According to him, published documents "partly look like analytical -books" about the attitude to a particular problem, for example, that Ukraine lacks certain air defense means.

At the same time, he stressed that the Ukrainian side of weapons and speaks it.

The Chairman of the Verkhovna Rada on Humanitarian and Information Policy, Nikitaporov considers it necessary to accelerate the process of adopting a government-law-proof of religious organizations in Ukraine with a center of management in the aggressor state.

He said this during a briefing at the Media Center "Ukraine - Ukrinform".

"We do not fight . We will not fight the believers. This is not the subject of any law that are now registered in the Verkhovna Rada (It is prosecution aimed at banning the activity of religious organizations with the center of management in the Russian Federation - ed.)", - Podkayev emphasized.

He noted that Ukraine with these laws records that religious organizations that are in the territory of the aggressor state, which are "actually grown with the ruling so-called Russian Federation", no relations with Ukrainian religious organizations cannot be able to do.

"I believe that it is optimal to accelerate the process of adopting a bill that was developed by the Cabinet of Ministers (No. 8371 "On Amendments to Certain Laws of Ukraine on the Activity of Religious Organizations"). Чому? Тому що там йдеться про всі релігійні організації, а не якусь конкретну", – підкреслив народний депутат.

На його переконання, ухвалення відповідного документу – це спільне бажання українського народу встановити таку умову в законодавстві, щоб українські релігійні організації не мали жодних зв'язків з тими, хто підтримує війну та геноцид в Україні, прикриваючись світовими релігіями.

About it [told](#) Secretaries of National Security and Defense Alexey Danilov during the discussion "Ukraine before the face of external challenges".

He is convinced that Russia's fragmentation has already begun, and the decision of a full -scale invasion of February 24, 2022 only accelerated this process.

"This fragmentation occurs regardless of the desire of some countries, including Western countries. Everything will start with the Caucasus. And it will continue or not, it depends on us, "the NSDC secretary emphasized.

If the fragmentation process does not complete, the issue of stability of Ukraine will constantly interrupt on the agenda.

"The country that is in the risk zone does not attract investors. It is not necessary to vitrate that money will be used, regardless of the safety situation. There is a great deal of countries in the world where you can invest without risk. Therefore, if we are not abandoned by Russia's issues, then all other issues will be extremely difficult for us, "Alexei Danilov said.

In his opinion, new unions and tasks of Ukraine will be formed in the world and the region to make them protect themselves from Russia with their help.

The NSDC Secretary also shared a forecast for the development of the world. The National Security Council has developed five basic scenarios, among them:

- 1 . revival of democracies and a one -pole world accompanied by the United States
- 2 . a variable world under the influence of China
- 3 . a two -pole world in which the US and China will rule
- 4 . Multipolar world, or the world fragmented into several economic and safety blocks
- 5 . EU and China coalition that will have the greatest impact

Alexei Danilov is convinced that the most likely is the scenario of the transition of the additive world, or the competitive coexistence of the two countries.

Despite the fact that the army of the Russian Federation is fighting along the entire front line, its advancement is approaching the climax, so the occupiers use artillery to compensate for reduced offensive potential.

About it in your [report](#) reports the Institute of War Study(Isw).

Зазначається, що 8 квітня голова Ради резервістів Сухопутних військ України Іван Тимочко повідомив, що російські війська ведуть бої на всій лінії фронту, але наступальний потенціал росії продовжує знижуватися і що нинішні російські атаки спрямовані на відволікання і розпорощення українських військ в очікуванні контрнаступальних операцій.

Також повідомляється, що Іван Тимочко оцінив атаки РФ, зокрема в районі Бахмута та Авдіївки. Зазначається, що за його словами російські війська недосягають серйозних успіхів на жодній ділянці фронту, зазначивши, що темпи обстрілів у Бахмуті та навколо нього дещо знизилися на одних ділянках, а на інших — повністю зупинилися.

А російський наступ на Авдіївку, за оцінкою Тимочка — «захлинувся». Він підкреслив, що РФ досі не взяла під контроль Мар'їнку, незважаючи на те, що перетворила місто на руїни.

Водночас російські війська використовують артилерію, щоб компенсувати знижений наступальний потенціал, повідомляють в ISW.

Аналітики вважають, що високий попит на снаряди свідчить, що росія значною мірою покладається на артилерію, щоб компенсувати ключові недоліки в бойовій проможності, зокрема погані навички наземного штурму та недоступність авіації в Україні.

