US Embassy Kyiv sent an alert to Americans in Ukraine tonight: “In light of the recent uptick in strikes across Ukraine and inflammatory rhetoric from Moscow, the Department of State cautions U.S. citizens of an ongoing heightened threat of missile attacks, including in Kyiv.”

In light of the recent uptick in strikes across Ukraine and inflammatory rhetoric from Moscow, the Department of State cautions U.S. citizens of an ongoing heightened threat of missile attacks, including in Kyiv and Kyiv Oblast. The U.S. Embassy urges U.S. citizens to observe air alarms, shelter appropriately, follow guidance from local authorities, and refer to additional safety information from a previous Security Alert provided below:

- If you hear a loud explosion or if sirens are activated, immediately seek cover.
- If in a home or a building, go to the lowest level of the structure with the fewest exterior walls, windows, and openings; close any doors and sit near an interior wall, away from any windows or openings.
- If you are outdoors, immediately seek cover in a hardened structure; if that is not possible, lie down and cover your head with your hands.
- Be aware that even if the incoming missile or drone is intercepted, falling debris represents a significant risk.
- After the attack, stay away from any debris.

Actions to Take:

- Know the location of your closest shelter or protected space.
- Follow the instructions from local authorities and seek shelter immediately in the event of mortar and/or rocket fire.
- Depart Ukraine when it is safe to do so.
- Ensure travel documents are valid and easily accessible.

The Security Service and the State Bureau of Investigation have exposed a large -scale scheme of financing the DNR terrorist organization. The

equipment operated before the beginning of a full -scale invasion and replenished the "budget" of fighters for a total sum of 50 million in UAH equivalent.

As a result of complex events in Vinnitsa and Zhytomyr, the organizer of the bark was exposed.

The attackers have established the supply of mining equipment from temporarily occupied days to Ukraine -controlled territory.

Such "turnover" provided regular revenues to the "budget" of terrorist organization "DNR" in the form of "taxes" and "fees".

In the future, this money was directed to the logistics of the Eastern Front.

To pass the ban on trade with temporarily captured enterprises of Dilika, the dealers have created a network of fictitious commercial structures in the Zhytomyr region and in Russia.

The calculations were made through the sub-financial institutions of the aggressor country.

Currently, investigators of the DBR have been informed by the three organizers of the Scheme about suspicion of terrorism. Among the suspects is the director and chief accounting of a private enterprise.

Investigation is ongoing to establish all the circumstances of the crime and to be held accountable.

It is planned to submit proposals for the application of sanctions to Russian companies involved in the equipment.

Measures to expose the crime were carried out by SBU staff in Vinnytsia region in the DBR under the procedural guidance of prosecutors.

Each military depends on the success of the operation on a particular preference. The Minister of Internal Affairs of Ukraine Igor Klimenko declared

this on the question of the preparation of the soldiers of the assault brigades of "Guards nozzle".

The head of the department Igor Klymenko said that eight brigades have already been fully formed. Recently, the Guard of the offensive has been supplemented by another brigade - Khartia:

"We will pick up the brigades that have already been formed, they will pass appropriate training-it is 2-3 weeks, and in parallel to form additional units. The task of each of these brigades is to carry out appropriate offensive storms together with forces of defense during military operations."

The Minister of Internal Affairs emphasized that the role of people who volunteered by the Urba Brigades will be significant in the future of the counter -offensive.

"We teach it. Because from each brigade, from each unit, on each military serviceman and a police officer will depend on the success of the operation at the same direction, "Igor Klymenko said.

The head of the Ministry of Internal Affairs said that some units of the Guards of the offensive were formed from scratch, and some - already on the basis of the current, with the formed structure, first of all, logistical:

"In such cases, the" skeleton "of the brigade for success was formed precisely by the servicemen and police officers who have experience of hostilities. These people are just teaching volunteers - young people who first came to Labryad. Also, experienced fighters are commanders at the links of the future fighting. "

Igor Klymenko emphasizes that it is difficult to teach the commander - it is always a long time, and he is limited to us, so in the department they bet on the workers of the hostilities and the experience of managing the units.

Bakhmut is a really heroic page of the Russian-Ukrainian war. Even after the summer, how many Russians did not throw there, they have not been achieved, the city is still under our control. At the same time, we should always remember that the phrase "Bakhmut continues in Bakhmut". Behind her are the most mighty soldiers who keep outside the enemy's logic. And secondly, you should not forget-it is a 24-hour work of headquarters. It is 24/7

of a powerful analytics about all information - up to a second, to a millimeter of everything that is happening. And intellectual approval of the conclusions from this work.

