As of June 21, the Ministry of Defense of Ukraine concluded the first three contracts with the winner of food supply to the Armed Forces of Ukraine through the ProZorrotrotor system.

In total, 19 winners of 22 **have been identified**. On 16 the winners of the competition ** are currently preparation of contracts for their signing, with the winners of the Deposit Contest on the Ministry's account, as required by tender documentation.

Three more procedures from the total 22 were rejected by all participants in connection with the inconsistency of their price proposals with the conditions of the announcement. Repeated bidding - this information is highlighted in Prozorro(*The procedures for the deadline for submission of documents 22.06.2023, by the third - until 27.06.2023*).

Зазначимо, що у повторних процедурах закупівлі так само беруть участь всібажаючі, а не лише діючі учасники. Тому Міноборони з метою розширення колапотенційних учасників та зниження ціни на аукціоні просить долучатись всіх, хто має бажання і спроможності.

Також триває низка судових процесів, на яких розглядаються позови окремих учасників торгов. Зміст позовних заяв різний, але здебільшого їх суть полягає у претензіях до роботи Колегіального органу Міністерства оборони України з питань оборонних закупівель.

При цьому, з метою максимального громадського контролю за процесом закупівельта задля дотримання принципів транспарентності Міністерство оборони ввело доскладу Колегіального органу з питань оборонних закупівель представника Громадської Антикорупційної Ради при Мінобороні.

— Наголошу, всі процеси відбуваються максимально відкрито. Ми активно співпрацюємо з громадськістю, за що вдячний, зокрема Антикорупційній Раді, та незважаючи на всі ці труднощі, закупівлі тривають, договори підписуються, все відбувається з дотриманням всіх процедур і термінів, визначених законом «Пропублічні закупівлі». Жодних затягувань немає. Військо є і буде повністю забезпечене — це наше ключове завдання, — прокоментував заступник Міністра оборони України Денис Шарапов.

The British magazine The Economist posted [material](#) Kiril Budanov, and the role of the department headed by him during a full -scale war with Russia, about the head of the Main Directorate of the Intelligence of Ukraine.

The journalists of the publication spoke with the fighting brothers Kirill Budanov, his subordinate officers, as well as intelligence of the Western powers to open the character of the head of Ukrainian military intelligence.

Kirill Budanov himself was asked about bold special operations, directed by the anti-state aggressor, as well as about the nuclear threat from Russia.

"We are in the war. The Kremlin's drones have shown the world that Russian defense is just a Potemkin village," Cyril Kirill quoted The Economist, noting that Ukraine did not confirm its involvement in the special operations of the Russian scent.

The head of the GUR of the Ministry of Defense of Ukraine stressed that without the strategic defeat of Russia, there will be no transformation of power in it, and the risk of using a nuclear weapons aggressor is low.

"As a reconnaissance manager, I tell you straight - this will not be. With all my unfortunate Russian, there are not many idiots that govern the country," Kirilobudanov said.

Deterous Ukrainians, Ukrainians!

Today was a very busy day.

First, they briefed for partner countries about the situation at the Zaporizhzhya atomic station. There were representatives of the countries of the Great Seven, "Grand Twenty", representatives of international organizations. Here in the office. A available information has been provided from the GUR, from the commissioner, from our diplomats.

Our principle is simple: the world must know what the occupier prepares. Everyone who knows has to act. Of course, after a Russian terrorist attack on the Kakhovskaya hydroelectric power station, terrorists on other dams and energy objects of the old one in the world should not have any illusions about Russia. It is Russia that is now the brigal center of cynicism, and from there may be any order for any excellent, which they expect to mask under one or another catastrophe. The world has a complicated power to prevent any radiation incidents and, moreover, a radiation disaster. Everyone understands that intelligence of different countries can give corresponding signals, they can press. This is required.

We will continue to inform partners. Information will also be provided to those countries that have some neutrality even now. Obviously, radiation does not ask, who is unnecessary, and can reach anyone in the world. Accordingly, anyone in the lightisaraz can help, and what to do is quite known.

Full de -occupation of the Zaporizhzhya nuclear station is required. And anyone who has fulfilled their eyes on Russia's occupation of such an object, on the mines of Russia, the territory of the structures of the nuclear power plant, in fact contributes not only to this Russian gun, but terror in general. And today I instructed the Minister of Internal Affairs Klimenko Igor to take all necessary measures, all the necessary work with our people on all available risks. And in the near future it will be done.

