As previously reported, our warriors destroyed another precious hostile helicopter KA-52, known as the "alligator". With the assistance of the United

Tavriya defense forces, the Armyonform became known to be famous for how the analogue "alligator" followed the Russian military ship.

The pilot of the Russian helicopter quietly controlled the combat car. It was very confident that it was moving above the temporarily occupied territory of thawing below twenty meters, and the distance to Ukrainian positions was overwhelming. Performing the maneuvers at such a distance, the "Putin - screenwriting" felt almost invulnerable.

The Ukrainian Marines, near the positions of which, had a Russian helicopter, were otherwise thought. The sub-air defense of a separate Marine Corps named after the counter-Admiralhail of Bilinsky performed the task of covering during counter-offensive. Marpitch with a call sign "Summer" visually determined the target that was identified as a "Russian shock helicopter KA-52".

The missile, launched from Igla MSrk, hit the tail of the helicopter. Further, "summer", along with the brothers, watched a picturesque picture: praised "alligator", leaving behind the fatty thick smoke, began to lose its height sharply and disappeared from the field of view for a few seconds.

Subsequently, the observers who were in the infantry units of the brigade received confirmation of the affected target. The Alligator has fallen in a territory that is still under the control of the occupiers. So, another praised Russian "alligator" has turned into scrap, which spoils the amazing landscapes of the Ukrainian nature. "But this is a temporary phenomenon," our Marines say.

Kamianskaya Sich Nature Park

The State Inspectorate has already calculated indicative losses for these territories and they are colossal. More than UAH 15 billion, Kamianskaya Sich, for the Great Lug National Park - over UAH 73 billion.

This is stated in [material](#) at the official website of the environment and natural resources of Ukraine.

"It is projected that the area of land in these parks will increase by thousands of gigectors, almost twice. The National Park "Great Meadow" - for more than 7 thousand hectares, "Kamianskaya Sich" - for 5.5 thousand hectares ", - quotes the website of the Minister of Environmental Protection and Natural Resources of Ukraine Ruslan Stilts.

According to him, at a time when today the whole civilized world notes the fight against desertification and droughts and directs efforts against this problem, we are talking about the consequences of Russian terror on Ukrainian land. The world has no right to forgive this environmental terror of the aggressor country. Armed aggression of Russians is not only losses here and now. These are global challenges for future generations.

"Recently flowering areas and fertile soils can turn into a desert. This will lead to a rise in temperatures and deepen the climatic crisis. Increase drought and extreme weather phenomena. The world must understand that such actions of the country-terrorist destroys not only Ukraine. The consequences will feel everyone. The aggressor is hungry whole continents. After all, our supply depends on the life of people in the Middle East and Asia. And this is about 400 million people, "Ruslan shook.

"In order to restore these territories to the natural state, the animal tassel will be recreated for decades. Mindovil's experts already work over development of such programs and events. Everyone in its place does what Ukraine has to victory, "the ministry said.

This week, the Central Election Commission of the Russian Academy of Sciences decided to hold in September "elections" in the territories of Ukraine temporarily occupied by Russia, which is an violation of international law.

This is stated in [statement](#) Leading foreign affairs spokesman and security policy of the European Union, published on the EU's official website.

This is another vain attempt to make a legitimization of its illegal control and annexation attempts to annexation of Donetsk, Lugansk, Zaporizhzhya Tacherson regions of Ukraine, the Autonomous Republic of Crimea and the city of Sevastopol.

The statement emphasizes that such a decision seriously violates the UN Statute, Independence, Sovereignty and Territorial Integrity of Ukraine. In Russia, there are no legal grounds for any such actions in Ukraine.

“Russia, its political leadership and all those involved in the organization of such such elections will have the consequences of their illegal actions. The European Union is adamant in its support of Ukraine. Russia must immediately withdraw all its troops and military equipment from all over its territory within its internationally recognized borders, ”the document states.
