UN Non Grate: The Kremlin is artificially blocking the admission of the organization on the Left Bank.

About it on your Facebook page [writes](#) Center for Strategic Communications and Information Security.

There is also an interesting history with the prevention of the UN to the flooded territories of the occupied Kherson region. Gennady Gatilov, Post-Russian Post-income Headquarters of the UN, stressed that the organization "should not ignore the fact that the Kherson region is part of the Russian Federation, and accordingly, for its certification it is necessary to comply with Russian laws."

Peskov, in turn, put the usual smoke, saying that the Uonians were not allowed to the affected areas through shelling.

In fact, the coordinator of the UN Special Humanities Mission from Ukraine Denizbraun has issued a statement stating that Moscow refuses to organize admission to the left bank under the control of Russia.

Moscow may not like the definition of the UN: "Territories that are undergoing in Russia"(that is quite obvious because the international community does not recognize their "accession"). Тому росія пішла на принцип і не пустила гуманітарну місію, прикриваючись «турботою про її безпеку».

Зараз в українському місті Гола Пристань окупаційна влада оголосила карантин. Тобто нічого нового не відбувається. путін, як і раніше, нехтує життям людей заради власних цілей. Є що приховувати і кого ховати?

The appropriate decision was made The Supreme Court is a complication of the court chamber for the protection(Case No. 560/8064/22).

Так, вищезгадана колегія суддів, переглядаючи таку справу в касаційному порядку відносно ветерана війни — особи з інвалідністю II групи внаслідок війни, дійшла висновку, що положення статті 13 Закону України «Про статус ветеранів війни, гарантії їх соціального захисту» необхідно застосовувати щодовиплати у розмірі 8 мінімальних пенсій за віком для даної категорії ветеранів.

Судова палата під час ухвалення рішення звернула увагу на те, що реалізація права на соціальний захист осіб, які перебувають на службі у ЗСУ та інших військових формуваннях, а також членів їхніх сімей потребує запровадження механізмів забезпечення їх державної підтримки. При цьому головну роль обороні України відіграють саме Збройні Сили України та інші військові формування, які своєю мужньюю боротьбою здійснюють ефективний захист Української держави та Українського народу. Відтак усебічна підтримка військовослужбовців та ветеранів війни є найвищим державним інтересом і однією з найбільш захищених конституційних цінностей України.

Відповідна постанова суду касаційної інстанції набирає законної сили з дати її ухвалення та не може бути оскаржена.

Раніше Велика Палата Верховного Суду вже розглядала аналогічну справу щодовиплати одноразової грошової допомоги до 5 травня за 2020 рік. Під час розгляду судді акцентували увагу на тому, що на момент отримання спірної разової грошової допомоги до 5 травня слід керуватися вимогами Закону України «Про статус ветеранів війни, гарантії їх соціального захисту», що передбачає виплату такої допомоги для учасників бойових дій у розмірі 5 мінімальних пенсій за віком, інвалідам війни 1 групи — 10 мінімальних пенсій за віком, 2 групи — 8 мінімальних пенсій за віком, 3 групи — 7 мінімальних пенсій за віком.

Отже, цьогорічним рішенням Верховний Суд підтвердив те, що одноразова грошова допомога до 5 травня за 2022 рік повинна виплачуватися відповідно до розмірів мінімальних пенсій за віком, навіть в умовах воєнного стану.

He added that the cost of registration of a weapon permit remains unchanged and determined by the CMU Resolution of 2007, but the procedure of payment for permission will be simpler, since the receipt can be attached to the package of documents that are sent to the weapons control units with a vestibule.

Also, from June 23, business entities will be able to submit weapons and obtain a permit in a single register when buying weapons.

Currently, according to Tymchenko, in Ukraine more than 700 thousand weapons, economic entities that receive direct access to the register of about 300, expert services that receive such access - about 130, as well as more than 700 police officers, which perform the functions of control over the control of weapons. This was stated by the President of the Czech Republic Peter Pavel at the International Conference "Media and Ukraine", which is conducted by Czech Radio on June 22, Ukrinform correspondent reports.

commented the Pavel Document of Lex Ukraine Vina V, which he signed in the spring.

He called it clear and fair that if one of the refugees found a work, integrated into society, sent children to school, leads such as citizens of the Czech Republic, then the conditions provided by the Czech authorities should be not allowed for those who apply to their own citizens.

