The expansion of the grain agreement on the ports of Nikolaev depends primarily on the possibilities of Ukraine's siloborophe to guarantee safety in the south, not from the UN or other mediators.

This was stated by the Ambassador of Ukraine to Turkey Vasyl Bodnar at a briefing on the topic: "Grain Agreement": How does the mechanism work now? " In the Media Center Ukraine -Ukrinform.

The diplomat recalled that the conclusion of the grain agreement on July 22, 2022 was perhaps, first of all, the actions of the Defense Forces of Ukraine on the displacement of Russian from the north of the Black Sea.

"Today, the way out of Nikolaev and Kherson is under the fire control ... That is, it is first and foremost security risks that need to be taken into account, how to talk about the possibility of expanding the grain initiative," - said.

**Read also:** In this context, he recalled that the port нині перебуває шість кораблів, які належать турецьким компаніям, інаразі ведуться переговори про їх виведення.

"Це дуже складний процес, оскільки і фарватер замінований, і перешкоди стоять, і бойові дії в цьому регіоні тривають. І говорити серйозно про включення цих портів до "зернової ініціативи" перш ніж ми витіснимо ворога з Кінбурнської коси і зони ураження, думаю, досить складно", - зазначив посол України.

Bodnar зауважив, що питання про розширення зернової угоди на порти Миколаєва і Херсона стоїть на порядку денного ще від початку "зернової ініціативи".

**Читайте також:** "But in reality, everything is achieved by defense forces, not the UN or other intermediaries on which we, of course, have great hopes and which are our partners. Liberation from the enemies of the occupied territories will allow the acceleration of this issue," the diplomat summed up.

As it was reported, the Ukrainian side stated that the grain agreement should be spread, making it indefinite, as well as .

As the director of the KSCA Municipal Security Department emphasized, every permanent man and the guest of the capital is entitled to receive protection regardless of whether Devin is at the time of announcement of air anxiety. When the siren was heard, it is necessary to open Tastes the closest shelter. "If someone, the commandant of this shelter or resident of the house where it is located, you are not allowed there, it is an offense, a criminal case. It is necessary to contact 102 immediately and provide appropriate information. If closed storage, law enforcement agencies, police and SESS are not responsible for opening such storage facilities, but in our city there is a municipal emergency rescue service. I personally take responsibility and give the Kars team so that they will leave and open a particular storage that is

closed during air anxiety. Therefore, the utility service will do. The appeal can be made to the service dispatcher 101, and it will immediately be transferred to our KARS. Together with law enforcement agencies, the service will open the door and provide access to repositories, "Tkachuk said.

At the same time, he acknowledged that such appeals to the municipal emergency service(Cars)The Kyiv Rescue Service was not so much. All reports are resolved promptly.According to the head of the department of organization of civil protection measures of the SESU. Kyiv Oleg Stovolos, a statistical number of shelters can cover the residents of the capital, but there are areas where there are no protective structures within 500 meters. This should also be noted when forming a protective structure fund in the future. "I would like to emphasize that during martial law we only cover shelters. The principle of two walls is possible only when it is disappeared suddenly and the person has not time to leave the building. But for some reason, some "experts" say that the principle of two walls is safe, that it is possible to hide and you do not need to go anywhere. Do not listen to them, because it is wrong. The most safe place during shelling is the underground space of the city. The abyss, when our rescuers disassembled the rubble of residential buildings on the "arrivals" showed that those people did not help the principle of two walls at all, "he proclaimed.

Roman Tkachuk

Participants in the press conference urged citizens not to think that the war was greedy and the danger has passed. There are many cases where people do not respond with shed and continue to stay on the streets, but it is worth remembering that there is no "training anxiety". And the ballistic hostile They come to our territory very quickly, and there have already been cases where the explosions were initially heard, and after this, the alert system. "Personal protection depends primarily on the Vasus Person. We can help you, but you make the decision on the shelter or not. I cannot force you to use protective structures, but we can open them for you, "Tkachuk stressed.

As reported, there are more than 4 thousand shelters of different types in the capital. Last year, 398 civil protection structures were added in the city. The main increase in the number was due to the order of the simplest.

This year, over 290 million UAH is provided for overhaul of the basements of residential buildings in all 10 areas for use for the simplest shelter. Separately 61 million UAH is provided for work in civil protection structures of 4 districts - Darnytsky, Desnyanskiy, Obolon, and Svyatoshinsky.

На мою думку, негідник, дії якого привели до смерті одного українського військового й поранення ще сімнадцяти, має понести заслужене покарання. Справді, окрім персонажі вирішили, що можуть самовільно провести так звану спецоперацію і заволодіти російським літаком. Вони розпочали спілкування з ворожим пілотом, який нібито погодився перейти на бік України", - наголосив Малюк.

За його словами, СБУ та ГУР МО сразу висловили свої зауваження щодо цьогоплану, його не погодили інші державні органи, оскільки спецоперація містила багато ризиків, "але окрім люди вирішили діяти на власний розсуд".

"Як наслідок - ворожий борт не роздобули, натомість ворог дізнався, дерозміщувалися українські літаки й особовий склад. І завдав ракетного удару. Загинув командир військової частини, а 17 захисників дістали поранення. Некажучи вже про повністю розбиті два бойові винищувачі, зруйновану злітнусмугу, іншу техніку та будівлі", - розповів голова СБУ.

