President of Ukraine Volodymyr Zelensky spoke at the opening of the IV Summit of the Radyepa in Reykjavik.

Ukrinform provides the full text of the presidential speech, published Office of the Head of State.

_ Thank you very much! _

Ms. Prime Minister Jacobsdottir, dear Katrin, thank you for inviting the participation at the Summit of our Council of Europe and for your sincere desire to help Ukraine.

Dear leaders of Europe!

Today, Ukraine has passed because of a very complicated challenge - an intense Russian -currency attack. It is in such challenges that we are all now forced to pay attention.

At three o'clock in the morning our people woke up from the explosions. 18 Russian rocket launchers were in our sky, including ballistic missiles, which the terrorist state boasted. Like, they are guaranteed to bear death because they are allegedly knocked down.

Russia applied at the same time balistics, winged rockets, drones ... Especially it was especially difficult for the other defenders of the sky to protect people's lives. But all the lives were protected - all rockets were knocked down, including ballistic. One hundred percent. This is a historical result. Thank you all!

Russia is very trying to improve its ability to kill. We are very trying to improve the protection of our people. I thank all the countries and leaders that work out for us to improve our air defense!We all show that Takenashi with you one hundred percent, what is the power of the free world.

And, of course, I thank each of our soldiers who do this work in our land and on our land, and especially I thank everyone who trains our warriors of cross - out training missions, which are all similar in one - in success. Thank you all! Thank you all!

A year ago, we could not knock down most terrorists, and specialty. And I ask: if we were able to do it, then there is something we can't when we are united and tuned to protect life? Answer: We are one hundred percent in any field, when the goal is to protect our people of Nasha Europe.

Of course, there is a lot to do. The territory of Ukraine is significant, and that such a result of air defense, like this night, be a rule throughout the territory, requires specialty air defense systems and missiles. Modern fighters are also needed, without which the air defense system will not be perfect. I'm sure we'll come to this.

One hundred percent should be a benchmark for us. We have zero percent to leave the aggressor!One hundred percent of the success of sanctions - it is

guaranteed by honesty in the policy of each state. Thank you to everyone who treats the fight against terror - honestly!

One hundred percent of the success of our peace formula - it is guaranteed by diplomacy. Thank you who helps us to unite the world to implement the formula of peace - the only realistic peace plan!

But, of course, one hundred percent of justice - there is no reliable peace of rationality.

Thank you to the Council of Europe - each of you personally!- for the decision on the register of losses caused by Russia's aggression. This brings the creation of a full -fledged compensation mechanism that will show the world that aggression does not even think of thinking.

There should also be a special tribunal for the crime of aggression, so that the terror is answered in whose heads this terror is born. I am sure that we will give this result for one hundred percent.

Europe expected such a time - a time when leaders for the sake of protecting Europe, for the sake of our common values with you, would have been in one hundred percent unity and ascetic percent results.

That's what we achieve! Ukraine and all of Europe. Everyone and everyone who is now this summit and who helps us.

We are Europeans, and therefore we are free. We are Europeans, and therefore we value peace. We are Europeans, and therefore, we act on one hundred percent of our forces when you need to protect your lifestyle. Let it be the rules for our continent forever!

Thank you for your support!

Glory to Ukraine!

Glory to all of Europe!

The Ukrainian battlefields not only asserts her own freedom and independence, but also of values that are expensive every European, which is why Europe has to support Ukraine in its fight against Russian aggression for as long as it will be necessary.

This was announced today during a speech at the Council of Europe Summit in the capital of Iceland, Reykjavik, President of the European Commission Ursula von Der Lyen said, Ukrinform correspondent reports.

"Today the war has returned toUkraine is fighting for the values that we believe in both we are and which are so exterminated for us. I am very grateful for our unity in protecting peace and in promotion of ideocracy. This is the reason from which the Council of Europe was formed, Isama has gathered us today. While Russia continues its war on democracy itself, Europe is the only one and it stands for Ukraine. This is a duty, "the President of the European Commission emphasized.

She recalled the words of the Sakharov Prize laureate Alexandra Matviychuk, who was lying to Ukraine not because he was afraid of NATO, but in order to suppress the movement of Ukraine to democracy. That is why this war, which Russia has solved against Ukraine, is a war of values. Therefore, Europe has to take on the responsibility of the slavery of democracy.

"It is very true that the people of Ukraine requires responsibility for Russian crimes: for shelling of civilian homes, for cold -blooded executions, the suspension of children. More than 19,000 children were stolen and removed from their own years. This is exactly what this summit in Iceland should focus on, "Ursula Der Lyen said.

