The luminosity is what is the fundamental role of Ukraine's marine exports for food security.

Volodymyr Zelenskyy said this in [video closer](#) , reports Ukrinform.

Video: [Presidential Office](#)

I wish health, dear Ukrainians!

Today is a working trip to our Odessa.

He thanked our soldiers here for the protection of the region and all Ukraine. In particular, he visited the hospital, our wounded defenders. He wished a speedy recovery. There was an honor to hand over state awards. He thanked our doctors.

He held a special and long -term meeting on security and social confidence in the region. The management of the region, military, law enforcement.

The area is a priority in all views. It is Odessa region that is one of the foundations of our south, and therefore the state.

Very important results are in Odessa region in the Security Service of Ukraine in the counter -fighting sabotage.

There was a report by General Moskalov on the situation in the areas of responsibility Odessa. Detailed how to strengthen the defense.

They discussed in detail economic issues, jobs, social disabilities.

Held a field meeting. The constant attention of the front. Reports of commander - "Khortytsia", "Tavriya", head. Special reports of GUR and SBU leaders. Details - later. Special attention is our grain corridor, safety in the marriage.

The world knows what fundamental role our marine grain export plays for food security. And in general, the safety in the Black Sea, the effectiveness of international law against navigation is a globally important security facility. All the maritime countries of the world now see that they can threaten their exports, their waters if Russia gets off the hands of the navigation of the navigation of the Sea.

Here is just one example. Currently, of the three ports that were agreed within the Small Sea Grain Initiative, the Southern port is actually blocked. About one and a half million tons of agricultural products have been accumulated in one "Southern". At least ten countries, including Turkey, Egypt, Bangladesh, and China, are expected. Obviously, the less food is supplied to Kamirain, the higher the prices of food there, the more people lose from their family budgets. And I thank everyone in the world who helps us to increase the safety space of the Sea, who presses on Russia to unlock food supply.

He also held a meeting today on the development of our port infrastructure.

And one more.

We are working to ensure that the second half of this week is meaningful to our partners. Our internationalists do everything to make this week be able to complete the news with the necessary news.

And now I thank the United States of America, personally by Biden President, the Baydent, and every American - all who value freedom - for a new defense package for our soldiers. Petriots missiles, Himars missiles, artillery and other weapons. Need right now!

Glory to all our soldiers, who is now in battle for Ukraine, who is on combat missions. Thank you all who work for our country!

Thank you, Odessa, for this day!

Glory to Ukraine!

The U-LEAD ZEVROPE program will create a straw fuel briquette, which will heat the kindergarten, with the support of the U-LEAD ZEVROPE program.

As Ukrinform reports with a link to [site](#) U-LEAD, there will also be implementing the energy management system and spreading the use of biofuels to other municipal establishments and households.

"The communities of the Kherson region in a very difficult situation: part is occupied, some suffer from shelling, trying to restore the destroyed infrastructure. It is important that with the support of the U-LEAD Berislav community, it is possible to improve the project that will give it hope for energy independence, create additional workplaces, improve ecology and help economic development. It is sure that this practice of the Berislav community will be an example for others, " U-LEAD with Europe "in the Kherson region Oksana Silyukova.

Russia's armed aggression against Ukraine, nine -month occupation and hostilities under the Beryslav community provoked powerful energy. Destroyed high -voltage transmission lines, damaged gas distribution systems. Infrastructure restoration requires considerable money. Therefore, in the community, they decided to create an alternative to coal and gas and use local biofuels - straw for heating buildings.

With the support of U-LEAD with Europe, the project "Improving the energy independence of the Berislav city community by creating fuel briquettes" is being implemented here, which provides for the organization of production of briquettes of the power management system. The local U-LEAD subsidy was held on this initiative by the NGO Ber and Slava.

The community is agrarian. After de -occupation and demining in its territory, several agricultural enterprises are functioning in its territory, which can ensure the supply of large volumes of straw.

"As part of the project, we acquire a line for the production of fuel briquettes with a capacity of 300 kg of finished briquettes for 1 hour. The trial batch of products will be useful for heating one of the kindergartens of our community. And the raw material we are consumed from local agrarians, " - said the head of Nataliastarodubets Natalia. Activists plan to popularize alternative fuel and carry out information and explanatory measures for community residents.

