About what prospects for creating a special international tribunade by the leader of the criminal Russian Federation Vladimir Putin, the Armyinform [told](#) Director of the Research Institute of Lawmaking and Research and Legal Expertise of the National Academy of Law of Ukraine(Eg), Doctor of Laws,

Professor, Corresponding Member of the National Academy of Sciences of Ukraine, Honored Lawyer of Ukraine Alexei Kot.

The correspondent of the information agency of the Ministry of Defense of Ukraine was the hope that in respect of Putin, according to the results of joint work of the Armed Forces, international partners, politicians, lawyers, representatives of the public, the pity will still adhere to the main principle of criminal law - inevitability of punishment.

Director of the Research Institute of Lawmaking and Scientific and Legal Expertise of the National Academy of Sciences of Ukraine Alexei Kot. Photo of Vladimir Polishchuk

Another thing, how to provide it? To continue your [interview](#) Oleksiy Alexei Kots knew that the script with the involvement of Putin and his associates by the courts of Russian naragia seems absolutely unrealistic or even fantastic. Our nationality will also not be able to investigate Putin's military crimes, which has judicial immunity.

In such circumstances, he advised to focus on other mechanisms attracting international criminals-in particular on international legal instruments, which, taking into account the prescriptions of international law, will have a criminal jurisdiction over the top officials of the aggressor country. It is an interior criminal court or an international special tribunal.

The International Criminal Court was created by signing the Roman statute to ensure that military criminals are prosecuted, but it does not allow investigation in an inhabita regime - that is, retrieved -a -criminal proceedings. Therefore, Putin as an accused must be in the courtroom. The reason for the creation of the tribunal could be the resolution of the General Assembly, however, in view of its charter, neither in the General Assembly, nor such powers in the Secretary General. Therefore, it can question the authority of such a tribunal.

-Speaking of a more or less real option, at least as I see it with my colleagues discussed it at various conferences-it should be a "criminal ramsttin". In the end, there is a coalition of our disadvantages, so partners, so I think it would be quite reasonable to ask about the creation of a special International Criminal Court of AD HOC (*letters. For a specific case. - Ed.*) To consider exclusively military crimes committed by the Russian criminal leadership in our country of anti -Ukrainian citizens, Ukrainian cities and towns, Ukrainian nature, - says Alexei Kot. - The agreement on the creation of such a tribunal must be imposed on its powers, procedural aspects, the possibility of joining the signatures of other countries. We know that defeat is always an orphan, and there are always many parents. When we still get our dream trainery, there will be many countries in the hesitation, but later with the fair -to -face "pick up this deck" and join this tribunal. The possible way to join such an agreement should be provided in advance.

Finally, the director of the Research Institute of Lawmaking and Scientific and Legal Expertise of the National Academy of Sciences of Ukraine Alexei Kot noted that modern world, as well as after the Second World War, requires the creation of new safe instruments: "We hope, finding effective mechanism of international punishment for Ukraine's crime in Ukraine The answer to the question about the creation of an international special tribunal, a new Nuremberg for Putin's click, which will confirm one of the following criminal law principles is the inevitability of punishment. "

About it in an interview with a German edition [bild](#), Welt Ipolitico said the Minister of Foreign Affairs of Ukraine Dmytro Kuleba, reports Ukrinform.

“The first mistake is that leaders see our NATO membership as a way of a new war. In fact, it's the way to peace. When we become a member of NATO,

Russia will never dare to attack us, "the head of the Ukrainian Foreign Ministry said.

He also cited another argument in favor of Ukraine's accession to the Alliance, which will help that the Ukrainian army will assist on its eastern flancing states, who will want to strengthen their defense against the Russian threat.

"We will take over part of this burden. There will be not German Brigades, but Ukrainian, "the diplomat said.

He stressed that in Kiev they do not say that Ukraine becomes a member [NATO](#) immediately until the war is going on.

"But, of course, for Europe, after the war, it will be suicide not to accept Ukraine. The this is a way to close the door for Russian aggression against Europe with the Taiurotlantic region, "said the Foreign Minister of Ukraine.

As if Ukraine was adopted in NATO until 2014, there would be no illegal annexation, there would a large -scale invasion, the minister is convinced.Kuleba named the main difficulties with which the Ukrainian army faces in a walk: replaced territories(Therefore, "our fighters have to crawl 200-300 meters a day to release the corridor for the advancing troops"); Russian defense lines fortified and steel; The dominance of Russia is in the world.

A number of workers of Rosatomi, brought to the Zaporizhzhya NPP from Russia, went Zenergodar, as well as part of the collaborators - employees of the ZPP, who have concluded contracts of the Russians.