She noted that such attention is important for Ukrainians, since the prospective reversal responsibility can now keep Russian soldiers the export of new military crimes. But it is also important for the future. Therefore, only justice can be the basis for a long peace in Ukraine, just peace.

The President of the European Commission emphasized - since the creation of the Council of Europe, the continent has been heading for democracy. Europeans rebuilt not only their cities, they resumed the moral foundations of Europe, placed freedom, equality of tasolidarity in the heart of European society. **Read also:** [SHOLC](#) She noted that today Europe again confirms loyalty to its values.

"We will do our best to win peace, just peace. We will do nothing for Ukraine without Ukraine. That is why we strongly support the Ukrainian formula of peace, which is the basis of the path to peace. I call us at this summit to support this peace formula. The test is coming. It is very important that we combine forces. Ukrainians are struggling with suicide and for freedom. This is our joint struggle, and we will stand on their Botthat for a long time. Glory to

Ukraine!, Let Europe live!”, The President of the European Commission has written her speech.

As it was reported, the Sumith of the Council of Europe is taking place today in Reykjavik, whose participants consider the most important global problems and issues of international relations, including the consequences of Russia's military aggression anti -Ukraine and the search for ways to just peace.

The five -year restoration period of Ukraine will require additional investments in a size of about \$ 50 billion a year.

As Ukrinform reports, it reports "In the last report of the European Bank for Reconstruction and Development(EBRD)Regional Economic Perspectives outlines a script that demonstrates the basis of history lessons that a five - year recovery period will require additional investments of about \$ 50 billion a year thanks to the inflow of foreign capital, including private, "the statement reads.

It is noted that most economies that have come out of the armed conflict are experiencing the long -lasting calm period for 25 years after it, neither recovered to the pre -war level of income per capita, even in the urban perspective. But, according to the report, 29 percent of the economy reaches the pre -war GDP per capita for five years. This is a study combined common features during the war.

For Ukraine to recover for five years, its economy should increase by 14 percent a year throughout this period. This will increase the average VDPD \$ 225 billion with approximately \$ 150 billion In 2022 in constant prices.

The main feature, which is common to periods of persistent extremely high economic growth, is the high ratio of investment to GDP.

Before the war, moderate investments in Ukraine were mainly funded by extent innovative savings. The inflow of capital was only 3 percent of GDP per year in 2010-21. And foreign direct investment, as a rule, falls significantly post -conflict and require a lot of time to recover. When domestic savings were low, foreign funding helped to support a number of investment booms, in particular in Central and Southeastern Europe in the 2000s.

"This scenario is the difference between the required level of investment and existing internal savings will probably need to be covered by external funding(a pure inflow of capital)20 percent of GDP or US \$ 50 billion per year, "the message reads.

In the EBRD report, the largest institutional investor of Ukraine, it is also pronounced on the importance of the proper balance of attraction of the private tanto -state sectors in previous post -conflict reconstructions together with a significant role of foreign aid from bilateral and multilateral structures.

"Private and government investments tend to supplement each other, a conflict situation and in general. In addition to funding, the private sector provides the necessary technological experience, know-how in management and focus economic efficiency, "the document commented.

He emphasized that in order to achieve the United States of successful policy of Napoleonic direction, it is necessary to understand their enemy.

"Secondly, we need to work on creating an architecture of security within the framework of NATO, as well as with the help of intense bilateral and multilateral diplomacy to protect not only Ukraine but also Europe and the rest of the world of red-Russian aggression," Sullivan said.

Third, he said "there can be no confidence in the Russian government." In this connection, he recalled how in 2022 the Kremlin repeatedly stated that he did not plan to attack Ukraine. "Why should someone trust this power?" The exhibition said.

He expressed the belief that it is time to return to the Mantra "Trust, but check" Ronald Reagan.

"There can be no confidence (to the Russian Federation - ed.), only a verification of the establishment of justice for Ukraine and victims of Russian military raids in Ukraine, "the former ambassador said.

Sullivan acknowledged that it is difficult to implement diplomacy in such circumstances, but Shan should refuse to completely refuse when the national interests of America require.

"But our interests do not require the Russians to ask for dialogue, whether it is a controlling assembly or a war in Ukraine. And they want it. And it will only bring to new failures in politics, "he said. Sullivan noted that during his stay as a US Ambassador to Moscow, he received the best advice: never to ask the Russians. "We must approach any of the proposed interaction or negotiations from the standpoint of Sylite confidence," the exdiplomat emphasized.

Finally, he noted that between Russia and the United States still remains the permanence of parity in the issue of diplomatic presence.

