що в найближчій перспективі українські мережі будуть мережами Євросоюзу.

Друге — власне будівництво.

Українці ніколи не задуть своєї країни ворогу й ніколи не полишать своєї землі. Хоч сотні наших сіл і десятки міст спалені ударами російської артилерії та авіації, українці здатні повернути їх до життя. Не у звичці нашого народу — залишати на своїй землі рани, що не загоїлися.

Ми маємо колосальну потребу у відбудові тисяч будинків, сотень шкіл, лікарень, транспортної, виробничої інфраструктури. Причому на новій безпековій основі, яка має стати типовою для інших країн, для міст у тих країнах, де люди вхороші часи можуть і не задумуватися про безпеку. Але розуміють, що гарантії потрібні.

Щоб кожен батько був спокійним за свою дитину у школі — бо там є сховище, безпечне місце, яке гарантує захист. Щоб кожна мати знала: у її громаді, у її місті безпекова інфраструктура влаштована так, що будь-який терорист — чидерская, як Росія, чи якась терористична організація — точно програє наявній системі безпеки.

The third example is technologies.

Full -scale Russian aggression did not break Ukrainian finances, banking system, digital services that our people are used to.

We have preserved the connection in the country and all that is not to imagine modern life. Babil, we have attracted our Aviters to the cyber defense of the state and the economy. Miporoborons were constructed by the country. We continue to develop an action state service that provides access to public services through a smartphone or portal.

In addition, partners in Europe are already taking our "action" for their digital development.

Our defense industry is gaining momentum even now when the war is brushing. We are interested in the localization in Ukraine of the production of

such military equipment we receive from partners. We build new produce of our own weapons and ammunition. We create new protection tools such as floxes as a wide range of drones for our front.

I am sure that your companies have something to add to these stories of Ukrainian success.

The fourth is global markets.

The world has already understood the potential of our country's agrarian sector. Ukrainian is to guarantee global food stability. Supply from Ukraine is food on the tables of millions of families in different countries, including Africa, Asia. Pulse to Ethiopia, from Lebanon to Yemen. Without our supply to some countries, the chaos would be accumulated. And that means - there would be new waves of migration, including Uevrop.

In addition, there is no such considerable potential for green metallurgy in Ukraine in Europe. From iron ore to lithium and other maximum-needed resources - all this is Ukraine. From natural gas to the way ... We can give - and give!- All this global markets. We can largely replace the company with Russia - those who have chosen work for war, not a mentally development.

But the number one task is processing. So, these are new enterprises. So, it is new logistics and modernization of transport. So, these are new investments. Aotge, these are profits. And I am sure that your companies too.

And the fifth example - and this is far from the last of cooperation - pharmaceutical and rehabilitation.

There is a purely economic fact: Ukraine is a huge market and net import pharmaceutical goods. One thing already means that the localization of the production of in Ukraine gives an obvious benefit. To finish the war is, in particular, to quench the pain that was survived in the war, brought from the war, associated with the war. Obviously, we will work over this in Ukraine - and together with the best representatives of the world.

Ukraine sees what is the key security demand. Ukraine has a unique experience in the protection of the state and people in the face of aggression and all possible manifestations of the terror. There is no such evil that Russia would not try to do against Ukrainians, which we would not have to defend.

Our experience of protection is successful and scales on the lives of other peoples, other countries.

It is logical that our experience will become part of the new security foundation of the world. Asks you, Italy, to build a new security with us! I invite you, your investments, your experience is now coming to Ukraine.

Please in contact with our delegation at the conference with the Panpremier of Ukraine. Ukraine is ready for cooperation!

Glory to all who bring our victory closer!

Grazie Italia!

Glory to Ukraine!".

President of Ukraine Volodymyr Zelensky [said](#) during their daily video address.

"He spoke to China's leader today. It was a long and rather rational conversation. Such conversations are usually said that they open up.

