In Dnipropetrovsk, a resident of Novomoskovsk was condemned, who "drained" information about the location of the Ukrainian military.

About it [reports](#) Dnipropetrovsk Regional Prosecutor's Office.

"For public prosecution of prosecutors of the Dnipropetrovsk Regional Prosecutor's Court, a sentence was approved by a resident of Novomoskovsk

for unauthorized information on the location of the Armed Forces of Ukraine in the conditions of martial law(h. 2 centuries. 114-2 of the Criminal Code of Ukraine). Його засуджено до 5 років позбавлення волі», – йдеться у повідомленні.

Prosecutors in court proved that in August 2022, a man, having pro-Russian views, transmitted text reports on the places of the Armed Forces of Ukraine through the social network. He confirmed the enemy windows of military objects using a reference to Google Maps.

Law enforcement officers detained a man in February 2023. During the consideration of the proceedings in the court the accused was fully pleaded in the court.

Due to the pollution of the territory of Ukraine, 6.1 million people are explosive objects in the zone.

About it [reported](#) The first Vice Minister of Ukraine-Minister of Economy of Ukraine Yuliya Sviridenko.

"Technical examination requires 175 thousand km square. The territories of Ukraine, in particular, are at risk of 6.1 million people. We have asked our international partners to join the process of humanitarian mine. Therefore, the government searches the possibility of creating a "demining coalition" with countries that will help us to enter the global market for mine equipment, " - says the official.

She noted that the Defense Ministry has only 2,000 sappers, we need to train more specialists and attract sappers from other countries.

In Ukraine, the Humanitarian Demand Center has already been established, which will coordinate all participants in the process, attract funding and determine priorities. Also in Ukraine a plan for humanitarian demining agricultural land has been developed, priority among which are Dnipropetrovsk, Zaporizhia, Kyiv, Mykolaiv, Sumy, Kharkiv, Kherson, Chernihiv and Cherkasy regions.

"In the context of Ukraine's reconstruction, humanitarian demining is priority. First of all, it is about critical infrastructure, social infrastructure and residential buildings, agricultural land. In June, Vladon will take an important conference on restoration for Ukraine. One of the elements of the program will be a session dedicated to accelerating humanitarian designation, "Yulia Sviridenko added.

Yulia Sviridenko and Deniz Brown discussed the cooperation of Ukraine and the UN in spherric change

The humanitarian demining of the territory of Ukraine will restore and increase the capacity of the state in ensuring food security in the world.

As [reports](#) The Press Center of the Economy of Ukraine, this was discussed during the meeting of the First Viceremier-Minister of Ukraine-Minister of Economy of Ukraine Yulia Sviridenko with a constant coordinator of the UN system in Ukraine and humanitarian-friendly coordinator Deniz Brown.

"The result of a large -scale invasion of Russia was the destruction of production chains and capacity, locking logistics routes. In addition, Ukraine is doing everything to provide food to the countries that are extremely extremely drawn. Grain initiative is being implemented by the Grain Corridor today, more than 30 million tons of agricultural products have been sent. The humanitarian initiative of President Vladimir Zelensky Grain from Ukraine has world support, aimed at preventing a famine in the poorest countries and Asia. Ukraine is responsible for its mission to ensure the food security in the world and seeks to increase its role. Therefore, one of the key obstacles to this is the large -scale pollution of the territory of Ukraine with explosive objects, "Yulia Sviridenko said.

The First Viceremier-Minister of Ukraine-Minister of Economy of Ukraine emphasized that about 174 thousand square kilometers, or about 30% of the territory of Ukraine, are potentially potential polluted. This area is a source of food for about 81 million people around the world.

According to her, the survey and purification of this territory, the return of agricultural land exploitation is and will be a priority task of Ukraine. Therefore, given the scale of the work, our country needs a powerful assistance to the international community and counts on the leading role of the UN organization and support of Ukraine.

“More than a year of full -scale war.

The enormous path of vaccination from Russian infooids has been traveled. We learned to cut and feel even between the lines of their insidiousness.

It seemed that this rule already subconsciously works for everyone - we believe in official sources.

We do not believe the impersonal sources of information - when there is neither a name nor a name of the Institution, nor other identifying features. When you just don't know who exactly has written.