The President noted that more than half a million Ukrainian refugees In the Czech Republic, at the beginning of the war, less than 300,000 were now available, many of them found a job that reduced the budget.

He noted that "solidarity is needed, but it is not provided once."

Human Media Initiative(Mplex)She identified the 42 months of maintenance of the Ukrainian military - detention facilities, correctional colonies - both in the border with Ukraine and in the depths of the Russian Federation.

About it at the Media Center Ukraine-Ukrinform during a briefing on the topic: "From Bryanskado Irkutsk: what happens to Ukrainian prisoners on the walls of Russian prisoners" said coordinator MIPP Tatiana Katrychenko.

"The Russian Federation now continues to use the places of detention in Moscow, Rostov-on-Don, but they have still been added a huge number of places where citizens of both civilians and servicemen are being held. This is a huge number of citizens - it is about thousands - which have been moved to the territory of the Russian Federation and, obviously, that the Russian Federation lacks places for their maintenance, " - reported.

She noted that the topic of keeping, moving the prisoners of war is not researched, as it is often very scary. MIPP investigated the places of maintenance in the occupied territories until February 24, 2022. And if the MIPP knows about every location of prisoners of war by the occupied territories of Ukraine, then it is extremely difficult to obtain information in the Russian Federation, it is now collected, based on the testimony of released military -war.

According to the participants of the event, from February 24, 2022 and until June 15, 2023, MIMPP interviewed more than 50 servicemen released during the exchanges(<https://www.ukrinform.ua/tag-poloneni>). Analyzing the selected testimony, MIPP saw the systematic politicians and methods of treatment of Ukrainian prisoners used by Rossi. They are common to all places - physical and moral torture, poor and poor nutrition, practically lack of medical care.

All the evidence of the former prisoners is combined by the fact of systematic application of Ukrainian military physical and psychological violence. This is happening around the clock. The intensity of beating increases when eating, visiting shower and checking cameras. There are cases of torture during interrogations, the initiators of the study reported.

Also, according to Katrychenko, if prisoners have injuries or serious chronic domains, he usually does not receive medical care. Almost everyone who was in the afternoon and whom the MIP representatives interviewed claim that the request for medical assistance is ends with beating.

Often, the food is given for 2-3 minutes, and the extremely low quality of nutrition will be given to the fact that most of the released have critical weight loss-from 10 to 30 kg.

MIPP also known cases of captivity. The military reported however that they have seen or heard about the facts of the death of servicemen.

Imp representatives paid special attention to the frequent movements of the erection between different places of maintenance in the Russian Federation. This is how the person is hidden, to confuse his search, and so that the warriors could not subsequently identify the staff involved in the dosage over them. Even the information is carefully hidden from the prisoners of war in which area they were.

Based on the survey of released servicemen, the MIPP has collected about most well-known maintenance sites in the Russian Federation and an interactive map.

Providing in the process of rebuilding institutional, financial and technological support of "green"(Carbon neutral)Metallurgy, Ukraine has a chance to become one of the world leaders in the industry.

This conclusion, made on the basis of discussion of sectoral problems of the London Conference on Recovery, told at a briefing Vmediacenter Ukraine - Ukrniforor Yurrienkov CEO of Metinvest Group.

The focus of the participants of the discussion, he said, was represented by Ukraine concept of "green" metallurgy, restoration of the country and decarbonization of the industry.

"Now the whole world goes by decarbonization, production of" green "steel. And in Ukraine(Unfortunately because of the war)It is possible to start everything with a "clean sheet" to do everything right. Therefore, metallurgists, equipment manufacturers, as well as their servants, present at the West, spoke of interest in making such plans more quickly. After all, it is the possibility of real changes that the maintenance, financial and technological support can bring Ukraine to the first places in world metallurgy, "Ryzhenkov said.

In his opinion, foreign partners also understand that Ukraine will be part of the European Union, so it is necessary to rebuild it immediately as a component of the EU and European products of production. Therefore, they are also interested in taking advantage of the benefits that Ukraine has: significant coats of iron ore, prepared by experts who are able to work, access to renewable electricity sources.

All this, the industrialist said, will help our country become a competitive EU abilities in the production of "green" steel.

And most importantly - to win the war as soon as possible. But the preparatory steps, according to the industrialist, can be done now. You also need to solve the problem of capital value, which is now very high as soon as possible. This prevents long -term investments .

"It is necessary to work on both financial institutions and Ukrainian law," Ryzhenkov said.

