Currently, several thousand citizens of Ukraine are expecting prostheses that are easy to prepare and serve domestic specialists. According to current law, all prosthetics in Ukraine are free of charge. And this is very important to those citizens who doubt today whether a prosthesis is worth establishing. Here the answer should be unambiguous - worth it.

—The ballow of prostheses requires serious reform, because it has been released to the background, several important conditions of Ukraine were closed: Kyiv, Lviv, Ternopil, Cherkasy. The current state has planned more budgetary funds for 2023, because several citizens of Ukraine, especially servicemen, are expected to be prosthetized - [noted](#) The first deputy chairman of the Verkhovna Rada of Ukraine Committee on Social Policy of Protection of Veterans Rights Mykhailo Tsymbalyuk.

This year in the state budget for prosthetics there are more than UAH 356 million(Last year - less than UAH 24 million). Загалом у 2023 на реабілітаціювійськових заплановано понад 2,5 млрд грн. Окрім протезів, кошти підуть напротезно-ортопедичні вироби, спеціальні засоби для самообслуговування та засоби для пересування.

Михайло Цимбалюк наголосив на необхідності розвитку саме вітчизняної галузі протезування, зокрема, що нам потрібні добре підготовлені лікарі та бригади реабілітологів, здатні місяцями працювати над відновленням людини після установлення протеза.

— Коли ми звертаємося по допомогу до міжнародних партнерів, громадяни України мають кілька місяців перебувати за кордоном з метою протезування. Ба більше, у майбутньому протези потребують обслуговування, а якщо протез встановлений закордоном, то громадянину доведеться виїжджати туди, витрачати кошти і час, — пояснив він.

Однозначно більш доцільно встановлювати протез, освоювати його та проходити реабілітаційний курс у вітчизняних центрах протезування, вважає Михайло Цимбалюк. В Україні працюють як державні, так і приватні реабілітаційні центри, тож можна проаналізувати пропозиції і обрати — послуги з протезуванням безкоштовні.

One of the problems of prosthetics is bureaucratized in communication between those who need prosthetics and government agencies.

We will remind, a serviceman who has a certificate of injury(Even if it is not yet issued a disability), is entitled to free receipt of the prosthesis regardless of the number of amputations.

The state prosthetics procedure is currently quite complicated, it provides for series. According to her now, the action algorithm is as follows:

First, the injured person must choose a prosthetic enterprise on his own, and it is difficult to use if you have never encountered it: not just evaluate the technical possible, providing appropriate personnel and honesty of the enterprise, giving prosthetics services.

Secondly, after the choice of the contractor, a contract with a prosthetic enterprise is signed, and it, for its part, concludes an agreement on the Ministry of Social Policy.

Among the existing problems, the most common is prosthetics delay. Usually, it may be due to the fact that businesses do not start work until the budget is received. On the other hand, if the enterprise does not have sufficient production capabilities, then the term of production of the prosthesis can also be delayed. Therefore, you should not delay and seek the prosthetics as soon as possible.

President of Ukraine Volodymyr Zelenskyy

This Monday and New Week began with an hourly meeting with all levels of government and protection. Government, ministers, office. Reported by the

head, heads of GUR and foreign intelligence service, the head of the SBU, the Secretarp.

The first question is the consequences of Russian blows, including missile. It was only in the past, from midnight to seven in the morning that 15 Russian rockets managed to bring down. But unfortunately, not everyone. Not all of them. We actively work with partners to the defense of our sky even more reliable.

They discussed at a morning meeting the likely behavior of the enemy in the near future, coordinated our defensive steps.

Separately - issues of weapons and shells for our soldiers. Also, the situation in the still occupied territory and counteraction to Russia. No chance of the occupier on our land!The enemy is only destruction.

Here's just one example today. Chernihiv region, the village of Lizunivka, is the North region, near the state border. There, the Russian aviation was destroyed by a still Ukrainian school ... Unfortunately, this blow took the life of a teenager - a guy of 2009 birth ... 14 years old!He was just near the school. My muddy and loved ones!