It is possible to apply China's political influence to regain power by the principles of the rules on which peace should be kept. Ukraine and China, as well as the absoluteness of the world, are equally interested in the strength of the sovereignty of nations of territorial integrity ... in compliance with the main security rules, including inadmissibility of threats to nuclear weapons and the distribution of nuclear weapons. We are equally interested that the situation around the Zaporizhzhya nuclear plant is fully protected and that the nuclear power plants are not used for the sake of military purposes at all - namely cynical use of nuclear power plants, Russia is trying to make the norm.

It is very important that China has the same view of the freedom of navigation of its waters. I informed Mr. Xi Jinping about our efforts to restore the Mountain exports of food. And I heard the words of support of our Sea grain initiative, its extension, as well as to support our humanitarian efforts, in particular the Grain Program from Ukraine.

Of course, a essential part of the conversation is our views on how a peaceful peace can be restored. I presented the Ukrainian formula of peace, its specific points. We agreed to continue our communications, "the Head of State said.

The deportation of Ukrainian children is one of the fully thoughtful elements of the efforts to erase the identity of our people, to destroy the very essence of Ukrainians. The centered crime of genocide committed by Russian officials.

Volodymyr Zelenskyy said this in , reports Ukrinform.

Viso:

I wish health, dear Ukrainians!

Today, there is an important political result in Strasbourg - at the Council of Europe Parliamentary Assembly. A resolution was adopted, which is recognized that Russia's deportation contains signs of genocide. And this is the first recognition of such a fact at the level of such a high international organization that unites the states of our continent.

To put it practically, this decision will significantly help our global work for the involvement of Russia and its officials, including the leader of the terrorist state, accountable for genocide, genocide policy of anti-Ukraine.

The deportation of Ukrainian children is one of the well -designed elements of Russia to erase the identity of our people, to destroy the very essence of Ukrainians. It is a conscious crime of genocide committed by Russian officials. Sametak should qualify both politically and legally.

Today, the first lady of Ukraine addressed the PACE - for children, families ... Overpartlemen and our diplomats worked well. And at all levels - formal and informal, with leaders of states, at the parliamentary, government, law enforcement levels, in the legal community and in international immigrant organizations - we will continue to work to return all deported Ukrainian children and for the punishment of Russia. We have been cleared of nearly 20,000 children who have been taken out and scattered across different regions. But it is obvious that it is only part of the much larger criminal offices. Such children can be much larger.

Europe and the world have already seen various deportations and attempts to destroy peoples. It is the Natroian example - the responsibility of this state and its officials, guilty of genocide - we must show all other potential sources of the same evil that impunity will never be again. And the sentences for genocide will be. Similarly, for all other crimes of Russia against Ukraine and our people.

In Nikolaev, the parsing of rubble on the site of the rocket stroke, which was tonight, has already ended. More than 20 wounded, one person was killed ... My condolences and loved ones.In the evening, another rocket strike was inflicted in Konstantinovka of Donetsk region. The school, hospital, and dwellings were also injured. Unfortunately, there are affected people.

Unfortunately, the legal machine of the world is gaining momentum. But it is gaining. Unfortunately, the political pressure of the world on the terrorist state, the sanction pressure has not yet reached full. But he reaches...

But our warriors from the first day of this battle to protect people and humanity will work absolutely everything! And even more than possible.

Avdiivka-the 35th separate brigade of the Marines. Marinka is our glorious "seventystyatyak" ... Donetsk direction in general-55th separate artillery "... Thank you, the soldiers, the warriors, for the constant performance!

Zaporizhzhya direction-today, as always, there is something to thank the soldiers of our 44th separate artillery brigade. Well done!

Today, he gave his gratitude to the soldiers and commander of the 95th Separate Brigade of DShV, who are very powerfully fighting near Kreminna in Luhansk region.

And separately I want to thank absolutely to anyone who defends Bakhmut and destroys the tamborog as large -scale as the occupier deserved it.

Glory to all our soldiers who are now in battle, in combat posts, in combat operations!

Thank everyone in the world who helps us!