Farmers will talk about the importance of processing straw for fuel and the benefits of supplying this raw material. "The creation of briquettes will develop our community. Every year after the harvesting fields and the Beryslav community, a huge amount of straw is stamped in the Beryslav district. If it is recycled into fuel bryquets, you can

save high -calorie coal. In addition, ownership sources of energy can become a powerful incentive for the development of a local economy, "Starodubets said.

Straw briquettes are an inexpensive, environmentally friendly, calorie fuel that responds to the European standards. They can be burned in large boiler rooms and small boilers, tubs, and furnaces. In the process, the unpleasant odor does not spread, they are smoky, do not shoot, do not form soot and carbon monoxide.

In 2023, the European Union was imported from the European Union to Ukraine, which was 285 million euros exceeded by the 285 million euros of the 285 million euros and by the export of the ZACAGEGRAPHIP 2022 and by 107 million euros - the indicator for the first quarter 2021.

According to Ukrinform, it reports [press service of the Ukrainian Clubagrarian Business](#).

Зазначається, що безпосередньо з Польщі до України за результатами першого кварталу 2023 року було імпортовано агропродукції майже на 262,7 млн євро. Цей істотно більше, ніж імпорт за аналогічний період 2022 року (nearly 93.2 million euros) and 2021 (Almost 76 million euros).

В УКАБ зауважують, що, крім безпосереднього імпорту, до переліку ввезеної до України продукції також входить і гуманітарна допомога у вигляді харчових продуктів, що надається європейськими країнами, зокрема Польщею.

According to the Association, the EU trade with Ukraine was severely affected by the coming -wide invasion of Russia, but in December 2022, the share of Ukraine in EU exports to third countries was higher than the pre -war level(1.5% of the fucking compared to 1.2% in February 2022).

Загальний імпорт агро-харчової продукції з ЄС до України скоротився з майже 3,2 млрд євро у 2021 до 3 млрд євро у 2022 році, але деякі держави - члени ЄС змогли наростили свої поставки агропродукції.

Зокрема, експорт агро-харчових товарів з Польщі до України за 2022 рік зріс на 133 млн євро (+16%)- up to 945 million euros.

Experts explain that growth [import](#) Part of the product groups was caused by lack of products in the inner market of Ukraine. It is primarily about the products of the vegetable group; some meat and milk products and eggs; as well as about alcoholic and non -alcoholic and tobacco products(Some transnational factories stopped work in 2022 and replaced their products with imports from Poland).

Thus, according to the Union of Flour Meals of Ukraine, Ukrainian producers were partially displaced from the Ukrainian retail of other regions of Ukraine by cheaper Polish and Turkish products(paste, pasta, etc.). В асоціації наголошують, що здешевлення продукції відбулось за рахунок використання у виробництві менш дороговартісного українського зерна, що було імпортоване до Польщі та Туреччини, починаючи з другої половини 2022 року.

Читайте також: [Кабмін заборонив експорт цукру](#) The identical situation in the Ukrainian market has developed with dairy and meat products, the UKAB noted.

At the same time, due to the lack of liquid funds, Ukrainian producers lose European suppliers in the Battle for a place on the supermarket shelf - retail will be a prerequisite for a rather long time of refund for sales.

Considering the stable economic situation, the lack of hostilities of and ballistic challenges, European companies have the best positions for the implementation of Ukrainian retail.

If this trend is maintained in the UCAB, there is a risk of further demanding of Ukrainian grain processors and producers of flour milling products in international(including European)manufacturers. This, in its own, will have a significant negative impact on the internal processors of grain production.

According to Ukrinform, according to the Institute of Agrarian Economy, the EU in the first quarter of 2023 became the largest supplier food to Ukraine.

The luminosity is what is the fundamental role of Ukraine's marine exports for food security.

Volodymyr Zelenskyy said this in [video closer](#), reports Ukrinform.

Video: [Presidential Office](#)

I wish health, dear Ukrainians!

Today is a working trip to our Odessa.

He thanked our soldiers here for the protection of the region and all Ukraine. In particular, he visited the hospital, our wounded defenders. He wished a speedy recovery. There was an honor to hand over state awards. He thanked our doctors.

He held a special and long -term meeting on security and social confidence in the region. The management of the region, military, law enforcement.

The area is a priority in all views. It is Odessa region that is one of the foundations of our south, and therefore the state.

Very important results are in Odessa region in the Security Service of Ukraine in the counter -fighting sabotage.

