Honor propaganda on its resources extends misinformation about the potential of Ukraine in NATO in case of abandonment of temporarily occupied territories.

Facebook's Facebook Center [reported](#) About a fake, widespread by hostile propagandists.

The propagandists refer to the article The New York Times by a subdivision "If the divided Germany could get to NATO, why is Ukraine not?".

Having analyzed the article of the publication, the Center for Combating Misinformation reports that there is no mention that NATO has made any requirements to Ukraine in the Alliance.

The author of the material only reflects on the possibility of Ukraine's accession to NATO uncomplicated occupied territories and draws parallels with Germany in 1955.

Due to the entry into the North Atlantic Alliance of Finland and in view of the further expansion of NATO, it discusses the expansion of headquarters in Brussels and reorganization of premises.

According to NATO's four diplomats, the Alliance building in Brussels, opened in 2018, becomes too small to place delegations of future Member States.

"Finland's moving to NATO headquarters will end with the next weeks of the IIsyans," one of the Alliance officials confirmed, adding that it will be samosted with Sweden, "when it becomes a full member of NATO."

But the problem is that none of the new delegations in the current construction building will fit.

Currently, the delegations of Finland, Sweden and other partner countries are located the NATO Early Headquarters-an old complex built during the Cold War, across the road on Leopold III Boulevard. It is currently used to place delegations of partner countries.

Since NATO enlargement has occurred faster than predicted, now the Alliances are finding a solution that would allow Finland and its future faith of 50 people to move to the headquarters building.

One of the decisions of the Alliance is the construction of additional construction in the territory of the NATO military town, where its international employees and agencies could accommodate. This solution is proposed as a temporary but quick solution.

At the same time, the problem is the cost of construction, because for the construction of a new headquarters, the Alliance has already paid 1.1 billion euros.

The Parliamentary Committee on Social Policy and Protection of Veterans and Veteranovicated "Round Table" on "The State of Functioning of Automated Humanitarian Aid Registration System". MPs, representatives of the Presidential Office, ministries and departments, and the public sector were invited to participate.

The task of the state was to develop a mechanism of quality registration, the distribution of humanitarian aid - to get it where it is most needed.

Thus, the Deputy Minister of Health on Digital Development Mariakartchevich shared his experience in the rapid response to the closure of the needs of medical institutions, since February 2022.

In fact, in March 2022, the Ministry of Health operated the entire algorithm, from communications with donors and completing the process of accounting and distribution of goods in Ukraine.

Collection of data on medical needs, accounting of residues on regional warehouses and health care, as well as the distribution of medical humanitarian aid are reflected using the Meddata information and analytical system, providing control and process control.

The Ministry of Health distributes this assistance not only to health care facilities, but also to communal and departmental institutions, including those that are under the control of security and defense structures. The whole humanitarian assistance is sorted by priority. First of all, to close the needs of medical establishments located in and near the combat zone, as well as those that are re-enforced by the treatment of the wounded. In addition, the focus contains the establishments of the regions with a high number of internally displaced persons.

Humanitarian aid is unloaded in 4 transit warehouses. They contain a cloth mode so that the medicine can be stored. There, cargoes, accounting, introduction to the system for tracking everyone. After that, it is distributed according to the needs transferred to the Meddata system. Further, logistics partners transport to regional warehouses operating under military administrations. During the martial law, the Ministry of Health has received more than 12.5 thousand tons of medical humanitarian aid through coordination of the Ministry of Health in the amount of more than UAH 13.5 billion.

The participants of the round table noted that Ukraine will need humanitarian aid throughout the wartime. Therefore, the issue of registration of

humanitarian aid, control of humanitarian aid and reporting on its distribution should be resolved as soon as possible. Also present are the commemorative experience of the Ministry of Health and the healthcare sector in this area.

More than 19.5 thousand children, according to the Office of the Prosecutor General, Russia exported its territory from the temporarily occupied territories of Ukraine. In this she served as statements about their "salvation", and for

Ukraine chose the tacticuslyako to be blamed as such acting against the interests of Ukrainian children. Manipulations, misinformation, attempt to shift responsibility for Ukraine's other countries, conscious violation of international law and active involvement Thoughts in support of their unlawful politics - this is what the National Council revealed when monitoring Russian resources on the deportation of Ukrainian children. The media larger prepared the reporting with the results of his work, which relied not only on monitoring data, but also on the legal basis, including the international, in this matter.

About it reports [press service](#) National Council for Television and Radio Broadcasting.

Monitoring has covered Russian state TV channels ("Planet RTR", "Russia 24", "NTV-MI", "360"), online media (Izvestia, Moscow Komsomolets, Vesti.ru, RIA, Radio Sputnik, Vedomosti, Parliamentary Gazeta, AiF, Kommersant, Lenta.ru, TASS, "Sm.news", "Bloknot.ru", "Public Service of News") and the online version of the Radio Sputnik radio station for the period from a full-scale invasion to May 2023. Data from open sources, mainly from the EUVSDISINFO resource, and materials of research institutes, expert groups, authorized international representatives and missions, were used to refute narratives and misinformation. Human rights, puzzle crimes against humanity, related to the

forced movement and/or deportation of Ukrainian children to the Russian Federation. From the point of view of international law, deportation of children is one of the six serious orders against children in the face of military conflicts. The UN Security Council approved the UN 1261 of the UN in 1999, which described six serious violations against children during armed conflict. These violations are released from the fundamental principles of international humanitarian law, international human rights, and Geneva Conventions (inclusive protocols to them), Roman Statute and the Convention on Rights [3]. Therefore, when Russia performs the abduction or admiration of children, it is top on the Geneva Conventions, and commits war crimes and anti -moments.

The first report on how Russia exports to its territory Ukrainian children appeared in the Russian media on February 21, 2022. Further such reports on "evacuation", rehabilitation and adoption or "design" of Ukrainian children in Russian families, their upbringing (In fact, re -education) Information in Russian information regularly.

The analysis of Russian media resources made it possible to evaluate the pattern of stories of the Russian media in the context of deportation of children and determine their intelligence and systematicity.

**Yes, it is clear that**

Транслюють позицію російської держави офіційні посадовці. З допомогою ЗМІ вони часто поширяють неправдиву інформацію, формують наративи для виправдання своєї політики і формування лояльного ставлення російського народу до депортациї українських дітей і будь-яких дій російського уряду щодо цього. Це сприяє підтримці політики депортациї Росією не лише у межах самої російської федерації, але й на тих територіях, де досі працюють або на які поширяють свою діяльність російські медіа. Тому російські медіа — це співучасники злочинної діяльності РФ у контексті депортациї дітей, оскільки вони підтримують і поглиблюють злочинну депортaciю.

In general, in the rhetoric of Russian high-ranking officials, the justification of the criminal deportation of Ukrainian children is due to the formation of the idea that Russia actually has only good intentions and seeks to save Ukrainian children from the renovated threat - Nazism and/or fascism.

In addition, significant efforts are made by Russian officials and the media in order to blacken the western countries(mainly in Europe and the United States). Так, після видання Міжнародним кримінальним судом ордеру на арешт президента росії в.путіна саме через депортацию українських дітей, російські ЗМІ почали ширитиповідомлення в дусі конспірологічних «змовницьких» теорій про те, що беззаступництва росії українські діти потрапили би або до рук європейських педофілів, або чорних трансплантологів.

**Було виділено такі наратори російської пропаганди в контексті депортации українських дітей росією:**

In the report on the monitoring of the National Council, some units have been submitted to such topics in Russian propaganda, such as adoption of Ukrainian children by Russian families and abrasion of national identity of Ukrainian children. The regulator came to the conclusion about the obvious and in fact confirmed by the deportation and abrasion of the national identity of Ukrainian children. That is why the term "forced deportation" should be used in the context of the export of Ukrainian children.

