LONDON — A Russian fighter jet fired a missile at a manned British surveillance aircraft flying over the Black Sea in September but the munition malfunctioned, according to U.S. defense officials and a recently leaked classified U.S. intelligence report. The incident was far more serious than originally portrayed and could have amounted to an act of war.

By the end of April, Spain will put 6 main LEOPARD combat tanks in Ukraine,

which have been restored from the country's government as part of the relevant obligations.

This was reported by the Minister of Defense of Spain Margarita Robles at a joint press conference with the Minister of Defense of Ukraine Alexei Reznikov on Tuesday, April 12, in Madrid.

"There will be 6 Leopards from Spain soon, which have been restored, and we will also have 20 APCs with them. We expect that by the end of the month they have to reach Ukraine, "said Margarita Robles, adding that 4 Leopard is currently being restored, which is also planned to be sent to Ukraine later.

Margarita Robles also reported that the results of today's meeting were the continuation of the preparation of Ukrainian military servicemen in Spain, noting that today Spangastor has already conducted appropriate training of 1,000 Ukrainian soldiers.

She added that in the framework of a meeting with a Ukrainian colleague, the parties also considered other important ways of further cooperation.

For his part, the Minister of Defense of Ukraine Alexei Reznikov thanked the Tanarod government of Spain for the defense and humanitarian aid provided to Ukraine, emphasizing that Spain was one of the initiators of the creation of "tank coalition", through which Ukraine receives modern combat vehicles.

-It is a special priority for me to preserve the life of our warriors on the battlefield, and so I am very grateful that we receive combat vehicles from Spain-tankers, M-113, and I hope we will get even more. Spain joined the "tank coalition", which was created in the fields of the Ramstein Club, so at the end of the month, I hope that in Ukraine will be heard as Leopard growl with a Spanish accent, - said Alexei Reznikov.

I wish health, dear Ukrainians!

He has just participated in the meeting of a special format of support of Ukraine - financial. This event takes place in Washington and unites ministers of financial democracies - our partners, the European Commission, Heads of International Financial Institutions: the IMF, the World Bank, the European Bank for Reconstruction and Development. The theme is first and foremost recovery. Restoration of our country after the battlefields.

I thanked my partners for helping us to maintain sustainability, our financial stability. And he urged to be more active so that Ukrainians could be more active in rebuilding, returning to Ukrainians a normal life.

There will be no ruins in Ukraine. This is our goal. And it will be quite a specific dioxide of the full loss of the terrorist state.

Moreover, the world knows the decisions - about the assets of Russia, Russian officials, oligarchs, who were rich, while their state became a terrorist ... All these are activated to compensate for losses to those to whom Russia brought pain and suffering. . The war should be the most expensive for the aggressor. And we do everything for that. Thank the partners who support us.

He met today in Kiev with a delegation of the US Senate - a two -party delegation. I informed what is happening on the battlefield now and about our opportunities. As well as we always, we have demonstrated that our relations with America in the supply of weapons, in financial support are completely clean, completely transparent. The partners have a full vision of each unit and every unit of weapons. And it is important that no artificial manipulations are spoiled by our trust.

Of course, I was pleased to hear from our guests from the United States positive words about Ukraine and what we manage to achieve together the fate of terror.

It was very emotionally and honorable to me today to congratulate our young police and rescuers of the SES with completion of study. More than 3 thousand youth - professional and patriotic - are now joining those who want to protect the safety and normality of life. They will also work in the Quaregions, where it is most dangerous. The distribution will be served in frontlines, in the border - in Kharkiv, Sumy region. There are those who will fight the new assault teams. I believe that today's graduates of the Ministry of Internal Affairs are justifying human hopes.

By the way, I would like to celebrate such defenders now - such rescuers, in particular from Nikopol. SES of Major Artem Shuldyakova, Lieutenant Fyodor Zaykina, Senior Sergeant Vasyl Muzychenko, Junior Satisfant Vitaliy Bulkin. Thank you guys for the rescue of the Ukrainians of post -Russian rocket strokes!

I will also note the police crews - "White Angels" who save our people in the home, evacuate, send humanitarian aid, resuscitated ...

I thank the police Gennady Yudin from Avdiivka for the salvation of children, Paramedic Popi, one of the White Angels in the Mariinsky Front. They have already rescued hundreds of our people, including seriously wounded.