He also noted that for more than a year, Ukraine has been fighting against a large -scale invasion of the Russian Federation and the same amount of time supporting partners remains unchanged.

The European Union transmits leopard tanks to countries that continue to coordinate through a contact group of ammunition and technical service for these tanks.

This contact group also provided key air defense systems for the defense of the sky of Ukraine, its citizens and critically important infrastructure. There are Patriot systems from the United States of America, from Germany Tandeerland. The SAMP-T Dental Anti-aircraft missile complex from Italy, as well as NASAMS from Canada and Norway. We also improved the preparation and support of our industrial bases. And throughout the time, our unity and determination have been disappeared. **Our efforts have a vast manner for Ukraine's defenders on the battlefield and emphasize how Kremlin was earning ,**"said Lloyd Austin.

The epicenter of hostilities remains the East. There, the enemy continues the offensive actions of four directions at the same time - Marinsky, Avdiivsky,

Lymansky, Bakhmutsky. In most of them, thanks to our defenders, the enemy fails to go forward. In these areas, Ukrainian defenders not only do it but also actively operate.

About it [reports](#) Deputy Minister of Defense of Ukraine Anna Malyar.

According to her, if you look at the whole map of Ukraine, then the situation is heterogeneous and, in fact, that is how it should be perceived:

"Who was watching the erection of the Armed Forces General Staff, noticed that the enemy was able to move in two more directions this week - Kupyansky and Shakhtarsky. Alenashi fighters repelled the attacks and the enemy did not pass, "said Anna Malyar.

However, Bakhmut remains the hottest place.

"There are fierce fighting now. The enemy attacks. Destroys the arrival of the arrival. The individual plot is advanced. At the same time, our courageous Bakhmut is both defensive and active assault. It will be unjustifiably high losses. The situation is tense, but controlled. Solutions are made in accordance with military expediency, " - said the Deputy Minister of Defense of Ukraine.

Another Russian agent was exposed in Kyiv region.

About it [reports](#) SBU.

The attacker was a local active lawyer, who previously worked as a prosecutor's office and, as a result of the failure of the certification, was released in 2021.

It was found that he was later recruited by the Russian special service to carry out intelligence and subversive activities against Ukraine.

At the instruction of the enemy, he tried to obtain maps of minefields, created for Silaboron on the approaches to Kyiv and in the Chernihiv region, as well as in the prifronted areas of East of Ukraine.

In addition, he explored the possible combat positions of M142 HIMARS jet artillery systems and the locations of the warehouses with ammunition and fuel and lubricants of the Armed Forces.

The Russian agent was looking for informants who offered a high monetary "reward" for the transfer of secret information.

Intelligence was needed by the occupiers to carry out the air strike of the Ukrainian troops, as well as to create their own map of Ukrainian fortifications.

However, the SBU staff worked on ahead - in a timely manner of the exposed agent, documented criminal acts and detained during the transfer of HIMARS.

In the course of the investigation it was found that the person also set up a scheme -made departure abroad of Ukrainian citizens of conscript age.

He attracted several accomplices to the equipment, who offered his clients' attachments for escape outside Ukraine.

During the search, the traitor's lawyer found computer equipment, mobile phone and information carriers that confirm the facts of the blasting activity of the aggressor country.

On the basis of the evidence collected, the security service informed him of the suspicion of a state treason committed in martial law.

The issue of the election of a precautionary measure in custody is resolved. Investigation is ongoing to establish all circumstances and to prosecute the perpetrators.

The head of the Pentagon noted that joint efforts were of great importance.

He also stressed that, in particular, the United States has accelerated the timing of Abrams tanks in Ukraine to provide it with more profound support for the next months. He also noted that in a few weeks, the M1 tanks will arrive in Germany, which Ukrainians will use for training.

According to the results of the meeting of the contact group of Ukraine in the format of Ramstein, the chairman of the Committee of the Chiefs of Staff of the US Armed Forces, General Markmilly said that the decision to grant Ukraine F-16 combat aircraft should be approved by political leaders. Currently, the sky over Ukraine will help to close air defense.

-The decision to provide F-16 or any other aircraft of the fourth generation is consistent with political leaders. But from a military point of view - the task is to control the airspace. You can control the air space in different ways. And the most economical, most effective, and fastest way for Ukraine is now aircraft that they have been working for over a year, preventing the Russians from effectively using air space, - said Mark Millie.

According to him, Ukrainian forces skillfully use air defense systems and this is "most critical" now.

He noted that "the most important thing now" is to make sure that the air defense system "reliable, accurate, deep" and "multi -level". In particular, from near, medium additive.

He also added that the training and preparation of pilots takes a long time.

-From the point of view of the aircraft themselves, because the preparation of pilots, etc., it takes a long time, and the Russians have a considerable amount of military-air forces, and in this way to bring Ukrainian air forces to this level, it is necessary to make value from many countries. Therefore, we will see the results of tick decisions that will be adopted or not made in the future, but now an urgent need is a anti -air defense, - Markmilli summed up.