## **According to the results of monitoring and analyzing materials of the Russian change council the following conclusions:**

<b>1</b>	<b>«Викрадення Росією українських дітей – абсурдна містифікація»</b>	<b>4</b>
	російські ЗМІ заявляли про те, що українських дітей не усиновлюють, а лише оформлюють під «тимчасову опіку»	пропаганда з метою применення наслідків санкційного впливу на росію та зниження авторитету МКС перед російською аудиторією

Distributed by Russian officials and media information is a predominant depository, which in all cases either discredit Ukraine and its allies, or justifies Russia's actions in the context of deportation of children, or resorts to these two techniques at the same time. The reception of the dichotomy "My-Vona" in the Russian information environment of Ukrainian children is typical of warning the waters and propaganda of war.

The Russian media form an information isolated from objective reality, in which Russia plays the role of a state that "saves" and acts good, Aukraine and Western countries that oppose Russia is evil. This prevents Russian citizens from reliable information, encourages civilian populations of the Russian Federation to commit even more violent atrocities against

Ukrainians, introduces from the fuzzy consumers of Russian media in the territories abroad, where the Russian media signal is accessible.

The justification of deportation of Ukrainian children by Russian media is a further encouragement of genocide of the Ukrainian people, which indicates the involvement of legal(Media)and individuals for crimes committed by an aggressor state, in particular to genocide.

NATO Allies continue to consider the format of future relations with Ukraine, as well as the framework guarantees or security assertions for Ukraine after the end of the war, which should prevent the repetition of history and restraint from new aggression against Ukraine.

About this during a public discussion of Brussels Sprutes as part(CNAS)NATO Secretary General Jenstoltenberg said, Ukrinform correspondent reports.

“The question is about security guarantees or certificates and future membership(Ukraine in NATO - ed.). Тому що, коли ця війна завершиться, ми маємо засоби, щоб це не була якесь пауза, протягом якої президент Путін зможе відпочити, переформуватися та розгорнути свої сили для ще однієї атаки, як ми це бачили протягом багатьох років. Ця війна почалася не минулого року, вона почалася набагато раніше – у 2014-му. Коли ця війна завершиться, нам будуть необхідні рамкові заходи, щоб історія не повторилася, і щоб президент Путін неміг надалі шахраювати з європейською безпекою», - сказав Столтенберг.

Він зауважив, що головною гарантією безпеки для [НАТО](#) There is Article 5 of the Washington Treaty Collective Defense and full membership. Discussions are currently underway on the provision of security guarantees for Ukraine, in particular, at the level of bilateral relations with some of the allies. Consultations between the Allies, how to respond to Ukraine's aspirations in NATO, were also continuing, it was this topic that was a major meeting of the Foreign Ministers of the country with Oslo during a recent meeting of Foreign Ministers.

“Certainly, it is too early to anticipate the results of Vilnius - Samite on this issue in advance, but the Allies have already agreed with many important speakers concerning Ukraine and its path to membership. NATO doors remain open ... All allies agreed that Ukraine would be a member of the Alliance - it was released again and again, the last time - during the Madrid summit in June year. Everyone agreed: it is a matter of Ukraine and allies - to decide when the right time will come to invite Ukraine to full membership. This is not about Moscow. Putin has no veto on expansion, "the Alliance head emphasized.

He recalled again that NATO's most difficult task is to ensure that President Putin does not win this war so that Ukraine would win. He emphasized the need to maintain the unity of allies in the Ukrainian assistance in the fight against the Russian invasion, and thanked the United States for the leadership in mobilizing such assistance as from NATO allies, such from partner countries around the world.

The fields in the south of Ukraine can turn into a desert durability of the Kakhovskaya hydroelectric power station.

About it reports [press service](#) Ministry of Agrarian Policy and Food of Ukraine.

The report states the following: "The Ministry of Agrarian Policy and Food of Ukraine, according to preliminary estimates, as a result of terrorist acts at the Kakhovskaya hydroelectric power station, provides in Kherson region, flooding about 10 thousand hectares of agricultural land on the Right Bank."

Also in several carzes more on the left bank of the region, which is now under the occupation. Detal information will be known in the coming days, after analyzing the information of the tasks about the size of the flood.

In addition, the man -made disaster will stop water supply 31 irrigation systems of Dnipropetrovsk, Kherson and Zaporizhzhya regions.

In 2021, these systems provided irrigation by 584 thousand hectares, of which about 4 million tons of grain and oil crops were painted, worth about \$ 1.5mlrd.

In 2023, only 13 irrigation systems operate on the right bank of the Dnieper. Terrorist act on the Kakhovka hydroelectric power station actually left 94% of irrigation systems in Kherson, 74% in Zaporizhzhia and 30% - in the Dnieper regions. The destruction of the Kakhovka hydroelectric power station will lead to the fact that the Polyana South of Ukraine can turn into a desert next year. Not only agrarians and water users, but the sources of drinking water supply of settlements, will be affected by the Bezkakhov reservoir.

The negative effects of the destruction of the Kakhovka hydroelectric power station will also be for the fisheries. The death of fish both young and adults is already recorded. The spawning period has ended and as a result of falling water levels, caviar dried names.

In addition, the Fauna water flow of the reservoir into the floodplains formed by the Kakhovskaya Hydroelectric Power Plant will also die. Since in the future, when the "flood" wave is reduced, these bioresources will be on land.

Another problem will be the ingress and death of freshwater fish and other bioresources into the salty waters of the Black Sea. The Black Sea fauna of the disgraceful influx of fresh water may also die.

The negative effects of devastation of aquatic bioresources will be traced for several years in a row, even when filling the bed of the Kakhovsky water storage in the near future. Since the renewal of quantitative and qualitative composition of fish populations, the restoration of bottom coenoses of the forage base requires long.

We emphasize that all data are given only by preliminary estimates. The final ones can only be done when the water level stabilizes. ”

NATO Secretary -General Jens Stoltenberg noted the revival of the fighting in all the front line in Ukraine, and at the same time congratulated the Ukrainian side's information cutting into common details about probable contrast.

NATO manager stated this today during a public discussion(CNAS)Ukrinform correspondent reports.

"In what is concerned with an offensive([Ukraine](#))- We see an increase in the intensity of battles along the front line. The army is always very careful not to talk about operational parts. This is really the right of Ukrainians - to talk about such things. We also saw this video(General Staff of the Armed Forces of Ukraine - ed.), which they placed in a social media, and which really calls to refrain from information about the counter -offensive or prompt details, "Jens Stoltenberg said, responding to a moderator of the discussion.

He stressed that any war is unpredictable, and no one can say how it will develop. But what is probably known is that Ukrainian respects currently have the capabilities, weapons, ammunition and necessary tension, which were provided, in particular, NATO Allies and partners of the contact group for assistance to Ukraine for US leadership.

"We also know that Ukrainians have already proven: they are able to push Russian forces, as they did it in the north, around Kiev, only in several times, in the east, around Kharkiv, and in the south, in Kherson. Now they have more equipment, more training, they are better prepared for the release of larger territories, "said NATO Secretary General.

"No one can predict what this war is over. But we know: that it will take place at the table of negotiations, which, we will hope, will put an end to this war on a certain stage - this will depend entirely on the achievement of the target battlefield. Therefore, we must strengthen Ukraine's position on the battlefield so that they hold such a result of this war that will ensure the preservation of Ukraine as a sovereign and independent country, and that Putin does not win this war, "Yinstoltenberg added.

"There is no doubt that [EU](#) Talatin America ... have common positions on the world political structure of cultural heritage, are close to beliefs.... Does this mean that we do not agree to? There are such things. In the case of Ukraine, there are certain countries that always have a point of view different from ours. But look at how Latin America voted in the UN compared to other regions of the world, the reconciliation and rejection of the Russian invasion of Ukraine was higher than anywhere, "the EU High Representative said

Responding to the question of the "peacekeeping proposals" of the President of Brazil, Borrel reminded that during the voting to the UN, this country has renovated a clear position of condemning Russian aggression against Ukraine.