This was emphasized by the Deputy Minister of Defense of Ukraine Anna Malyar in the Evirithelovia Marathon "Unified News".

The Ukrainian Operating European Union is for the efforts to find a solution for the crisis of Ukrainian agricultural imports to neighboring countries, but this problem has yet been unknown to the final solution that should be made in the spirit of solidarity.

This was stated today by Deputy Minister of Economy of Ukraine Taras Kachka during a virtual speech on the Brussels Economic Forum, reports Ukrinform.

"The economic model of Europe should also include Ukraine. Political decision To give Ukraine the status of a candidate country should also be strengthened by economic integration, with greater access to Ukraine and the EU domestic market, which also provides additional advantages for the internal market. But when this happens too fast, it gives rise to all, and this is the situation that we now have with neighboring Member States, "the Ukrainian official said.

He noted that sharp changes in trade policy were caused by political protests by Polish farmers, to which the Poland government responded with a purely political reaction that had a devastating effect for both the EU and Ukraine. Thanks to the intervention of the European Commission, it was somewhat facilitated by the applications, but the final decision has not yet been found.

"That is why we need to move away from political decisions that destroy economic. Last month, the decision of Poland to block Ukrainian agrarian export led to Ukraine's losses of \$ 143 million, which more than the European Commission will pay Polish farmers as a compensation, the capacity of the point of view, for nowhere. Because it was in reality Blef by Polish Ferrars, and the Polish government responded to it in a very strange way, "said Kachka.

He noted that this is exactly the case where the EU-economic policy should be used to ensure the stability of the European economy of this willingness to overcome any crisis in the future.

"And this not only applies to resistance to Russian influences. Russia has an absolutely different attitude to the economy that it wants to put under rigid political control. But such approaches will never work in Europe, they will not work in Ukraine. I would like to emphasize that open market economies the basis for ensuring stability under all conditions, including Russian aggression against Ukraine, "the Deputy Minister of Economy of Ukraine emphasized. As reported, five EU countries - Poland, Hungary, Slovakia, Romania Bulgaria, - asked the European Commission to introduce protective measures against "excessive" agricultural exports from Ukraine, which affects the situation in the market, leads to a fall in prices and prices and thus affects the interests of farmers in the EU -neighboring countries with Ukraine.

On May 2, the European Commission announced a compromise solution, which provides for a prohibition of Ukrainian imports of four key farm goods-wheat, corn seeds of rapeseed rapeseed, with the simultaneous cancellation of unilateral measures of the mentioned anti-Ukrainian imports and the continuation of the Ukrainian seeds. The restrictions will be valid until June 5, and if the situation does not change, may be extended by the end of the year.

This decision was made on May 4 , reports Ukrinform.

"Former Federal Chancellor Gerhard Schroeder is not eligible for the office to perform current tasks," the sentence reads.

The judges noted that the plaintiff, who was Chancellor from 1998 to 2005, as well as other heads of government Before and the afternoon, he had an office in the German Bundestag, which worked the last four of the Federal

Chancellor staff. However, in May 2022, the Bundestag budget committee decided to suspend the plaintiff's powers because he had no current obligations. Thus, the Berlin Administrative Court rejected the Schroeder's Position, who demanded the preservation of the office and employees.

Since the plaintiff received rooms from the SPD deputy group, not the viability of Germany.

The longing of the Taboo on weapons for Ukraine, the more Ukrainian people die, protecting Europe.

This was stated by President of Ukraine Volodymyr Zelensky, speaking to the Parliament of the Netherlands, Ukrinform correspondent reports.

"The longer the taboo is about weapons, the more our warriors give life to pull out the defense when weapons are not powerful or long -range and Russian -

based Russia's more effective than the aircraft of Europe's defenders. Now, all this is, unfortunately. Depends on all of us, "said .

He recalled that the defense of the country, the defense of Europe is people, and therefore the decisions of the separate countries that must protect life and instead retain defense, are simply contradictory. "Defense is people. People who have weapons. More powerful weapons and a more long -range fire, the more lives are saved by detachable hostile blows. To appreciate life and to keep defense taboos with interdestations that must protect life is an obvious contradiction," Zelensky said.

Read also: [Zelensky](#) In this context, the President stressed that Ukraine remembers leaderships well in initiating the PZH 2000 supply and thanks for this bold decision, for Patriot and other weapons. "Remember that the Netherlands was the first to say that the F-16 is not a taboo. Your leadership really gives results. So we will provide new ones!" - the head of state emphasized.