"We have an embassy in Moscow and there are no consulates. They have an embassy in Washington and two consulates in Houston and New York. In addition, they have more diplomats intended for a bilateral mission in the United States than we are in Russia. We need to insist on reciprocity, "Sullivan emphasized.

“One day Russian It will end. One thing is that it will not end with the victory of Putin's imperialism. We will support Ukraine until the justice is reached, ”Scholt said.

One of the main lessons that Europe has to take out of Russian aggression of an anti -European peaceful order is "the need to support Ukraine on its democratic European path: in protecting from Russian aggression, strengthening legal institutions, in reconstruction," the chancellor said.

He noted that the CE was important for bringing the occupiers, Russian military workers and the establishment of a mechanism for recovering compensation for incredible damage caused by the Russian Federation, launching a register of losses. These issues are one of the central tasks of the current summit. Scholz also emphasized the role that the Council of Europe can play, in particular, expert opinions of the Venice Commission, in the acquisition of Ukraine and other countries that are candidates in the EU.

When the Council of Europe was organized in 1949, the memories of the Second World, Nazi Germany, were still fresh, and the peoples of the European were already behind, the cult of violence was already behind, Chancellor said. According to him, the founders of this body sought to prevent the repetition of such violence of tasses, to ensure equality of all rights and obligations.

The German leader noted that his homeland, the national socialist authorities caused unbearable suffering of Europe to Tasvit, but the war was possible because they had tried to destroy democracy, human rights to ignite hatred in Germany.

Immediately after that, Scholz moved to Ukraine on February 24, to capture its territory and move borders with force on February 24. This is the first CE summit for 18 years. Its main topic is Ukraine. President of Ukraine Volodymyr Zelensky has ended with video binding participants.

The Ukrainian battlefields not only asserts her own freedom and independence, but also of values that are expensive every European, which is why Europe has to support Ukraine in its fight against Russian aggression for as long as it will be necessary.

This was announced today during a speech at the Council of Europe Summit in the capital of Iceland, Reykjavik, President of the European Commission Ursula von Der Lyen said, Ukrinform correspondent reports.

"Today the war has returned toUkraine is fighting for the values that we believe in both we are and which are so exterminated for us. I am very grateful for our unity in protecting peace and in promotion of ideocracy. This is the reason from which the Council of Europe was formed, Isama has gathered us today. While Russia continues its war on democracy itself, Europe is the only one and it stands for Ukraine. This is a duty, "the President of the European Commission emphasized.

She recalled the words of the Sakharov Prize laureate Alexandra Matviychuk, who was lying to Ukraine not because he was afraid of NATO, but in order to suppress the movement of Ukraine to democracy. That is why this war, which Russia has solved against Ukraine, is a war of values. Therefore, Europe has to take on the responsibility of the slavery of democracy.

"It is very true that the people of Ukraine requires responsibility for Russian crimes: for shelling of civilian homes, for cold -blooded executions, the suspension of children. More than 19,000 children were stolen and removed from their own years. This is exactly what this summit in Iceland should focus on, "Ursula Der Lyen said.

She noted that such attention is important for Ukrainians, since the prospective reversal responsibility can now keep Russian soldiers the export of new military crimes. But it is also important for the future. Therefore, only justice can be the basis for a long peace in Ukraine, just peace.

The President of the European Commission emphasized - since the creation of the Council of Europe, the continent has been heading for democracy. Europeans rebuilt not only their cities, they resumed the moral foundations of Europe, placed freedom, equality of tasolidarity in the heart of European society. **Read also:** [**SHOLC**](#) She noted that today Europe again confirms loyalty to its values.

"We will do our best to win peace, just peace. We will do nothing for Ukraine without Ukraine. That is why we strongly support the Ukrainian formula of peace, which is the basis of the path to peace. I call us at this summit to support this peace formula. The test is coming. It is very important that we combine forces. Ukrainians are struggling with suicide and for freedom. This is our joint struggle, and we will stand on their Botthat for a long time. Glory to

Ukraine!, Let Europe live!”, The President of the European Commission has written her speech.

As it was reported, the Sumith of the Council of Europe is taking place today in Reykjavik, whose participants consider the most important global problems and issues of international relations, including the consequences of Russia's military aggression anti -Ukraine and the search for ways to just peace.

Today, Ukraine has passed because of a very complicated challenge - an intense Russian -currency attack. It is in such challenges that we are all now forced to pay attention.

At three o'clock in the morning our people woke up from the explosions. 18 Russian rocket launchers were in our sky, including ballistic missiles, which the terrorist state boasted. Like, they are guaranteed to bear death because they are allegedly knocked down.