"Sometimes there were points that we disagreed with, then there were qualified comments after that. But(From Brazil - Ed.)There was a sincere desire to find a solution. We always welcome such efforts, in particular when the side, as the side, does not put at the same level with the victim of the attack, "the EU high representative emphasized.

Ukraine and May 2023 import 4.2 thousand tons of fresh, chilled tamored pig meat, which is more than 5 times less than in the same period.

According to Ukrinform, it is reported [Press Service of the Association "Pigs"](#).

"The total volume of imported pork in five months is more than five months in the same period of 2022 and 2.5 times less than comparable to the last year:

4.2 thousand tons against 22.4 thousand tons and 10.3 thousand . T, accordingly, " - the message reads.

It is noted that according to preliminary data of customs statistics, in May, the aggregation of fresh, chilled and frozen meat pigs in Ukraine was 603.5 tons(\$ 1.7 million US in currency terms). За даними АСУ, цьогорічний травневий імпорт свинини у десять разів менший, ніж у травні торік.

В асоціації додають, що істотна волатильність цін закупівлі у травні, зокрема, їх підвищення у кінці місяця, дещо пожвавила активність імпортерів в останній тиждень місяця. Проте це не мало істотного впливу на ринкову ситуацію, враховуючи незначні об'єми зовнішніх надходжень.

"Основним стримуючим чинником і надалі залишаються підвищені ціни на європейському ринку свинини та, відповідно, на імпортні позиції відповідного походження. Так, середня ціна кілограма імпортованої у травні свинини становила 2,82 дол. США проти 2,4 дол. США у квітні та 1,88 дол. США у березні", - пояснюють аналітики АСУ.

The greatest damage due to the undermining by Russian invaders of the Kakhovka hydroelectric power station threatens to electric grid.

According to Ukrinform, Alexander Sergienko, Director of the Analytical and Research Center "Institute of City" informed [Ukrainian Radio](#).

"Коли заливає підвали чи перші поверхи, то страждають несучі конструкції, стіни, підлога, меблі. Якщо йдеться не про хатину початку ХХ століття, тонічого з фундаментами не станеться. Можуть бути зовнішні пошкодження настінах, можуть відійти шпалери, але якщо є цегляні стіни й бетонні фундаменти, то навряд чи станеться щось критичне.

Комуникаціям є загроза, особливо електричним networks, "he said.

According to the expert, there will be nothing to the water pipes and gas pipes, although they will probably have to be blown. Instead, electrical contacts, where possible, threaten significant damage.

Pumping stations in the basements can also be damaged.

\*!(<https://www.ukrinform.ua/rubric-society/3719574-pidriv-kahovskoi-ges-rozsliduut-policia-ta-sbu-pracuut-10-opergrup.html>) Sergienko emphasized that the first basic rule in the extreme situations of the like plan is to turn off all networks, electricity, gas and water.

"Because there are pumps everywhere, electricity works everywhere, and if you do not turn off - it will be a short closure and everything will just be burned. Second - do not forget that it will come down or late because it will spread. Everything will depend on how much water has penetrated into the system Water supply, gas supply, in variations, other mechanisms, " - said the expert.

In his opinion, it is quite realistic to restore the working condition of all units, because water is not an aggressive fluid, although oxidation is likely.

Yes, if the nodes are made qualitatively, when the water comes down, they will need to be a little overwhelmed, cleaned and lubricated. "The faster the water goes down, the easier it will be. It is difficult to predict," Sergienko added.

The destruction of the Kakhovskaya hydroelectric power station and the damage caused to this environment is the largest ecocid with the beginning of the full -scale invasion of Russia into Ukraine.

The first deputy Minister of Environmental and Natural Resources of Ukraine Alexanderkrahnolutsky said this at a press conference at the Media Center Ukraine - Ukrinform.

"To highlight something(Why the greatest harm was caused - ed.)It is difficult because the harm is created in the territory. This is the largest ecocide that has occurred in Ukraine since the beginning of the full -scale war ", - said Krasnolutsky.

He explained that the Kakhovka reservoir and surrounding areas were by migration of birds, their nesting place. After blasting the hydroelectric power station, very great damage was biodiversity. In the territory that is now flooded with water storage, there are national natural resources that were created for the preservation of red -book plants and animals.

"They are at risk of destruction today. It will be necessary to understand what happened to it and whether these species, which are unique to the Southern Region of Ukraine, and continue to exist," Krasnolutsky said.

Also damages caused to water resources, which have got chemicals, fuel and lubricants; Soils that blur under the large pressure.

"We constantly monitored the state of filling the Kakhovka reservoir, and this robotane stopped," Krasnolutsky informed. He noted that the monitoring of the reservoir was carried out on a regular basis since October last year, when the Russians have undermined one gateway.

Also, according to him, there is a fixation of losses caused by the Reserve Fund, Lands, etc.

"Huge environmental losses have been caused to our environment, and, accordingly, from the moment the ecological inspection began to work from the moment, the buildings, which are caused by the environmental fund, forest resources, water resources, biodiversity. We are fixing it. Profile services, structural units of the State Forestry Agency, State Agency, everyone work for fixing and minimizing the damage caused to our environment, " - said Krasnolutsky.

He emphasized that the damage is measured not only in money, but also that Ukraina is able to lose certain species of flora and fauna. However, the calculations are carried out. Where possible, the calculations are conducted, photo and video recording of the deterioration of the hydroelectric power station.

with all governmental incumbent international environmental organizations to condemn Russia's actions is established.

"We will demand the exclusion of the Russian Federation from the conventions of environmental, so the country that takes such actions may not be a member of environmental arrangements," Krasnolutsky said.

At the same time, he added that non-governmental international environmental organizations have not responded to what had happened.

As reported, on the night of June 6, the Russian army blew up the Kakhovskaya Hydroelectric Dam. In Kherson region, evacuation began from dangerous places for which there is a risk of flooding. On the fact of Kakhovskaya hydroelectric power departments, law enforcement officers began investigations under the article "Ecocid".

Ukrhydroenergo stated that the Kakhovka hydroelectric power station is completely destroyed and recoverable.

Real salaries in the private sector have virtually stopped falling, but their further growth will be restrained by the difficult financial condition of enterprises and the high level of uncertainty.

According to Ukrinform, this is stated in the macroeconomic and monetary inspection of June 2023, reports [NBU press service](#).

"Real [salaries](#) In the private sector, on the background of a low base of comparison, they practically stopped falling, which together with pensions and payments in the budget sector supported the revenues of DG. But more of their growth will be restrained by the difficult financial condition of the enterprise with a high level of uncertainty, " - the message reads.

As stated in the document, in the II quarter of 2023, according to the survey of the European Business Association among IAS, most companies(62%)Wages were fully paid. At the same time, 32% declared the lack of financial results, 16% - dismissed employees. Among the large international companies set by the EBA, 90% were fully paid, and there are no financial reserves in 5% of companies.

The NBU notes that the increase in the number of resumes has almost stopped while the number of vacancies continues to grow(In addition to IT sector where the situation is complicated).Частково зростання попиту на робочу силу пов'язано із сезонністю, зокрема, сільгospроботами, а частково – мобілізацією співробітників, у тому числі критичних, та посиленням складнощів із пошуком персоналу. У результаті кількість претендентів на одну вакансію суттєво знизилася і у травні 2023 року була близькою до рівня травня 2021 року.

Chinese export to Russia increased by 75.6% over the first five months compared to the same period last year and reached \$ 42.9 billion, while imports increased by \$ 20.4% -up to \$ 50.9 billion.

This is evidenced by the data published by the Main Customs Directorate of the PRC, reported by Ukrinform.

