"The protected area is enshrined in the static document, at the legislative level, the Park's idiose, regardless of the name, must adhere to the regime of the territory of the decision. That is, there will be no "interesting" economic elements. Also, there are not immune to the "interesting" decisions of the powerful and people who love to look at the elections during the war. The protected area is an area where a person's intervention should be, "said the cartilage.

Ухвалений закон – про можливості для максимально швидкого відновлення авіасполучення, як тільки це дозволить безпекова складова», - наголосили в міністерстві.

He also noted that it will be extremely difficult to eliminate the effects of a possible accident during the TPP. In this context, the politician recalled that 600,000 carriers were involved in the pre-active phase of the Chernobyl accident.

Kostenko informed that he publicly addressed "these views" to the General Director of the Maga Raphael Grosssey, and also criticized this organization for the fact that it was not able to conduct a special meeting at the IAEA leadership level in the situation of nuclear terrorism of Russia and did in the fall of 2022.

The decision on the placement of tactical nuclear weapons in Belarus is a hybrid -tangible operation.

This opinion was expressed by the director of the Institute of World Policy, Eugene Magda Nazidani, a roundtable on the topic: "Russian nuclear weapons in Belarus as a child of European security," Ukrinform correspondent reports.

"To date, Russia by the decision on the placement of tactical nuclear weapons of Belarus performs a hybrid offensive surgery. It carries a nuclear ARSENAL for several hundred kilometers to the west, using the so -called Billerian Balcon , .. And largely translates responsibility to Lukashenko, "Magda said.

"Putin does not confirm such steps and indicates that Russia is a lot of terms of non -proliferation of nuclear weapons. We understand that Russia is indicative of compliance with the terms of basic treaties in the realm of international law is an element of forming its image. Therefore, in this case, Belarus is threatened with the threat of nuclear weapons, including from its territory, "the expert said.

In his opinion, Putin is very interested in the internationalization of Russian-Ukrainian .

"I believe that the desire to threaten the expansion of the war territory in one way or another responses to the Russian interests, because the Kremlin emphasizes that it is leading war, the widow side, against NATO, on the other hand, the war is not in Russian territory. At least at an ideological level, that Russia calls a special military operation, in the format of the world, " - said the director of the Institute of World Policy. As reported by Ukrinform, on March 25, the President of the aggressor country Volodymyrputin, for whom the ISS issued a warrant for arrest, said that Russia is to place tactic nuclear weapons in Belarus. Oleksandr Musienko, the head of the military-legal research, believes that Ukraine is started to start a frank and fair conversation with partners about the opening of a second-hand in the Russian-Ukrainian war.

He expressed this opinion at a roundtable meeting on the topic: "Russian nuclear in Belarus as a threat to European security," Correspondentukinform reports.

"It seems to me that today we have to talk to our partners frankly that, in principle, saved the world during World War II, we are saving now - I mean the second front. This is the question that day is crystallized by today . And the fact that Putin with his aggressive actions provokes the discovery of this front in the territory of Belarus, too, it seems to me that the things we approach, " - said Musienko.

According to the expert, he would not easily be threatened, because Putinprag will internationalize the conflict, and how many NATO or Europe would be unhappy with a direct clash with Russia, it is "closer."

"And then what? And then let's sit down and discussed(Putin - ed.)ultimatum. This is Putin's position - let's speak the proneclamp And so on, " - said the Center for Military Legal Research.

According to him, given the statement of Putin about the placement of tactical nuclear weapons of Belarus, the event should be ready for preventive actions.

"Is the event ready? I think no. Poland is ready. Hence the statements of the presidency, which were a few months ago, that it is necessary to place American nuclear weapons in Poland. And it is absolute weapons, "the expert said.

Also, the head of the united Press Center of Defense Forces of Tavriyskaya direction was that yesterday the enemy changed his tactics. So, trying to show the advantage in the air, the enemy increased the number of aviation strikes, and moving to the tactics of group air strikes. That is, two aircraft released Ukrainian air defense, and the third struck.

Due to the improvement of weather conditions, the Russians doubled the number of apparatus apparatus twice. This is first and foremost the exploration UAVs, he said.