Pavlograd of Dnipropetrovsk region. Terrorists rockets have taken away the lives of two people, very young guys ... My condolences to families!More than forty people - women, children, men - received help after injuries and injuries.

For each such impact, Russian invaders will receive our answer. And I thank our warriors who provide it daily and every night. Which protect our position, reflect Russian assaults, help their fire brothers, who are in positions, and to the maximum destroy the occupier. The more Ukrainian comprehension, the more Ukrainian mutual support, the more Russian evil is building.

Ukraine's accession to NATO - in the interests of the Alliance itself, arguments against it are the imprisonment of false judgments, which have long lost their relevance.

This is stated in the post on Facebook of the spokesman of the Foreign Ministry Oleg Nikolenko in response to the Natural Science of the German Press Agency(DPA).

Він нагадав, що у контексті підготовки до саміту In Vilnius, German journalists, referring to unnamed interlocutors, claim that the steps to Vnato's membership can be distracted from "much more important support for Ukraine". In addition to DPA, new obligations to NATO can push Russia to do the aggressive war. Further, the agency concludes that progress is likely to be possible only after Ukraine has achieved success in combating Russian aggression.

"These arguments are a set of false judgments that have long lost its relevance," Nikolenko said.

He stated that the battles are really important, but Ukraine has already achieved success in defense against Russian aggression.

"In February 2022, skeptics gave Ukraine 72 hours, and optimists - a week. The heroism of Ukrainian defenders and defenders, as well as international support, Ukraine not only stood a blow, but also conducts successful operations of discharge of occupied territories. It will not be an exaggeration to call the Ukrainian army the strongest army of Europe. Ukrainians are now making the greatest contribution of Vevro -Atlantic security, "the Foreign Ministry spokesman.

In addition, he noted, earlier we have already heard arguments about the need to maintain steps that could "provoke" Russia for new provocation. In this context, Nikolenko quoted the Minister of Out -of -Kulebu, who emphasized that "the only thing that provokes Russia is ceniferation." Instead, promoting on the path to Ukraine's accession to Natov will quench its aggression, predicted a foreign Ministry of Foreign Affairs.

He also believed that the current international support of Ukraine in the protidium by the Russian invaders does not contradict, but on the contrary complements the process of acquiring the acquisition in NATO.

"The future of Euro -Atlantic security is resolved on the battlefield in Ukraine, and the introductory state to NATO will guarantee the strategic security of all the Alliance. Ukraine is not a problem, but an advantage for NATO. Therefore, in response to the calculation of anonymous sources, we emphasize that Ukraine's accession to NATO -Winteresa of the Alliance itself and urge partners to show leadership, "Nikolenko emphasized. He added that Foreign Minister Dmytro Kuleba is clearly defined Ukrainian expectations: at a summit in Vilnius, Ukraine expects to obtain a commitment from allies, which will determine the path to our NATO accession.

"The time for such a step has long been raised," the Foreign Ministry spokesman summed up.

As reported, the German press agency(DPA)With reference to the NATO, NATO members such as the United States and Germany have recently made it clear that they did not want to take any extent that would go beyond NATO Declaration from 2008.

About it stated Doctor of History, Employee of the Armed Forces Center for Military History Ivan Patrylyak at the Military Media Center.

According to him, for Ukraine the Second World War is unfinished, because the issue of the Ukrainian state was not disseminated, and evil was not punished.

During a roundtable on the topic: "The contribution of Ukraine and Ukrainians to the victory in the Iisvito war: the lessons of history we still teach" Ivan Patrylyak stressed that "one evil of the Second World War - the Nazi regime - was punished, but the other - Russian Bolshevism - was not punished. "

According to the historian, instead the Russian Bolshevik regime is among the winners and "now we have the consequences of this non -punishment of Russian Bolshevism in the Second World War."

"Because the Russians have perceived immovable as a weakness of the world, that they can repeat, first of all, to repeat their aggression and crimes," Ivanpatrylyak said.