At the same time, the volume of foreign trade in China from the Russian Federation in January - May was \$ 93.8 billion, which is 40.7% more than a year earlier.

Total Import and Exports [China](#) In the first five months compared to the same period last year, it grew by 4.7% in local currency, up to 16.8 trillion yuan, but in dollar equivalent decreased by 2.8% - to \$ 2.4 trillion.

Statistics show that in May, foreign trade of the PRC declined for the first time, the month of the month, mainly due to the overall fall in exports to China's main trading partners-the countries (Russia, European Union, USA and Japan). The greatest recession was supplied by electronic goods, such PCs and mobile phones, as well as clothing and toys.

The fall in imports is explained first and foremost, by lower prices for raw materials and other resources for which Chinese companies bought them in the reporting period, as well as still low domestic demand in the country itself.

In January - May, the ASEAN Ukraine included the four largest trade partners of the PRC, with which China has increased by 2.1%, to \$ 377 billion, the European Union with \$ 332 billion. The turnover, which is 3.7% less comparable to last year, the United States with \$ 274.7 billion. (-12.3% year-over-year) and Japan - \$ 131.3 billion. (-10.4%).

Зниження показників експорту/імпорту Китаю посилює занепокоєння фахівців щодоспільнення економічного відновлення країни на тлі уповільнення економік ключових країн - торговельних партнерів КНР.

Prince Harry testified in the High Court of London in the case of a lawsuit against a tabloid interference with his private life.

According to Ukrinform, it reports [Reuters](#). Tuesday Prince answered the Mirror Group Newspapers lawyer for almost five hours (Mgn), publisher Daily Mirror, Sunday Mirror and Sunday People, Andrew Green. A member of the royal family and 100 other persons sue the tabloids, accusing them of large-scale illegal information collection between 1991 and 2011.

It is noted that [Prince Harry](#) -the first high-ranking member of the British royal family, who has been certified in court for the last 130 years. The prince claims that the media used non -consumed tools, including listening to the phone, pursuing it.

At the same time, the defendant's lawyer insists that there are no data from the mobile phone that would indicate that Harry was a victim of telephone hacking.

For his part, Prince Harry stated that "telephone breaks were on an industrial scale in at least three newspapers at that time, and this is not doubtful."

Due to the rush of water levels in the Kakhovka reservoir due to the blasting of Hesrashists tomorrow in the Nikopol district of Dnipropetrovsk, centralized water supply can be stopped.

About it in [video commentary](#) The head of the Nikopol Rva Yevgeny Yevtushenko, Ukrinform reports.

"We have a rapid fall in water, we are at risk of stopping water utilities, that is, threatening the disappearance of centralized water supply," he said.

Yevtushenko noted that the water supply of the district is provided by three large infrastructure objects. Two of them, while maintaining the current rates of falling, will lose the technical opportunity to continue their work tomorrow. In this case, the district center will suffer the least, as the Nikopol water utilities will preserve the ability to collect water with structural features.

At the same time, the RVA chief stressed that the country's leadership and local authorities have plans to resolve the critical situation and are working on it. The government's large infrastructure solutions will not be able to embody either back or week, so now it is about attracting additional water volumes of Nikopol. In particular, the locals were urged to make incentive water as long as possible and drinking bottled. The administration entails Ukrainian and international funds that will provide bottled water already in the day and day of today, and the communities will distribute it to the middle.

Also, according to him, with Ukrzaliznytsya the issue of delivery of tissues is elaborated.

Yevtushenko stressed that the task is complicated by a large number of people in the area: about 280 thousand people lived in a full -scale invasion in the Nikopol region, to which about 40,000 displaced persons were added. In addition, in the warm season there is an increased risk of intestinal infections. However, the authorities are aware of these challenges and work to overcome them.

Flooding in the south of the country carries the risks of outbreaks of viral hepatitis, intestinal infections and botulism.

The Deputy Minister of Health, Chief State Sanitary Doctor Igor Kuzin said this during communication with journalists on June 7, Ukrinform reports.

"Concerning forecasts. Floods are a significant risk factor for the development of outbreaks that are associated with drinking water. First of all, it is a disease

such as virus hepatitis, and, unfortunately, it appears first during such occasions. Second, this is the spread of acute intestinal infections which are related to how food is used or used, whether they can be washed or adequately prepared. And acute intestinal infections are also related to the possibility of access to safe and quality drinking

[water(<https://www.ukrinform.ua/tag-voda>)]. Therefore, we do not rule out that the situation of acute intestinal infections can also be deteriorated, "Kuzin said.

The third disease, according to the chief state office, is botulism, which can be associated with the use of fish that died as a result of massive wetlands of the destruction of the Kakhovskaya Hydroelectric Dam.

"We see the mass of the mass of fish as a result of flooding, so for us it is a percentic situation, because such fish can gather the population and be used for cooking, canning, drying. Dangerous because they may be associated with the spread of such infectious disease like botulism, "Kuzin warned.

"These three groups of infectious diseases are the greatest danger. Epidemic supervision has been increased for their preventive, additional measures are being carried out and the public work is being carried out," the chief sanctions said.

There is a proof of the blast of the Kakhovska Hydroe Dam occupants and it is actively continuing.

According to Ukrinform, a representative of the Main Directorate of Intelligence of the Ministry of Defense of Ukraine Andriy Yusov said this on the air of the nationwide television "JUDINOVINA".

"There is an evidence base and it is actively going to gather. There is a mass of direct incisor evidence that the purposeful destruction of the Kakhovsk hydroelectric power station, but we are talking about blasting, is not just [RF](#), and the military and political leadership, "Yusov said.

According to him, the Russian Federation tries to lift responsibility for the Podryvkakhovsky hydroelectric power station, and if this does not work, at least equate the victim and the aggressor to organize a certain discussion.

"Let's talk. Let's look like it's not clear. But - no, all the time. Indeed, this terrorist act was committed by the Russians in the Ukrainian territory. The terrorist state is responsible for this. And the personal responsibility is the head of the Rashist regime and his associates, "Yusov said.

He recalled that GUR and the President in the whole world were informed that the Kakhovka hydroelectric power station and the dam was racadered - and this happened last year. All that time, the enemy was preparing this horrific crime and for this purpose the right critical was sought. "And right now they committed this crime, trying to limit and stop the Ukrainian Armed Forces, "the scout said.

Rosya lost about 60,000 killed and wounded in Bakhmut, moving 29 kilometers - one killed or wounded for every 48 centimeters.

This was stated by the Senior Military Advisor of the UK delegation to the OSCE lensstabbs during a meeting of the Security Cooperation Forum in Vienna, Ukrinform reports.

"When Russia began a full-scale invasion of Ukraine on February 24, 2022, one of its goals seems to be a complete capture of the entire Donbass for 10-14 days. More than 15 months later [Bakhmut](#) Up to 60 thousand vows and military personnel of regular Russian troops were killed or injured, "said Stabbs.

According to him, almost half of these losses - about 30 thousand killed and were killed - Russia has received within three months, starting in March.

"These stunning losses were achieved by the overall promotion of only 29 kilometers. That is, for every 48 centimeters of land acquired by Russia, one of its soldiers was killed or injured," the British military adviser emphasized.

He also called "pathetic and disgusting" the constant attempts of Russia to break the will of the Ukrainian people through constant missile and unmanned blows to cities and towns throughout Ukraine. "These are the desperate actions of Russian leaders who ended with ideas and who constantly overestimated their military opportunities and underestimated the strength and determination of the Ukrainian people," Stabbs said.

The city of Oleshka, temporarily -refurbished by the Russians on the left bank of Kherson region due to the underblowers of the hydroelectric power station is flooded by 90%, and in the terminist there are settlements completely absorbed by water.

This was reported in an exclusive interview [Ukrainian radio](#) Mayor of Oleshok Yevgeny Rishchuk, Ukrinform reports.