Zelensky expressed his hope that during his next visit he would be able to thank the Netherlands for the defense assistance.

He also thanked the Netherlands for their leadership in Europe, through which Ukraine has reached the greatest unity in Europe, which for decades they had not been, which would not have happened without the Netherlands.

Read also: [Zelensky](#) "I am grateful to you that what you appreciate, you help to defend. The Netherlands protection of freedom, protect the rule of law, protect democracy, protect Europe and our lifestyle with you. Life of free people. That's our way is our Europe. No aggressor now It seems that he can allegedly can be in the fire of aggression of our Europe with you, "Zelensky said.

The Ukrainian Operating European Union is for the efforts to find a solution for the crisis of Ukrainian agricultural imports to neighboring countries, but this problem has yet been unknown to the final solution that should be made in the spirit of solidarity.

This was stated today by Deputy Minister of Economy of Ukraine Taras Kachka during a virtual speech on the Brussels Economic Forum, reports Ukrinform.

"The economic model of Europe should also include Ukraine. Political decision To give Ukraine the status of a candidate country should also be strengthened by economic integration, with greater access to Ukraine and the EU domestic market, which also provides additional advantages for the internal market. But when this happens too fast, it gives rise to all, and this is the situation that we now have with neighboring Member States, "the Ukrainian official said.

He noted that sharp changes in trade policy were caused by political protests by Polish farmers, to which the Poland government responded with a purely political reaction that had a devastating effect for both the EU and Ukraine. Thanks to the intervention of the European Commission, it was somewhat facilitated by the applications, but the final decision has not yet been found.

"That is why we need to move away from political decisions that destroy economic. Last month, the decision of Poland to block Ukrainian agrarian export led to Ukraine's losses of \$ 143 million, which more than the European Commission will pay Polish farmers as a compensation, the capacity of the point of view, for nowhere. Because it was in reality Blef by Polish Ferrars, and the Polish government responded to it in a very strange way, "said Kachka.

He noted that this is exactly the case where the EU-economic policy should be used to ensure the stability of the European economy of this willingness to overcome any crisis in the future.

"And this not only applies to resistance to Russian influences. Russia has an absolutely different attitude to the economy that it wants to put under rigid political control. But such approaches will never work in Europe, they will not work in Ukraine. I would like to emphasize that open market economies the basis for ensuring stability under all conditions, including Russian aggression against Ukraine, "the Deputy Minister of Economy of Ukraine emphasized. As reported, five EU countries - Poland, Hungary, Slovakia, Romania Bulgaria, - asked the European Commission to introduce protective measures against "excessive" agricultural exports from Ukraine, which affects the situation in the market, leads to a fall in prices and prices and thus affects the interests of farmers in the EU -neighboring countries with Ukraine.

On May 2, the European Commission announced a compromise solution, which provides for a prohibition of Ukrainian imports of four key farm goods-wheat, corn seeds of rapeseed rapeseed, with the simultaneous cancellation of unilateral measures of the mentioned anti-Ukrainian imports and the continuation of the Ukrainian seeds. The restrictions will be valid until June 5, and if the situation does not change, may be extended by the end of the year.

The Prime Minister [wrote] about work on the DIZHITALIZATION(https://t.me/Denys_Smyhal/5158)In his telegram channel.

"Certificates go to the military"-this principle we form the basis of reforming the process of passing the military medical commissions. Yesterday, the Supreme Radapiditau was drafted by government officials and parliamentarians after the Nizhnarads and consultations with the participation of military and doctors.

One of them introduces electronic document flow between the military unit of Materiel Centers of Acquisition and Social Support. The document also provides a certificate of the circumstances of the injury - now you do not need to investigate. Documents will be sent electronically to the CCC of the JV within the deadline. Quickly, easily and accessible.

The second project of the law allows you to create VLK in state and communal health care. We have already started expanding the number of VLCs in the country. Now we have a legislative basis for the creation of additional military medical commissions on the basis of civilian medical institutions. This will eliminate the queues and improve the accessibility of the process for our military.

I thank the MPs for the support of the Ministry of Health, the Ministry of Defense, the military and the doctors for their direct participation in the development of documents. We continue the DIABLALIZATION OF SERVICES AND Elimination of Unnecessary Bureaucracy.