But the larger the beacon, the more they believe.

The Russians write in telegrams that have happened to our Glavcom.

And what? Well, let them write.

We have denied it - repeatedly. He does his job. And he does not bypass fakes, as well as other commander, whose enemies write fictions.

We do not substitute doubles.

The Russians just test their IPSO. "

The prosecutor General's Office reports in Telegram channel .

Prosecutor General Andriy Kostin spent an online meeting with members of the UK Parliament Committee. In his speech, he thanked the concern and continuous support of Ukraine.

"An example of such assistance is an advisory group on the most severe international crimes - AtroCity Crimes Advisory Group(ACA), one of the founders of which is the United Kingdom. It was created to support the office prosecutor in the investigation and judicial prosecution of military and violations of international humanitarian law, committed as a result of an incorporated and illegal Russian war.

Recently, the UK Embassy in Poland has hosted the ACA leaders forum, which helped determine priorities and future initiatives.

We appreciate the personal involvement of highly respected Victoria Pntis, its assignment to restoring justice and ensuring the responsibility of horrific crimes of the Russian Federation. The world community is united in the desire to punish the guilty committing serious international crimes, "Andrei Kostin stated.

He also noted that international support and unity are necessary to win the legal front and the restoration of peace in Europe and the world.

Viceremier-Minister of Ukraine Irina Vereshchuk

About it [reports](#) Ministry of Reintegration.

This statement was announced by Viceremier-Minister Irina Vereshchuk on the air of Inter.

She explained that Russia has begun to actively promote summer holidays. In particular, in the Crimea, where, under the pretext of organizing cultural and educational events, it is necessary to lure as many children from different countries as possible. Including Artek's hearing camp.

In fact, it is another desire to use children as a living shield. To get rid of them from the Armed Forces.

"First, the enemy tries to legitimize the occupation of the international community. Secondly, the Russians want to make a live shield of representatives of foreign countries. Taking the opportunity, I appeal to foreign countries to take urgent measures to prevent their citizens, so they would not be in the temporarily occupied territories of Ukraine. Protect people and do not let Russia cover their crimes, " - calling them.

Lviv Media Forum was in Lviv(LMF), which will last for three days offline. Focus theme: "After the war or before the war. How to civilize chaos? "

This was reported on the page , reports Ukrinform.

"The fact that today, after a full -scale invasion of Russia, the possible holding of the International Forum in Lviv means two things. First, the countries of the democratic world still heard our call and supported the Ukrainians in their

wake against the latest barbarism, which in neighboring Russia was reborn in a resort and embodied in a totalitarian ideology, which has recently been officially officially named Rashism. Secondly, the fact that in the defense of the values of the democracy of Stalanayai in the world is a group of community of human rights defenders - Armed Forces, "Olga Mirovich said during the opening ceremony.

The freezing of the conflict is the worst scenario for Ukraine, as it will mean that the state will not be able to develop normally and numerous casualties were in vain.

This belief was expressed by the expert of the Minister of Defense of Ukraine, expert Frolov during a discussion organized by the German Society of Foreign Policy(DGAP), Ukrinform correspondent reports.

"Freezing conflict is not possible. Ukrainians - both military and politicians, as well as ordinary citizens - understand one thing: we will win or die. Conflict tie will only mean a long, slow dying. The sides of our partners, besides, we have been losing people. Freezing conflict is the worst scenario, so no one looks at it," Frolova said.

She noted that Ukrainians are ready even for greater victims, but not pre - compromise. The history of 8 years after 2014 showed the futility of the expectations of Narcombr, as it will lead to further conflicts. The expert cited a Daninian survey, when about 96% of respondents said they did not see the possibility for negotiations, for compromises with the Russians. 86% of respondents are negotiated with the aggressor, even with the threat of using it with it.

**Read also:** [\*\*frozen\*\*](#) "Ukrainian society is not ready for compromises. We have already sacrificed much. These victims should not be in vain," Frolova repeated. It is bonar that negotiations can be conducted on topics such as compensation, indemnity and more.

The expert does not agree with the definition of the situation on the front as a "deadlock". "Bakhmut is not a strategic point, it was done by Russian propaganda ... The most strategic issue is huge reserves in the city's city," Frolova joked. "There can be very unusual solutions, as Belgorod showed," - said Lyafrolova.