I also thank today especially the explosion of the National Police Vladimir Perepelytsya, who works for mine in Kherson region, works very effectively.

And one more.

Today in our country traditionally celebrates the Day of employees of the rocket and space industry. The industry that always made glory to Ukraine. And I'm sure he will do!

Thank you all who have retained our potential. Our current level of integration is international relations, our level of power - both the state and society - for

which Ukraine deserves, the level of our people - all this will allow Ukraine to take in the development of outer space along with the advanced states, and our business - along with advanced companies.

But first - we will win! In particular, thanks to Ukrainian rockets.

Glory to all our soldiers who are in battle now!

Thank you all who help Ukraine!

Thank you to everyone who protects our people and protects Ukrainian life!

Glory to Ukraine!

President of Ukraine Volodymyr Zelensky spoke at the third meeting of the round table [World Bank](#) on Ukraine's support.

_Text of the speech: _

_ President Malass, thank you for your support. Ms. Director-Managor Crystalina, Mr. Vice president Dombrovskis .

_ ladies and gentlemen ministers, secretaries, heads of international financial institutions... _

Thank you all for this meeting, for your work in this format.

Now Ukraine is experiencing special emotions. Yesterday, Russian sources were widespread on the Internet video of the animal murder of our soldier by the occupiers.

They, in the video, boast about their ability to kill. Apparently, you have all seen what is being said. And you know that this level of violence, this level of destruction, the Russian army tries to make a routine everywhere on Ukrainian lands.

You cannot get used to it. Every time shock as they first do something.

The death of Russia should not become a routine! The long history of Russian freeness should finally stop.

I thank everyone in the world, thank everyone and every one of you who helps Ukrainian to play! But every day ... Every day we lose our people - men and women, adults and children who die from Russian hands ...

I ask you now to pay a moment of silence to the memory of this Ukrainian, whose death saw yesterday, and the memory of all our people whose lives were worn by Russian invasion.

Thank you. This is very important for all of us.

Dear present!

Ukraine will win this war. Only the question of the time when Russian aggression is illuminated.

But the state-zla should not remain a chance to defeat the ruins.

What is the purpose of the terrorist always? To break life. If you do not kill, then cripple. If it is destroyed, then make it suffer.

Any aggressor that hates life-whether it acts at the state level, Yakovia, whether at the level of terrorist group, or at the level of one degraded personality ... The aggressor always enjoys when it destroys. And when the

ruins of after aggression have to overcome for decades. Supporting rapid recovery is literally part of the anti -terrorist work. Cleaning what has been destroyed, we win the main target - we return a normal life.

The second point is assets of the state.

For the first time in history, the world has such a large -scale opportunity to harvest losses from an uncontrollable and illegal war on the aggressor - to be guilty of war.

For example, the World Bank has given a new estimate of the losses and needs of Ukraine with a volume of \$ 411 million. Every day Russia increases this account. The world has Russian jacobes of different species that cover this level of losses!

Potential aggressors in the world are now looking at whether you are doing the right one. Conflicting Russian assets, as well as assets of persons related to the governing building of the state, real. Confiscate and direct that the life of in Ukraine could recover. Russia should feel the full price of its aggression.

Ladies and Gentlemen!

Ukraine appeals to you with two calls. The first: priority needs.

I thank you for the new IMF cooperation program, which is a significant stabilization process for Ukraine. This will help us to fight. But in order for people to turn to Ukraine so that the aggressor will lose not only on the battlefield, but literally, we need the approval of the support program to cover the first -time prospects of rapid recovery. The total volume of such projects is \$ 14.1 billion. Our government officials, who are now in Washington, are presenting.

And second. It is already necessary to work on specific mechanisms of directing the frozen Russian assets to compensate for the losses caused by Russia. Treachitko declare that assets, including the assets of the Russian Central Bank, will be confiscated. It will be the peacekeeping act - an inflammatory scale. Potential aggressors should see it. And remember that the world can be strong.

There may be different formats of decisions, but the faster and more effective decisions will be, the more to the more will be peace after this war.

Ladies and Gentlemen!

There are no minor fronts in the war. Everyone needs attention and strength. Financial front - especially. We do our part of the work and I am grateful to everyone who helps. But fundamental solutions depend on you.

I believe they will be approved!

Thank you for your attention! Glory to all who are now in battle for life and freedom for our people!