Russia applied at the same time balistics, winged rockets, drones ... Especially it was especially difficult for the other defenders of the sky to protect people's lives. But all the lives were protected - all rockets were knocked down, including ballistic. One hundred percent. This is a historical result. Thank you all!

Russia is very trying to improve its ability to kill. We are very trying to improve the protection of our people. I thank all the countries and leaders that work out for us to improve our air defense!We all show that Takenashi with you one hundred percent, what is the power of the free world.

And, of course, I thank each of our soldiers who do this work in our land and on our land, and especially I thank everyone who trains our warriors of cross - out training missions, which are all similar in one - in success. Thank you all! Thank you all!

A year ago, we could not knock down most terrorists, and specialty. And I ask: if we were able to do it, then there is something we can't when we are united and tuned to protect life? Answer: We are one hundred percent in any field, when the goal is to protect our people of Nasha Europe.

Of course, there is a lot to do. The territory of Ukraine is significant, and that such a result of air defense, like this night, be a rule throughout the territory, requires specialty air defense systems and missiles. Modern fighters are also needed, without which the air defense system will not be perfect. I'm sure we'll come to this.

One hundred percent should be a benchmark for us. We have zero percent to leave the aggressor!One hundred percent of the success of sanctions - it is

guaranteed by honesty in the policy of each state. Thank you to everyone who treats the fight against terror - honestly!

One hundred percent of the success of our peace formula - it is guaranteed by diplomacy. Thank you who helps us to unite the world to implement the formula of peace - the only realistic peace plan!

But, of course, one hundred percent of justice - there is no reliable peace of rationality.

Thank you to the Council of Europe - each of you personally!- for the decision on the register of losses caused by Russia's aggression. This brings the creation of a full -fledged compensation mechanism that will show the world that aggression does not even think of thinking.

There should also be a special tribunal for the crime of aggression, so that the terror is answered in whose heads this terror is born. I am sure that we will give this result for one hundred percent.

Europe expected such a time - a time when leaders for the sake of protecting Europe, for the sake of our common values with you, would have been in one hundred percent unity and ascetic percent results.

That's what we achieve! Ukraine and all of Europe. Everyone and everyone who is now this summit and who helps us.

We are Europeans, and therefore we are free. We are Europeans, and therefore we value peace. We are Europeans, and therefore, we act on one hundred percent of our forces when you need to protect your lifestyle. Let it be the rules for our continent forever!

Thank you for your support!

Glory to Ukraine!

Glory to all of Europe!

Sekretarz Rady Bezpieczeństwa Narodowego and Obry Ukrainian Oleksij DaniłowPodczas Wywiadu W Kijowie, UKRAINA, 22 MarCA 2023

The Russian Federation is an indisputable leader in the number of conflicts in the world, and it is not possible as long as exists in the current limits. This was emphasized by the Secretaries of National Security and Defense of Ukraine Alexey Danilov in an interview for the Facts of the Week on ICTV on Monday, May 15, 2023.

"Chechnya is occupied by the Russian Federation today. In 2008, Putin committed an act of aggression on a non -volatile Georgia. In the summer of 2014, the Russian Military SPRK BUK destroyed aircraft. In 2014, the Russians invaded our country ... " - reminded Vavdanilov.

Unfortunately, the NSDC secretary noted, the civilized world then "worried, worried, but did not make any decisions regarding the aggressor country."

To date, he emphasized, "there is no decision on the future of Russia after war" because it "is a hostage of illusions about Russia's power through nuclear potential."

"If someone believes that Russia should stay in the same form in which it is a Blado of War, after our victory, then the question of activation of Russian swinging, imperialism," said Alexei Danilov, adding that then RFProtrotag will succeed in aggression about aggression another country. "They will calm down if they exist within the limits in which they exist," he saved.

The aggressor state of Russia forcibly exports civilian population from the occupied territories of Kherson and Zaporizhzhya regions, including the staff of the captured AAP in Enerгодар.

"It is about people who either deliberately worked on the aggressor or were forced to do. They are told that hostilities will soon begin, that this territory will be fired and bombed, so they will convince and work with the Russians, "said Andrey Chernyak, a representative of the RBC-Ukraine.

According to a representative of the military intelligence of Ukraine, the so-called evacuation of the packed territories of southern Ukraine, Russians use as a screen to carry counterintelligence and filtration measures: "They, first, are bad that the population can observe their preparation for battles—that is, certain counterintelligence measures. It is also filtration, because, first of all, there is a forced export of the pro -Ukrainian population. And thirdly, the Russians are afraid of holding in these territories of some guerrilla movement and internal resistance, "Andrey Chernyak said.