Speaking of Crimea, she noted that with the missiles of a distant radius of action already in the Armed Forces, as well as with the prospect of receiving fighters, Ukraine should have the opportunity to have the Crimean bridge, which will achieve the logistics isolation that will then, in particular, how to reintegrate the territory that has long been completely detached of Ukraine, was added by the expert. According to her, practice shows that the Language troops see the threat of the environment, they try to run, so with the 2 million of the population of the peninsula about 800,000 will try to leave the territory that will resolve the issue of liberation easier.

Frolova also touched on NATO and EU membership.

"After the fighting is completed, Ukraine has a largest, strongest and most talented army on the European continent. It will be a very strange solution to take Ukraine in its bench for NATO, as NATO's capacity has been moving," she said. According to the expert, Ukraine is ready to be now in the version of "Finland 2.0" - complete integration into the uses without formal membership.

**Read also:** [\*\*freeze\*\*](#) As for the EU, it will benefit from Ukraine's membership, but it must be noted that Ukraine has the potential for rapid growth, that the money that the EU is now will be investments, not grants.

Frolov also stopped at future relations with the Russian Federation. She sees vast nongs in the fact that the Western powers still fall into the trap, building plans as a "liberal Russia". It could be a big mistake, convinced.

"Russia has never been and will never be liberal," the expert is confident. It proceeds from the fact that plans should be made exclusively on the basis of the fact that Russia will remain in any case an imperial aggressive state, who would not come to power there.

Alina Frolova was Deputy Minister of Defense of Ukraine in 2019-2020. Zasna and CEO of RAM 360 Advertising Agency and Agency Group Agency Group(RAM 360 Advertising Agency, Core Reputation Management Agency, Strategic Communications Center Stratcom UKRAINE).

During Kherson, Russian invaders could not suppress the Ukrainian financial system.

About it a trainer of new media, expert on information and communication Internet technologies, Kherson Yuri Antoshchuk told in .

«Можна було добре побачити, як окупанти всіляко намагалися витиснути українську гривню і запускали в обіг свої рублі. Наш український онлайн-банкінг – це щось», - сказав експерт.

**Читайте також:** [\*\*Антошук\*\*](#) He noted that even without Ukrainian mobile communications, the Kherson quickly reacted and came up with different approaches to how to get hryvnia, how to get into bank accounts on how to pay. When they stopped working, people transferred funds from card to card through banking, paid for goods or "stopped" the hryvnia. Ukrainian POS terminals were kept in Kherson to the last, and so people could pay off with their Ukrainian cards.

"Although the Russians opened their banks in Kherson and began to issue their cards, imported their rubles, distributed them to everyone as much as possible, reduced the course, depreciating the hryvnia," they could not suppress the Ukrainian financial system before the release of the Right Bank, "Antoshchuk stressed.

According to him, experts communicated with different banks, prepared instructions, for example, as entrepreneurs to accept payment if POS terminals are confirmed by the Russians. After all, there are options to turn your smartphones into POS terminals and accept Ukrainian cards for payment.

It is only possible to reach Mir and stability in Ukraine with its membership in NATO.

This opinion was expressed by the American philosopher, professor of Stanford University Francis Fukuyama at the Kiev Security Forum, reports Ukrinform.

"It is obvious that a truce and stability without Ukraine's membership in a gracious. Each member , which has to think about this, what a peaceful agreement is possible, so that it is not a simple -flow ceasefire in order for Russia to be re -armed, rebuild its positions, etc., "Fukuyama said.

In his opinion, the Alliance should consider under what conditions NATO is ready to accept Ukraine and prepare for it.

**Read also:** The professor also emphasized that under the current conditions, any peace agreements will be able to regroup troops and after a break up to renew the war.

"In the future, only the membership of Ukraine Tagrantia, provided for in Article 5 of the Washington Treaty, can restrain the war on the part of Russia. Membership in Vitto will be real if, thanks to the counter -offensive, Ukraine returns the Kherson Isaporozhye region on the Black Sea coast. This region is critically important for the negotiation position of Ukraine, "Fukuyama said.