"Yesterday(June 6), sometime at the first hour of the day, we already had a massive flooding of paints. Today we have settlements that are 100%flooded, there are notes that are flooded by 10%. And in those who are a little further burst, there is nothing at all. Therefore, the sub -steppe and Peschanivka are flooded by 50%, the Cossack camps - 10%, including the coastal coastline and those homes that stand. Oleshki flooded somewhere by 90%, perhaps a little more. That is, there is a little dry territory in the city, "Rishchuk said.

According to the mayor, the homes in Oleshki are flooded almost under the roof, the level on the streets reaches three meters. Meanwhile, the Russian occupying power is non -evaotic people and does not allow them to leave the city on their own.

"Water arrives on. But there is already good news from a new kakhovka that water She started to fall there. So one or two days - and water will fall into Oleshki. Another question is - will it go to zero, will the level fall off? In addition, the city of Oleshka has lowlands. So there the water level rising to four meters. That is, the situation regarding the flooding of the heavy, "is the man's head.

**Read also:** water "took the ring" captured city Oleshki Nakherson region But even when the flood is completed, the region will have many problems, including garbage and sewage.

According to Ryshchuk, about 40 thousand people lived in Oleshkovskaya OTG before the occupation. After the occupation, about 20%remained, ie up to 8,000 people. The community includes 12 villages.

As reported Ukrinform , on the night opposite June 6, the Russian army blew up the Kakhovskaya Hydroelectric Dam. About 16,000 people were in the Right Bank of the Uzhichherson region. Evacuation has begun.

NATO Allies continue to consider the format of future relations with Ukraine, as well as the framework guarantees or security assertions for Ukraine after the end of the war, which should prevent the repetition of history and restraint from new aggression against Ukraine.

About this during a public discussion of Brussels Sprutes as part(CNAS)NATO Secretary General Jenstoltenberg said, Ukrinform correspondent reports.

“The question is about security guarantees or certificates and future membership(Ukraine in NATO - ed.). Тому що, коли ця війна завершиться, ми маємо засоби, щоб це не була якесь пауза, протягом якої президент Путін зможе відпочити, переформуватися та розгорнути свої сили для ще однієї атаки, як ми це бачили протягом багатьох років. Ця війна почалася не минулого року, вона почалася набагато раніше – у 2014-му. Коли ця війна завершиться, нам будуть необхідні рамкові заходи, щоб історія не повторилася, і щоб президент Путін неміг надалі шахраювати з європейською безпекою», - сказав Столтенберг.

Він зауважив, що головною гарантією безпеки для [НАТО](#) There is Article 5 of the Washington Treaty Collective Defense and full membership. Discussions are currently underway on the provision of security guarantees for Ukraine, in particular, at the level of bilateral relations with some of the allies. Consultations between the Allies, how to respond to Ukraine's aspirations in NATO, were also continuing, it was this topic that was a major meeting of the Foreign Ministers of the country with Oslo during a recent meeting of Foreign Ministers.

“Certainly, it is too early to anticipate the results of Vilnius - Samite on this issue in advance, but the Allies have already agreed with many important speakers concerning Ukraine and its path to membership. NATO doors remain open ... All allies agreed that Ukraine would be a member of the Alliance - it was released again and again, the last time - during the Madrid summit in June year. Everyone agreed: it is a matter of Ukraine and allies - to decide when the right time will come to invite Ukraine to full membership. This is not about Moscow. Putin has no veto on expansion, "the Alliance head emphasized.

He recalled again that NATO's most difficult task is to ensure that President Putin does not win this war so that Ukraine would win. He emphasized the need to maintain the unity of allies in the Ukrainian assistance in the fight against the Russian invasion, and thanked the United States for the leadership in mobilizing such assistance as from NATO allies, such from partner countries around the world.

reported that on July 11-12 in Vilnius will take place another NATO summit, which, among the most important issues, will consider the continuation of assistance to Ukraine in its fight against Russian aggression. President Volodymyr Zelenskyy expresses the name in person to take part in this meeting. At the same time, at all levels, the Ukrainian side stressed that the certificates that "Ukraine will become a member", which were made during the NATO Bucharest Summit in 2008, is not enough. Instead, Ukraine raises NATO allies to provide security guarantees and a clear prospects for the movement towards full -time.

## **Dear Ukrainians, Ukrainians!**

Today, the maximum attention of the consequences of the Russian terrorist attack on Kakhovskaya HEP. Dozens of settlements are flooded in the territory controlled by us. Those houses!

Evacuation continues. And under shelling! Russian artillery continues to beat, no matter what. Just inhumans.

But as of this time, more than 2 thousand people have been improved in the Kherson and Mykolaiv regions. And I thank everyone who is involved in this work, everyone who helps! Our task is to protect life and to help people.

Absolutely catastrophic situation in the occupied part of Kherson region. Occupant threw people in these terrible conditions. Without rescue, without water, just the supplies of houses in flooded communities. And this is another conscious crime of Russia: after the terrorist state has caused a catastrophe, it also maximized the harm from it.

Now a clear and quick reaction of the world is needed to what is happening. Even it is possible to establish for sure how many people on the temporarily occupying territory of Kherson region can die without salvation, without drinking water, without food, without medical care. Our military and intelligence services are as high as they save people despite the fire.

But larger efforts are needed. International organizations, such as the International Committee of the Red Cross, should immediately join the rescue operation and help people in the occupied part of the Kherson region. Every kind of person there is a sentence of existing international architecture, international organizations that have learned to save life. If there is no international organization now in the area of this disaster, then it is not at all, then it is incapacitated. There are all relevant appeals of Ukraine, our government.

Many leaders of the world, leaders of states, governments, interstate associations have expressed their support to Ukraine and a clear condemnation of Russian crime. I thank this principle! We also called for the departure of an international observation mission to Kakhovka, to replace the units and all structures of the station. Unfortunately, world attention was not enough to provide all this. We now need to concentrate the world for the treatment of the consequences of another disaster due to the fault of Russia, we must prevent the more destructive activity of the invaders.

He spent some important international conversations today.

Turkish President Erdogan. He informed him about the situation in flooded areas, about our rescue operations and urgent needs to help people.

Of course, they also discussed the risks for the Zaporizhzhya nuclear power plant, which is under the control of the occupiers. There is an agreement with the IAEA leader to proactively involve the work of IAEA representatives at the station. But it is clear that, there are no full security, the governors there. Therefore, Ukraine's de-occupation is a task.

France President Macron. They discussed - and in great detail - all the consequences of the Russian terrorist attack at the station, in general the situation. Everything we can do to people affected by the regions.

Defense actions were also thoroughly discussed, as well as international measures that are preparing for everything, because we need safety despite any aggressive and frank-free actions of Russia.

Separately, I want to point out a few things that are important to our country, which is particularly for people in our regions that depended on the Kakhovsky Direction.

First. We will provide drinking water with drinking water. In all areas, cities of Isella, where it is necessary. Where the drinking water is now, all necessary supply systems will be made. The sustainability of supply is the main principle.

Second. The world will be with us. The partners are fully informed of what is giving away, what help we need. Whatever there are economic, social, environmental consequences of this catastrophe, all the foundations of life will be preserved. Kherson region, Mykolaiv, Zaporizhzhya, Dniprovska - we see all the problems and make it possible and impossible to have been solved by the occupiers.

Third. The direct duty of representatives of the state and local authorities in all communities and areas that have suffered is assistance to people. From the Government and the SESA of the complementary authorities, local communities - all are involved to the maximum to rescue and protect as many people as possible. Everyone should perceive this task. And I thank those who perceive it in this way! We take care of each other and Ukraine!

And, of course, today I thank each of our warriors, all units, all the masters who continue to beat the occupiers. Let that, every day should be the day of destruction of the enemy.