At the same time a representative of the GUR of the Ministry of Defense of Ukraine reported that the removal of Russian combat units from Zaporizhzhya, or from the Kherson regions, is not being recorded. In the occupied territories of these two regions, there are now approximately 152 thousand personnel of enemy troops, and all their actions indicate that they are preparing a pre -defense.

For the effective application of the rules of international humanitarian right - wing, the translation of 29 existing international houses in Ukraine organized the rules of international humanitarian right. About this [reported](#) On the Ministry of Reintegration.

Among them, including:

- protocols to Geneva Conventions concerning the protection of victims of international and international armed conflict; —
- Convention on the prevention of and punishment for a crime of genocide;
-
- Protocol on the protection of cultural values in case of armed conflict; —
- the Convention on the Prohibition or Restriction of the Use of Certain Types of Common Medical Officials that may be considered to be excessive damage or have a non-selective effect; —
- UN Statute and the Statute of the International Court of Justice of the United Nations; —
- Convention on improving the fate of the wounded and patients in active armies; —
- Geneva Convention on the Treatment of Prisoners of Pursuing; —
- Convention on the protection of civilian population during the war; —
- protocol on the ban on the use of suffocating, poisonous or other gases, and also by bacteriological methods of warfare; —
- *Protocol on the ban or restriction of the use of mines, min-traps and other devices.*

This was necessary because the majority of these documents in Ukraine did not have a translation in Ukraine, or had an outdated, still Soviet version. This did not allow the right to apply these norms by Ukrainian lawyers, military and authorities.

The translation was carried out by LLC "Pro-Consulting", with which the Ministry of reintegration has relevant a memorandum.

Documents, which are more than 200 pages of texts, have already been sent to the Foreign Ministry for the official approval.

At the Zaporizhzhya nuclear power plant, Russian invaders intensified the control of the supervisors, so it is forbidden to communicate with each other. In this way, the invaders are trying to mask their own fire positions of Tavian equipment in the station.

About it [reports](#) Energoatom.

The rules of work and staying on the facility or not less for the employees are becoming more tougher.

"After a recently entered ban on using even a button phone, Russian terrorists are introduced to personnel by more restrictions for personnel.

Before the working change, the guards are carefully and carefully inspected the staff at the entrance, allowing them to pass to the workplaces exclusively by the trestle.

Under the harsh taboo and any movement of the territory of the ZPP, except those that were clearly defined by "local police". To go beyond the station is strictly forbidden.

While at work, employees now have the right to look only directly by the front. To turn your head and even just look away - it is strictly forbidden, "the message goes.

Energoatom notes that the reason for such prohibitions is the efforts of Russia to assemble their own firing positions and a large number of military equipment of the stations.

Currently, about 2.5 thousand atomics remain on the ZPP.

Our prisoners of war, the invaders are trying to persuade to their side, persuade Ukraine and act in favor of Russia. About it in [interview](#) The Deputy Head of Anause and Research Department of Internal Communication of the Research Center of Humanitarian Problems of the Armed Forces of Ukraine Volodymyr Petukhov told the information agency of the Ministry of Defense:

“By the way, this is a constant question that is asked by our captives on that side. So -based pressure agrees to improve the conditions of their maintenance. But the 111st Article of the Criminal Code of Ukraine is "State Council", the third paragraph of which proceeds from criminal prosecution if the person has informed the afternoon by our authorities about attempting to recruit it.

In Russia, our captives are said - "you will come - you will be tortured, imprisoned," they are scared by the fact that they will not "get off" by the SBU.

Volodymyr Petukhov assures that in Ukraine for captured Russian military created such a system where the rules of keeping combatants are strictly observed(According to the Geneva Convention): "Undoubtedly, our European principles created by the European principles, and the Russian way of keeping prisoners of war is the Gulav traditions. We had such exchanges that the Russians came from wheelbarrows like tourists. They had the opportunity to work, earn money, buy something »..."

Representative of the Research Center of Humanitarian Problems of the Armed Forces says that it is a worthy of Russian prisoners of war, most of them, when they return to Russia, commenting on them that they have been bullied, pressed and repeated all the rascist narratives about the Nazis, Western mercenaries ...

And interestingly, these fables Russian law enforcement agencies register and collect as revelations of "war crimes" of Ukraine.

"I used to engage in cults, issues of their influence on people's consciousness, helped the victims of these organizations, and say that the behavior of Russian servicemen is very often similar to the behavior of adept -totalitarian sects," Colonel Vladimir Petukhov summarized.