There was a report by General Moskalov on the situation in the areas of responsibility Odessa. Detailed how to strengthen the defense.

They discussed in detail economic issues, jobs, social disabilities.

Held a field meeting. The constant attention of the front. Reports of commander - "Khortytsia", "Tavriya", head. Special reports of GUR and SBU leaders. Details - later. Special attention is our grain corridor, safety in the marriage.

The world knows what fundamental role our marine grain export plays for food security. And in general, the safety in the Black Sea, the effectiveness of international law against navigation is a globally important security facility. All the maritime countries of the world now see that they can threaten their exports, their waters if Russia gets off the hands of the navigation of the navigation of the Sea.

Here is just one example. Currently, of the three ports that were agreed within the Small Sea Grain Initiative, the Southern port is actually blocked. About one and a half million tons of agricultural products have been accumulated in one "Southern". At least ten countries, including Turkey, Egypt, Bangladesh, and China, are expected. Obviously, the less food is supplied to Kamirain, the higher the prices of food there, the more people lose from their family budgets. And I thank everyone in the world who helps us to increase the safety space of the Sea, who presses on Russia to unlock food supply.

He also held a meeting today on the development of our port infrastructure.

And one more.

We are working to ensure that the second half of this week is meaningful to our partners. Our internationalists do everything to make this week be able to complete the news with the necessary news.

And now I thank the United States of America, personally by Biden President, the Baydent, and every American - all who value freedom - for a new defense package for our soldiers. Petriots missiles, Himars missiles, artillery and other weapons. Need right now!

Glory to all our soldiers, who is now in battle for Ukraine, who is on combat missions. Thank you all who work for our country!

Thank you, Odessa, for this day!

Glory to Ukraine!

The Secretary General of the North Atlantic Alliance Jens Stoltenberg, speaking on Tuesday on May 30, 2023 in Oslo, announced that on the eve of NATO summit, and during him, allies of Ukraine would have some decisions that would help to win the war against Russia.

About it [reports](#) NATO press service.

“Putin's aggressive war against Ukraine marks the end of the world we have known it. What we decide to do and do not do now determine what to look like in the coming decades. We are now approaching [NATO Summit(<https://armyinform.com.ua/2022/11/09/nastupnyj-samit-nato-vidbudetsya-vlitku-2023-roku-v-lytvi/>)]. Коли лідери НАТО зустрінуться, я очікую, що вони підтвердять та посилять нашу підтримку України. На словах тана ділі. Я очікую, що напередодні та під час саміту буде більше заяв та нових рішень. Ми не повинні дозволяти путіну продовжувати урізати європейську безпеку, і для цього нам потрібна структура, яка забезпечує довгострокову безпеку України», — сказав Єнс Столтенберг.

Він додав, що зараз НАТО працює над багаторічною програмою для України, щоб допомогти їй перейти від старих стандартів радянських часів до сучасних стандартів і обладнання НАТО, а також допомогти Україні наблизитися до НАТО.

«Всі союзники з НАТО згодні з тим, що двері НАТО відчинені; всі згодні з тим, що Україна стане членом; і всі згодні з тим, що вирішує Україна і країни-члени НАТО, а не Росія. Але найголовніше зараз — зробити так, щоб Україна перемогла. Це наше найважливіше завдання. Інакше не буде про що говорити в майбутньому», — наголосив Генсек НАТО.

It is noted that the area of each object is more than 4,000 square meters. The pre -complex will be included:

points for conducting investigative actions and research on bodies;

refrigerator with refrigerators for 1000 seats;

warehouses with coffins and other funeral decorations;

A mournful hall.

The intelligence agencies have been assumed that the cost of construction of a complex for the rated occupiers in Rostov-on-Don is about 600 million rubles, and UcCursk-more than 800 million rubles. The cost of refrigerator equipment is valued at more than a billion rubles for each complex.

The Main Directorate of Intelligence of the Ministry of Defense of Ukraine also states that terrorist Russia is no longer able to hide the scale of personal losses of personnel against Ukraine. The construction of these complexes in the territory of Muscovy confirms the fact that the Putin regime sends its occupying army of the frozen conveyor, but does not cope with the flow of the dead.

The GUR of the Ministry of Education and Science of Ukraine reminds that every Russian soldier who is not committed by crimes has the opportunity to be captured. Otherwise, its clover is waiting for one of the sorting bases for corpses in Russia.