This was reported in a comment [Ukrainian radio](#) Mayor of Energodar Dmitroorlov, reports Ukrinform.

"Regarding the workers of the nuclear power station, there is information that the part of the co-laboratory assets who have concluded contracts with Rosatom and occupied the leading positions of the UFEi Company from "Rosatom", left the city ... also part of Rosatoma staff, imported from Russian atomic stations - few of them, up to 100fham - left the city at the end of the previous week, "Orlov said.

According to him, the explosives were brought to the invaders almost a year ago: the perimeter of the station, the entire coast of the Kakhovka reservoir was founded.

"And since the beginning of this year, the Russians began to be chaotic, perhaps preparing for the counter-offensive of the Armed Forces, the territory around the perimeter of the city, pole-by-law. And what they did with the Kakhovka hydroelectric power station, had a significant impact on the mood of those specialists who still remain in City energy. They understand that the enemy will be capable of any step, and the disposal of trucks with explosives indicates that the occupiers are preparing to produce any scenarios. In fact, the Russians use the nuclear station as an international influence for blackmail not only Ukraine but the world but the world ", -the mayor.

At the same time, according to him, Energodar does not provide shelter in the case of an explosion of the ZPP.

In any cases of nuclear and radiation in the station, which are foreseen in the regulations and instructions, the city of Energodar is categorical. The weather conditions that will be at that time. The shelter is only the stroke premises at the nuclear, heat station, factories, slammed, "Orlov stated.The mayor of Energodar said that in December last year, any evacuation of residents of the city through Vasylivka was occupied. For some time, they were able to evacuate through the territory of the temporarily occupied Crimea, but the NPP workers were not missed - the Russians had their lists.

"As far as the humanitarian component is concerned, the occupiers have blocked any opportunity from September(Shipment)humanitarian cargoes, including medicines, such as Insulin, which is important for the lives of some categories of citizens, " - said the official.

Read also: [Zelensky: Russians can make a terrorist attack on ZPE to stop the counter -offensive](#) According to him, the communication in the city is complicated. Since Energodar is located on the coast of the Kakhovka reservoir, Ukrainian mobile operators are able to "break through" to the upper floors of high -rise buildings. "In this way, residents are able to receive objective information by connecting pre-ternet sources, Ukrainian telegrams," Orlov said.

However, according to him, the invaders block Ukrainian TV channels and radio, and have taken control of all online resources. Therefore, propaganda has been working there for more than a year and for residents who do not have access to objective channels of information, it is not very difficult to fall under the influence of propaganda information resources. "

Orlov also noted that the Russian military now "not very active" moves in [Energodar](#). At the same time, increasing searches may indicate the preparation of the invaders of the good "goodwill gesture".

As reported by Ukrinform, on March 4, 2022, the Russians occupied the ZPP.

On June 22, 2023, President Volodymyr Zelensky declared plans for a terrorist attack at the Zaporizhzhia NPP.

The Secretary of the National Security and Defense Council Alexei Danilov stated that Ukraine is preparing for any scenarios for developments around Zaporizhzhya AAP.

Russia has completely stopped the registration of the new fleet from June 26, which testifies to the pro -the same to disrupt food supply to the world markets.

About it [reports](#) Ministry of Community Development, Territories and Infrastructure of Ukraine.

29 ships that have to export 1.4 million tons of food mainly for the 5 countries of Asia and Africa, including China, Egypt, Bangladesh, Turkey, blocked by Russia in Turkey's territorial waters.

In June, only 2 million tons were exported from Ukrainian ports. Another 1 million tons of food will either load or have already been partially loaded on 13 ships - the last registered in the initiative. If you do not restore the registration, the grain agreement will be completely stopped.

In 11 months, 45 countries received 32.5 million tons of food. An additional 25 million tons of tonnes did not receive the world due to sabotage. But even with these indicators, according to the UN, it was possible to reduce the world prices for food by 22%. This is a direct evidence that the grain agreement is needed by the world.

We support a statement of the Joint Coordination Center that all parties should be adequately accessed by vessels for food export, because it is a food danger to the entire world market. Only joint guns is able to stop Russia's food.

We urge partners under the agreement and all countries of the civilized world to defend the right to food. Ukraine, for its part, will also defend the right of a prominent trade navigation, which is recorded in international conventions.

The Zagreb took a two-day training for Ukrainian investigators and prosecutors. General Andrey Kostin thanked the Minister of Justice and the Prime Minister of Ukraine for this opportunity.