Eternal memory to all whose lives took away Russian terror!

Glory to Ukraine!

Ukraine is in the international rather than a hybrid tribunal model, which will allow the sentence to the leadership of Russia for the crime of aggression on behalf of a civilized world.

The deputy head of the Presidential Office Andriy Smirnov said this on an online meeting with deputies of the German Bundestag, Ukrinform reported.

"First of all, the international scenario of creating a tribunal will make it possible to give the Venramoputin and his associates not in the name of Ukraine, but on behalf of the whole civilized world.

Read also: [**tribunal**](#) He also emphasized that the creation of a hybrid tribunal will require a change in the Constitution of Ukraine, which, he said, could not be done during the state of military status.

The deputy head of the office of the Head of State said that Ukraine carefully studied the Nuremberg Tribunal and the Tokyo Process and that is why the international version of the tribunal is the most acceptable.

"We are died daily, torturing them every day, rape, illegal. We ask the whole world to wake up and act. We ask you to support the creation of an international tribunal that will force Russia to respond to Zlochin - aggression against our country," Smirnov said.

Read also: [**tribunal**](#) As reported by Ukrinform, in September 2022, President Vladimir Zelensky has experienced a working group headed by OP Head Andriy Yermak, who processes the creation of a special tribunal to bring the Russian Federation to criminal responsibility for committing the crime of Ukraine. The creation of such a tribunal was supported by the Parliamentary Assembly of Europe, the European Parliament, the NATO Parliamentary Assembly, the OSCE Parliamentary Assembly and individual states.

Recently, the Western media appeared that the West allegedly considers the most realistic version of the hybrid tribunal to bring the reference of the Russian Federation. This tribunal can combine the jurisdiction of Ukraine and the process of international law.

The deportation of Ukrainian children is one of the fully thoughtful elements of the efforts to erase the identity of our people, to destroy the very essence of Ukrainians. The centered crime of genocide committed by Russian officials.

Volodymyr Zelenskyy said this in , reports Ukrinform.

Viso:

I wish health, dear Ukrainians!

Today, there is an important political result in Strasbourg - at the Council of Europe Parliamentary Assembly. A resolution was adopted, which is recognized that Russia's deportation contains signs of genocide. And this is the first recognition of such a fact at the level of such a high international organization that unites the states of our continent.

To put it practically, this decision will significantly help our global work for the involvement of Russia and its officials, including the leader of the terrorist state, accountable for genocide, genocide policy of anti-Ukraine.

The deportation of Ukrainian children is one of the well -designed elements of Russia to erase the identity of our people, to destroy the very essence of Ukrainians. It is a conscious crime of genocide committed by Russian officials. Sametak should qualify both politically and legally.

Today, the first lady of Ukraine addressed the PACE - for children, families ... Overpartlemen and our diplomats worked well. And at all levels - formal and informal, with leaders of states, at the parliamentary, government, law enforcement levels, in the legal community and in international immigrant organizations - we will continue to work to return all deported Ukrainian children and for the punishment of Russia. We have been cleared of nearly 20,000 children who have been taken out and scattered across different regions. But it is obvious that it is only part of the much larger criminal offices. Such children can be much larger.

Europe and the world have already seen various deportations and attempts to destroy peoples. It is the Natroian example - the responsibility of this state and its officials, guilty of genocide - we must show all other potential sources of the same evil that impunity will never be again. And the sentences for genocide will be. Similarly, for all other crimes of Russia against Ukraine and our people.

In Nikolaev, the parsing of rubble on the site of the rocket stroke, which was tonight, has already ended. More than 20 wounded, one person was killed ... My condolences and loved ones.In the evening, another rocket strike was inflicted in Konstantinovka of Donetsk region. The school, hospital, and dwellings were also injured. Unfortunately, there are affected people.

Unfortunately, the legal machine of the world is gaining momentum. But it is gaining. Unfortunately, the political pressure of the world on the terrorist state, the sanction pressure has not yet reached full. But he reaches...