He considers another challenge to be a personnel problem: many workers have gone by Nafront, and there are not enough specialists in production. After victory, they will return.

"However, this may not be enough. It is very important to return Ukrainians from abroad to successfully implement the projects, "Ryzhenkov summed up.

From June 23, a single register of weapons will start operating in Ukraine.

According to Ukrinform, clarification on the introduction of the Unified Register was in a comment [Ukrainian Radio](#) Criminal law expert Gregory Usaty.

As reminded in Ukrainian radio, the Ministry of Internal Affairs is consulted that it will help to automate weapons and make permissions convenient and accessible to ordinary people.

The unified register of weapons will provide for the creation of e -offices. From now on, the Ukrainians will be able to receive the service without leaving home, submitting documents through a "single window of a citizen" or in a weapon sales store.

Commenting on the introduction of a unified register of weapons, the criminal expert has rightly suggested that "a good example of using the" Action "system can be mentioned here.

With regard to the purpose of registration of firearms, the Udaty noted that "it is not only about the accessibility to the register of Ukrainian citizens and the transformation of services is more reliable and more convenient."

"The main goal is to effectively prevent and investigate crimes that weapons can be achieved. expert.

According to him, "regarding the functioning of the Unified Register of Weapons of the Ministry of Internal Affairs, it is an effective control of the whole cycle of use [weapons](#) - That is, to make the processes of licensing of permits, acquisition, possession, check, neutralization and other processes concerning weapons, transparent. "

"Automation of such information support for the compression of weapons circulation is also envisaged. That is, the National Police can record the facts of the abduction of weapons, which makes it impossible for the corruption component in this area. Because it will make meters of the official, for example, from the permitting system to the citizen, the That is, when we talk about transparent services, we can mention a good example when I was recommended only on the positive side using the "Action" system. So the Ministry of Internal Affairs trying to direct its efforts approximately in such a way, " - explained the expert. He added that "some notes that weapons can be obtained" one -click. " War click. "

According to the expert, "the creation of a register of weapons is a desperate attempt at the Ministry of Internal Affairs somewhat to order what is exactly the ordering."

He emphasized that "Ukraine is the only state in Europe that still has no Armable law."

"Bill No. 5708 of June 25, 2021" On the Right to Civilian Occasional Weapons "remained a law, because literally in the day until the full -scale invasion of the Russian Federation into the territory of Ukraine, Assham on February 23,

2022, but approved as a basis. The year is ongoing, and we have no law, " - said.

Therefore, according to the expert, "the Ministry of Internal Affairs realizes that it is nowhere else to pull. They are required to move and organize the circulation of weapons. Therefore, they take a step that depends on them."

However, the expert stressed that "these processes are independent of each other. After all, the Ministry of Internal Affairs represents the executive branch of power in the state, and the legislator - the legislative. So we very much need a weapons law, but the question is in what form."

He also noted that "today we cannot say that the permission of a firearm is acceptable."

"Therefore, everyone should know that in Ukraine there is free wearing on the streets today.(Pistols and revolvers), trophy weapons, recycled weapons, explosives and grenades. The weapon, which is tuned under the shots, is also outlawed, "the expert emphasized.

He stated that "we also do not have the purchase of weapons for self - defense."

"Therefore, the order of the Ministry of Internal Affairs, which has existed since the 1990s, allows only the purchase and circulation of the weapons of a corresponding purpose, in particular it is about hunting weapons,"-added.

In addition, the specialist explained what weapons Ukrainians can buy.

He added that "the purchase, storage and use of these weapons is performed under certain conditions."

"The Ministry of Internal Affairs may have gone further, but provided there will be a weapons law. Now, I think it is too early to say," the expert summed up.

As reported by Ukrinform, on May 25, the Minister of Internal Affairs of Ukraine Igorklimenko stated that the single register of weapons will work on June 23.

Full de-occupation of the Zaporizhzhya NPP, and anyone who closed their eyes on its occupation by the Russian occupation actually contribute to terror.

According to Ukrinform, about it in his [traditional evening address](#) President Volodymyr Zelenskyy said.

_ Dear Ukrainians, Ukrainians! _

Today was a very busy day.

First, they briefed for partner countries about the situation at the Zaporizhzhya atomic station. There were representatives of the countries of the Great Seven, "Grand Twenty", representatives of international organizations. Here in the office. A available information has been provided from the GUR, from the commissioner, from our diplomats.