He noted that this would also cut the land supplies to the Crimea, the bridge through the Kerch Strait will be a serious threat and again the possibility of blocking the North Crimean channel.

**Read also:** Fukuyama predicted that a more realistic scenario would be the return of control over the entire territory of Kherson and Zaporizhzhya by the end of the summer, to get a "thorough truce". Under the formal peace agreement, it is difficult to imagine that Russia will agree to the membership of Ukraine Valiance and sovereignty of Ukraine over the Donbass and Crimea.

Oksana Zabuzhko said this during a speech at the Lviv Media Pharkum(LMF)Ukrinform correspondent reports.

"The Book of the Longest Journey" was ordered by an Italian publisher. And this is the first book I wrote, so to speak, to order for my whole career. The request is: explain to us that we have missed in historical contextual in Ukraine. And I said: I apologize, I have to start from the seventeenth century. And I did this, "Zabuzhko said.

Письменниця наголосила, що зараз нарешті настав той час, коли українські автори перекладаються європейськими мовами і це надзвичайно важливо для перегляду російсько-українських відносин у історичному контексті.

«Українській історії просто не було місця в європейському наративі, допоки тривала не переглянута історія про Росію. Так, наша держава існувала взаємних медіа, але її до 24 лютого 2022 року сприймали, як чорноземля, або передмістя, периферію великої Росії. «Законні околиці Росії» - цей термін використовувався ще у 30-х роках і те, що він досі на плаву, означає, що ми, як цивілізація стикаємося з дуже великими проблемами», - додала Забужко.

The Coordination Headquarters met with the families of the soldiers of the separate landing brigade of Zhytomyr of the DSSV of the Armed Forces, during which representatives of the coordination headquarters, the National Police of Ukraine and the Office of the Personal Personal Persons, with the

relatives of the prisoners of the prisoners, were communicated with the relatives of the paratroopers.

About it [reports](#) Coordinating headquarters of inquiries for the treatment of prisoners of war.

According to the headquarters, criminal cases, initiated by the prosecutors, or the "sentences" of the courts of the aggressor country, which can be obtained from various sources, is not a obstacle to involvement in the exchange processes. Proterous captivity is returned both "convicts" and those who continue the "investigation" in the Russian Federation or temporarily occupied Ukrainian territories. The same applies to the missing persons: all who are introduced to the Unified Register of the National Information Bureau involved in the exchange processes.

A separate block of questions concerned the search and return of the bodies of the fallen defenders. As Ivan Angelin, a representative of the office of the Commissioner for Persons missing in special circumstances, the work of search groups began after the de -occupation and demining of a certain territory. It is dangerous to send search groups there before carrying out the appropriate preparation procedures. He added that the office receives an information about the probable places of burials from various sources: both Vrivka, from the police, and from the local population.

As for the information about the directions from which the bodies of the dead soldiers return, Mr Angelin noted that representatives of the Russian side provide very generally information about it, so it is difficult to find out which location has returned from our defenders. The final confirmation is given by the already relevant expertise. He also urged his relatives to pass to the office to know information about the probable places of disappearance of servicemen.

The background of large-scale armed aggression of the Russian Federation against Ukraine was more relevant about building a strong European-Atlantic security architecture. And it was the determination of the main directions in the defense sector that was devoted to the largest conference of the state and Eastern Europe \_ defence 24 day \_, which took place in the capital of Warsaw.

It is a matter of mind that, given the desperate and bloody struggle, our country will now be with Russian aggressors, the main attention of participants in the international conference was attracted to issues related to the heroic opposing Ukrainian people. And in this sense, our foreign partners were very interesting and relevant to hear the opinion and specific meaningful proposals of the Deputy Minister of Ukraine's Defense Anna Malyar.\_

### **About "Antipytinists" and hybrid effects on the part of the Russians**

In her opinion, the result of Russian aggression against free and independent Ukraine was the very fact that the so-called Eastern neighbor could not have managed to give in the spirit of imperialism. And, despite the fact that more than 30 years of moving to the collapse of the Soviet Union, the Russian Empires can still not be reconciled with this objective historical fact, Ukraine

consider Ukraine the best of the former USSR and through its conquest try to restore their unobstructed.