According to him, despite recent information about arrival in the area The new tank brigade of the occupation army, it has not shown itself at all, and for the attack on our positions the enemular four in a row uses only infantry. Perhaps it is possible for Dmytashkivsky, this is due to the fact that the opponent is not so much about to use this technique as to demonstrate the effect of its presence.

In the field of view, a broken 155-camp of the Marine infantry appeared in the field of view. However, it is unlikely that it could fully consolidate the combat capacity in such a short time."That's what the Russians go out in this direction - so it is to use an aviation on residential buildings. Yes, yesterday the enemy struck a residential building in a carbon," Dmitrashkivsky added.

In this context, the People's Deputy emphasized that in the event that such asislochys will get directly to the representatives of the Ukrainian right - handedness, it will already be possible to document all their confessions.

Mykola Solsky, Minister of Grade Policy and Food of Ukraine believes that Europe is Ukrainian grain, corn, meal and other agricultural products.

He stated this during an online output at an EU Council meeting on agriculture and fishing, Ukrinform reports with reference to .

Solsky noted that Europe requires Ukrainian grain, corn, meal and other products, and Ukrainian goods are useful for the European market. In particular, Ukrainian imports to Poland have brought a lot of benefits not only

to Ukraine, but also by Samipolshi, which increased the export of meat and dairy products by 37% last year.

Read also: [Solsky](#) "Grain from Ukraine has increased the competitiveness of Polish producers. So, the neighboring country grew, using Ukrainian raw materials in that number. In particular, in 2022, chicken production in Poland increased by 8.2% compared to 2021. Poland has become one of the EU leaders in chicken to chicken in third countries, "the minister said.

He added that in the first quarter of 2023 Poland sold 10.5 thousand tons of chicken in Ukraine, and Ukraine of Poland - 4 thousand tons, which is 2.5 times less.

In addition, Last year, Poland increased by 40% of exports of grain and their products.

Read also: Solsky stressed that agricultural trade between Ukraine and the EU is a food for EU member states who have suffered from last year's drought. Livestock livestock in Germany, the Netherlands and other leaders. Traders, carriers of TAPORTS also earn on Ukrainian grain.

According to the minister, Ukrainian grain was not a key cause of market pricing. Solsky explained that in the last two months the quotations have fallen in spite of the expectations of farmers of all countries not through Ukrainian grain, but a very large crop from Brazil.

This factor presses on the markets, perhaps more than exports from Ukraine, according to the Ukrainian minister.

«Ми бачимо стрімке зростання обсягів бразильського виробництва і експорту, щопри повільно зростаючому попиті суттєво тисне на ціни. Ми щиро раді за колегіз Південної Америки, але невже, виходячи з останнього досвіду, тепер треба закрити можливості експорту і Бразилії, аби світові ціни знову розвернулися всторону зростання?» - зауважив очільник Мінагрополітики.

Сольський нагадав, що українські аграрії працюють у надскладних умовах війни, але розуміють проблеми колег за кордоном. Водночас він акцентував на тому, що основна причини нинішньої кризи - повномасштабна війна, розв'язана росією.

«Проблеми фермерів у європейських країнах - це не вина українських фермерів. І першопричина такої ситуації на європейському ринку - не в ціні українського збіжжя, а у війні, яку розв'язала росія проти України. Ця війна, нагадаю, триває вже дев'ять років. З яких ми переживаємо другий

рік страшного іцинічного терору, знищення всього українського з боку російського агресора», -підкреслив міністр.

Читайте також: [агропро](#) According to Solsky, it is now necessary to achieve a joint mutual decision through discussions and negotiations. At the same time, the minister expressed the hopeful decision of the European Commission.

“We emphasize once again that the opinion and position of our clerks are extremely important to us. And that great support we received and receive. We have a single, because there is always a discussion between real friends, and at the same time they always find a solution, ” - summed up the head of the Ministry of Agrarian Policy.

As reported by Ukrinform, Poland, Hungary, Slovakia and Bulgaria to introduce a prohibition on imports of grain and other types of agricultural products from Ukraine. Poland also suspended the transit of Ukrainian APC products through its territory, but renewed it from April 21.