The aggressive war of the Russian Federation against Ukraine increased the threat of illegal trash weapons in the EU and other regions - such a message sounded during the time of the working group on small arms of the conference of participants of the Convention on Transnational Organized Crime. However, since 2019, Ukraine has been in the efforts to prevent illegal circulation of weapons, ammunition and explosives.

"We remember misinformation campaigns launched by Russia about this threat. Allow me to emphasize that by this time there was no need for a large -scale illegal circulation of small arms in connection with the war. Let us say that we have a good and wide cooperation with the Ukrainian government, and it is a washing to him for identifying this threat as a priority, "the Vevrosui said.

President of Ukraine Volodymyr Zelensky is on the official visit of the Netherlands today. In the Hague, the head of our country made a speech of representatives of the International Criminal Court in the Hague.

The slogan of the speech: "No peace without justice for Ukraine".

According to Vladimir Zelensky, it is now necessary to stop the crime of aggression, which is due to impunity.

I am sure that will happen when we win. And we will win not only in the bias with aggression. See how the countries of the world are united in helping Ukrainians in the defense - this is the basis of the desire to help. Feeling more than the fate of one country. It is a feeling that it is more than an anti - counter aggressor.

We have to stop the aggressive war as such. We have to stop the crime of aggression, which sometimes appears in the heads of those who are used to impunity. It is the same free door to aggression-if we look at any aggressive in history. We will see that they are united by one single thing. Those who started this did not believe that they would ever have to be responsible for the committed, they would be responsible for the war. But the war must receive condemnation.

Only a full -fledged, not hybrid peace is needed now, says Vladimir Zelensky.

We know that long -term peace after victory can only be achieved thanks to the sides, strong values. It is freedom, the rule of law, the need to provide full justice - not any hybrid substitutes. We cannot allow hybrid immunity. Not a hybrid peace associated with the contamination of hostilities for a certain period. But the true peace, the reality of the right is exactly what we need now, not hybrid forms.

Solution of war is an international crime that is different from the rest of the rays by the fact that it contains all the evil of other crimes.

According to Volodymyr Zelenskyy, only an effective special tribunal, such as after the Second World War, is capable of having a sentence of the antisoner. We want to continue the tradition of mandatory punishment for such crimes of aggression as a guarantee of uniqueness of such aggression. If we want justice, we are innocent to seek justifications, we should not refer to the shortcomings of the current international law. Instead, we must make bold decisions that will correct the shortcomings, which, unfortunately, exist in international law.

The constancy of peace arises as a result of full justice, including a lesion against the aggressor. The aggressor must feel the fullness of justice against it is our historical responsibility.

We need to have a true, complete tribunal, true full -time, - said Volodymyr Zelenskyy.

In the Ministry of Defense, responding to the appeals of the Armed Forces of Ukraine, jointly worked proposals for changes to the legislation on reducing the marginal age of the recruitment of citizens on military accounting of conscripts from 27 to 25 years, [reports](#) Military Media Center.

The changes are dictated by the fact that during the legal regime of the military, the need to stay citizens on military accounting of conscripts up to 27 years.

First, the need for their annual arrival in territorial centers of completing and social support, including for medical examinations, leads to additional financial costs, load on medical workers and increase queues for HCP. While no call for term service during martial law is not carried out.

Secondly, prolonged military registration of conscripts during the action of the war, leads to the fact that a significant number of citizens who do not have the status of military service cannot be unrelated to military service during mobilization.

Considering the considerable attention of society to issues related to the military and mobilization, it is worth noting that all initiatives of Ukraine's siloboplants aimed at strengthening the defense capability of the state, are grounded, agreed with other governmental and security structures, aiming to win the process of winning. !

Every common step, every government decision, every change to the law is a response to a large -scale invasion of Russia in order to strengthen our defense capacity. Each such solution is undergoing a rigid test in the conditions of the state.

"Thank you for supporting sanctions against Russia and help packages for our state and people," said Volodymyr Zelenskyy.

During the negotiations, the parties focused on security issues. As the President of Ukraine stated, now the main thing is the speed in the supply of extorting weapons.

"I called on partners - both the Netherlands and Belgium - to assist us in the maximum quickly implement weapons agreements. It is very important - we work on the creation of a coalition of armored vehicles in the continuation of the coalition of tanks. We deliver that the Netherlands and Belgium, together with the countries of Northern Europe, Tavsim, partners will effectively support our initiative to start the coalition of armored vehicles, "the Head of State said.

In addition, according to Vladimir Zelensky, it is time to make positive decisions on modern aircraft.
