Sekretarz Rady Bezpieczeństwa Narodowego and Obry Ukrainian Oleksij DaniłowPodczas Wywiadu W Kijowie, UKRAINA, 22 MarCA 2023

The Russian Federation is an indisputable leader in the number of conflicts in the world, and it is not possible as long as exists in the current limits. This was emphasized by the Secretaries of National Security and Defense of Ukraine Alexey Danilov in an interview for the Facts of the Week on ICTV on Monday, May 15, 2023.

"Chechnya is occupied by the Russian Federation today. In 2008, Putin committed an act of aggression on a non -volatile Georgia. In the summer of 2014, the Russian Military SPRK BUK destroyed aircraft. In 2014, the Russians invaded our country ... " - reminded Vavdanilov.

Unfortunately, the NSDC secretary noted, the civilized world then "worried, worried, but did not make any decisions regarding the aggressor country."

To date, he emphasized, "there is no decision on the future of Russia after war" because it "is a hostage of illusions about Russia's power through nuclear potential."

"If someone believes that Russia should stay in the same form in which it is a Blado of War, after our victory, then the question of activation of Russian swinging, imperialism," said Alexei Danilov, adding that then RFProtrotag will succeed in aggression about aggression another country. "They will calm down if they exist within the limits in which they exist," he saved.

The aggressor state of Russia forcibly exports civilian population from the occupied territories of Kherson and Zaporizhzhya regions, including the staff of the captured AAP in Enerгодар.

"It is about people who either deliberately worked on the aggressor or were forced to do. They are told that hostilities will soon begin, that this territory will be fired and bombed, so they will convince and work with the Russians," said Andrey Chernyak, a representative of the RBC-Ukraine.

According to a representative of the military intelligence of Ukraine, the so-called evacuation of the packed territories of southern Ukraine, Russians use as a screen to carry counterintelligence and filtration measures: "They, first, are bad that the population can observe their preparation for battles—that is, certain counterintelligence measures. It is also filtration, because, first of all, there is a forced export of the pro-Ukrainian population. And thirdly, the Russians are afraid of holding in these territories of some guerrilla movement and internal resistance," Andrey Chernyak said.

At the same time a representative of the GUR of the Ministry of Defense of Ukraine reported that the removal of Russian combat units from Zaporizhzhya, or from the Kherson regions, is not being recorded. In the occupied territories of these two regions, there are now approximately 152 thousand personnel of enemy troops, and all their actions indicate that they are preparing a pre-defense.

For the effective application of the rules of international humanitarian right - wing, the translation of 29 existing international houses in Ukraine organized the rules of international humanitarian right. About this [reported](#) On the Ministry of Reintegration.

Among them, including:

- protocols to Geneva Conventions concerning the protection of victims of international and international armed conflict; —
- Convention on the prevention of and punishment for a crime of genocide;
-
- Protocol on the protection of cultural values in case of armed conflict; —
- the Convention on the Prohibition or Restriction of the Use of Certain Types of Common Medical Officials that may be considered to be excessive damage or have a non-selective effect; —
- UN Statute and the Statute of the International Court of Justice of the United Nations; —
- Convention on improving the fate of the wounded and patients in active armies; —
- Geneva Convention on the Treatment of Prisoners of Pursuing; —
- Convention on the protection of civilian population during the war; —
- protocol on the ban on the use of suffocating, poisonous or other gases, and also by bacteriological methods of warfare; —
- *Protocol on the ban or restriction of the use of mines, min-traps and other devices.*

This was necessary because the majority of these documents in Ukraine did not have a translation in Ukraine, or had an outdated, still Soviet version. This did not allow the right to apply these norms by Ukrainian lawyers, military and authorities.

The translation was carried out by LLC "Pro-Consulting", with which the Ministry of reintegration has relevant a memorandum.

Documents, which are more than 200 pages of texts, have already been sent to the Foreign Ministry for the official approval.

At the coordination headquarters, an online meeting was held from the family services of a separate mechanized brigade named after King Daniel, during a time, the representative of the staff noted that Ukraine should minimize the risky exchange of "all of all".