Romania has not yet imposed restrictions on the import and transit of Ukrainian agro -products, but increased control and inspection of agricultural goods imported by its territory.

The European Commission has offered a package of assistance for farmers from the countries that bordering Ukraine, which includes financial assistance and other events. Assistance will be provided to the conditions that will be removed for the import of Ukrainian agro -products.

Consultations with the participation of the European Commission and representatives of Bulgaria, Hungary, Poland, Slovakia, Romania and Ukraine are currently underway.

Ukrainians!Ukrainians!All our partners in the world!

During the day, there was a parsing in the city of Kupyansk Kharkiv region after the Russian shelling of the C-300 missiles. On ordinary civilian. The target for terrorists was the museum of local lore and adjacent houses.

Russia killed this blow of two women. My condolences to my relatives and loved ones ... Ten people were injured - they are given the necessary help.

In total, more than 60 museums and galleries in different areas of our country are so self -destroyed or damaged by the occupier.

Today, in the Kherson region, the blow of Russian aviation was destroyed. In the village of Kizomis, the Belozersky community. Orthodox temple ... managed by theuaabomb. That is, the Russian military knew that they were destroying. This church has been one of the hundreds of churches and prayer houses broken by Russian blows.

Crimea ... Today, the invaders broke into the house of Abdureshit Jepparova. He is the single representatives of the Crimean Tatar national movement, human rights activist, citizen of Ukraine. Where he is now, which is unknown to him. This is another example of the Crimea's indigenous people, against all our people. Those and thousands of such examples during aggression in the Crimea and in other regions occupied by Russia.

No one can feel safe anywhere until the aggressor is broken. This is the day in Ukraine proves - all that Russian troops and special services are doing on our land against our people. And this is that they dream of bringing other peoples on the ground. The whole world knows it.

The world also knows: Russia can be stopped. This is a common interest. Stop the powerful soldiers on the front line. Our weapons - both Ukrainian and the one we make from partners. By the power of law, that is, sanctions that need constant strengthening, as well as our joint work for the sake of justice. The manifestation of Russian terror, every day of aggression - these are additional arguments that all this should end in the tribunal - in the new Nuremberg on Rashism, relative And people who have rockets against museums, and managed avaibombs - against churches. Today, our international sanction group, a group of experts headed by Andriyermak and Michael McFol, presented a document on strengthening sanctions against Russia. The first such sanction plan was fulfilled by more than 70%. Therefore, the infected with what directions it is possible to increase the sanction pressure and how to give a more stability due to the complete exclusion from the global relations of all deestruktive Russian entities, all those who work for the war.

This sanction document will be on the tables with all key leaders in the world - both political and public, business. Sanctions against the Russian Naptogaza Sector, against the nuclear industry, against absolutely everyone who helps Russia to circumstance. This is necessary self -defense of international order.

Today I held the next meeting. Commanders, Head, Intelligence, Ministry of Defense. Reports on hostilities on the front are now actively moving, the equipment of new units. The Ramstein and further communication with our partners have been separate today.

He also held a meeting on the economic restoration of Ukraine. Shmigal, Sviridenko, Shurma, Kubrakov, Fedorov - our restore team. Presented the economic experiment of today and post -war period. It is already clear that the result of a more victory will be the opportunity of Ukraine to be a real supplier of security to all our partners, for all in the world, who appreciates the international order based on the rules. The new safety standards that we embody in our lives: in our infrastructure, energy, logistics and communication, in the social and educational spheres, in our production - all this can be scale in other parts of the world.

Separate mountain and assault Brigade is one of the units that actively participates in hostilities in eastern Ukraine. The fighters of this unit of the day collide with the enemy on the front line, protecting their native land.

War is always scary, and this is confirmed by every soldier who was on the front. Every day, it offers new trials and dangers that become a norma for soldiers who protect the country. And this is the case when the custom "routine" loses its usual meaning.

Due to the destroyed shelling, settlements have to move in heavy talks, counting on their strengths and skills. Only the remains of destroyed buildings and infrastructure have remained in the territory that previously had people who have been humbled by humans. Damaged civilian cars and dead pets are just little things compared to the terrible consequences of the war.