Our principle is simple: the world must know what the occupier prepares. Everyone who knows has to act. Of course, after a Russian terrorist attack on the Kakhovskaya hydroelectric power station, terrorists on other dams and energy objects of the old one in the world should not have any illusions about Russia. It is Russia that is now the brigal center of cynicism, and from there may be any order for any excellent, which they expect to mask under one or another catastrophe. The world has a complicated power to prevent any radiation incidents and, moreover, a radiation disaster. Everyone understands that intelligence of different countries can give corresponding signals, they can press. This is required.

We will continue to inform partners. Information will also be provided to those countries that have some neutrality even now. Obviously, radiation does not ask, who is unnecessary, and can reach anyone in the world. Accordingly, anyone in the lightisarase can help, and what to do is quite known.

Full de -occupation of the Zaporizhzhya nuclear station is required. And anyone who has fulfilled their eyes on Russia's occupation of such an object, on the mines of Russia, the territory of the structures of the nuclear power plant, in fact contributes not only to this Russian gun, but terror in general. And today I instructed the Minister of Internal Affairs Klimenko Igor to take all necessary measures, all the necessary work with our people on all available risks. And in the near future it will be done. Of course, we also have information about what is happening in the occupied part of the Serson region. To do this, even the word "catastrophe" is not enough. The Russian wicked special groups there to remove and obviously hide the Tilasagid people. And this is not the first time Russia is trying to destroy the evidence of its crimes in the occupied territory. So they did in Mariupol, other places. But this is the truth that you do not hide. And I thank everyone who helps our intelligence, our special services to get the information they need!

He also held a meeting on the spiritual independence of Ukraine - we continue the correspondence, and there will be new steps. Obviously, there can be no spiritual communication with the terrorist state and those who justify the murder, murder of Ukrainians and cover evil. Every day and every

night of Russian terror is custom. And we will reach the moment when all the dependence on Russia, which is trying to manipulate somewhere, will be destroyed.

One more.

I want to give especially to all those who, even at that time, even in such circumstances, that our people and our country are small cultural power. Today, the next book Aresenal began in Kyiv. "Arsenal" is the word that best characterizes the meaning of culture. What makes people people. What makes humanity stronger. What protects and spreads through time our experience - everyone and everyone, all of our Ukraine, all our Ukraine, all our Europe, all our humanity. Bellas, if you have the opportunity, visit one of these days Book Arsenal and always support cultural power.

I thank everyone who is fighting and working for Ukraine! I thank everyone who is now in the battles - in the south, in the east, in Zaporozhye, in Donetsk region, in Luhansk region. Thank you!

Thank you all who help Ukraine and protect their lives and humanity with us!

_ Glory to Ukraine! _

In total, 19 winners of 22 **have been identified**. On 16 the winners of the competition ** are currently preparation of contracts for their signing, with the winners of the Deposit Contest on the Ministry's account, as required by tender documentation.

Three more procedures from the total 22 were rejected by all participants in connection with the inconsistency of their price proposals with the conditions of the announcement. Repeated bidding - this information is highlighted in Prozorro(*The procedures for the deadline for submission of documents 22.06.2023, by the third - until 27.06.2023*).

Зазначимо, що у повторних процедурах закупівлі так само беруть участь всібажаючі, а не лише діючі учасники. Тому Міноборони з метою розширення колапотенційних учасників та зниження ціни на аукціоні просить долучатись всіх, хто має бажання і спроможності.

Також триває низка судових процесів, на яких розглядаються позови окремих учасників торгов. Зміст позовних заяв різний, але здебільшого їх суть полягає у претензіях до роботи Колегіального органу Міністерства оборони України з питань оборонних закупівель.

При цьому, з метою максимального громадського контролю за процесом закупівельта задля дотримання принципів транспарентності Міністерство оборони ввело доскладу Колегіального органу з питань оборонних закупівель представника Громадської Антикорупційної Ради при Мінобороні.

— Наголошу, всі процеси відбуваються максимально відкрито. Ми активно співпрацюємо з громадськістю, за що вдячний, зокрема Антикорупційній Раді, та незважаючи на всі ці труднощі, закупівлі тривають, договори підписуються, все відбувається з дотриманням всіх процедур і термінів, визначених законом «Пропублічні закупівлі». Жодних затягувань немає. Військо є і буде повністю забезпечене — це наше ключове завдання, — прокоментував заступник Міністра оборони України Денис Шарапов.

