This was told during an interview with Dmitry Komarov Minister of Defense of Ukraine Oleksiy Reznikov. He noted that situational awareness on the battlefield, which would be used to UAV, is very important.

He stressed that in turn the Russians were afraid to report on the loss of the territory. They could keep it secret for several days. Therefore, when their commanders, who reported for logistics, thought they were in the rear 50-60

kilometers from the front line, and their Ukrainian military was surrounded by the Ukrainian military. They were shocked that the Ukrainian army can already be here. Proper competent planning with the use of all forces and means, situational identity gives preference.

Minister of Defense of Ukraine Alexei Reznikov [congratulated](#) Ukrainian infantrymen with a professional holiday:

“Pychotin warriors are the basis of the Ukrainian army, one of our respects!

With their blood and titanic effort, they restrain the Russian aggressor, fight fierce battles with the enemy, bite into every centimeter of Ukrainian land and fight to victory. It is now that the mechanized, infantry, mountain and assault units and units of the Land Forces of the Armed Forces of Ukraine have the greatest burden of trials. They are the first passionately meeting the enemy when they are the fortifications of the same fortifications.

The professional holiday of the Ukrainian infantry, which our warriors now celebrate in Okopakhna, in training or in battle - another opportunity to repeat:

we are proud of more defenders and defenders who serve in the infantry and take the winner every day!

We pay tribute to all the infantry soldiers who gave their lives for the sake of our non-volatility and the future!Eternal memory and eternal glory!

Glory to the Ukrainian infantry!Glory to Ukraine!".

The Commander of the Land Forces of the Armed Forces of Ukraine, the General-General of Syrsky [posted](#) In Telegram:

“Dear warriors, infantrymen!

Today we celebrate our professional holiday!

It is a holiday of steel and courageous men. Infantry is about endurance, courage, courage and heroism. And about character - it is the basis of stability.

As Karl Clausewitz wrote, the concept of "power of character" is about the firmness of beliefs. It is indifferent whether the latter are the conclusions of a foreign or own system of views, whether they arise from the principles, norms, instant impressions and any other manifestations of the mind.

Infantrymen - always where it is difficult!

In recent years of the war, you have shown that even in the most difficult situations, it is possible to break the course of events in your own benefit. And even where the enemy is numerically, it is possible to conquer the Ukrainian land.

Successful counter -offensive operations have become possible due to the clear discipline of infantry.

Today, the holiday is not only the Land Forces, but also the defenders of the territorial defense, landing troops, the Marines and all who hold the front line, where heavy fights are going on.

Eternal honor to fallen heroes who gave their lives in the fight against Pidlagressor. Glory to all who continue to fight and fearlessly destroys enemies.

I am convinced that in the near future Ukrainian infantry will lift the Ukrainian label above Deoocupovan Donetsk, Lugansk and in the Crimea.

Happy infantry, our dear defenders and defenders of Ukraine!

Glory to Ukraine!".

In addition, it is important to prepare a childhood from childhood, - Oleksireznikov said in an interview. - I believe that we do not need a fixed service, but there should be a better approach, perhaps an analogue of the Swiss reservist variant.

He also added that after the victory of Ukraine, it is obligatory to take place in the Nonurnberg-2, where the Russian killers will be tried.

-There must be an international court where Russian criminals, their military-political leadership should be on the defendants and obtain their sentences. It is important for history, for descendants and for them, in particular, to understand that responsibility will necessarily come, - the Minister of Defense of Ukraine emphasized. -Polony women are a particularly sensitive topic. They must be repatriated, that is, returned without any conditions. At the same time, it is important to support the little Ukrainians who have been waiting and continue to wait for their moms from captivity. Therefore, this harmful event for our little Cossacks and Cossacks, - said the representative of the coordination headquarters Bogdan Okhrimenko.

The most often orders such souvenirs from the United States, Canada, Japan and European countries. People perceive this more as a gesture in support of our country. It is important for them to get involved in this support. One of our work is to cooperate with the coordination headquarters on the issues of prisoners of war,-added the representative of the Gate Toukraine Charitable Foundation Marina Dyakun-Rudyuk.

- I want to thank everyone who has joined the help of the families of prisoners, everyone who helps to exchanges. We all wait for our family, brothers, friends. It is very painful for me to talk about it and I try to do everything I can accelerate and help children, - said the director of the charitable organization "Ukrainian Foundation" Mriya "Yulia Payevskaya, who survived captivity.