Knowledge and practices of the Croatian side are extremely relevant to us because of historical circumstances and, unfortunately, the specifics of the crimes that have been committed. We are trying to the ACA group for making this study trip possible.

Croatia has considerable experience in the field of investigation and judicial prosecution. Therefore, this training is, first and foremost, a practical workshop. The focus is practical issues: collecting and preserving evidence, specializing units, investigating the crimes of sexual violence related to conflict, prosecuting command, examination, electronic documentation, as well as the experience Andriy Kostin.

Participants - 30 representatives of Ukrainian criminal justice institutions: investigators of the SBU and National Police and prosecutors specializing in military races; Prosecutors of the juvenile direction, the ecological prosecutor's office, the coordination center of support of victims and witnesses.

Last December, the Prosecutor General's Office has already participated in a similar educational visit dedicated to a model of support of victims and witnesses focused on the needs of the victims. This knowledge helped in the development of the Concept of the Victims and Witness Supporting Center, which has already started their work.

Prosecutors visited the city of Vukovar, which became a symbol of Croatia's struggle in the 1990s. At one time, this city was so self-focus on the attention of the world community as now Ukrainian Bucha, Irpin Chimariupol. The experience and methods of investigation of horrific war crimes committed in Croatia are invaluable for the search and punishment of the perpetrators, which has been solved by the Russian Federation in Ukraine.

About the middle of last year, there is a trend of growth of attack attacks on the supply chain(supply chain attacks). Йдеться, зокрема, про IT-компанії, що розробляють рішення для критичної інфраструктури.

Про це [повідомляє](#) State Service for Special Communication and Information Protection of Ukraine.

For IT companies and specialized software developers, such attacks are the first reputational threat and risks of losing customers in the future, while for critical infrastructure, the effects of such attacks can be more serious.

Often, specialized software developers and technological companies mistakenly consider it sufficiently protected and capable of resisting threats on their own - it is impossible in the modern world every time, after we see the breakdowns of such companies as Uber, Fireeye and others. Such underestimation of risks can lead to the pre -compromisation of the entire supply chain and unprecedented impact on all clients.

Cyber resistance of critical infrastructure depends on whether the objects of critical infrastructure detect and lock trycomprotation and whether the code and infrastructure audit are performed. Unfortunately, many do not realize this. Therefore, it is important that the relevant requirements for cyber defense companies-suppliers of critical infrastructure are enshrined in the name.

We are all confident in Ukraine of a silly people and in your strength, in your professionalism, in your ability, Inadali to demonstrate Ukrainian power. Many in Russia thought that the blackness was a water area of their strength. The enemy hoped that our navals were allegedly not standing the strikes of Russia. Well, the courage and skill of our military destroyed all these hostile hopes and drowned them in the sea," the President said.

The head of state emphasized that the Ukrainian defense in this war with the Russian aggressor consists of various large and small episodes, which are generally giving the state and the opportunity to move forward both on land and at sea.

"Our naval forces, together with other elements of defense and security forces, have defended our Black Sea coast from Russian landing operations. You defended Odessa, which the Russian invaders dreamed of conquering. Our rockets were flooded by the Russian flagship, and it was only humiliating for the Kremlin that they are still afraid to publish all this loss. The powerful involvement of the naval forces in a joint operation from our intelligence and defenders made it possible to release Ostrovminius from the occupiers, and this returned the safety of a large part of the Ukrainian waters, "Volodymyr Zelenskyy said.

According to him, these and other powerful operations of defense forces have taught the Russian Flot not to approach the Ukrainian shores.

"And if the Russian warships remain in the Black Sea ... If they collapse, they will be afraid to approach our Ukrainian Crimea, the ido of our coast of the Azov Sea. This will definitely be. I know it. I see the eyes of our military sailors, our Marines, commanders of our naval forces, in the skillful work of our artillerymen, marine aviators, who work for the sake of our naval drones, "the Glavs stressed.

Volodymyr Zelensky especially noted the Marines of the famous 35th and 36th-grade brigades of the Marines. The head of state addressed the cadets of the Institute of Navy.

The President noted that Ukraine is one of those states that can fight and redeem, including at sea. In his opinion, this will be of global importance, because few states in the world are capable of this.

"The fate of Ukraine is undoubtedly strong. Be a free part of the free world. I am convinced that Ukraine will protect itself in this war and return everything that is temporarily controlled by the invaders. And after the war, Ukraine will win others in the world, including at sea, will teach protection. Ukraine will become a donor of global security and global power, and Yavir that your knowledge, your strength, your future victories will bring this powerful time for our beautiful state, for our people, "Vladimir Zelensky said, addressing the cadets.