Glory to Ukraine!

The enemy exports documentation from pension funds on temporarily occupied territories(THAT).

Про це [повідомляє](#) The Center for National Resistance to Special Forces.

"In particular, from Donetsk to the Russian Federation, pension affairs are taken from all major populated points that are temporarily captured by the enemy. At the same time, Moscow set the task to take all the cases by August.

At the same time, this is presented, as if because of the technical inability to process the information on the Tot, as well as to "facilitate the evacuation of" retirement age ", - the message reads.

The National Resistance Center reminds that since March 1, the payment of pensions for Tott is available in the presence of an enemy passport. At the same time, the certification in the region is slow, and a large number of population ignores the receipt of the passport.

ПРО ЩО СВІДЧАТЬ НОВІ ПРАВИЛА ПРИЗОВУ ТА ВРУЧЕННЯ ПОВІСТОК У РФ?

Under the cover of the conscription in the Russian Federation is gaining momentum. In addition, unlike the first part of partial mobilization, even Moscow and St. Petersburg joined the necessary indicators, in addition to depressive regions of the Russian Federation.

On March 30, Putin signed a decree on the six -year spring conscription military service from April 1 to July 15, during which 147,000 Russians between the ages of 18 and 27 will be drafted. Russia conducts two cylm a year, during the spring call is usually called 134 thousand Russians. At the same time, according to British intelligence, the Russian authorities are preparing to develop a large campaign for a set of additional 400 thousand servicemen.

And in order for the Russians to be left with a chance to avoid conscription, the State Duma would accept a series of laws on the creation of a Unified Register of Military Treatment of Electronic Tales on April 11.

The adopted package of laws is as rigid as possible and actually introduces the preinterpretation of guilt. It equates electronic reports to paper and a closing visit abroad to citizens who will fall into the register. The introduced electronic statement will be considered as prescribed from the moment of placement in the personal office of the state service "State Services"(The only platform of public and municipal services of the Russian Federation). Тобто чоловік може не знати, що йому виписана повістка, але через 7 днів післяїї формування він автоматично стає злочинцем. Нові правила торкнуться якстроковиків, так і всіх військовозобов'язаних, а за їх ігнорування ухилянта загрожує низка покарань. Серед обмежень: заборона на реєстрацію індивідуального підприємця, на державну реєстрацію транспортних засобів, водіння, відмова в укладенні кредитного договору та договору позики.

Звичні схеми ухилення за такого механізму неможливі, як неможливо і легальнозмінити військову службу на альтернативну, тобто росіян поставили у безвихід, якої не було з часів радянського союзу.

Характерно, що влада продовжує наполягати, що нововведення не пов'язані змобілізацією, а лише поліпшують процедуру вручення повісток і військового обліку, а проведення мобілізації зараз в країні нібито не планується.

До чого може привести новий призов і чи посилить він військовий потенціал зсрф?

Secondly, Putin is unlikely to decide to use the recently called troops in Ukraine. In addition, the chairman of the State Duma Committee of Rfartpolov emphasized that during the spring conscript cycle of 2023, the prisoners will not go to Ukraine. Against the backdrop of social tension of tamas protest shares due to the departure to the front of recruits, the winter and spring prison of 2022, it is doubtful that Putin will risk repeating a mistake due to the stability of his regime.

Third, the use of innovations will predict a sharp burst and provokes a new wave of emigration and other methods of boycotters. The Levada survey shows an increase in the "request for peace" in Russian society. If in the first months for the "war before victory" and for "peaceful interpretations" was expressed an equal number of citizens(approximately 44%), then after the

first wave of mobilization - already 60% for peace, and only a third - for the continuation. In the Russian segment of the Steam Game Platform, even the viral distribution of the computer game "Simulator Escape from the military enlistment office", the character of which the youth Russian is doing everything to avoid the call.

Therefore, conducting hidden mobilization under the guise of "Putin's call" of Taurus of digital authoritarian tools will not help the Kremlin achieve goals in Ukraine and consolidate power within Russia.

The head of the UGCC Svyatoslav commented on the events around the Kiev-Pechersk Lavra, stating that it was painful to look at the shameful behavior of representatives of the UOC-MP, it is that the state did not order its relations as the owner of the National Historical Reserve with tenants for 30 years.

As Ukrinform reports with reference to The head of the UGCC announced his position in an interview with Maria Radio.