- Women who are captured are the most vulnerable category in this war. For many months, some even for more than a year, they live without knowing anything of the loved ones, knowing nothing about their children. Russia neglects all the provisions of the Memorial Convention, so it does not provide information about the people who are captured, does not allow them to communicate with families, - said Natalia Kravtsova, a representative of Natalia Kravtsova.

Now I will start picking up words to convey the real atmosphere of the meeting and not to raise the protocol.

The meeting was emotional and frank. Irene Fellin is very well aware of our war and sincerely ill for the fate of Ukraine and Ukrainians.

Irene has heard my speech at an international event in Portugal on the problems of women of icholovik in the Armed Forces, which arose from a full - scale war, and now wanted to talk about it in more detail.

Yes, there are things that can only be discussed in such a personal meeting format.

Irene Fellin is grateful for indifference and active position. "

"Today, Ukraine celebrates the courage and strength of the infantry warriors- what gives the state the most important result, the indomitability of our defense.

The state is standing because you are fighting with dignity - together with all Ukrainian forces and security! Thank you for it!

Every time Ukraine speaks with the world, the combat achievements that our warriors are being presented is an extremely convincing argument.

It is not easy to get rid of many years of illusions about Russia-the state has made a lot of the world to consider that this evil is insurmountable.

But Ukrainians, Ukrainian warriors, Ukrainian infantry warriors demonstrate how evil is over.

The stability and courage of each of our soldiers destroy the illusions of the world - change history. Everyone and everyone who is gaining success in battles pushes the world to be along with our power - to be on one side of history with Ukraine, " - said In his speech, state.

The founder of the Wagner PEC Yevhen Prigogin and Chechnya Ramzan Kadyrov's leader intend to accuse the Russian Ministry of Defense of the Russian Federation of Bakhmut.

This is stated in Institute of War Study(Isw), reports Ukrinform.

Analysts recalled that Prigogine and Kadyrov announced the intention to replace the "Wagner" in Bakhmut by Akhmeta militants.

"Prigogine and Kadyrov are probably aimed at presenting the Russian Defense Ministry of Tararegular Russian troops as ineffective and establishing conditions to establish the Ministry of Defense in the failures of Russia in the Bakhmut region," the expert institute said.

The ISW notes that in the decision of Prigogine to transfer responsibility for Bakhmutboy Kadyrov intentionally do not mention the VDV of Russia, which are already operating in the semi -nerve and southern flanks of PEC "Wagner" around Bakhmut.

At the same time, this decision reflects distrust to the Russian military command and positions it as non -volatile from the Russian military department. In addition, the Prishozhin tries to "keep his face" if Wagner is not able to get a bakhmut, and to avoid a repetition of the situation with Soledar, where the RFFV Ministry of Defense was responsible for the city's seizure, experts say.

Read also: [**Casting**](#) In their opinion, Kadyrov, in turn, could receive a positive reputation effect from participating in such a high -profile operation, based on the "personal polypular" of Prigogine.

The ISW points out that such rotation of the "Wagnets" on "Akhmatov" can be the conditions for accusing the Ministry of Defense of Russia of inability to support their efforts.

At the same time, analysts noted that the assumption of Kadyrov that he would be able to quickly move deep into Bakhmut and capture the city, are "typical for his boasting" and does not reflect the tactical situation in the region.

As it was reported, the other day the head of the private military company "Wagner" Yevgenprgozhin stated that since May 10 he would withdraw from Bakhmut of the Donetsk region of his landman. He called the refusal of the Russian Ministry of Defense to give them a complicated amount of ammunition.

Ukrainian activists in Berlin hope that the Russians will not allow to use such symbolism as St. George's tape.

This is stated in a statement by the Association of Ukrainians Vitsche Berlin, which is in charge of Ukrinform.

It noted that on May 6, the Berlin court suspended the prohibition released by the police on May 5, on the use of Russian and Soviet works and St.

George's tape during May 8-9. Earlier, he was convicted of the ban on the use of Ukrainian and symbolism.