But our warriors from the first day of this battle to protect people and humanity will work absolutely everything! And even more than possible.

Avdiivka-the 35th separate brigade of the Marines. Marinka is our glorious "seventystyatyak" ... Donetsk direction in general-55th separate artillery "... Thank you, the soldiers, the warriors, for the constant performance!

Zaporizhzhya direction-today, as always, there is something to thank the soldiers of our 44th separate artillery brigade. Well done!

Today, he gave his gratitude to the soldiers and commander of the 95th Separate Brigade of DShV, who are very powerfully fighting near Kreminna in Luhansk region.

And separately I want to thank absolutely to anyone who defends Bakhmut and destroys the tamborog as large -scale as the occupier deserved it.

Glory to all our soldiers who are now in battle, in combat posts, in combat operations!

Thank everyone in the world who helps us!

Eternal memory to all whose lives took away Russian terror!

Glory to Ukraine!

The surgery to return Ukrainians from Sudan's battle was more complicated than the evacuation of Kabul people in 2021.

About it [reports](#) GUR MO.

"It is one of the unique operations of Ukrainian intelligence, the details of which can not be tied. The only thing we can say is that compared to the Vaffganistan's operation, it was more complicated," the scout said.

It is a surgery in Kabul in Afghanistan, from where Ukrainian military was eating people in August 2021, after the seizure of power by militants of the Taliban. By the end of the summer, Ukraine has exported 650 Ukrainians from the country.

"In Kabul in Afghanistan, the base was kept by American troops, it was as a fortress from whom our special forces were exported. But then there was a point where it was possible to return," - said the employee of GUR of Ukraine.

And in Sudan, he said, the nearest safe point was 900 km. And this despite the fact that the Ukrainian military did not have significant military support, the scout added.

"I think that when it is possible to reveal all the details, this operation [in Sudan] can be called unique," - summarized the employee of Ukraine's military intelligence.

Media is subject to materials with comparison of prices for the purchase of products for the Armed Forces of Ukraine and a separate military unit of the main management of intelligence of the Ministry of Defense of Ukraine.

As [stated](#) In the Ministry of Defense of Ukraine, this **information is not correct.**

Secondly, we emphasize that for food supply of armed forces, the Ministry of Defense purchases a comprehensive service for the organization of storage by catalog of products whose prices are already taking into account logistics, in particular, mainly delivery to the areas of fighting. The service of organizing nutrition, in fact, is the format of "food" walks "a prisoner." The price of food organization of a single -aged serviceman is from UAH 137.04 to UAH 144.06 per day.

Third, As a rule, the personnel of the Main Directorate of the Intelligence of Defense of Ukraine during the performance of combat missions are ensured by the same principle as all military personnel of the Armed Forces-thanks to the Ministry of Defense, contracts for food organization services.

We also remind that the Ministry of Defense of Ukraine continues to search for decisions aimed at providing transparent purchases and effective models of food for the Armed Forces of Ukraine. Therefore, in the first half of April, the Ministry of Defense held a meeting with representatives of large trading networks "Kolo", "ATB-Market", "Varus", "Auchan", "Silpo"(Fozzy Group)In order to attach large retailers to the process of organization and uninterrupted supply of servicemen.

The meaningless war of Russia turned the lives of Ukrainian children. The physical effects of this invasion are not easy: daily, on average, they die or get wounded by a four -year -old children.

This is stated in [statement](#) Heads of the UK delegation to Bush Observed.

"My statement will be focused on the long -term psychological influence of Russian children on Ukrainian children, increased movement, violation of the process of education of children's development, as well as horrific human rights violations. Under the stability of these children, deep and long -term scars of injuries are hidden, "the OSCE official's official representative in the OSCE.

The Russian war has led to the movement of about 3.5 million Ukrainian children. Families were broken because their parents faced a difficult decision to send their children to a safe place as they remain in the area. Other children were taken away.