"It is very painful for us to watch everything around the Lavra. There are several reasons for this. First, it is very painful to look at the shameful behavior of the Ukrainian Orthodox Church, which sometimes resembles the behavior of the oligarchs. And this is a certain challenge for public morality," the head said.

"I do not want to condemn anyone, but it beats everyone, causes the moral loss of the church as such," said His Beatitude Sviatoslav.

It is also unfortunate that the Ukrainian state has disordered its relations as the owner of this national historical reserve with tenants for over 30 years.

We will be very careful about the actions, because today they are not fully understood, in particular the international community," the UGCC head said. The head of the UGCC also told about other pain on this. "Today, we can ever hear that there is a danger with water to splash the baby. Such a title of Lavra forms a very radical attitude towards church spiritual life in general ... We have heard a statement by Metropolitan Epiphany with a negative evaluation The scandalous behavior of the clergy, trying to eliminate the public discourse, discredit any church religious life," he said.

Read also: Blessed Svyatoslav noted that the scandal in the laurel is a challenge for the whole religious environment: both Protestants, Greek Catholics, and for Roman Catholics, and Orthodox. "People lose moral spiritual guidelines when some church becomes dangerous in terms of state security ... Here the state is punished by collaborators and traitors. But we understand that if any church loses trust, it can cause powerful wavesecularization. That is why it hurts me," the UGCC head said.

"Still, I believe in the wisdom of the Ukrainian people. I believe that we are a Christian, believing people, and that our spiritual criteria of evaluations of dramatic situations will help to find the right solution to even those problems

that have not been solved for a while and have intensified now, during the war, "Svyatoslav summed up.

The heads of administrations and public services jointly worked out the priority projects developed within the framework of the All -Ukrainian Mental Health Program "Are You How?"

This is stated in the release, which the organizers of the program have been transmitted by Ukrinform.

"Ministries are currently developing their own programs in the field of psychological assistance. But in order for each direction to work best, you need to coordinate efforts ... Mental reintegration of each of us today does not start from a simple and sincere: "How are you?". I hope that in the near future this question will be answered by Ukrainians calmly and confidently: "All is well!", - Vice Minister on reintegration of the temporarily occupied territories Irina Vereshchuk.

According to the report, a two-day strategic session "Coordination. Ability. Strength" provided for acquaintance, professional examination and testing of priority projects of individual ministries and departments. These initiatives lead to a more coordinated mechanism, which will imagine how to look like a state-owned psychosocial support service, and make it sensible for citizens who need such a service.

"When we will clearly understand how and where a person gets, who finances it, what quality of services, who provides them and what protocols ... If we think about all things as if small, mechanical, technical things, only then will we have a quality service" , - said the deputy head of the office of President Yulia Sokolovskaya.

Read also: During the workshop, the participants focused on how to deprive Ukrainian-negative stigmas about mental health and develop the habit of taking care of their permanent state no less than the physical one. The purpose of the program is to teach Ukrainians to take care of mental well-being and to "be in time", as well as to create an effective state system of psychosocial support and support for citizens who need professional assistance.

The Minister of Defense of Ukraine Oleksiy Reznikov stated this during the opening of the first Black Sea Security Conference as part of the work of the International Crimea Platform.

After Russia's invasion of Ukraine, it has become apparent to European countries as weapons are used as weapons, energy is used as weapons, - the Reznikov emphasis.

The Minister of Defense also noted that exactly a year ago the Ukrainian Navy destroyed the Russian military cruiser "Moscow", and this became a very important known place for diving in the Black Sea.

It was also said that due to the violation of international humanitarian law and their commission of war crimes, it was necessary to unite in the creation of peace in the Black Sea region.

This is in the interests of each country in the region. We cannot rely on the practice we have used - it did not produce. Ukraine is open, because the unity of efforts of the free world we will ensure the luminaries of law, not the rule of power. And we will make the Black Sea of space, - Alexei Reznikov summarized in his introductory speech.

ARMIA INFORM

The experience and courage of our defenders, as well as their ability to use the arms provided by partner countries, have led to a reduction in the military potential of the Russian Federation. For its part, it will force the aggressor to

revise the strategic goals of the wars, in particular the gradual seizure of the entire Left Bank of Ukraine this year.

About it during [briefing](#) VMILITARY MEDIA CENTER was informed by the Deputy Chief of the Main Operational Administration of the General Staff of the Armed Forces of Ukraine Bryadna General Oleksigromov.