China and Brazil, who have put forward the ideas of peace, should first come to Ukraine to zoom into the eyes of those who touched Russian aggression.

On this emphasizes The high representative of the European Union for Foreign Affairs and Security Policy of the Zhozep Borrel.

"Recently, some ideas about peace have been put forward by China as well as Brazil. For the hopeful, honest peaceful efforts, you also need to talk to Kiev and go your best to see aggression by their eyes, the eyes of those they bombard. I want to remedy about the terrible situation on the spot for all the people who are now calling Domir. I also call for peace. But where were these calls when Russia is pulled on the borders? We need to understand very clearly what is happening. There is an aggressor that violated the UN Statute and invaded another country, and there is a victim of this aggression. We can take such a benevolent approach that states: "Oh, one is bad to stop, and the other does not want. Oh no!" It is impossible to put one level of the aggressor and aggressive, "said Josep Borrel.

He stressed that the EU countries are aware of the urgent need of Ukraine with poor trims and missiles, and they are needed to protect their territory.

"Russia does not want to stop the invasion, and Ukraine must continue to defend. The all -right way to explain what is happening there. That is why we support Ukraine, now including tanks, air defense and even fighters. About it in [interview](#) The commander of the eastern group of troops was informed by Colonel-General Alexander.

-Indeed, Bakhmut remains the object of focusing the main efforts of Vorozhaz, among all other areas. For Russia, the East of Ukraine is the only part of the front where it has made at least some progress with the beginning of the "big offensive". The plan to win Ukraine in three days has transformed into nine -month attempts by a small city. After a series of defeats in the north and south of the Ukrainian -ownership, it is necessary to demonstrate at least the slightest success in the occupation of Donbass. Without mastering it, the invaders will not be able to develop the offensive in the direction of Kramatorsk and Siverskaya. Therefore, Russian propaganda provides battles for Bakhmut as a "battle for Stalingrad". They love such parallels. And in order to reach its goals, Russia will not regret human or material resources,- said Colonel-General Alexander Sirsky.

The largest and most effective motivator for the defenders of Ukraine was the building of the enemy, because the protection of his homeland, his relatives, victory over the superfluous is the greatest desire for today.

About it reported Commander of the Joint Forces of the Armed Forces of Ukraine Lieutenant General Sergey Naev, talking about the morale and motivation of our soldiers.

"Almost for everyone who took their arms and stood in defense of their homeland, their relatives, victory over the enemy is the greatest desire for today. Each serviceman knows that behind his back - his family, which needs to be protected, "the message reads.

According to him, military personnel are convinced that the constant development and transmission of experience is a new reality and critical need for today.

"There are fewer mistakes - more saved lives, and to not allow them, they train hard," - said Sergei Naev.

The commander said that additional stress loads help to work with the fighters stability on the battlefield. Military skills are strengthened by pain and daily wins. In daily training increases the strength of the spirit, the will of the will and the character becomes hardened. There are no printing tasks. There is a goal to be achieved with the least moral and physical loss. It is the result of long -term training, during which knowledge, skills and skills are reflected.

"But first of all, undoubtedly, it is necessary to live Ukraine, to work for Ukraine and to be with Ukraine in the heart. And all who defend Ukraine today are just that way. A powerful incentive to continue the struggle is the desire of will and the desire to release the Ukrainian land from the barbarians and the arms that wanted to build in our homes, "he said.

Live broadcast [TEMACHORFON](#) The only news is the head of the united Press Center of Defense forces of Tavriysky, Colonel Alexei Dmitryashkivsky noted that the enemy began to start his artillery component again.

Alexei Dmitrashkivsky told about the assault actions, the enemy 22 times healed the positions of our troops. It happened in the Marinka area, which the enemy was not at attempts to capture to block Avdiivka.

Also, the head of the united Press Center of Defense Forces of Tavriyskaya direction was that yesterday the enemy changed his tactics. So, trying to show the advantage in the air, the enemy increased the number of aviation strikes, and moving to the tactics of group air strikes. That is, two aircraft released Ukrainian air defense, and the third struck.