About it [reports](#) Coordination headquarters of inquiries for the treatment of prisoners of war.

First of all, the risks relate to the accounting of missing persons. To do this, the staffs are necessary to confirm the captivity of those who are not available, in particular with the participation of the International Committee of the Red Cross. As well as the exchange of the defenders convicted by Russia. Ukraine managed to return the goal, who has already received a "sentence" and those who are under investigation. However, sometimes processes are a obstacle for exchange.

"It happens that a person is not confirmed to the exchange, because they seem to be under investigation. But the Russian side refuses to comment on details of cases," - said the representative of the staff.

According to him, the list of wounded is extremely large. Following the Non - Budsmans in Turkey, a list of 780 people was handed over to the Russians. Then it was about the seriously wounded.

"A great job is done with the wounded. During the possible exchange of "all on all" they should be returned first. We offered the repatriation of the wounded. Now the word behind the Russian side. We have already given "heavy" without any conditions. But we cannot take the next steps without being sure that Russia will answer the same. Arrangements are required. Every second exchange is tolerated. Not comprehension is completed by exchanges, "the headquarters representative explained.

Also, during the meeting, they discussed the issues of payments to the families of prisoners and missing.

In Ukrinform presented the book "Ukraine: Journalists on the front line". The editions are administered to the masters of the words that were defense of

our country both on the information front and on the battlefield. The peculiarity of the book is that the journalists act in it in two hypostases - as authors and as heroes of stories.

The book contains more than 60 essays, combined in six sections, the first of which - "on the leading land" tells of military journalists who serve the Armed Forces of Ukraine. Among them-an essay about our colleague Vladislavoloshin, who saw with his own eyes and described more than ten wars, and when this war began in 2014, he participated in the creation of the ATO press center, he frequently on business trips on the forefront, and now continues to document the Opirals.

The same cover contains materials of different genres: reports, interviews, essays, reviews, as well as photographs and documents. These are the living evidence of eyewitnesses of the content of events and the impression of direct participants in hostilities, experienced work and information resistance.

The book also feeds on other editions that describe the course of large-scale interaction and poems of poet journalists, written after February 24, 2022.

The publication became a kind of continuation of the book that was published in the early 2022 - "Journalists in the War", the compiled by the head of the Kiev organization Mikhail Soroka. There are stories about the events of the Russian-Ukrainian war since 2014. Mikhail Mikhailovich, who was the presenter of the presentation of the book "Ukraine: Journalists on the Advanced", announced the beginning of work on the Thirdtoom, which, convinced, will describe our victory.

The head of the National Union of Journalists of Ukraine Serhiy Tomilenko said in his own, 59 Ukrainian journalists were killed in the war, including 14 - during his professional duties. One of the books of the book is "Memory". In it, the essays of the died of colleagues and friends-Mikola Kravchenko, Alexander Kuzenkov, Alexei Chubashev, Maxim Levin, Irina Tzvil, Pavel Lee, Dmitry Shipovsky. As well as the material of our colleague Olgimossonz about Dmitry Labutkin's TV studio officer. The attendees were honored with a moment of silence ...

Military journalist Colonel Sergey Kuzmin and Head of the Department of Military Comrade of the Window Colonel Alexei Poznyakov shared the experience of cooperation between public and civilian journalists during the Russian-Ukrainian war.

Editor of the Ivanka District Newspaper "Tribune of Labor" in Kyiv region Pavlo Smovzh, ex-editor of the newspaper "Donetskchina" Igor Zots, Professor of the Department of Social Communications of the Educational and Scientific Institute of Journalism that entered the book.

Of course, the presented publication does not claim exhaustiveness - too wide the Jauralist palette of belligerent Ukraine. However, this book contains great masses of specific facts that will be useful for future researchers of the Russian-Ukrainian war and perhaps to those who will determine the punishment of military ransoms on the tribunal. Therefore, the time of its preparation is recorded under each publication. The task of all Ukrainian journalists today is to fix the rates of the aggressor country, victory over misinformation and fakes of hostile propagandists. After all, journalists, like no other, know that the war is waged more than the territory, but also for human souls. And the victory certainly awaits us on these fronts!