**Glory to all our heroes!**

**Glory to all who care about Ukraine and Ukrainians!**

**Glory to Ukraine!**

NATO Secretary -General Jens Stoltenberg noted the revival of the fighting in all the front line in Ukraine, and at the same time congratulated the Ukrainian side's information cutting into common details about probable contrast.

NATO manager stated this today during a public discussion(CNAS)Ukrinform correspondent reports.

"In what is concerned with an offensive([Ukraine](#))- We see an increase in the intensity of battles along the front line. The army is always very careful not to talk about operational parts. This is really the right of Ukrainians - to talk about such things. We also saw this video(General Staff of the Armed Forces of Ukraine - ed.), which they placed in a social media, and which really calls to refrain from information about the counter -offensive or prompt details, "Jens Stoltenberg said, responding to a moderator of the discussion.

He stressed that any war is unpredictable, and no one can say how it will develop. But what is probably known is that Ukrainian respects currently have the capabilities, weapons, ammunition and necessary tension, which were provided, in particular, NATO Allies and partners of the contact group for assistance to Ukraine for US leadership.

"We also know that Ukrainians have already proven: they are able to push Russian forces, as they did it in the north, around Kiev, only in several times, in the east, around Kharkiv, and in the south, in Kherson. Now they have more equipment, more training, they are better prepared for the release of larger territories, "said NATO Secretary General.

"No one can predict what this war is over. But we know: that it will take place at the table of negotiations, which, we will hope, will put an end to this war on a certain stage - this will depend entirely on the achievement of the target battlefield. Therefore, we must strengthen Ukraine's position on the battlefield so that they hold such a result of this war that will ensure the preservation of Ukraine as a sovereign and independent country, and that Putin does not win this war, "Yinstoltenberg added.

In the temporarily occupied territories, Russians do not even try to assist people after [undermining Kakhovskaya hydroelectrics](#) .

Про це Президент України Володимир Зеленський [написав](#) In his telegram.

"This once again demonstrates what cynicism Russia treats people whose land has been, and that in reality Russia carries Europe and the world," the Glavs stressed.

The President of Ukraine noted that our services, all who can give people rescue are already involved. But we can only help in the territory controlled by Ukraine.

He added that Russian terrorists once again proved that they are a threat to all alive.

"The absolutely conscious destruction of one of the largest reservoirs of Ukraine. At least 1,100,000 people lived in these areas before the Russian invasion. At least thousands of thousands are still there. Hundreds of thousands of people remained without normal availability of drinking water," his post reads.

## **Dear Ukrainians, Ukrainians!**

Today, the maximum attention of the consequences of the Russian terrorist attack on Kakhovskaya HEP. Dozens of settlements are flooded in the territory controlled by us. Those houses!

Evacuation continues. And under shelling! Russian artillery continues to beat, no matter what. Just inhumans.

But as of this time, more than 2 thousand people have been improved in the Kherson and Mykolaiv regions. And I thank everyone who is involved in this work, everyone who helps! Our task is to protect life and to help people.

Absolutely catastrophic situation in the occupied part of Kherson region. Occupant threw people in these terrible conditions. Without rescue, without water, just the supplies of houses in flooded communities. And this is another conscious crime of Russia: after the terrorist state has caused a catastrophe, it also maximized the harm from it.

Now a clear and quick reaction of the world is needed to what is happening. Even it is possible to establish for sure how many people on the temporarily occupying territory of Kherson region can die without salvation, without drinking water, without food, without medical care. Our military and intelligence services are as high as they save people despite the fire.

But larger efforts are needed. International organizations, such as the International Committee of the Red Cross, should immediately join the rescue operation and help people in the occupied part of the Kherson region. Every kind of person there is a sentence of existing international architecture, international organizations that have learned to save life. If there is no international organization now in the area of this disaster, then it is not at all, then it is incapacitated. There are all relevant appeals of Ukraine, our government.

Many leaders of the world, leaders of states, governments, interstate associations have expressed their support to Ukraine and a clear condemnation of Russian crime. I thank this principle! We also called for the departure of an international observation mission to Kakhovka, to replace the units and all structures of the station. Unfortunately, world attention was not enough to provide all this. We now need to concentrate the world for the treatment of the consequences of another disaster due to the fault of Russia, we must prevent the more destructive activity of the invaders.

He spent some important international conversations today.

Turkish President Erdogan. He informed him about the situation in flooded areas, about our rescue operations and urgent needs to help people.

Of course, they also discussed the risks for the Zaporizhzhya nuclear power plant, which is under the control of the occupiers. There is an agreement with the IAEA leader to proactively involve the work of IAEA representatives at the station. But it is clear that, there are no full security, the governors there. Therefore, Ukraine's de-occupation is a task.

France President Macron. They discussed - and in great detail - all the consequences of the Russian terrorist attack at the station, in general the situation. Everything we can do to people affected by the regions.

Defense actions were also thoroughly discussed, as well as international measures that are preparing for everything, because we need safety despite any aggressive and frank-free actions of Russia.

Separately, I want to point out a few things that are important to our country, which is particularly for people in our regions that depended on the Kakhovsky Direction.

First. We will provide drinking water with drinking water. In all areas, cities of Isella, where it is necessary. Where the drinking water is now, all necessary supply systems will be made. The sustainability of supply is the main principle.

Second. The world will be with us. The partners are fully informed of what is giving away, what help we need. Whatever there are economic, social, environmental consequences of this catastrophe, all the foundations of life will be preserved. Kherson region, Mykolaiv, Zaporizhzhya, Dniprovska - we see all the problems and make it possible and impossible to have been solved by the occupiers.

Third. The direct duty of representatives of the state and local authorities in all communities and areas that have suffered is assistance to people. From the Government and the SESA of the complementary authorities, local communities - all are involved to the maximum to rescue and protect as many people as possible. Everyone should perceive this task. And I thank those who perceive it in this way! We take care of each other and Ukraine!

And, of course, today I thank each of our warriors, all units, all the masters who continue to beat the occupiers. Let that, every day should be the day of destruction of the enemy.

**Glory to all our heroes!**

**Glory to all who care about Ukraine and Ukrainians!**

**Glory to Ukraine!**

The involvement of the Russian Federation in the undermining of the Kakhovka hydroelectric power station is undoubtedly a number of public information.

Andriy Yusov told about it, [reports](#) Main Department of Intelligence of the Ministry of Defense of Ukraine.

"Even if we look at the chronology of propagandists, the" official man "of the Rashist regime for today's events, then it is visible: at first there is no happening, then happens, but partially, and then - winery, but they, the occupiers, are very pleased with the islands, the islands which our defenders were allegedly flooded, "Andrei Yusov said.

The representative of the GUR of the Ministry of Internal Affairs of Ukraine also focused on the chaoticity of the reactionary propaganda on the undermining of the Kakhovka hydroelectric power station and emphasized that, given its engineering features of the structure, no one, except the Russians, had no physical and means to carry out such a large -scale undermining.

"Ukraine has informed publicly as well as partners with other channels about the preparation of mines and a possible blast. It is not a spontaneous act, it's a terrorist attack that was prepared(Russians)For a very long time, "Andrei Yusov said.

According to a representative of Ukraine's military intelligence, security and defense forces were preparing for various options for the behavior of Russian terrorists, in particular, the likelihood of a Kakhovsky hydroelectric power station.

In Belgorod region, active fighting and internal mass immunity continue - Russian citizens from the Legion "Freedom of Russia", "Russian Volunteer Corps" and some of the local residents with weapons in their hands reached against the criminal Putin authorities and its regime.

About it reported Representative of the Main Directorate of Intelligence of the Ministry of Defense of Ukraine Andriy Yusov.

"The fighting is ongoing. Several settlements occupied the Rashist authorities in fact left without control, trying only to establish fire control, which means the task of strokes from artillery, reactive systems of volley fire to the objects of their own civil infrastructure and local residents, " - said the representative of the GRO of Ukraine.