According to Anna Malyar, in her desire of the Russian Federation uses any methods, in particular, trying to influence Europeans through financing political parties. Of course, in her speech, Anna Malyar not only stated the fact of one of the deputies by the Russian Federation. First of all, she reminded the participants of the conference that in the European countries and in America and in the Ukrainian Ukrainians, the so-called experts who allegedly opposed Putin have been growing and funding for years, and now, when the Warning War was ongoing, they have stood on its side and for some reason. At the same time, the trust of millions of citizens. Therefore, in her opinion, that Russia could not use this hybrid information instrument of influence through free access to the information space with developed democracy, the Western world must be as much as possible and consolidated in the fight against totalitarian Russia and not allow it to be possible.

## About the phenomenon of Ukrainian force

Photo: Poglyad.tv

As for the very fact of the large -scale invasion of the Russian Federation into the territory of Ukraine, as the Deputy Minister of Defense emphasized, such a step is different, as a great foolishness from the Russians, it is impossible to call. After all, since 2014, when fighting against Russian invaders in the east of our country began, the Ukrainian army gained enormous combat experience. It is to break the enemy from such adventure and madness, and the Ukrainians were convinced that the Russians were well aware that we cannot be overcome that we would still win them.

“They would have first remembered our history. For example, in the same Soviet prisoners, the vast majority of political prisoners were Ukrainians who have not been not free from the totalitarian Soviet system for all over 70 years of its existence and proved by their struggle that we were not slaves. However, there was a very terrible war that could never be imagined and that it was impossible to prepare for people who are not some savages but bearers and civilization. Today, Ukraine is the object. Our warriors are hardened by the poor with Russia. And the phenomenon of the strength of Ukrainians consists of a whole complex of different manifestations, factors and circumstances, - said Anna Malyar.

## About the President, Government and Departure from Bureaucracy

- I have repeatedly witnessed the casual situation with the warriors on the front line. And after that, people with more inspiration will fight the enemy. It was the first at the beginning of a large -scale Russian invasion at the beginning of a large -scale invasion, which inspired all the Ukrainians to fight the aggressor, - said Anna Malyar.

## About the Defenders of Ukraine and the historical chance to win Russia

It is indisputable to the very fact that even before the start of a large -scale war, the Ukrainian army served powerful vocational military service, many of which were trained in NATO standards. But the Great Invasion requires constant replenishment of human resources. Today in the trenches near Bakhmut and other areas of the Russian-Ukrainian Fronte are representatives of many purely civilian professions-farmers, doctors of sciences, business owners, singers ...

- In general, these are hundreds of thousands of mobilized persons. And today they all bring them together, everywhere we all have a historical chance to put a point in this 400 years of war. As they say, now we have all the stars. There is a powerful army, there are no political strife that have always destroyed our country, and we finally managed to unblood the subversive activities of Russian special services, "Anna Malyar said.

In her opinion, such unity, as now, has never been to counteract Russia. Israz together we pass that historical peak, when a real chansous jerk appeared to finally end this country with the aggressor. All the prerequisites for this. There is no one to be afraid. For example, the Ukrainian military leadership is much more professional than Russian. We plan combat operations according to modern standards, and they - by the old Soviet ones. We also have the bureaucracy of the VSKskaya less and much more freedom to make decisions by representatives of the team units.

## About our unity and Russian narratives

- For example, the Russians have seen how powerful in these difficult times the Poland helps Ukraine and how strategically it strengthens us with you. But for them, Dobrostidu partner Polish-Ukrainian relations are a threat. Through the tevons, any methods are used to quarrel our multimillion innasters. For example, they begin to say that the Poles are not satisfied with the behavior of Ukrainians who went to Poland through the war. In response to the same social networks, a Ukrainian may be unpleasant to the Poles. That is, Russia launches narratives that can adjust us against each other. In particular, they also dive into expert discussions about our past and try to state that we have become antagonists again. That is, they work through social, because it is the driving force of power. But Ukrainians have become much more in the information space, understanding how Russian propaganda operates and do not believe in these narratives. And it is very important that the Poles are well aware. Our main task is to be stable in this information space and to constantly explain to people so that they do not perceive the props. We are friendly peoples and together we are strong!- said Hannamal.

## About Bakhmut's Defense and Release of Territories

During the International Conference on Defense and Security, the Deputy Ministry of Defense of Ukraine also spoke with representatives of the media.