"Separation with parents is a form of injury that gives these children a greater risk of psychological problems. Children who have undergone a long separation with their parents often experience strong fear, panic, grief, depression, helplessness and hopelessness - feelings that should not be expected from the child. The organization of Save The Children reported that on average, children had spent more than 900 hours. 900 hours that children had to spend on training, a group of communication. When children come out of these bins, many are faced with the destruction of their schools, kindergartens and playgrounds. And the objects that stand, parents perceive not as safe places, but as a potential threat of Russian rocket firing, "Nile Bush says.

According to him, despite convictions from the international community, the Kremlin shows any repentance and compassion for the suffering they caused.

"Ukrainian children deserve the future without fragments, bins and armed blocks. The United Kingdom will do everything possible to support Ukrainian protection of her homeland and protect the future of its younger generation, "Nile Bush researched.

Information on the place of detention usually does not affect the speed of exchange of soldiers, often this information is consistent with the coordination headquarters after exchange.

About this [the one was talking](#) During a meeting with family servicemen of a separate Eger Brigade at the Coordinating Headquarters on the issue of prisoners of war.

"For example, when the negotiations agree to return the seriously wounded, then data on where they were kept, we find out after exchange. Or when there is a colonies in which the colonies are kept by our defender, and even in which barracks is not a guarantee that he will be able to pick him up in the near future, "the headquarters explained.

In addition, the meeting discussed the collection of information from those who returned Nagornology.

"Conversations are conducted almost immediately after being released from captivity. Because multi -defenders are in captivity for a long time, so we try to do everything more promptly, "the headquarters representative said.

The coordination headquarters told about details of official investigations of the disappearance of the missing person during the fighting.

"Not always the testimony of brothers are reliable. Even if they take a direct hit in the dugout, but there are no missing defenders, the commander accounts for them as missing. It used to be that after such evidence was then found in captivity," the message said.

According to confirmed data in the Russian captivity, there are currently 19

390 Ukrainian children, forcibly exported by the occupiers to the territory of the Russian Federation.

This was reported by Elena Zelenska during a speech on the PACE debates for considering the results of forced by Russia of Ukrainian children, [informs](#) Office of the President of Ukraine.

The first lady of Ukraine Elena Zelenska participated in the debates, which took place by a shock procedure at the plenary session of the second part of the Session of the Parliamentary Assembly of the Council of Europe. During the meeting, a report was adopted a draft resolution on the topic: "The situation with Ukrainian civilians, in particular with children, forcibly displaced or relocated to the Russian Federation, Ukrainian territories under the actual control of the Russian Federation."

The draft resolution was prepared within the framework of the PACE Committee on Migration, refugees of displaced persons. Speaker - Paulo Sand(Portugal, Soc).

Дружина Президента подякувала учасникам пленарного засідання ПАРЄ за увагу дотеми примусової депортації українських дітей.

«Ця тема дуже болить Україні. Дякую за те, що долучилися до боротьби за наших дітей та їхнє дитинство. У нас кажуть: „Чужих дітей не буває“. Ви доводите цетим, що зараз тут», — зазначила дружина Президента

Олена Зеленська розповіла історії дітей, викрадених російськими окупантами. 12-річний Сашко був із мамою Сніжаною в Маріуполі, коли місто оточили російські військові. Разом вони пережили страшні обстріли, відсутність води, тепла, голод, поранення Сашка. Поки їх не розділили росіяни. Їм не дали навіть попрощатися. Хлопцю сказали, що мама відмовилася від нього. Сашка вдалося звірятувати, але мама все ще в полоні у російських окупантів.

12-річна Кіра також була з татом у Маріуполі, коли росіяни почали нищитимісто. Тато, колишній капітан збірної України з водного поло Євген Обедінський, загинув під час бомбардування. Дівчинку окупанти вивезли в Донецьк. Величезними зусиллями держави, громадських діячів, десятків небайдужих Кіру повернули до бабусі й дідуся.

"These stories show all this terrible technology, as it is occupied by Ukrainian children. Most often - having killed their parents or forced to divorce with families. And they export entire children's homes and boarding schools, "the first lady said.