"We believe that the demonstration of St. George's tape is a criminal offense with the current legislation, since since 2014 it has been used for the decision and glorification of Russia's attack on Ukraine. In addition, he distorted the Second World War and serves the Russian propaganda for "Ukrainians as Nazis". Therefore, it is not surprising that the urgent application of Narodian flags and St. George's tape came from the Russian propagandist Elena Kolbasnikova and right extremist lawyer, the taletics of Marcus Beziht, "the statement said.

Read also: [**Berlin**](#) Unlike the "Ukrainian case", Berlin police have already filed a complaint from the Administrative Court of Berlin-Brandenburg. Vitsche hopes that the City will consider the use of the symbolism of the Russian aggressor as soon as possible and will not allow it.

Last year, Berlin authorities banned the use of both Ukrainian works and symbolism, including the performance of songs and Russian. This year, for the purpose of "preserving the order", the law enforcement officers decided to apply again in the three greatest places of commemoration of the dead Soviet people. Vitsche has filed a urgent complaint and achieved the cancellation of the police.

President of the International Olympic Committee(MOK)Thomas Bach commented on the return of Russian and Belarus to international competitions.

He made his statement in Chinadaily, Ukrinform reports.

"Now we are making every effort to fulfill the mission, to implement the proposals of the Olympic movement, returning athletes with Russian or Belarusian passports to international competitions. We are very closely cooperated and exchanged with international federations that are responsible for this moment. We very much hope that this mission can be fulfilled on the conditions that athletes from these two countries take part in neutral status to take part in the two countries to participate. We could really unite the whole worldlympian games in Paris," Bach said.

The IOC President also commented on the interference of governments around the world with the admission of Russians and Belarus to international competitions.

"You know the statements of governments who want to decide who can participate in the Volhlympic Games, international sports competitions and who are not. We must be very solid so that these decisions are made by responsible sports organizations. I think governments have the right to express their position. But they also realize that any type of boycott will punish only their own ports and will deprive their people's opportunities to be proud of the performances of the athlete Olympiad," Bach added.

Ukraine is unchanged in this regard: while in Ukraine it is long, aggressor countries should not be admitted to competitions in any status, even under a neutral flag. In case of admission of Russians and Belarus, the Ukrainian national team can boycott the Olympics.

Ukrainian activists in Berlin hope that the Russians will not allow the use of symbolism as a St. George's tape.

This is stated in a statement by the Association of Ukrainians Vitsche Berlin, which is in charge of Ukrinform.

It noted that on May 6, the Berlin court suspended the prohibition released by the police on May 5, on the use of Russian and Soviet works and St.

George's tape during May 8-9. Earlier, he was convicted of the ban on the use of Ukrainian and symbolism.

"We believe that the demonstration of St. George's tape is a criminal offense with the current legislation, since since 2014 it has been used for the decision and glorification of Russia's attack on Ukraine. In addition, he distorted the Second World War and serves the Russian propaganda for "Ukrainians as Nazis". Therefore, it is not surprising that the urgent application of Narodian flags and St. George's tape came from the Russian propagandist Elena Kolbasnikova and right extremist lawyer, the taletics of Marcus Beziht, "the statement said.

Read also: [**Berlin**](#) Unlike the "Ukrainian case", Berlin police have already filed a complaint from the Administrative Court of Berlin-Brandenburg. Vitsche hopes that the City will consider the use of the symbolism of the Russian aggressor as soon as possible and will not allow it.

Last year, Berlin authorities banned the use of both Ukrainian works and symbolism, including the performance of songs and Russian. This year, for the purpose of "preserving the order", the law enforcement officers decided to apply again in the three greatest places of commemoration of the dead Soviet people. Vitsche has filed a urgent complaint and achieved the cancellation of the police.

Therefore, with water - water. The misery is terrible. Even in the heat of the water level, the water level of water is not enough for Mariupol, and the blocked Kalchik will not allow the reservoir to be restored, " - explained Vandrunchenko.

"... To realize - thoughtlessly. The project referred to a water -clever plant and the construction of a factic water intake of two reservoirs - the old Crimea and Pavlopolsky. Falling into the details, the Russians decided to combine these two reservoirs now," Andryushchenko said.

He stressed that it could solve the problem - but there is a nuance.

"Pavropol reservoir should be replenished through Kalmius with the Siversky Donets's Done to work that does not work(Why is there no water of Donetsk). У підсумку, якщо зроблять, то просто вб'ють одночасно дваводосховища та всю флору/фаяну навколо. Остаточно", - додав радник мера.