Due to the improvement of weather conditions, the enemy doubled the number of use of unmanned aerial vehicles yesterday. First of all, the vows are said.

-Also yesterday there was a change in the use of the enemy Dronov-Kamikadze,-continues Alexei Dmitrashkivsky. - Yesterday afternoon, they first considered the Shahledi, which were well knocked down, but after the "Shahmed" appeared "lancets". This was also the purpose of identifying our points of antipyretic defense.

The officer also told about the deterioration of the moral and psychological state of the avalanche, and the news in the Tavriya direction. Yes, he noted that in the recent information about the arrival in the area of Avdiivka of the new tanking unit of the occupying army, it has not shown itself at all, and for the attacks of our positions the enemy uses the fourth day in a row exclusively infantry. Oleksiy Dmitrashkivsky may assume, this is due to the fact that the opponent is not so much selected to use this technique as to demonstrate the effect of its precision.

And in the carbon direction, as the head of the united press center told, a broken enemy of the 155th Brigade of Marine Corps appeared again. However, it is unlikely that it could fully restore the combat capability in such compisormins.

Most of the destructive content, the attackers took from the online resources of the aggressor.

Yes, in Kiev:

A 37-year-old resident of the capital was exposed, who called for mass killings of Ukrainians in the Russian social network "Vkontakte".

блоковано інформаційно-підривну діяльність мешканки регіону, яка адмініструвала декілька прокремлівських Телеграм-каналів.

На цих ресурсах вона розміщувала публікації із закликами до обстрілу українських міст та поширювала фейки про кількість загиблих оборонців України.

На Миколаївщині:

повідомлено про підозру дружині настоятеля одного із храмів УПЦ (МР). У листуваннях з мешканцями громади жінка схвалювала воєнні злочини окупантів, а також репостила антиукраїнські матеріали росмедіа.

У Харкові:

кіберфахівці СБУ задокументували злочинну діяльність жительки міста, яка в «Однокласниках» закликала до співпраці з бойовиками та окупаційною адміністрацією у захоплених районах на сході України.

У Черкаській області:

викрито двох мешканців регіону, що популяризували учасників окупаційних груповань РФ та «героїзували» їхні злочини.

За цими фактами тривають слідчі дії у межах кримінальних проваджень за двома статтями Кримінального кодексу України:

On behalf of President of Ukraine Volodymyr Zelensky, the International Work Group on Sanctions against Russia, headed by Presidential Office Head Andriy Yermak, together with the Director(FSI), Ambassador Michael McFol, presented a new plan of action in order to further reinforce the sanction pressure on Russia. The head of the Presidential Office told this during online meetings with representatives of the expert and media environment.

Andriy Yermak explained that the plan of action to strengthen sanctions against Russia, which the international expert group presented last year, became the basis for the introduction of important sanctions.

“The documents of our group today lie on the tables of all world leaders and all those who are sanctioned. I am proud that today the development of our group is the basis of more than 70% of sanctions that have been implemented and implemented in the EU, the United Kingdom and other countries,” he said.

Andriy Yermak stressed that through the work of the group, embargo on roots and petroleum products were introduced, the price limits on them, the full blocking of approximately against the 20 largest Russian banks, as well as Russia, and all rights in FATF were subject to Russia. In addition, a widespread list of dual -use goods, impedable sanctions on thousands of persons from different spheres, has been imposed under trade restrictions,

coordinating mechanism of implementation of "Greater Seven" sanctions was created.

"Almost everything from the foreground was implemented. I would like to thank all Ukrainians. Sanctions are a strong weapon with which we defend our Ukraine and which we will win the aggressor, "he said.

The head of the head of state said that the International Working Group has presented a new plan for sanctions - Action Plan 2.0.

"We expect new powerful sanctions packages provided for in this plan. This is an extremely important document, and I thank everyone who participated in its development, "said Andriy Yermak.

