One of Ukraine's joint common tasks and its allies is to remove any possible sanctions for Russia, because every scheme that enables the overgrowth of sanctions, adds time to this war and the capabilities of the aggressor.

About it in your President Volodymyr Zelenskyy said at the end of the 423rd day of the war, reports.

Video:

I wish health, dear Ukrainians!

Today, three new sanctioning decisions have come into force on and supported Russian aggression.

First of all, it is another package of sanctions against the Russian MIC-enterprises that provide a terrorist army. This time, 322 companies were added to the sanctions lists - weapons, accessories and more.

The other two sanctions lists are natural and legal persons that help sanctions against Russia, hold the property of military criminals and involved the leisure of freedom both in the territory of Russia itself and in our land.

Our sanction packages are elaborated in detail, in particular, to synchronization by the correspondents. This is one of our common tasks - absolutely everyone who will end the faster end of the war, faster than our victory. The task is to remove any opportunities for Russia to circumvent sanctions. Each Russian scheme that gives the sanction to overcomes this war, adds the opportunities to the aggressor.

Accordingly, the stricter sanction regime against Russia, which is more restrictions in front of the terrorist state and all the persons related to it, against the whole Russian economy of war, the faster will be the completion of aggression. And I thank everyone in the world who understands it.

It is important that global restrictive work on the Russian atomic industry has begun.

This industry not only generates funds for the aggressor budget, but also helps to depend on other states in the territory of which "energy" atomic projects are being realized. Any Kremlin energy is a weapon. The nuclear power of them is also a weapon.

And this, by the way, happens at the Zaporizhzhya nuclear power plant, which is used as weapons for blackmail of the world. For blackmail by catastrophe.

And it is good that Britain, America, France, Japan, Canada formed an alliance that can remove the atomic industry of the terrorist state from the global market. The Netherlands - thank you for increasing the air defense and for joint with Denmark on tanks.

Thank you to Germany. There are new steps that will provide more peace in our sky, and ... can be new steps that will bring more peace to our earth. We expect this.

I thank Estonia, Finland for new defensive packages. Thank you Slovakia for aviation.

I thank Switzerland for new sanctions against Russian terrorists.

Next week we prepare in relations with partners no less effective than this one. Each such result for Ukraine is the lives of our people. It is the ability of our warriors to protect their lives, to reflect Russian assaults to prepare Ukrainian active actions.

I thank all our soldiers who are in battle now! Especially to those who are now the most winged places of the front line - Marinka and Bakhmut, Avdiivka, Lymanskaya. It is there the most fierce.

Thank you to the Armed Forces, National Guard, Border Guards ...

Today I will celebrate the unit of the GUR MO Timur, which is fighting in Bakhmut. Thank you guys for your courage and efficiency!

Glory to all our soldiers!

The Government has approved a resolution "On Amendments to the Procedure for Sending Persons of the Complex Defense and Security Forces,

Victims in connection with the military aggression of the Russian Federation against Ukraine, for treatment abroad."

About it [reports](#) Government portal.

According to the Prime Minister during a government meeting, this is a significant step that Ukraine's abuse could get the necessary treatment or rehabilitation abroad, without unnecessary bureaucratic procedures.

"One of the priorities of the government is the reform of medical and social expert commissions of the Tavi-Medical Commissions. Today we adopt a resolution on the simplification of our wounded fighters for treatment abroad. Now such directions will be able to get in the medical institution where treatment is undergoing chireabilization. Without tightening, without queues, without bureaucracy, "Denyshmigal said.

From now on, medical institutions, in which Ukraine's defenders are treated and/aperabilization, will be able to determine independently the need to send them abroad. Conducting a consultation of a military medical institution is now needed.

That is, the medical institution, in which the defender of Ukraine is on treatment, will independently formulate the conclusion that the need for treatment for treatment abroad will tap a package of documents to the relevant state body, which is part of the sector of safety and defense.

Thus, the conclusion on the need to refer the defender of Ukraine abroad will be accepted without a consultation of a military medical institution.

An unusual and at the same time a landmark event occurred in Odessa, where a station for dragging the sea rope was set. In the event, which took

place, 148 navals of the Vice-Admiral Vice-Admiral Vladimir-Abazkorovayny and 60 cadets of the Navy of the National University "Odessa Maritime Academy" took part in the event of one of the local parks of culture and recreation. The participants of the competition were divided into two teams of calculation more(!)meters and weighing 500(!)kilograms.