Russian aggression against Ukraine has negative consequences for Asia and the world, so in the interests of the countries of the region to take a clear position in support of the state and the UN Charter.

This was stated by the Minister of Foreign Affairs of Ukraine Dmytro Kuleba in the online existence of the Asia Center of Harvard University(USA).

«Азія знаходиться в епіцентрі тектонічних зсувів у системі міжнародних відносин, які відбуваються через російську агресію проти України», — заявив він.

Міністр підкреслив, що азійський регіон протягом десяти років виступав глобальним агентом змін: його держави вибороли незалежність, перемогли імперіалізм, віднайшли власний голос і втілили економічне диво, подолавши бідність.

«Два слова, які я чую від азійських колег дещо частіше, ніж хотілося би, це „солідарність“ та „нейтральність“. Вони висловлюють солідарність з Україною, за що ми вдячні, але декларують нейтральність щодо нас та Росії. Водночас проходну нейтральність не може бути мови, коли йдеться про агресію, вбивства, терор, з'валтування, мародерство і масові звірства. Країни Азії мають зайнятічітку позицію на підтримку України та Статуту ООН», — наголосив Дмитро Кулеба.

Голова МЗС переконаний, що розділення світу на Глобальний південь та північштучне. Натомість універсальними для всіх цінностями є принципи Статуту ООН, які необхідно захистити від імперіалізму.

«Новий імперіалізм вже не просто стукає в двері, а вибиває їх. Все через те, що протягом десятиліть світ мав сліпу пляму розміром з Росію. На щастя, це в минулому. Росія програє війну — не лише проти України, але і проти сучасності, розуму та здорового глузду», — заявив він.

Дмитро Кулеба порівняв керівництво Росії з диктаторами минулого, які напередодні краху своїх режимів намагалися військовою силою втілювати імперські амбіції, але вже невдовзі втрачали все.

«Російська війна проти України несе лише погані новини для всіх у світі. Українці страждають найбільше, але російська агресія також руйнує життя, економіки та надії людей у багатьох регіонах. Саму тому Росію необхідно зупинити», — зауважив міністр.

Дипломат нагадав, що на початку повномасштабного вторгнення ніхто не вірив в Україну, але нині ситуація докорінно змінилася завдяки тому, що українці мали сміливість, а світ — гідність.

The minister stressed that Ukraine will win, and Russia will need "generations to choose from the pit that it has driven itself." The main lesson will be that "aggression does not produce any results", and it will be equally relevant for east, east, south and north of the world.

"It is still possible to avoid the collision of civilizations. The world in which the country is supported by each other is still relevant. If we can protect together, so we can withstand other challenges: climate change, food crisis, global inequality," he summed up.

** This story began in May last year. During the fierce battles of the Naikolaevsky direction, the gunmash of a separate infantry brigade named after Yakovagandziuk, Zabrofeyuk, a powerful 152mm Msta-B gun. For almost a year, the calculation of the gunman Eugene successfully destroys the enemy in the most important areas of church. During this time, artillerymen turned into a scrap of several dozen units

Armyinform correspondent visited the firing position of the Trophy "Msti-B" of the Taudyevsky direction and visually saw how she successfully destroy her former farmers. **

We are greeted by a tired gun commander.

We see a pile of shot sleeves in the trench. If most of them came to the goal, then for many Horde the night has become the last in life. By the way, the calculation of the once Russian Msti-B is currently working in 24/7 mode. The enemy is unhealthy attempts to attack the positions of Ukrainian defenders near Avdiivka, it is necessary to restrain their invasion daily, causing painful losses. There are many striking achievements on the account. For example, thanks to timely aerial reconnaissance coordinates managed to destroy the 122mm CAU 2C1 "Carnation" in almost 15 minutes. Equally successful was the attack during the battleflowers in the south of Ukraine. Then one shot was amazed by a whole column of hostility. It happened that the first projectile

managed to engage in a gas truck and the degrading fire spread to the rest of the fighting machines and trucks.