Of course, all the journalists were interested in the issue of counter - confronted and defense actions by Ukrainian defense forces.

Photo: AP / Scanpix

In this context, Anna Malyar explained that in general, from the beginner - scale Russian invasion, our country is in a defense state, which in turn includes various measures. And if in the east, Ukrainian military is mainly defended against the Russian invasion, then the other areas carry out active assault and offensive actions.

According to her, the defense of Bakhmut remains a separate and heroic page of the up -to -date history of Ukraine and the most expensive battle for Russian invaders, which have suffered great losses in weapons, equipment and personnel. She also stressed that the Bakhmut battle allowed Ukrainians to solve several martial tasks. In particular, thanks to the defense of the city, it has been struck from the summer of last year, it was possible to cause great losses of the enemy and divided one of his most professional groups among the mercenaries of the Wagner PEC. And secondly, it made it possible to reduce the offensive potential of the Russians, who, having concentrated their efforts there, could not use it on other preferences.

"In general, we do not divide our lands" more important. " For us, each of its kilometer is native and strategically important, because our ultimate goal is to slow down all temporarily occupied territories. Therefore, of course, we will only move forward, - said the Deputy Minister of Defense of Ukraine.

### **About the need for weapons and hostile missile attacks**

At the same time, many weapons are needed to accelerate this process. And, answering the questions of journalists, Anna Malyar said that among the priorities - to obtain a modern long -range weapons about the number of Russia, unfortunately, today there is still an advantage.

In addition, she said, today the Russians are able to launch missiles of the fortune of the territory of Ukraine.

### **About Poland that is known in trouble and joint counteraction to the aggressor**

Of course, both in this and in the humanitarian aspects, Ukraine greatly appreciates the assistance of the parties of many European countries and is gratefully grateful for this to such a large -scale and strategic partner as Poland.

ARMIA INFORM

This was stated in his opening address at the opening of the 15th Kyiv Security Forum by the Prime Minister of Ukraine in 2014–2016, the chairman

of the Open Ukraine Foundation, the chairman of the CBF Arseniy Yatsenyuk, reports the correspondent of the Armyinform of the scene.

"In 2007, we started the Kiev Security Forum. It was then that Vladimir Putin made ads in Munich. But he was not heard. The first was Georgia, then - Ukraine.

In 2007, less than 20% of Ukrainians supported Ukraine's membership in NATO. And in 20123, more than 80 % say that Ukraine should become a member of the Alliance.

We fight for the Alliance. We fight for ours and your freedom.

There are those by whom Ukraine exists, fights, wins. There are those who protect NATO, there are those who protect all of us - Ukrainian soldiers, armed forces.

At the same time, Arseniy Yatsenyuk explained why our state should become a member of the European Union and NATO.

"We owed to the present. Those who were murdered in Irpen, Bucha and Mariupol.

Debt can be paid in one way - to become a member of NATO.

We owed stories - to those who fought for Ukraine to be independent, fought in enslaved Europe under Soviet occupation. This will be due to the expansion and expansion of world democracy.

The united, democratic Europe will never be free without free Ukraine, continuing Ukraine, "Arseniy Yatsenyuk summarized.

**Background:** Kyiv Security Forum was founded by the Arseniyanyuk Foundation "Open Ukraine" in 2007. KBF is the main platform of Ukraine for the formation of problems of war and peace, national and world security.

The forum partners are the Atlantic Council, the NATO Information and Documentation Center, the National Democratic Institute, the Ukrainian Women's Congress, the Ebert Forendrich, Euro -Atlantic Course .

US Defense Minister Lloyd J. Austin III, Head of the United States Committee on US Army Army Mark A. Millie and US Defense Minister Assist agencies of more than 50-Typads from all over the world in online format in Pentagon, Washington, District of Columbia, May 25, 2023, during which they discussed the continuous war of Russia in Ukraine in Ukraine further close coordination

to provide the Ukrainian people with the means necessary to protect their sovereign territory.

"Hello to everyone. Thank you that we have joined us virtually from all time zones.

Since Ukraine is moving in the fight against Russian invaders, members of this contact group are the only ones. After the meeting of this group last month, the United States allocated an additional \$ 1.8 billion to Ukrainian Security Aid.