In an appeal to the organization of American states, President Volodymyr Zelenskyy suggested working together on the implementation of the formular, which he proposed last year. In addition, the President is invited to prepare

the Global Peace Summit, which will determine which state with what point in the formula will help.

About it [reports](#) Office of the President of Ukraine.

"The world that does not dominate violence is our common goal, all the leaders of the wealth that really appreciate human life. The world in which the UN Statute is truly respected by all - from the smallest to the largest states. A world in which new frozen conflicts emerge, but also in which the majority of nations realizes that any war is a common world challenge, it is a threat, not the suffering of the only one against whom this aggression is, "the Glavs said.

In a speech, he stressed that Russia has brought war to the territory of Ukraine, Russian missiles and artillery burn Ukrainian cities and villages, Russian ecocids destroy the nature of the country.

"So Ukrainians are best aware of what to do to return. But in order to return peace, we need collective effort. And of course, in particular your support, your leadership. I invite you to work with us and all the free nations of the world over the implementation of peace. I invite you to get involved in the preparation of the global peace summit. We must become a global community in the full sense of the word so that the peace for the right nation is guaranteed to full power, "said Volodymyr Zelenskyy.

40 Ukrainian drones have undergone a procedure for commissioning and already have state contracts. A year ago, there were only 7 such drones.

About it [reported](#) Viceremier-Minister of Ukraine Zinnovations, Development of Education, Science and Technology-Minister of Digital Transformation of Ukraine Mykhailo Fedorov during a meeting with Ukrainian producers.

"It is right now that thousands of FPV-pings are needed, because they are fast, accurate, maneuverable and destroy a lot of Russian equipment. We have a budget for the purchase of UAVs, but not every Ukrainian company is ready to produce so many drones. One of the main reasons - companies did not pass all the steps for operation due to the complexity of the process, "the minister said.

He noted that the government removed almost all the blockers, introduced Fast-Track for UAVs, created special areas for pilot training and drone testing, eliminated bureaucracy, simplified its admission and more.

In addition, the minister reported that the Drone Army team will constantly advise manufacturers for documents, helps organize testing at the landfill, etc. Therefore, it is not necessary for Ukrainian developers to worry about the passage of all procedures.

"We are always ready to help you get contracts and scale production faster. I am sure, together we will make a revolution in the development of FPV-digters. Ahead of work before, "said Mikhail Fedorov.

Full de-occupation of the Zaporizhzhya NPP, and anyone who closed their eyes on its occupation by the Russian occupation actually contribute to terror.

According to Ukrinform, about it in his [traditional evening address](#) President Volodymyr Zelenskyy said.

_ Dear Ukrainians, Ukrainians! _

Today was a very busy day.

First, they briefed for partner countries about the situation at the Zaporizhzhya atomic station. There were representatives of the countries of the Great Seven, "Grand Twenty", representatives of international organizations. Here in the office. A available information has been provided from the GUR, from the commissioner, from our diplomats.

Our principle is simple: the world must know what the occupier prepares. Everyone who knows has to act. Of course, after a Russian terrorist attack on the Kakhovskaya hydroelectric power station, terrorists on other dams and energy objects of the old one in the world should not have any illusions about Russia. It is Russia that is now the brigal center of cynicism, and from there may be any order for any excellent, which they expect to mask under one or another catastrophe. The world has a complicated power to prevent any radiation incidents and, moreover, a radiation disaster. Everyone understands that intelligence of different countries can give corresponding signals, they can press. This is required.

We will continue to inform partners. Information will also be provided to those countries that have some neutrality even now. Obviously, radiation does not ask, who is unnecessary, and can reach anyone in the world. Accordingly, anyone in the lightisarase can help, and what to do is quite known.

Full de -occupation of the Zaporizhzhya nuclear station is required. And anyone who has fulfilled their eyes on Russia's occupation of such an object, on the mines of Russia, the territory of the structures of the nuclear power plant, in fact contributes not only to this Russian gun, but terror in general. And today I instructed the Minister of Internal Affairs Klimenko Igor to take all necessary measures, all the necessary work with our people on all available risks. And in the near future it will be done. Of course, we also have information about what is happening in the occupied part of the Serson region. To do this, even the word "catastrophe" is not enough. The Russian wicked special groups there to remove and obviously hide the Tilasagid people. And this is not the first time Russia is trying to destroy the evidence of its crimes in the occupied territory. So they did in Mariupol, other places. But this is the truth that you do not hide. And I thank everyone who helps our intelligence, our special services to get the information they need!