He also predicted that in the spring and summer of this year the enemy to build quantitative and qualitative indicators of units and military units that wage war in Ukraine. Also aggressor will form strategic reserves and transfer them to Ukrainian borders.

- most likely, the Kremlin will continue to carry out hidden mobilization of sales, and to prevent protests, especially in the densely populated regions of Russia, Putin's regime avoids mass mobilization from the central regions: Moscow and St. Petersburg and gives priority to the most depressed. In order to increase the number of contracts of contract service, the enemy was announced by more than 400 thousand people, and for conscript service - 147 thousand. But despite the deterioration of the social-demographic and economic situation in Russia, conducting an agitation campaign on federal channels, the population is already aware of the chances of increasing the chances of returning home in the package and does not want to make controversial with the advertised so-called second army of the world, - -

Ukraine should take advantage of the opportunities of international courts, because for the first time Russia is not the first time the Ukrainian nation is destroyed. It is also important that the Russian Federation is international criminal liability for the omnipotence that it commits in our territory.

About it during [briefing](#) The Deputy Minister of Defense of Ukraine Anna Malyar said VMILITARY Media Center.

The charter provides for four crimes that are subject to the jurisdiction of the international court: war crimes, crimes against humanity, aggression and genocide.

"But the first and key crime is aggression. All other crimes are derivatives of depression. And the world must, on the example of the Russo-Ukrainian War, realize that all the instruments that were created before this to counteract such wars are not working, "said Anna Malyar.

She recalled that since the Nuremberg process in the world, no sentence for aggression, where wars are constantly being constantly, have been announced.

"Therefore, the Russian-Ukrainian war should become the point from which the political will to punish aggressors in the world for such difficult, internationalist, in particular for genocide, war crimes and crimes against humanity. And it is a one tool for all other aggressors that may have the same ambitions as Putin. If he and Russia are not punished, then it will solve it to all others, "the Deputy Minister of Defense of Ukraine emphasized.

The "import substitution" of the Russian Security Service of Ukraine now remains even at the level of individual parts of spare parts, but at the level of propaganda imagination of the Kremlin. This is especially true in the production and modernization of unmanned aerial vehicles. During a briefing

About it during briefing в Military MediaCenter reported a representative of the Central Investigations of Trophy and Prospective Weapons and Military

Technical Headquarters of the Armed Forces of Ukraine Andriy Rudyk.

The present during the event showed a photo of a super -labeled Mado company - the first similar case.

-In addition to the "new" relay, the servicemen of the center found in the UAV Shahd 136 so-called GSM transverse. The main feature of this device is to accept and transmit information by the 3G, 4G GSM-standard channels. As it turned out, there is nothing Russian in it - no chip or chip. Even there are no Russian markings. There is also no traditional "brand" equipment for such equipment. Hence the conclusion that such a device was prepared and installed quickly. Although the marking of the central microprocessor is completely destroyed, and therefore not established origin. However, we can state that it is not Russian production, - says Andrei Rudyk.

-You can see some foreign components in Zala 421-16e. This processor, RAM, Internet Commercial and Audio Codek of Field Controller, Global Navigation Satellite Satellite Receiver, Air Value Sensor, Barometric High meter of Inertial Navigation System, etc. It is worth noting that each of these components is not new. It is possible that they were used somewhere, before getting into this drone. The words of the speaker, found in both modifications, are evidenced by the prodigious facts. First of all, the Russian MIC is in principle not capable of providing a full cycle of production of own and maintenance of UAVs. Not only the basic components, but even the latest "modifications" are of foreign origin. It is obvious that the Russian MIC in the production of basically dependent on foreign components.

About it in an interview with the Armyinform told Head of the Department of Religious Studies of the GS Skovorodyan of Ukraine, Doctor of Philosophy, Professor Alexander Sagan.

“Large -scale invasion and missiles that fall into our cities and villages, the preaching of the Moscow Patriarch Kirill, in which he not only supported but also urges to destroy Ukrainians.(For that he even promises "release of sins" and get into paradise), significantly changed the attitude of many Ukrainian believers to the Moscow Patriarchate. Sociologists claim that UOC -MP support has decreased with 15%(to a large -scale invasion)Do4%(As of April 2022), - he said.