According to Andriy Yusov, the RDC fighters and the Legion "Freedom of Russia" actually determine the function of armed self -defense in the territory of Belgrad region, where they protect their own compatriots from the criminal Kremlin regime.

"The support of the rebels among the local population is increasing. This applies to the Yakochya attachment to the armed struggle against Putin, as well as the local residents who ask for protection, "said a representative of military intelligence, adding that Ukraine will consider the evacuation of civilians in the proper order, if they arrive.

Andriy Yusov noted that the number of insurgents who fight against the Putin regime is increasing, and the geography of their actions is expanding.

"The so -called Russian Federation today is an incapable state, whose sootacities are many conflicts. The central government is inadequate, and the events are absolutely demonstrated by the events. Everything that is a little capable, focused in the Ukrainian territories, and in Russia - disorder, chaos, anarchy and powerlessness. This means that such conflicts can be widening and gaining scale in different corners of the country, which is called the Russian Federation, including in the capital region, " - summed up Andrei Yusov.

СЛУЖБА БЕЗПЕКИ УКРАЇНИ

# СБУ ПОВІДОМИЛА ПРО ПІДОЗРУ ЩЕ 7 ТОПКОЛАБОРАНТАМ: СЕРЕД НІХ – СОРАТНИЦЯ АКСЬОНОВА, ЯКА ЗАКЛИКАЛА КРИМЧАН ВСТУПАТИ ДО ЛАВ ЗС РФ

The SBU reported suspicion to 7 more to fireolaborators: among them - a colleague, who called on the Crimean to join the ranks of the Armed Forces of the Russian Federation, [informs](#) пресслужба відомства.

«Служба безпеки задокументувала злочинну діяльність ще 7 чиновників-колаборантів, які переховуються на тимчасово окупованій території України. Однією з них є очільниця створеної агресором „адміністрації Чорноморського району Криму“ Наталія Пісарєва. Її кандидатуру на це „крісло“ нещодавноособисто погодив місцевий гауляйттер Аксьонов. До цього призначення Пісарєвабула так званою „першою заступницею

міністра культури“ на тимчасово захопленому півострові», — йдеться у повідомленні.

Зазначається, що перебуваючи на цій «посаді», після початку повномасштабного вторгнення вона координувала ворожу інформкампанію щодо підтримки збройної агресії РФ. Тоді фігурантка публічно закликала українських захисників здаватися в полон, а також агітувала мешканців Криму вступати до російських військ для війни проти України. За це окупаційний «військовий комісаріат Криму» нагородив її грамотою.

За даними слідства, до захоплення українського півострова Пісарєва керувала регіональним проектним офісом апарату Ради міністрів автономної республіки. Однак, під час його захоплення підтримала агресора і згодом увійшла до такзваного кадрового резерву окупаційної адміністрації.

Ще однією колаборанткою є колишня посадовиця Управління Державної казначейської служби України в Луганській області. Після захоплення частини регіону вона добровільно погодилась на «пропозицію» агресора очолити так зване «казначейство ЛНР».

До «штату» псевдоустанови вона залучила ще п'ятьох спільніків. Ними виявилися її колишні підлеглі зі Старобільського, Новоайдарського, Міловського, Новопсковського та Марківського районів. У складі окупаційного органу вони стали керівниками відповідних районних «управлінь казначейської служби ЛНР». На цих «посадах» вони брали участь у фінансовому забезпеченні російських окупаційних угруповань, які були задіяні на східному фронті.

In the space of the exhibition project "Ukraine - Crucifixion" of the National Museum of Ukraine in the Second World War there was a public discussion - "liberated. How to work in de -industrial territories. " During which the journalist museums for the first time exchanged experience in working on the released landowners.

The journalists were presented with two angles. Regarding the fixation-observation of the work, the founder of the report of Ukrainer, the laureate of the prize of Georgy Gongadze in 2023 for the documentary project on de-coming lattice and for the book "Deophocation" Bogdan Logvinenko. The experience of the study-investigation of crimes was told by documentary Russian crimes against civilian, local producing film of the British TV and Radio-language Corporation of the Air Force "I appeal to him" about the crimes of the Russians in Bucha Sofia Kochmar-Tymoshenko.

Bogdan Logvinenko and Sofia Kochmar-Tymoshenko separately raised the problems of working with people who were in the occupation, underwent torture of or wicked by Russian invaders. In order to clearly demonstrate the specificity of communication with such people, Sofia Kochmar-Tymoshenocope has made an excerpt of his movie "I refer to him."

The topic of gathering museum artifacts was also discussed. Irina Kotabyuk, the head of the scientific and exposition department of the modern Russian-Ukrainian war of the National Museum of Ukrainian History of Ukraine in the Second World War, said that it is important to collect during expeditions in the territories of Ukraine. And as the Mr. cooperate with the local population and military-civil administrations.

In particular, the participants of the event shared their impressions of what the consequences saw and the heard stories of eyewitnesses of inhumane behavior of the invaders. The lights that participants showed the audience and museum exhibits exhibited in the exhibition hall were vivid evidence of Russian -bearing.

According to the results of the meeting, the participants agreed that it was necessary to deepen the cooperation between the media and museums, as museums, collecting artifacts, often with stories of worthy reporting, and journalists sometimes do not know how to use. The expediency of exchange of experience in the field of professional moral and psychic resistance while working with the consequences of war was also recognized.

On the initiative of NGO "Staff of Marine Corps of Ukraine", a meeting with the unification of the families of a separate infantryman of the Marine Corps, Mikhail Bilynsky, took place on the coordination school.

About it [reports](#) Coordination headquarters of inquiries for the treatment of prisoners of war.

The coordination headquarters pointed out that the information of the persons and captive servicemen is collected in different ways: this is the official confirmation of the Russian Federation Ministry of Federation through the international committee of the Red Cross, photo and video materials from the open sources.

A considerable amount of valuable information comes from relatives. However, part of the information has restrictions on access, so it is forbidden to disclose it. It should be noted that the coordination headquarters does not carry out operational and search measures independently, this is done by the relevant authorized bodies.

As for seriously wounded and seriously ill defenders, the staff representative claimed that the emphasis on this category of servicemen is placed every time during the negotiation process.

According to the Geneva Conventions of the seriously wounded and seriously ill, the Combatantian side must return without any conditions. Similarly, without the involvement of the exchange, children, women and civilian hostages, which the aggressor country illegally holds in places of freedom, should be repatriated.

During countertoing measures, a Russian agent was exposed in Dnipropetrovsk, who collected for Russian invaders about the types and number of heavens of the Armed Forces of the Armed Forces, as well as their place of departure.

About it [reports](#) Security Service of Ukraine.

He also handed over to the invaders of the location of the territorial centers of staffing and social support(military enlistment offices)and tried to identify rail lines involved in the supply of ammunition to the front. For each task, the Russian agent received from his "curator" from the FSB to 4 thousand hryvnias. For conspiracy the money was transferred by the traitor with the help of a cryptocurrency electronic wallet.

Intelligence information was needed to prepare the series of air strikes in the region, first of all for the defeat of strategic objects.

According to the investigation, a local resident was detained, who was a staffing officer of the FSB in July 2022. In the field of view of the Russian special service, he got through one of the Russian telegrams, where he periodically launched a photo of the positions of Ukrainian troops.

In the future, he maintained connection with the aggressor through the messenger. To perform the intelligence he went to the area where he was hidden watching the objects, and also asked the information he needed from people.

When searches at the place of residence of the person, the mobile phone of Iplanchet was found, which he used to communicate with the FSB.

The detainee was informed of a suspicion of a state betrayal committed in the conditions of a state.

ARMIA INFORM

In Kyiv, at the National Museum of History of Ukraine, volunteer organizations were handed over to servicemen by parties. These machines are intended to

enhance the efficiency of ammunition transportation, weapons and military equipment, which is supplemented by Western partners to Ukraine.