[!\(Images/APMIRINFORM/2023-05-07T67-00-00-04-00/5-18-150x150.jpg\)](#)

- The cannon got unharmed in perfect technical condition, - the platoon commander, the acting commander of the senior officer -violet Denis, attaches to the conversation. - Then we performed tasks near Nikolaev. The reading artillery unit was very timely. Immediately attached to combat work. In a few days, they opened the extent of destroyed goals. It was usually the Horde infantry. They then climbed in the future, and we used to do them daily. Soon in our account appeared tank, BMP, APC and artillery systems. If the Muscovites have found out that such losses were being caused by weapons, they would be more careful about their preservation. But then they were not about it. Orcs tried to save their lives. When Maknaks were fire, they immediately thrown their technique and flew where they were. By the way,

this "MSTA-B" is not the only trophy gun in our team. During the fighting, we managed to capture several different artillery systems, "Denis adds.

According to the gun commander Eugene, the most striking was the destruction of the Rashist Artillery Division 122 mm howitzers D-30, which was part of the elite airborne unit of the invaders. At that time, 14 guns were seized, eleven of which were in working order.

[!\(Images/APMIRINFORM/2023-05-07T67-00-00-04-00/10-11-150x150.jpg\)](#)

- After a successful fire damage by the artillery division, the brigadiog suffered devastating losses. I personally saw its consequences, - says Euen. - The shelters are destroyed, cut by the fragments of the building, and also - "garlands" of the dies on the branches of trees and the remains of the bodies of the invaders in the trenches. On that day, we destroy the whole division of the orkiv - close 150 people. Such achievements are very sophisticated and confident in further actions.

Memories and stories about the heroic past are interrupted by the team "To the gun!" The calculation begins to act, all the numbers know what to do. The shells bring to the gun a 43-pound projectile, chargers send it to the barrel, the gunner quotes the gun according to the instructions of the commander

and in 3 minutes everything is ready for the shot. The mechanism has been developed to work on automatism. No one makes unnecessary movements. Everything is rationally oriented. The team is heard: "The gun!" And the first shot loudly replicates over the tips of trees. Smoke has not yet dispelled, but the next shell was trunk. A small adjustment of the sight and shot again. The MSTA-B trophy is struck by the accumulation of living force, which again decided to check the strength of the defense of the defenders of Avdiivka.

Regional Criminal Code and in the Sumy and Sports Administration of Sumy Ova organized a tournament of noble games. He was involved in students, teachers and volunteers. Supreme classes were introduced to the students of the Kapitan Sonar's team play, which is analogous to the maritime battle and provides a game in the composition, which includes the captain, senior assistant, and intelligence.

[!\(Images/APMIRINFORM/2023-05-07T71-00-00-04-00/02-2-150x150.jpeg\)](#)

- Thanks to this game, we show children that the profession of military is not a license and dismantling of weapons. In this way, we want to emphasize the role of the commander, the senior assistant, the intelligence officer, etc. However, the general purpose is to convey the youth that working in the team is similar to the common work in the combat unit. We also showed the participants of the weapons festival the basics of shooting from it, - said the head of the press service of Sumy regional shopping center and JV Major Alexander Bondarenko.

Kirill Budanov also reported that the Russian Federation is trying to accumulate a certain stockparetake to disrupt the Ukrainian counter - offensive.

"However, the truth is that the Russians have erected their missile reserves," said the head of Ukraine's military intelligence.

Cyril Budanov compared the enemy fighters of the so-called PECs by the lgraphers of the Regular Army of the aggressor, saying that the Wagnerivtsi have much preparation. At the same time, the leader of the Wagner PEC Prigozhin uses the great loss of their mercenaries in the war to lead a political campaign:

Answering the journalist's questions about the alleged involvement of Ukrainian -specific services in the elimination of a number of Russian public apologists of the Anti -Ukraine war, Kirill Budanov refused to confirm or refute this information:

I wish health, dear Ukrainians!

This week ends - very fruitful for Ukraine. And these days we are actively active in new events in May and June. We must make this time not less fertile both in the supply of weapons for our soldiers and in decisions for Ukraine, in negotiations with our partners.

The legislative initiative was important for our society. The preparation of sanctions against the aggressor is ongoing. We are waiting for international meetings in Kiev. We are talking to partners about weapons that will help you to do more for the sake of restoring peace.

This week, our various partners were distinguished in helping Ukraine, in helping Ukrainians. From the United States to New Zealand, from the Netherlands and Belgium Croatia. Northern Europe - Norway, Denmark, Sweden, Finland, Iceland. I thank every partner decision to support Ukraine!