"Two countries that have resolved World War II are the Nazi Reich Union. But on the gallows were the leaders of one state, and the leader state found themselves in the warm chairs of international organizations, " - said Visorik.

"And now we have a consequence that Russia is presiding on the UN Security Council," - said Ivan Patrylyak.

"That is, we see what is the influence of World War II on the events of today."

- The first creation of our Sirko UAV enterprise is a tactical reconnaissance type with a fixed wing. He can collect reconnaissance information, providing a

permanent video with the operator at a distance of up to 30 kilometers, the Vafline mode-up to 50 km,-says Skyssist, the chairman of the supervisory board of the Skyssist Scientific and Production Company LLC.

According to manufacturers, SIRKO UAVs are made of cast housing, that is, this feature allows to organize the process of assembling the apparatus on the conveyor to provide its mass production.

Sirko has a size of 93 centimeters in wings, it is considered super -light because it will only lead 1.37 kilograms. The battery charge is enough to overcome the distance to 130-140 kilometers at an altitude of about 1 thousand meters. In the air, this fabric is up to one and a half hours depending on the weather - for example, the spinning wind is decreasing.

According to the designers, the aircraft itself is made of polymer material, which is completely radio transparent - in the mode of radio silence the means of electronic struggle of the enemy is not seen or perceived as a bird.

It distinguishes Sirko from the rest of the famous UAV brands and the fact that its operators can get it from shelter, for example, a dugout, placing the antenna and the mast from the human location.

- For example, known to all UAV MAVIC is only manually controlled. And its pultication emit radio waves, which the enemy can fix. That is, the safety assembly to stay on the terrain can be a very short time, the UAV flight will also be short -lived. The structure of our complex extends the work of the operator, and can save his life in the event that the rebuper records the work of the station and opens the fire in its direction, - explains Krynnichko.

According to manufacturers, you can master the control of SIRKO UAV for two to three weeks. The school of operators is directly in production.

According to Igor Krynnichko, the enterprise is currently at the stage of signature of the state agreement for the supply of these complexes, in particular the change in defense.

_ I wish health, dear Ukrainians!_

A brief report on today.

The first is a military office. This is a special work with key commanders to go to the defense. It is clear that this is a closed job, its details are not made

public. But as well as rates, the military office also works regularly to synchronize our most important defensive and active action.

The second is sanctions. He held a meeting on strengthening sanctions regimes - both our, Ukrainian, and in common with partners.

We carefully monitor how the terrorist state tries to circumvent sanctions, fix each such direction, we work together with partners to block. We prepare a large sanction package. The solution is soon.

The third is international events. This May and the following months will be prebue to Ukraine in the international plane. There will be a lot of negotiation, international measures that will strengthen our defense. We work everything. There have a few meetings planned for this week and in the near future.

Fourth - held a meeting with the head of government Shmigal. Coordination, training. We prepare conceptual security solutions for the development of Ukraine, our infrastructure both now and after the war. We are also preparing for the planned international meetings for the reconstruction of Ukraine and the corresponding negotiations by the partners.

And the fifth is today's international meetings and conversations.

He met with the Portugal Parliament delegation headed by Parliament. Productively.

He thanked for the support of our country and people. The theme of the conversation is quite a sprout, but the main thing is that it unites us ... It is safety for all -Europeans, stability, and therefore it is the further development and strengthening of the European and Euro -Atlantic community. In this context, I noted what wickedness we expect from the partners summit in Vilnius in July, the NATO summit.

He spoke today with the chairman of the African Union, the President of the Komorkikostrov. An important conversation and important common understanding. Thanked for the support of global sites, in particular in the UN. He invited to join the realization of the peace formula and assured that Ukraine is ready to be reliable guarantees of food security. We do our best to eliminate any harm to the sprouting aggression for both our people and all our partners.

Thank you to everyone in the world who supports Ukraine! I will especially note today the soldiers of the 77th separate airmobile and 93rd separate mechanized brigades who defend the Bakhmut direction. Really! Thank you guys!

Glory to Ukraine!