Today, the SBU and the Ministry of Internal Affairs have spoken appropriate security issues - ITe concerning the Zaporizhzhya station, and what concerns the consequences of the Russian terrorist attack at the Kakhovsky Hydroelectric Power Station. We do our best to connect as much as possible and means to pressure and influence on the terrorist state. There was also a separate report of internal affairs to support people and life in the Kherson region and the greetings of our south, which were affected by the destruction of the Kakhovsky Damage. He also held a meeting on the spiritual independence of Ukraine - we continue the correspondence, and there will be new steps. Obviously, there can be no spiritual communication with the terrorist state and those who justify the murder, murder of Ukrainians and

cover evil. Every day and every night of Russian terror is custom. And we will reach the moment when all the dependence on Russia, which is trying to manipulate somewhere, will be destroyed.

One more.

I want to give especially to all those who, even at that time, even in such circumstances, that our people and our country are small cultural power. Today, the next book Aresenal began in Kyiv. "Arsenal" is the word that best characterizes the meaning of culture. What makes people people. What makes humanity stronger. What protects and through time spreads our experience - everyone and everyone, all of our Ukraine, all our Ukraine, all our Europe, all our humanity. Bellas, if you have the opportunity, visit one of these days Book Arsenal and always support cultural power.

I thank everyone who is fighting and working for Ukraine! I thank everyone who is now in the battles - in the south, in the east, in Zaporozhye, in the Donetsk region, in Luhansk region. Thank you!

Thank you all who help Ukraine and protect their lives and humanity with us!

Glory to Ukraine!

The Save Ukraine Charitable Foundation has helped return 121 children who were exported by Russian invaders from the territory of Ukraine.

Dmitry Filipenko, Deputy Chairman of Saveukraine, said this in a comment to Ukrinform correspondent.

"As of today, we have already returned 121 children," he said.

According to Filipenko, during the last rescue mission it was possible to return 8 children from an orphanage who were illegally removed from the territory of Ukraine. "We have identified their location thanks to the children who were returned before. And two weeks ago, these eight children managed to return. We are now raising the question of their location," he said.

According to the deputy chairman Save Ukraine, other returned children were at least one of them. "Several children were also returned to their parents. They were returned to their grandparents," he added.

"This means that we know their name, first name and patronymic, birth dates and approximate location. But numerical children are at times greater, the exact number of no one knows. Many children continue to be abducted by Russia in the occupied territories," -said he.

Filipenko indicated that the Government of Ukraine cannot work directly with the authorities of the aggressor state in the issue of returning deported [children](#), since diplomatic relations were destroyed, and therefore the main work was assumed by the organization of civil society. In the case of Save Ukraine, the Foundation receives relevant information in Russia through the "hotline" and direction from parents. According to him, since the direct automobile or other connection with Russia is coming, parents go through the neighboring cranes to the place where their children in Russia were identified. Often, the route can be more than 4 thousand km. Each rescue mission lasts from three weeks to a month, taking into account the preparation of documents.

According to Filipenko, on average, the cost of returning one child is about \$ 4,000. That is why the Fund is currently being conducted, incl. abroad, a campaign for accumulation of funds for their activities to return to the growth of stolen children.

"The Russians gave children only to their parents and on the basis of all properly decorated doctors. In the event that they are about orphans, they

were followed by an official representative from the orphanage from which they were abducted, with a proxy," - said Save Ukraine representative.

According to him, the Russian side has always tried to prevent the return to Ukraine, and with the issuance of an international criminal court of the arrest on the part of various obstacles on the part of the Russians only increased. According to representatives of the UKRAINE, data on all cases with the dismissal of stolen children, as well as their testimony, are further sent, in particular, to the office of the ISS Prosecutor.

We had two such cases where the child could not be obtained and in a few days we lost information about their location "That is, they were moved from one institution to another. We try to identify where they are now," Filippenko said.

At the same time, he indicated that after the issue of the arrest of Putin and the "children's return" by Maria Lviv-Belova, who "adopted" a Ukrainian boy who wanted to adopt children in Ukraine.