Канцелярія польського президента.

«Для росіян людське життя нічого не означає, для українців кожне життя — навагу золота. Це — інша культура. Росія — ядерна держава, у неї — гіантські склади зброї. І нічого сміяється, коли вона викочує танки 1960-х років, бокожен танк важить тонн 50-60. Якщо він рухається, то давить, незалежно відтого, чи він сучасний. Путін програє війну, коли російську армію будевідкинуто від міжнародно визнаних кордонів України. Тоді ми скажемо, що вонинічого не виграли від цієї війни, що їхній план поневолення України провалився, їхні імперські амбіції були покарані, вони втратили сотні тисяч людей», — сказав польський президент.

Спільний обов'язок країн Заходу — підтримати Україну

Президент Польщі застеріг: російська економіка переходить на військові рейки, і роспропаганда зробить усе, аби переконати людей, що вони повинні затягнутіться тугіше. І навіть якщо росіяни будуть голодними, пропагандисти промиватимуть мізки громадянам, мовляв, ті повинні пишатися, бо росія начебто велична.

«Сьогодні наш спільний обов'язок як співтовариства Заходу, частиною якого є і Польща — підтримати Україну. Ми розуміємо, що російський імперіалізм відроджується і якими будуть наслідки. Ми розуміли, що малося на увазі, коли росіяни побудували «Північний потік» в обхід Центральної Європи. Ми чудово розуміємо, що означає російський енергетичний шантаж. Ця пам'ять — у наших сім'ях», — нагадав Анджей Дуда.

Лише поразка РФ ознаменує настання безпечних часів для світу

Водночас глава Польщі пояснює, чому країна однією з перших після початку широкомасштабного наступу росії на Україну зголосилася допомогти українським біженцям.

He added that only Russia's defeat will marry the onset of safe times for the world.

“We know that only the victory over Russia means that we will be safe - the Baltic States and Poland, as well as the countries of Western Europe.

I remind my colleagues from France that they were also in Paris in Napoleonic Epoch , ”Andrzej Duda said.

_ I wish health, dear Ukrainians!_

Today is a working trip to our Odessa.

He thanked our soldiers here for the protection of the region and all Ukraine. In particular, he visited the hospital, our wounded defenders. He wished a speedy recovery. There was an honor to hand over state awards. He thanked our doctors.

He held a special and long -term meeting on security and social confidence in the region. The management of the region, military, law enforcement.

The area is a priority in all views. It is Odessa region that is one of the foundations of our south, and therefore the state.

Very important results are in Odessa region in the Security Service of Ukraine in the counter -fighting sabotage.

There was a report by General Moskalov on the situation in the areas of responsibility Odessa. Detailed how to strengthen the defense.

They discussed in detail economic issues, jobs, social disabilities.

Held a field meeting. The constant attention of the front. Reports of commander - "Khortytsia", "Tavriya", head. Special reports of GUR and SBU leaders. Details - later. Special attention is our grain corridor, safety in the marriage.

The world knows what fundamental role our marine grain export plays for food security. And in general, the safety in the Black Sea, the effectiveness of international law against navigation is a globally important security facility. All the maritime countries of the world now see that they can threaten their exports, their waters if Russia gets off the hands of the navigation of the navigation of the Sea.

Here is just one example. Currently, of the three ports that were agreed within the Small Sea Grain Initiative, the Southern port is actually blocked. About one and a half million tons of agricultural products have been accumulated in one "Southern". At least ten countries, including Turkey, Egypt, Bangladesh, and China, are expected. Obviously, the less food is supplied to Kamirain, the higher the prices of food there, the more people lose from their family budgets.

That is, the blockade of one port in Ukraine creates extremely serious risks for different peoples. Moreover, in particular for those, which Russia still has to speculate.

And I thank everyone in the world who helps us to increase the safety space of the Sea, who presses on Russia to unlock food supply.

He also held a meeting today on the development of our port infrastructure. And one more. And now I thank the United States of America, personally by Biden President, the Obsec Parties of Congress and every American - to all who value freedom - for a new defense package for our soldiers. Petriots missiles, HIMARS missiles, artillery and other weapons. Need right now!

Glory to all our soldiers, who is now in battle for Ukraine, who is on combat missions. Thank you all who work for our country!

_ Thank you, Odessa, for this day!_

Glory to Ukraine!