She stressed that these are stories that have a good end when children managed to turn. There are 361 of them.

"But there is a figure that is even more striking - 19 390. It is the number of children who are still captive. And these are only those data that are confirmed. But this number is final, because what happens to the children in the occupied territories is unknown. For each figure - a broken life not only of the child, but of her family, all who have no rest for months, "Olena Zelenska said.

"It is a violence that lasts right now. Because right now a child is Taksama, like Sasha, they lie that she is not needed, that she has been abandoned. Some kind, like Kira, crying for her parents killed in her eyes. Children, as Matmatvia and his sisters, are prepared for forced adoption. Just now they have a relationship with loved ones, "she added.

The president's wife emphasized that every day, every hour in captivity, the psychic of children and families costs health and life. Therefore, Ukraine requires non -coping of the world - all possible effective help is needed for their liberation.

"I ask to treat this exactly as a call to all our common values. Our idea of good and evil. This is the case when salvage is only the efforts of the world. Let's become such a world for our children. They believed in the world and his people again, after all the experienced, they all the confidence, "said Elena Zelenskaya.

I wish health, dear Ukrainians!

Today, there is an important political result in Strasbourg - at the Council of Europe Parliamentary Assembly. A resolution was adopted, which is recognized that Russia's deportation contains signs of genocide. And this is the first recognition of such a fact at the level of such a high international organization that unites the states of our continent.

To put it practically, this decision will significantly help our global work for the involvement of Russia and its officials, including the leader of the terrorist state, accountable for genocide, genocide policy of anti-Ukraine.

The deportation of Ukrainian children is one of the well -designed elements of Russia to erase the identity of our people, to destroy the very essence of Ukrainians. It is a conscious crime of genocide committed by Russian officials. Sametak should qualify both politically and legally.

Today, the first lady of Ukraine appealed to the PACE - for children, families ... Overparliamentarians and our diplomats worked well. And at all levels - formal and informal, with leaders of states, at parliamentary, government, law enforcement levels, in the legal community and in international immigrant organizations - we will continue to work to return all deported Ukrainian children and for the punishment of Russia. We have been cleared of nearly 20,000 children who have been taken out and scattered across different regions. But it is obvious that it is only part of the much larger criminal offices. Such children can be much larger.

Europe and the world have already seen various deportations and attempts to destroy peoples. It is the Natroian example - the responsibility of this state and its officials, guilty of genocide - we must show all other potential sources of the same evil that impunity will never be again. And the sentences for genocide will be. Similarly, for all other crimes of Russia against Ukraine and our people.

In Nikolaev, the parsing of rubble on the site of the rocket stroke, which was tonight, has already ended. More than 20 wounded, one person was killed ... My condolences and loved ones.

The rockets damaged dozens of ordinary homes, two educational institutions. Calibers against school and college, against residential buildings.

In the evening, another rocket strike was inflicted in Konstantinovka of Donetsk region. The school, hospital, and dwellings were also injured. Unfortunately, there are affected people. But our warriors from the first day of

this battle to protect people and humanity will work absolutely everything! And even more than possible.

Avdiivka-the 35th separate brigade of the Marines. Marinka is our glorious "seventystyevyatka" ... Donetsk direction in general-55th separate artillery "... Thank you, the warriors, for the unchanged efficiency!

The Zaporizhzhya direction-today, as always, there is something to thank the soldiers of our 44th separate artillery brigade. Well done!

Today, he gave his gratitude to the soldiers and commander of the 95th Separate Brigade of DShV, who are very powerfully fighting near Kreminna in Luhansk region.

And separately I want to thank absolutely to anyone who defends Bakhmut and destroys the tamborog as large -scale as the occupier deserved it.

Glory to all our soldiers, who is now in battle, in combat posts, in combat operations!

Thank you all in the world who helps us!

Eternal memory to all whose lives have taken away Russian terror!

Glory to Ukraine!