As reported by Ukrinform, [in the capital of Austria opened the exhibition "Children during the Time"](#), which draws attention to the sufficiency of Ukrainian children as a result of Russian aggression and, in particular, to their non-consistent deportation to Russia and attempts by the Kremlin to change their identity.

At the same time official site [KSCA](#) reports that the work of conflict and asphalting is ongoing. Poly Technologies supplied tons of powder to the Russian Federation. From it the Nabarnaul plant was manufactured for rifles and machine guns.

According to Ukrinform, writes this [The New York Times](#) .

Deliveries that have not been reported before, between the state Chinese company, the Russian Ammunition Plant last year, cause a new way about Beijing's role in Moscow's war against Ukraine, the newspaper notes.

In two separate cases, last year, railway wagons that transported tens of kilograms of smokeless gunpowder-sufficient fuel to produce at least 80 million ammunition-traveled across the Chinese-Russian border in the remote city of Zabaikalsk.

The gunpowder was delivered by the Chinese state company Poly Technologies, which previously imposed sanctions for its global sales of rocket technologies and Iran support.

The destination of the cargo was the Barnaul plant of ammunition, fabricaboe -supplies in Central Russia, which repeatedly supplied the ammunition government.

These, not previously registered, the facts were discovered by the American aggregator of the trade -long Import Genius.

US officials have expressed concern that Beijing could send Moscow "death", although they did not say directly that China had made such plants, the newspaper reports. Secretary of State [USA](#) Anthony Blinken during a speech in Beijing was that China assured the United States that she did not provide fatal assistance to Russian for war against Ukraine.

Some experts have stated that Poly Technologies Delivery Barnaul Patrony Plant has since been an invasion of almost two million dollars, according to customs documents, were such fatal assistance.

According to customs documents, Poly Technologies planned to use its plants in ammunition for Russian vending machines Kalashnikov and sniper screws. Experts believe that from the beginning of the invasion of the Barnaul plant, the Barnaul plant has received products for two million dollars. Poly Technologies is a child company China Poly Group Corporation owned by the China Government. Earlier, this company has already supplied navigation equipment and helicopter parts to the Russian Federation.

The Barnaul Plant Factory in December came under EU sanctions. The information from the sources indicates that the plant could serve as a training camp related to Wagner PEC.

There is no direct evidence that smokeless powder has a direct connection with the war in Ukraine. Poly Technologies wrote that gunpowder is needed to

make "hunting rounds of a foreign sample". However, the analyst Brian Carlson of the Security Central Committee says that it is a militant.

The exhibition "Children during the War" was opened in the capital of the industry, which draws attention to the abilities of Ukrainian children as a result of Russian aggression and, in particular, to their non-consistent deportation to Russia and the Kremlin's attempts to change their identity.

As Ukrinform reports its own correspondent, the exhibition is organized ("Little hearts") Save Ukraine Tabardian Foundation, which is engaged in the return of Ukrainian children from the Russian Federation.

"This exhibition is not a normal exhibition. We wanted to show it that there are a few hundred kilometers nearby, there is a war, and there are children who die, to be fully injured. [Children](#) who cannot sleep that do not receive psychological help because it is difficult to find. A whole generation of children will bear this injury to the end of their lives, " - said Kleine Herzen Pascal, during opening the exhibition.

She urged not to forget about the Russian war against Ukraine and the humanity that it carries: "Do not close your eyes, stay careful, it is a threat for all of us."

"The war is continuing and it is becoming more difficult. But we must move forward and find the sides that return the stolen and forced displaced Ukrainian children. It is innocent to be addictive and perception of the situation as normal. It is necessary to engage in the return of Ukrainian children, as well as to attract Russia's reference. The deputy chairman of Save Ukraine Dmitry Filipenko.

He pointed to, in particular, the large -scale devastating effect of Russian propaganda of Ukrainian children, whose identity Russia wants to change. And this crime is happening here and now. We must save these children, "he said.

Romania considers measures to provide local farmers with priority access to Constanta, during the harvesting season, which can restrain the flow of Ukrainian grain.

According to Ukrinform, the agency [Reuters] reports it(<http://www.reuters.com/world/europe/romania-mulling-measures-protect-farmers-constanta-port-source-says-2023-06-23/>).

Ukraine faced the blocking of Moscow of its Black Sea ports and found the same routes of grain delivery through neighboring EU countries, notes. Even after the Grain Agreement, reached by Turkey, gave Ukraine limited access to three of its Black Sea ports, the Romanian Constanta became its largest alternative navigable marshrot, through which about a third of the Ukrainian grain has passed since the Russian invasion.