He stressed that the new plan should be as soon as possible to the world leaders and the relevant organizations that take care of the issues of sanctions. Andriy Yermak also marked the importance of imposing sanctions on Russian athletes whom the aggressor country uses as a tool for promoting his war. Ambassador Michael McFol emphasized that, despite the considerable amount of work performed by the sanction struggle, many work still needs to be realized. It was on these areas that experts in the process of preparation of the updated plan focused. The suggested directions of the sanctioning way are very specific. It is about the most painful points of the Russian economy, in which it should be pressed to reduce Russia's potential for hostilities. In particular, Mr Macfol emphasized the importance of further implementation of the sanction over the energy complex of the Russian Federation and the defense industry, the restriction of the use of financial instruments, the confiscation of assets of the central bank of Russia and their transmission to Ukraine, as well as other areas, reflected in the plan.

According to him, the sanctions regime should be strengthened, and the new document shows how they can be implemented in relation to the aggressor country.

The European Union is aware that the current crisis with the import of Ukrainian agricultural products to the ESUSE is caused by Russian aggression and will take all measures to solve it, based on the principles of solidarity with Ukraine.

This was stated in Luxembourg during the Press Conference on the results of the Council of Ministers of the ESEZ Agriculture and fisheries by the representative of Sweden Agrarian Agrarian Exercise, Peter Kulgren, Ukrinform correspondent reports.

"We had the honor of communicating with our Ukrainian colleague Nicholas Solsky, who participated in a videoconference at the beginning of the meeting. The participation of the Ukrainian minister helped to concentrate our thoughts on what really matters.

He acknowledged that there are problems in the EU's internal market, especially in those countries that border Ukraine. In this connection, he emphasized the need to carry out a thorough analysis of the impact that the Ukrainian agricultural imports committed on the market situation. Today, according to him, the EU Radaminist has expressed solid support not only for Ukraine, but also for the neighboring EU countries.

Read also: "In this connection, the EU Council has another important message. We need to respond to the strictness as the European Union. The EU continues to maintain unity in the solidarity of Zauzina, and intends to find a solution that will not compromise solidarity with our neighbor, " - said the representative of the Swedish presidency of the European Union.

In turn, the European Commissioner for Agriculture Janusz Wojciechowski has argued that the European Commission is fully understanding the concern of five states in connection with excessive production of products from Ukraine, which creates many problems for farmers. The European Commission is negotiating with the governments of these countries to work out the problem.

"This situation is 100% caused by Russian unprovoked, criminal -justified aggression against Ukraine, which has a consequence for the market, for the food system and for increasing imports, above all, grain, from Ukraine to the European Union," the European Commissar said. He recalled that before the war on the basis of the Association Agreement between the EU and Ukraine Import of major agricultural goods was free from and restrictions, including rapeseed seeds. But the actual import of these products to Poland, Romania, Bulgaria, Slovakia and Hungary was very insignificant. Everything changed when the war began. As a result of Russian aggression in Ukraine, the grain record of 2021 was actually blocked.

"It was the reason why grain in Ukraine was very cheap, and many traders of the Zevrian Union, especially in border countries, purchased grain in Ukraine.

Import of grain(in the EU - ed.)In 2022, compared to 2021, it increased from € 7 billion to € 13 billion. The whole volume of increasing imports from the "frontier" state of the EU, "said Janusz Voitsekhovsky.

He noted that the EU countries are close to the decision to pay these states the second aid from the Reserve Agricultural Fund, which was increased from the initial proposal of € 100 million to € 150 million. This money is planned to be directed to support farmers in five countries who have lost their loss with a decline in food prices in the domestic market. The first time, which has already been highlighted, is € 56 million.

Read also: [**European Commission**](#) The governments of the five countries of the EU - Poland, Slovakia, Hungary, Romania of Bulgaria - have referred to the European Commission with a letter that contains to ask for protective measures to restrict agricultural imports from Ukraine, since a large flow of grain and food that falls on the market From Ukraine, led to a fall in prices for such products. This has caused damage to the farms, first of all, in countries bordering Ukraine.

After the beginning of Russian aggression against Ukraine and blocking the Black Sea ports, through which it was usually made exports of agricultural products to the world market, the European Union organized "corridors of solidarity" on the borders with Ukraine to direct part of its farm exports to the world market, with the use Also, more than 32 million tons of grain and other agricultural goods were imported in the course of the year.