According to him, at the same time in Ukraine significantly increased supporters of the idea of connection of the UOC -MP with the Moscow Patriarchate. Thus, in March 2022 it was supported by 63% of respondents, and in April this year-already 74%(Sociological Research of the Rating Group).

«Керівництво УПЦ МП намагається компенсувати таке катастрофічне падіння рейтингу церкви своєю агресивною поведінкою та звинуваченням держави Україна в нібито „рейдерських захопленнях“ храмів. Ukraine pays a huge price for containment of Russia's imperial ambitions and can therefore count on a new Marshall Plan, which will rebuild and transform

our economics. Prime Minister Denis Schmigal said this during a speech of the US and Ukraine partnerships, organized by the US trading plate in conjunction with the US Administration.

"We are determined not only to come out of this war with the winners, but also to be integrated into the global chains of added value and to create possibility for Ukrainian and foreign companies to flourish from keeping business in Ukraine and Ukraine. We will rebuild better. By principle Back Better. Private foreign investments, especially from the United States, will lay the basis for such a transformation, "Denis Shmigal said.

The Prime Minister noted the prospect of investment in such industry, defense-industrial complex, agrarian sector, IT, production of critical raw materials, construction of new infrastructure and new housing.

"Ukraine offers four main sources of financing for the restoration plan: confiscated Russian funds in Ukraine and the world, funds of international partners, including international financial organizations, directly funds of the state budget of Ukraine, as well as donors and private sector. It is very important for the confiscated Russian sovereign funds to become a basic resource for rebuilding, "Denis Shmigal emphasized.

The head of government reminded of the proposals of Ukraine to create a special compensatory mechanism and to approve the relevant national legislation, which will allow to confine the frozen private and sovereign Russian assets. Denissigal also expressed his hope for US leadership in this matter.

The fact that the ship has drowned still does not recognize either the leadership or the propagandist Russian-bearing, calling the cause of the "malfunction" of the ship - a fire. Instead, foreign experts have been surprised and studied for a year how the Ukrainian military has been able to send Moscow to the bottom.

It was a cloudy and rainy day, the cruiser was 120 kilometers from Odessa, when he appeared on the radar of the operator PKR R-360 "Neptune". On April 13, 2022, at 14: 06, the start of the first of the two rockets "P-360" "Neptune" was started. Subsequently, the second one flew. They hit the left side into the area of the running bridge, the cabinet company and the machine compartment. During the day, on April 14, the flagship of the Russian Army wasized.

- This was a sufficiently secreted element of the missile weapon of Ukraine, but today we have the opportunity to show it. It is a symbol of the fact that in Ukraine Emps, which will allow us to win, and which we already win. This artifactnam was submitted by the Armed Forces of the Armed Forces.Another exhibit of the museum was the rescue circle from the board of the cruiser "Moscow". Six months ago, the border guards found him on board one of the

fishing vessels. Almost thanks to him, one of the staff of Stracer was escaped. According to the data of Sergey Voronov, there were about 500 military servicemen of the Russian Federation.

The inseparable part of the exhibition is the 3D show "Otricateliva". The excerpt of the exhibits and journalists was shown to visitors. In May he will be able to see Ukrainians. The show will last half an hour, during which time the viewer will observe the cruiser of Moscow from the moment when the ship sailed the pre -Officer Snake, and even to flooding.

With the help of 3D graphics, they also reproduced what the cruiser looks like, flooded at the bottom of the Black Sea. The participants of the NGO "Done" did this, says the head of the Supervisory Board of NGO Yevgeny Mironyuk:

[!\(Images/APMIRINFORM/2023-04-13T95-00-00-04-00/foto_10-1-150x150.jpg\)](#) - This cruiser is an element and flag of Russian propaganda. As they lied to the prose, the very cause of flooding is an element of lies. In the example of history, we want to show how Moscow lies, how it does. We have facts and evidence. We say today that Muscovy cannot be trusted.

In May, shows will be shown to Ukrainians. After that, the residents of Belgium, Germany, Britain and America are only previous arrangements.

The sinking cruiser is visible now. It is located at a depth of about 50 meters of sea, a huge spot of petroleum products. After the victory, the cruiser will leave the days. But artifacts from it will also become exhibits of the National Museum of Ukraine of Ukraine,-says its head Sergey Voronov. —When will reveal the name of the person who pressed the Neptune missiles.