It is worth noting that the National Record of Ukraine was established according to all the rules of its fixing in the presence of a well -known Ukrainian -sports journalist and commentator, founder of the National Registration of Ukraine, Valentin Shcherbachev, who, before the start of sports activities, was measuring the length of the rope.

[!\(Images/APMIRINFORM/2023-04-22T63-00-00-04-00/1-75-150x150.jpg\)](#)

And then, at the signal of the judge, the future defenders of Ukraine began to pull on themselves hard, trying that the closest to the opponents the marking crossed the corresponding border on Earth. They tried, were as tense as possible, and did their best to make the victory on their side. In fact, the victory for all participants was the very fact that they set a new national record in this inherent in seafarers, and to export. According to the officer, even despite the martial law, this format is very necessary and useful. After all, they are aimed at promoting a healthy offense of pre -draft youth and raising the prestige of the Lyceum, which study physical, bold future defenders of Ukraine.

His direct organizers Sergiyanko and Valentin Shcherbachev shared their thoughts on the organization and holding of this spectacular holiday with us. In their opinion, even during the war, participating in such spectacular sports events not only contributes to their physical development, but also cohesive boys and girls, raises their mood and a magic patriotic orientation.

[!\(Images/APMIRINFORM/2023-04-22T63-00-00-04-00/5-41-150x150.jpg\)](#)

By the way, this is not the first arranged Sergiy Isaenko and Valentinchcherbachov's holiday in educational institutions of a similar profile. At different times, they were direct organizers and, so to speak, ideological inspirers to establish national records on pull-up and lifting with a trip to the horizontal bar at the Kiev Military Lyceum named after Ivan Bohun, Takamyanets-Podilsky Lyceum with enhanced military-physical training.

Therefore, from now on the "treasury" of Ukrainian lyceum students in one record increased. The navigation of the Naval Lyceum inscribed their name in the history of Ukraine and the development . They are convinced that there are many new records and achievements in the future of the current I. in sports, both in sports, and in life!

The Militation Media Center has a round table dedicated to the features of the robots returned from captivity by the military and the search for missing missing.

I understand the expectations of relatives and their expectations for our performance. One of them seeks to return their home from captivity as soon as possible. Aleks is that even now, in this second, hostilities are ongoing. And, perhaps even now, someone was missing at this moment, perhaps he was killed, and was taken prisoner. We know about every serviceman who has missed the missing, and we work for all. As soon as we manage to prove the process and get the result in the form of an exchange, the serviceman returns.

This was stressed during a roundtable at the Military Media Center by the

representative of the Coordination Staff on the management of prisoners of war Bogdanohrimenko.

For families who are worried that their boyfriend does not have the official status of the VREAER or in any database, I note separately: for the coordination headquarters, this is a problem. If there is at least a little hope that a person is alive, we will be able to redeem on the other side of his return home. This work is complex, far from public, but I think as soon as we can tell society everything, no one will hide anything from anyone. After the victory, we will open the information, how the negotiations were, what was focused on, what washed on the other side, and what mechanisms forced Russia to give our citizens, our servicemen, our defenders, our heroes. The work will not come down until we return everyone.

This was stressed during a roundtable at the Military Media Center by the representative of the Coordination Staff on the management of prisoners of war Bogdanohrimenko. - The ICCH, according to its mandate, should check the maintenance sites of the health of servicemen who are in captivity, but it is not at the extent that regulates international law, - he said. Since June

2022. This was headed by the first Viceremier-Minister, Head of the Ministry of Integration Irin Vereshchuk. The work she organized was crucial because in the Present Wars the military was focused on repeling the attacks of the enemy. At the same time, the CMU Resolution No. 257 was elaborated, which determined the status and direction of the coordination headquarters. Ms. Irina headed the headquarters until May, and after the threat of capture of Kyiv, Chernihiv, Sumy, Kharkiv was removed, the decision to change the leadership of the coordination headquarters to the military was made. The Unara was headed by the head of the Main Directorate of Intelligence of the Ministry of Defense of Ukraine Kirilobudanov. Since June, we have started our communication with the ICRC. I note that what was in this Tszarin in early summer last year and now are two different things. Improved communication with other state authorities, in particular with the office of the Ombudsman of Human Rights Dmitry Lubinz and the Commissioner for Persons missing in the special circumstances of Oleg Kotenko, in general - all state structures who have applied to the ICRC and now give its positive results. to visit some places of maintenance of our captives by the territories of occupied Ukraine and the Russian Federation. But this was a little - they must perform the whole mandate. In the ICRC, the Russian Federation does not allow them to keep them... Sometimes we tell you, it is the advice of interaction.