We are working out in great detail with our other partners new steps in the help of Ukraine, we expect them in the near future - just what is needed for our power, to protect our sky, for justice against terrorists and for the fastest restoration of peace for all Ukrainian land. I will definitely inform about those decisions that can be spoken in public.

It is very important that the world knows about every fact of Russian terror against our people. That the world speaks what the terrorist state is doing and how we love life. I am grateful to everyone and everyone who helps us, spreading the truth about Russian blows and shelling, about the cruelty of the invaders who are not invited for a day!

Permanent Russian terror against Nikopol, brutal shelling of Kherson Joblast, blows in Kharkiv and region, terror against villages in the border areas in the external and Sumy region, hell in the Donets For people. My condolences to my relatives, loved ones.

Safety is the main target for Russia. Both in our country and everywhere in the Uevrop, everywhere in the free world. Destroying safety, carrying death and chaos is a terrorist state. And all who help Ukraine to return the safety, all who strengthen partnerships between countries in Europe for the sake of security, for the sake of common force, all who press on the terrorist state are all defenders of the Mir. I thank everyone and everyone in the world who with Ukraine, who supports our military!

Glory to all our soldiers, who is now in battle, at combat posts and at combat operations!57 Separate Motor Infantry Brigade, 93rd Mechanized Brigade. Thank you all the guys for the heroic protection of positions, for the exemplary stability!Just fellows

Vladasha has no doubt about the statements of the Ukrainian side that, thanks to the American Patriot air defense system a few days ago, a Russian rocket was killed.

About it reports The source is referenced, Ukrinform reports.

"While the Patriot system successfully counteracts ballistic missiles, its ability to stop hypersonic missiles released from aircraft, by last week, it was a purely theoretical," the publication noted.

According to the source, the interception of such a rocket by Ukrainian puppies has renovated this ability in practice, which is "considered in the Pentagon as a serious event." This is important for several reasons.

First of all, Putin's public statements have been denied that the Nibiradian hypersonic weapons are capable of bypassing any modern anti-air system. Now the Russian Federation does not have a significant number of such rockets, and the sanctions have just made their production.

In addition, CNN, Russians who launched a hypersonic rocket in Kiev, were convinced that the goal would inevitably be affected. Therefore, the work of the Patriot system has questioned such calculations.

At the same time, the fact that the interception was carried out by a Ukrainian crew, trained in Oklahoma, without the presence of American instructors on the spot, is an additional reason for joy in the Pentagon. According to the source, the Ministry of Defense is perceived as a significant return on investment.

At the same time, it is noted in the publication, the fact that Ukrainians have knocked down the rocket, as Russia considered unattainable, should cause serious uncertainty to the Russian Federation.

The Security authorities have doubts about the statements of the Ukrainian side that, thanks to the US Patriot, a few days ago, a Russian hypersonic missile was shot.

About it reports The source is referenced, Ukrinform reports.

"While the Patriot system successfully counteracts ballistic missiles, its ability to stop hypersonic missiles released from aircraft, by last week, it was a purely theoretical," the publication noted.

According to the source, the interception of such a rocket by Ukrainian puppies has renovated this ability in practice, which is "considered in the Pentagon as a serious event." This is important for several reasons.

First of all, Putin's public statements have been denied that the Nibiradian hypersonic weapons are capable of bypassing any modern anti-air system. Now the Russian Federation does not have a significant number of such rockets, and the sanctions have just made their production.

In addition, CNN, Russians who launched a hypersonic rocket in Kiev, were convinced that the goal would inevitably be affected. Therefore, the work of the Patriot system has questioned such calculations.

At the same time, the fact that the interception was carried out by a Ukrainian crew, trained in Oklahoma, without the presence of American instructors on the spot, is an additional reason for joy in the Pentagon. According to the source, the Ministry of Defense is perceived as a significant return on investment.

At the same time, it is noted in the publication, the fact that Ukrainians have knocked down the rocket, as Russia considered unattainable, should cause serious uncertainty to the Russian Federation.

As reported by Ukrinform, on the eve of , which is calculated by the Patrioot Center Air Command Destroying Air-Bellebalistic Missile X-47 "Dagger", which was launched