The equipment was handed over to the military, headed by the head of the Central Department of Military Equipment for Armed Forces Command of Armed Forces of Ukraine Andriy Buryan.

- Such trucks are essential for the Armed Forces to perform combat missions. The most important function of these cars is the transportation of military equipment, weapons and ammunition. Therefore, the presence of these cars will accelerate and improve the work of our military at the front, - says the deputy commissioner Vitaliy Paliychuk.

As part of the initiative, 6 units of cargo equipment manufactured by MAN SEA, Volvogroup, Scania and DAMM will be sent to one of the military units of the Armed Forces of Ukraine. The first 4 trucks were handed over to the event, and they will be twisted to Ukraine. At the same time, one of these trucks will temporarily go to the Nershson region with humanitarian aid.

President of Ukraine Volodymyr Zelensky has a telephone conversation with

Presidential Study Region Recep Taiip Erdogan. In particular, the leaders discussed the investigation of the Kakhovka Hydroelectric Power Consignment.

“He spoke about the humanitarian and environmental consequences of the Russian terrorist attack by the Nakakhovsky hydroelectric power station, including the risks to the ZPP. He has transmitted a list of urgent needs for the elimination of disaster,” said глава української держави.

За словами Володимира Зеленського, голос Туреччини важливий, коли йдеться провиведення окупантійних військ з української території. А також про повернення наших незаконно ув'язнених, зокрема кримських татар, і продовження йрозширення зернової ініціативи.

The destruction of Russia's troops is a disgusting act and tragic lean of brutal and unprovided invasion of the Russian Federation into Ukraine.

About it [stated](#) The UK Ambassador to the OSCE Nilkolland.

"The guilty of these actions should be responsible. Our thoughts - from the people of Ukraine, especially with those who live in the area, whose lives, the houses of the hip are in danger. This act has threatened the thousand peaceful lives and caused serious harm to the environment. The flooding contamination of water sources and vital natural environments. Large areas of agricultural land and source electricity are also threatened. This is in turn threatened with the production of food and international trade in food. The United Kingdom is ready to support Ukraine and anyone who suffered from this catastrophe, "Nile Holland stressed.

London will continue to monitor the development of events. In particular, it is also a prevention of Kherson's shelling by Russian troops during the evacuation of civilians.

"If so, then it is a hand. We say clearly: these destruction is the seeding of unjustified, unprovided Ukraine's invasion of Russia. Iceland's Parliament strongly condemns the illegal and systematic deportation of Ukrainian children from the territories of Ukraine occupied by Russian troops and their proceedings both within these territories and to Russia and Belarus. The correspondence was approved unanimously.

About this [it is referred](#) In a message on the official page of the Verkhovna Rada of Ukraine on Facebook.

"The decisive position of Alting is that the Russian authorities should immediately reflect the deportation of children, as it violates international humanitarian correctness, as recently emphasized in the declaration of the summit of the Udriyepa in Reykjavik," the document emphasizes.

Iceland's Parliament emphasized that all available means should be ensured that children displaced to Russia or Belarus or within the occupied territories were immediately returned to parents and other guardians under the supervisory community. Icelandic deputies also advocated the reference of representatives of the Russian authorities and all those who are guilty of deportation of Ukrainian children.

Olena Kondratyuk, Deputy Chairman of the Verkhovna Rada of Ukraine, noted that the need for this decision was advocated during a trip in May of Dutch and meetings with the leadership and deputies of Alting.

On behalf of the Ukrainian people, she congratulated the historical decision of parliamentuland, which officially condemned the illegal deportation of Ukrainian children by Russia!

— Дуже часто, коли виїжджаєш за кордон, вони тиснуть твою руку і говорять, що «якщо б на нас напали, то ми не впевнені, що ми, як суспільство, що ми, якармія чи держава, так би відреагували». І, звичайно, що можна робити, аби тема України, російської агресії і нашої боротьби проти неї не зникала з поля зору міжнародних партнерів — відповідь одна — продовжувати робити все те, що ми вже зробили: консолідація нашого суспільства і робота в унісон, як ми і почали з першого ж дня широкомасштабного вторгнення росії в Україну, — зазначила Олеся Огризко.

## **Dear Ukrainians, Ukrainians!**

Today, the maximum attention of the consequences of the Russian terrorist attack on Kakhovskaya HEP. Dozens of settlements are flooded in the territory controlled by us. Those houses!

Evacuation continues. And under shelling!Russian artillery continues to beat, no matter what. Just inhumans.

But as of this time, more than 2 thousand people have been improved in the Kherson and Mykolaiv regions. And I thank everyone who is involved in this work, everyone who helps!Our task is to protect life and to help people.

Absolutely catastrophic situation in the occupied part of Kherson region. Occupant threw people in these terrible conditions. Without rescue, without water, just the supplies of houses in flooded communities. And this is another conscious crime of Russia: after the terrorist state has caused a catastrophe, it also maximized the harm from it.

Now a clear and quick reaction of the world is needed to what is happening. Even it is possible to establish for sure how many people on the temporarily occupying territory of Kherson region can die without salvation, without

drinking water, without food, without medical care. Our military and intelligence services are as high as they save people despite the fire.

But larger efforts are needed. International organizations, such as the International Committee of the Red Cross, should immediately join the rescue operation and help people in the occupied part of the Kherson region. Every kind of person there is a sentence of existing international architecture, international organizations that have learned to save life. If there is no international organization now in the area of this disaster, then it is not at all, then it is incapacitated. There are all relevant appeals of Ukraine, our government.

Many leaders of the world, leaders of states, governments, interstate associations have expressed their support to Ukraine and a clear condemnation of Russian crime. I thank this principle!

Together, we must also hold the occupiers. They have more than a year controlled both the dam and the whole hydroelectric power station. Russian propagandists seriously and openly developing such a scenario of the man-made catastrophe they have reported. Last autumn, we warned the world about the Ministry of Internal Affairs of Russia. He spent some important international conversations today.

Turkish President Erdogan. He informed him about the situation in flooded areas, about our rescue operations and urgent needs to help people.

Of course, they also discussed the risks for the Zaporizhzhya nuclear power plant, which is under the control of the occupiers. There is an agreement with the IAEA leader to proactively the work of IAEA representatives at the station. But it is clear that, there are no full security, the governors there. Therefore, the de-occupation of Ukraine is a task.

France President Macron. They discussed - and in great detail - all the consequences of the Russian terrorist attack at the station, in general the situation. Everything we can do to people affected by the regions.

Defense actions were also thoroughly discussed, as well as international measures that are preparing for everything, because we need safety despite any aggressive and frank-free actions of Russia.

Separately, I want to point out a few things that are important to our country, which is particularly for people in our regions that depended on the Kakhovsky Direction.

First. We will provide drinking water with drinking water. In all areas, areas, cities of Isella, where it is necessary. Where the drinking water is now, all necessary supply systems will be made. Supply is the main principle.

Second. The world will be with us. The partners are fully informed of what is giving away, what help we need. Whatever there are economic, social, environmental consequences of this catastrophe, all the foundations of life will be preserved. Kherson region, Mykolaiv, Zaporizhia, Dniprovska - we see all the problems and make it possible and impossible to solve the problems.

Third. The direct duty of representatives of the state and local authorities in all communities and areas that have suffered are assistance to people. From the Government and the SESA of the complementary authorities, local communities - all to the maximum are involved to rescue and protect as many people as possible. Everyone should perceive this task. And I thank those who perceive it in this way! We take care of each other and Ukraine!

And, of course, today I thank each of our warrior, all units, all the masters who continue to beat the occupiers.

Bakhmut direction, Avdiivka, all "Khortytsia", all "Tavriya" - you are good!

Let that, every day should be the day of destruction of the enemy.

Glory to all our heroes!

Glory to all who care about Ukraine and Ukrainians!

**Glory to Ukraine!**