But now, when the harvest begins a few weeks in a few weeks, they are in Constantine to cope with the increase of Romanian and Ukrainian crops.

"The Ministry of Agriculture of Romania will propose an optimization of grain commercial flows to the port of Constanta at the negotiations of Zbrussell and Kyiv to protect local farmers during harvesting," Reuters Pridelo in the Ministry.

The source did not specify what measures could be taken, but added that more about the expected volumes can help organize flows.

The harvest season begins in about July, when the Black Sea corridor of Ukraine can close and usually lasts until October.

Romania is one of the Five Eastern European EU countries, to which the flow of Ukrainian grain has increased after the invasion of Moscow, which forced the EU to approve temporary trade restrictions and a support package.

_ I wish health, dear Ukrainians! _

Summary of this busy day.

The meeting on the results of the London Conference on Restoration of Ukraine is a powerful event, good achievements for our country. The support from the Great Britain, the USA, the European Union is very significant. Long-term support programs for a survey, for years ahead. About five hundred world companies, strong companies, interest in investments in Ukraine. Clear support for Ukraine's membership in the European Union: politically is so perceived-as a member of the European Union. We are working on the mechanism of confiscation of assets of the terrorist state and persons. I thank everyone who prepared the conference and participated in the work of our work is really important.

There was a very meaningful NSDC meeting today. I have already reported separately about it. I also spent the meeting. A very important point of our discussion is justice. What concerns the military committee, including scandalous ... figure in Odessa. This person should definitely not be in the system of managing forces, very unpleasant, frankly immoral and wrong, that this person is all remained in his position. He instructed the Zaluzhny Chief of Zelyudin from his post. And the first Deputy Minister of Defense of Ukraine Pavlyukuruchool to organize a check of the whole system of military committee. It is a pity and time of the rate now has to spend on such issues.

Of course, they considered in great detail the situation on the forefront - all the basic inquiries, the supply of ammunition, artillery ... Everything that needs attention to the rate today. Commanders-Generals of Zaluzhny, Syrsky, Tarnavsky, Moskalov, Vice Admiral of her Zhpapa, General Mid, officials, government officials reported. All. And two more things.

Today in our country celebrates Civil Service Day. The day of those people who are not of an effective state without honesty. Of course, we still need to do a lot of public service in Ukraine to come to those models, we are in our politics. But now I want to thank all those people who, under the existing conditions and under available resources in the state, do everything that depends on them to make the state effective. Thank you! Everyone and everyone! And I congratulate on the Day of the Civil Service of Ukraine.

And, of course, the front. To know our heroes, to be grateful to them is necessarily.

I would like to celebrate the warriors of our 35th separate brigade of naval infantry today today. Brigades that performs extremely difficult tasks. The guys who fight the same as the Ukrainian soldiers should fight. Senior sailor Vyacheslavimangulov and junior lieutenant Sergey Penov - thank you guys,

for your exemplary and courage in the battles in Donetsk region. Such are our warriors, Ukrainian warriors. Well done!

And I ask everyone and everyone: please honor the memory of our two paratroopers. Especially brave, especially strong. They gave the life of the state, for our people right now - in the battles in June, and Ukraine should remember them. Captain Ivan Kotzur ... Eternal memory! Senior Lieutenant Alexander Kanja ... Eternal memory! May the victory of Ukraine in this war and the success of our state institutions in the same strong and effective as the warriors are the best honoring of the memory of all our heroic times that have fought and died for the sake of freedom and strength of Ukraine!

_ Glory to Ukraine! _

Many children continue to be abducted by Russia in the occupied territories," -said he.

Filipenko indicated that the Government of Ukraine cannot work directly with the authorities of the aggressor state in the issue of returning deported [children](#), since diplomatic relations were destroyed, and therefore the main work was assumed by the organization of civil society. Often, the route can be more than 4 thousand km. Each rescue mission lasts from three weeks to a month, taking into account the preparation of documents.

According to Filipenko, on average, the cost of returning one child is about \$ 4,000. That is why the Fund is currently being conducted, incl. abroad, a campaign for accumulation of funds for their activities to return to the growth of stolen children.