He also held a meeting on the spiritual independence of Ukraine - we continue the correspondence, and there will be new steps. Obviously, there can be no spiritual communication with the terrorist state and those who justify the murder, murder of Ukrainians and cover evil. Every day and every

night of Russian terror is custom. And we will reach the moment when all the dependence on Russia, which is trying to manipulate somewhere, will be destroyed.

One more.

I want to give especially to all those who, even at that time, even in such circumstances, that our people and our country are small cultural power. Today, the next book Aresenal began in Kyiv. "Arsenal" is the word that best characterizes the meaning of culture. What makes people people. What makes humanity stronger. What protects and spreads through time our experience - everyone and everyone, all of our Ukraine, all our Ukraine, all our Europe, all our humanity. Bellas, if you have the opportunity, visit one of these days Book Arsenal and always support cultural power.

I thank everyone who is fighting and working for Ukraine! I thank everyone who is now in the battles - in the south, in the east, in Zaporozhye, in Donetsk region, in Luhansk region. Thank you!

Thank you all who help Ukraine and protect their lives and humanity with us!

_ Glory to Ukraine! _

Deterous Ukrainians, Ukrainians!

Today was a very busy day.

First, they briefed for partner countries about the situation at the Zaporizhzhya atomic station. There were representatives of the countries of the Great Seven, "Grand Twenty", representatives of international organizations. Here in the office. A available information has been provided from the GUR, from the commissioner, from our diplomats.

Our principle is simple: the world must know what the occupier prepares. Everyone who knows has to act. Of course, after a Russian terrorist attack on the Kakhovskaya hydroelectric power station, terrorists on other dams and energy objects of the old one in the world should not have any illusions about Russia. It is Russia that is now the brigal center of cynicism, and from there may be any order for any excellent, which they expect to mask under one or another catastrophe. The world has a complicated power to prevent any radiation incidents and, moreover, a radiation disaster. Everyone understands that intelligence of different countries can give corresponding signals, they can press. This is required.

We will continue to inform partners. Information will also be provided to those countries that have some neutrality even now. Obviously, radiation does not ask, who is unnecessary, and can reach anyone in the world. Accordingly, anyone in the lightisaraz can help, and what to do is quite known.

Full de -occupation of the Zaporizhzhya nuclear station is required. And anyone who has fulfilled their eyes on Russia's occupation of such an object, on the mines of Russia, the territory of the structures of the nuclear power plant, in fact contributes not only to this Russian gun, but terror in general. And today I instructed the Minister of Internal Affairs Klimenko Igor to take all necessary measures, all the necessary work with our people on all available risks. And in the near future it will be done.

Today, the SBU and the Ministry of Internal Affairs have spoken appropriate security issues - ITe concerning the Zaporizhzhya station, and what concerns the consequences of the Russian terrorist attack at the Kakhovsky Hydroelectric Power Station. We do our best to connect as much as possible and means to pressure and influence on the terrorist state. There was also a separate report of internal affairs to support people and life in the Kherson region and the greetings of our south, which were affected by the destruction of the Kakhovsky Damage. He also held a meeting on the spiritual independence of Ukraine - we continue the correspondence, and there will be new steps. Obviously, there can be no spiritual communication with the terrorist state and those who justify the murder, murder of Ukrainians and

cover evil. Every day and every night of Russian terror is custom. And we will reach the moment when all the dependence on Russia, which is trying to manipulate somewhere, will be destroyed.

One more.

I want to give especially to all those who, even at that time, even in such circumstances, that our people and our country are small cultural power. Today, the next book Aresenal began in Kyiv. "Arsenal" is the word that best characterizes the meaning of culture. What makes people people. What makes humanity stronger. What protects and through time spreads our experience - everyone and everyone, all of our Ukraine, all our Ukraine, all our Europe, all our humanity. Bellas, if you have the opportunity, visit one of these days Book Arsenal and always support cultural power.

I thank everyone who is fighting and working for Ukraine! I thank everyone who is now in the battles - in the south, in the east, in Zaporozhye, in the Donetsk region, in Luhansk region. Thank you!

Thank you all who help Ukraine and protect their lives and humanity with us!

Glory to Ukraine!