This includes a recent package of \$ 375 million with such Himars, anti -tank systems and laser missiles. We also provide key combat tools, such as transportation of heavy equipment Table bridge systems.

And in our last package of security assistance to Ukraine, the combination of America has financed additional anti -air defense systems of the camp. This package also includes equipment that will combine outdated Ukraine's prototype defense systems with the launching installations of the air defense, missiles and radars of members of this contact group.

We also provide more than 155 mm artillery shells, as well as increase training, maintenance and maintenance. We are concentrating a contribution that makes real changes in real time.

However, the United States is also dedicated to the long -term support of Ukraine. The Ukrainian ones that have come together today as well. We cooperate with all of you to give the defenders and defenders of Ukraine what they need when they need.

Several members of the contact group have recently made important ads. Denmark also announced a significant new package. It includes remedies for protruding defense and combat tools such as mine machines, mobile field bridges and evacuation machines.

France has also identified more light tanks and armored vehicles.

All these donations meet Ukraine's primary requirements and reflect the determination of this contact group.

Together, members of the contact group provided the Ukrainian soldiers with the necessary preparation. We have prepared motorized and mechanized crews, continuing to carry out collective preparation of Ukrainian combat units.

Earlier this month, 31 M1 Abrams tank from the United States arrived in Ukraine.

Last week, US President Joseph Biden announced that the United States would support joint efforts with our allies and partners to prepare Ukrainian pilots on fourth generation aircraft, including F-16. We hope that this training will begin in the coming weeks. This will further strengthen and improve the capabilities of the Ukrainian air forces in the long run. And this will supplement our co-resistant and medium-term safety agreements.

These new joint efforts send a powerful message about our unity and unwavering devotion of Ukraine's self-defense. And this again testifies to the main determination to ensure that sovereign and safe Ukraine must hold any future aggression and defend itself against future attacks.

You can see this dedication in our work on the most important potential that is now given by the contact group: terrestrial air defense systems. These are critically important systems protect the Ukrainian sky and civilian infrastructure from the attack of Russia. And we continue to deliver the needed trips.

In total, the contact group has allocated almost \$ 65 billion for security assistance. Now Putin hoped that our determination would disappear. And he staged that our unity would crack. Instead, we remain uniform as Iranian. And it can see the whole world. Now everyone here knows what Ukrainians reached. Russia has resumed its shocking and shameful flurry of racketeers, which threaten innocent Ukrainian civilians, including hypersonic missiles aimed at Kiev. Russia was unable to dominate the Ukrainian airspace. And that is why the air defense will be again at the center of our dysfunctions. As always, our good friend Alexei Reznikov and his team join us. Alexei, thank you that we have taken time to inform us about Ukraine's priority needs for future struggle.

Then the commander of the European Command of the US Armed Forces and the security group of Ukraine will inform us about Ukraine's closest requirements. And we will solve the ways of further acceleration of industrial production of critical systems. We will have to dig deeper and we will have to continue to find creative ways to increase our industrial potential.

The rates are high. But the reason is fair. And our will is strong. We continue to build a sovereign right of Ukraine to live in freedom. We continue to intensify the open world of rules and rights. And we will defend the free and democratic Ukraine as much as it will be needed, "said Lloyd Austin.

Currently, about three thousand Ukrainian athletes are beaten in the Armed

Forces of the Armed Forces. They are not preparing for the Litholympic Games in Paris, but save their country and the democratic world of the districting totalitarian regime.

Russian aggression has already claimed the lives of 300 Ukrainian athletes and coaches, more than 120 sports facilities have been destroyed by hostile rockets and artillery, more than 300 sports schools have stopped existing, 150,000 athletes have no conditions for training.

Instead, Russia and Belarus continue to prepare athletes to also challenge the civilized world in 2024.

The fact that the terrorist country manages to constantly find "useful idiots" or corrupt officials that help her promote the cannibal ideas and traditions of the International Arena, says In a message on the official page of the Verkhovna Rada of Ukraine on Facebook.

"In the International Olympic Committee, they forgot about humanity and are massively brought to the competitions of athletes who receive salaries in the Russian Defense Ministry, promote war and murder.