"The Russians gave children only to their parents and on the basis of all properly decorated doctors. In the event that they are about orphans, they

were followed by an official representative from the orphanage from which they were abducted, with a proxy," - said Save Ukraine representative.

According to him, the Russian side has always tried to prevent the return to Ukraine, and with the issuance of an international criminal court of the arrest on the part of various obstacles on the part of the Russians only increased. Poly Technologies supplied tons of powder to the Russian Federation. From it the Nabarnaul plant was manufactured for rifles and machine guns.

According to Ukrinform, writes this [The New York Times](#) .

Deliveries that have not been reported before, between the state Chinese company, the Russian Ammunition Plant last year, cause a new way about Beijing's role in Moscow's war against Ukraine, the newspaper notes.

In two separate cases, last year, railway wagons that transported tens of kilograms of smokeless gunpowder-sufficient fuel to produce at least 80 million ammunition-traveled across the Chinese-Russian border in the remote city of Zabaikalsk.

The gunpowder was delivered by the Chinese state company Poly Technologies, which previously imposed sanctions for its global sales of rocket technologies and Iran support.

The destination of the cargo was the Barnaul plant of ammunition, fabricaboe -supplies in Central Russia, which repeatedly supplied the ammunition government.

These, not previously registered, the facts were discovered by the American aggregator of the trade -long Import Genius.

US officials have expressed concern that Beijing could send Moscow "death", although they did not say directly that China had made such plants, the newspaper reports. Secretary of State [USA](#) Anthony Blinken during a speech in Beijing was that China assured the United States that she did not provide fatal assistance to Russian for war against Ukraine.

Some experts have stated that Poly Technologies Delivery Barnaul Patrony Plant has since been an invasion of almost two million dollars, according to customs documents, were such fatal assistance.

According to customs documents, Poly Technologies planned to use its plants in ammunition for Russian vending machines Kalashnikov and sniper screws. Experts believe that from the beginning of the invasion of the Barnaul plant, the Barnaul plant has received products for two million dollars. Poly Technologies is a child company China Poly Group Corporation owned by the China Government. Earlier, this company has already supplied navigation equipment and helicopter parts to the Russian Federation.

The Barnaul Plant Factory in December came under EU sanctions. The information from the sources indicates that the plant could serve as a training camp related to Wagner PEC.

There is no direct evidence that smokeless powder has a direct connection with the war in Ukraine. Poly Technologies wrote that gunpowder is needed to

make "hunting rounds of a foreign sample". However, the analyst Brian Carlson of the Security Central Committee says that it is a militant.

A certain decrease in the intensity of rocket strokes of the Russian Federation in the territory of Ukraine in June is comparable to the savings of weapons and changing the tactics of the aggressor: the enemy combines the use of different types of weapons, uses false-goals to highlight the Ukrainian air defense and tries to maintain the frequency of attacks.

Vadim Skibitsky told about it, [reports](#) Main Directorate of Intelligence of Defense of Ukraine.

"The blows will continue despite the fact that(Russians)They started to save rocket weapons. The campaign in the fall and winter, when they used one blow of 80-100 missiles, exhausted the arsenals and stocks of the Russian Federation, "Vadimskibitsky said, reminding that the main purpose of the Russian rocket terror was the disruption of the active actions of the Ukrainian army on the front.

The GUR representative confirmed that during the war Russia was able to increase the volume of winged rockets "Caliber" and X-101 several times: from 10 to 30-40 units per month. However, due to the exhaustion of rockets during the previous rocket terror against Ukraine, new products have been sent to war infactly from the conveyor.

"Now we record that the produced immediately goes to the troops for further use: for example, winged missiles from the last blows - we already see the eating residues - we were made in April this year," Vadimskibitsky said.

He also reported the results of studies of the downed Russian rockets for foreign components.

"The largest foreign components that are critical of the Russian Federation are in two ways is" Iskander "and" dagger ": nearly fifty components of electronic deed in these missiles, foreign production," said the representative of Ukrainian military intelligence.

According to Vadim Skibitsky, Ukraine is now actively working with partners, to exacerbate the supply of these components to the Russian Federation, to strengthen the sanction pressure of the aggressor, and to strengthen the Ukrainian air defense system, which is one of the key stations of the state.

_ I wish health, dear Ukrainians!_

Summary of this busy day.