According to the Chairman of the Verkhovna Rada Committee on Energy and HCP Andriugers, more than 1,200 missiles and drones have released the Russian Federation on the key facilities of the country. Accordingly, the total loss caused by the Ukrainian energy system of Ukraine by attacks of Russian missiles and drones is estimated at billionardidals.

"Of course, the safety margin has significantly decreased and it needs to be drawn to the next winter. Today, we need to work for the passage of the next heating season is simpler and more predictable than this winter, "Andrei Gerus said on the broadcasting of the only news.

The Chairman of the Committee informed that to prepare for the next winter, namely to restore the power system, Ukraine, according to the most conservative estimates, requires over UAH 40 billion.

"There are basic discussions around this: where to get money to repair the trapped objects of energy infrastructure, to establish additional protection and to create reserve stocks," - comments Andrei Gerus.

According to the Chairman of the Committee, Ukraine receives significant international assistance, but it is not enough to restore the power system to the level to abyigrand the uninterrupted supply of electricity to Ukrainians.

One way of accumulating money is to increase the tariff for electricity.

"In my opinion, the secured population has the opportunity to pay a higher tariff for electricity. If the business now has a tariff of 5.5 UAH per kWh, then the population consuming more than 250 kW-1.68 UAH, "said Andrey Gerus.

The Chairman of the Committee added that the tariff for the population to the level of tariff for business will not be increased, but it is necessary to find the option that the society, the authorities and the opposition will be agreed.

The first deputy chairman of the Committee on Energy and HCP Alexei Kucherenkoconstaches that the electricity tariff for the population is significantly lower than the comprehensive European countries. But it is obvious that the wealth of most Ukrainians does not correspond to European.

According to the Deputy Chairman of the Committee, a key emphasis from 2019 should be made to prevent gas tariffs from growth and heat for the population to be released to their real cost. At the same time, it was possible to gradually increase the tariff for electricity for the category of relatively "wealthy consumers", but not to change the tariff for low -income Ukrainians, who are about a third. **Source:** [overvna Rada of Ukraine](#)

A spokesman of the united Press Center of Defense forces of Tavriysky Colonel Alexei Dmitrashkivsky on the air of Televahorfon ["Yeninovina"] told about the situation in the south of Ukraine and in the Donetsk region on the evening.(<https://www.youtube.com/watch?v=WY8sDvZdWEA>).

— Протягом сьогоднішнього дня ворог уже шість разів атакував Вугледаравіаційними бомбами типу ФАБ-500. Наразі уточнюється інформація пропостраждалих серед цивільного населення. Що стосується Мар'їнського та Авдіївського напрямків, то там ворог

продовжує штурмувати наші позиції. У результаті дії окупантів був пошкоджений об'єкт критичної інфраструктури в Карлівці. Останнє створило проблеми з водопостачанням в 67 населених пунктах,— повідомив полковник Дмитрашківський.

За його словами, в Авдіївці, яку ворог щодня обстрілює, ще залишаються близько 1800 цивільних осіб, в тому числі й діти. Проте росіян це не турбує й вони продовжують руйнувати місто.

— Свою тактику ворог не міняє. Вони атакують мотострілецькими відділеннями. Наприклад, учора всі атаки були здійсненні саме відділеннями або групами до 10 осіб. Проте на Донеччині почастішали ворожі авіаційні удари, а також обстріли з артилерії та РСЗВ окупантів. Відносний спокій на Запорізькому напрямку пояснюється тим, що окупанти укріплюють свої оборонні позиції, бо бояться нашого контранаступу, — уточнив речник об'єднаного пресцентру Сил оборони Таврійського напрямку.