Російські війська використовують важкі артилерійські обстріли, щоб повністю зруйнувати населені пункти, перш ніж захопити їх наземними атаками.

«Триваючий дефіцит артилерійських боєприпасів у росії підірве здатність російських військових продовжувати компенсувати інші свої недоліки та обмеження», — йдеться у зведенні.

Representatives of the coordination headquarters and military parts answered the questions of the relatives.

They discussed the difficulties of official investigations conducting military units of hostilities.

"Service investigations are built on the testimony of servicemen," the representative of the headquarters said. - When there are fighting, you often do not see that you get away with a twin ten meters away. Such are realities. Or sometimes the brothers say that they saw a person injured, incompatible with life, the commander still accounts for the defender missing missing - until the body is not taken away. Because such testimonies are often subjective. And it was advised to return from captivity more than one defender who was considered dead. "

Representatives of the military unit explained that according to the Law on the Protection of Personal data, full information is provided only at the request of the prosecutor's office of the chief protection authorities.

The staff representative noted that the relatives cannot file documents for the status of a participant of hostilities if their loved ones are captured or disappeared. It can only do a serviceman personally after returning from captivity.

The Soviet equipment we have in service has virtually no chance to be able to go. Therefore, the aviation platform is important to us: the ships must be 4+, must have the full range of weapons that NATO countries have - winged, controlled, unmanaged and anti -ship missiles, as well as airplanes.

These are the main characteristics that Western fighters should be in line with. The F-16 Lifetime is the most common aircraft in the world today, it has 25 countries in the most likely candidate for Ukraine. However, I will emphasize - the necessary planes are still now, because up to 20 managed aircraft aircraft every day the enemy is used in the frontline zone of Ukraine. This is a great threat that we have to protrude.

At a briefing of the Ministers of Defense of Ukraine and the Kingdom of Denmark in Media Centerukraine - Odesa, Alexei Reznikov shared plans to

protect civilian citizens from the consequences of a Russian large -scale invasion, namely the release of territories. He noted that the process would consist of several differenties.

According to him, Denmark has specialized drones - submarines that have sappers that are able to detect, record and transmit coordinates to the sappers, which can carry out sapper work underwater. In Ukraine, since 2014, the company has been operating, which is represented by the Kingdom of Denmark. This company has great possible expertise to carry out humanitarian demining, that is, the change in areas that are not in the war zone.

Another institution of demining in Ukraine is the SES. They are interested in the demining of civilian infrastructure.

There is currently an interagency group headed by Yulia Sviridenko, the First Vice Prime Minister and the Minister of Economy. It, as an economist, understands which industries are priorities in this matter. And the experience of the Kingdom of Denmark will be indispensable for the effective work of our sappers.

Cyberfachivtsi of the Security Service together with the law enforcement agencies of the Republicapolskaya neutralized the transnational criminal group of fraudsters.

About it [reports](#) SBU press service.

The malefactors wandered money from the inhabitants of the front regions of Ukraine, who planned to leave the war zone, including Bakhmut and Coal. The locals "guaranteed" the locals to take them to the safest regions of our country "guaranteed". The average cost of such "services" was 30 thousand UAH.

Basically, fraudsters "distributed" their promises to the disabled and parents of young children. For this purpose they used groups on social networks and popular messengers. They took their clients "prepayment" of 50% of the declared amount. Money was kept on bank cards issued for false persons. After receiving the books, the dealers stopped communicating with the victims and no longer called. In this way, fraudsters have seen more than UAH 1.5 million in humans.

Another "target audience" of fraudsters was men of conscript age. For a "fee", the intruders promised the military to produce false expenses to travel abroad.

As a result of special operations in different regions of Ukraine, one group organizers were detained. He was a resident of Zhytomyr region, who was contacting the clients and offering them "conditions" for evacuation. In the

investigation, two other Ukrainian citizens, organizers of the criminal group, are currently in one of the EU countries.

SBU staff together with European partners conduct comprehensive detentions on the detention of both intruders and their extradition to Ukraine.

During the searches at the addresses of the persons involved in several areas of Ukraine revealed:

Currently, one of the malefactors, a resident of Zhytomyr region, reported suspicion of Part 3 of Art. 190 of the Criminal Code of Ukraine(fraud).