Volodymyr Zelenskyy

President of Ukraine Volodymyr Zelensky addressed the daily message of the D -Ukrainian people:

The other two sanctions lists are natural and legal persons that help sanctions against Russia, hold the property of military criminals and involve the reduction of freedom both in the territory of Russia itself and in our land.

Our sanction packages are elaborated in detail, and in particular - for synchronization from partners. This is one of our common tasks - absolutely everyone who will end the faster end of the war, faster than our victory. The task is to remove any opportunities for Russia to circumvent sanctions. Each Russian scheme that allows you to bypass sanctions, adds time to this war, adds opportunities to the aggressor.

Accordingly, the sanction regime against Russia, which is more restricted in front of the terrorist state and all related persons, against the whole Russian economic economy of war, will be more likely to complete aggression. And I thank everyone in the world who understands it.

Glory to all our soldiers! Glory to all our heroes of different times who fought for the independence! Ukraine will always be free! Glory to Ukraine!

On the day of the Earth, which is celebrated annually on April 22, the Ministry of Foreign Levels of Ukraine together with the group 1+1 Media launched thematic video protoastrophic consequences for ecology around the world, caused by full -scale Russia against Ukraine, informs the Ministry of Foreign Affairs. The main idea of the video is to disappear at the fact that the Russian Federation causes irreparable damage to the All-and-planet by its actions, and war is not eco-freely.

“We sort, process, refuse. Choose ECO, Green, Cruelty-FREE.Tereside, go to an alternative, we put on a second time, use again. We save, plant, learn ... But this is not enough until it continues to war Ukraine. Russia's invasion has catastrophic consequences for Ukraine's ecology all over the world, ”the [video] reads(<https://youtu.be/PzCz9zY Gh7M>).

Спеціальний відеоролик із закликом «Зупини росію, щоб врятувати Землю» поширюватиметься через дипломатичні представництва, а також — українськомовні майданчики групи 1+1 media та ресурси міжнародних партнерів.

«Сьогодні під загрозою не лише наша країна, а самі основи світового порядку, системи безпеки та міжнародного права. росія нехтує всіма існуючими міжнародними угодами у сфері охорони навколошнього середовища під часвійськових конфліктів. російські війська не лише вбивають українців і руйнують українські міста та села, але і вчиняють екоцид, руйнуючи унікальні екосистеми нашої країни та знищуючи сотні унікальних видів рослин і тварин. Все це відбувається просто в центрі Європи. Захист природи є одним з важливих елементів Формули миру Президента Зеленського. Ми закликаємо партнерів об'єднати зусилля і зупинити російський екоцид», — коментують в Міністерстві закордонних справ України.

Ініціатори акції закликають всіх небайдужих поширювати відео у соціальних мережах українською та англійською мовами.

«Щоденно росія завдає збитків нашій країні, ведучи тактику „спаленої землі“. Обстрілюючи, знищуючи та мінуючи все на своєму шляху, країна-агресорка наближає суспільство до екологічної катастрофи. І йдеться не лише про наслідки для території України, а й для всього світу. Ми повинні це зупинити. Саме тому спільно з Міністерством закордонних справ розробили тематичний ролик, аби відтут привернути увагу міжнародної спільноти до подій в Україні», — коментують в 1+1 media.

About it [reported](#) The Commissioner of the Verkhovna Rada of Ukraine for Human Rights Dmitry Lubinets.

Нагадаю: Апаза Куртамета російські силовики затримали 23 липня 2022 року наадмінмежі з тимчасово окупованим Кримом, куди він прямував до родичів. Того ждня зв'язок із ним зник. Про його місце перебування не було відомо до 8жовтня. Наприкінці лютого цього року окупанти розпочали судилище.

Росія не полишає репресивну політику стосовно представників корінного народу Криму — кримських татар. Усі обвинувачення на адресу громадян України є надуманими і мають політично мотивоване підґрунтя, а вироки — незаконними.

Міжнародне гуманітарне право забороняє державі-окупанту застосовувати своєкримінальне законодавство на окупованій території.

Закликаю світову спільноту посилити політико-дипломатичний тиск на РФ доповного і безумовного звільнення всіх незаконно утримуваних українських громадян.