The meeting on the results of the London Conference on Restoration of Ukraine is a powerful event, good achievements for our country. The support from the Great Britain, the USA, the European Union is very significant. Long-term support programs for a survey, for years ahead. About five hundred world companies, strong companies, interest in investments in Ukraine. Clear support for Ukraine's membership in the European Union: politically is so perceived-as a member of the European Union. We are working on the mechanism of confiscation of assets of the terrorist state and persons. I thank everyone who prepared the conference and participated in the work of our work is really important.

There was a very meaningful NSDC meeting today. I have already reported separately about it. I also spent the meeting. A very important point of our discussion is justice. What concerns the military committee, including scandalous ... figure in Odessa. This person should definitely not be in the system of managing forces, very unpleasant, frankly immoral and wrong, that this person is all remained in his position. He instructed the Zaluzhny Chief of Zelyudin from his post. And the first Deputy Minister of Defense of Ukraine Pavlyukuruchool to organize a check of the whole system of military committee. It is a pity and time of the rate now has to spend on such issues.

Of course, they considered in great detail the situation on the forefront - all the basic inquiries, the supply of ammunition, artillery ... Everything that needs attention to the rate today. Commanders-Generals of Zaluzhny, Syrsky, Tarnavsky, Moskalov, Vice Admiral of her Zhpapa, General Mid, officials, government officials reported. All.

He was honored to congratulate our military educational institutions on the issue of officers ... at once six universities. Kharkiv National University of Air Force, Military Institute of Tank Troops of Kharkiv Polytechnic, Military Institute of Shevchenko University of Kyiv, Military Institute of Communications and Informatization named after Kruty Heroes, Ukrainian Military Medical Academy and Department of Military Training of the National University of Ukraine. I thank everyone and everyone who chooses to be a Ukrainian officer, and I wish two absolutely fundamental ways: to destroy the occupiers and the fastest victory as much as possible.

And two more things. And, of course, the front. To know our heroes, to be grateful to them is necessarily.

I would like to celebrate the warriors of our 35th separate brigade of naval infantry today today. Brigades that performs extremely difficult tasks. The guys who fight the same as the Ukrainian soldiers should fight. Senior sailor Vyacheslavimangulov and junior lieutenant Sergey Penov - thank you guys, for your exemplary and courage in the battles in Donetsk region. Such are our warriors, Ukrainian warriors. Well done!

And I ask everyone and everyone: please honor the memory of our two paratroopers. Especially brave, especially strong. They gave the life of the state, for our people right now - in the battles in June, and Ukraine should remember them. Captain Ivan Kotzur ... Eternal memory!Senior Lieutenant Alexanderkanji ... Eternal memory!May the victory of Ukraine in this war and the success of our state institutions in the same strong and effective as the warriors are the best honoring of the memory of all our heroic times that have fought and died for the sake of freedom and strength of Ukraine!

Glory to Ukraine!

_ I wish health, dear Ukrainians! _

Held a NSDC meeting. Three issues of the agenda. The most important thing: Ministryklimenko and Kamyshin presented the first summary results of inspection of the shelters of the Uregions of our country: Klimenko - throughout the country, Kamyshin - about Kiev. In general, today they considered the situation with shelters in regions, areas, cities that enemy terrorizes.

The conclusions are disappointing. Almost all over the country. It is Kyiv, Zaporizhzhia, and Kharkiv, Idnopro, and Konotop, and Bila Tserkva, and many other cities. Particularly cynical tagnebic situation in those cities that have considerable financial resources, but unfortunately, are other priorities. Personnel decisions will be.

Affordable and reliable shelters across the country should be and will be priority for leaders at all levels. Safety is the first priority.

The Prosecutor General informed the NSDC about the claim of the prosecutor's office to return the shelters that were illegally withdrawn from the property of the communities. Today - more than 400 such claims around the country, work is ongoing.

Prime Minister Smigal also reported on a difficult situation with the state of bridge bridges. The largest cities, including Kyiv. The state is frank. There is a decision of the NSDC to create a commission to check all bridges, overpasses all over the country. Responsible for checking the Vice Prime Minister.

The second point of the agenda is the courts.

Vice Prime Minister Stephanyshina informed the NSDC on the intermediate oral evaluation of the European Commission of our institutional progress, in particular, this concerns perfect reform.

Much has been done. But we consider this only as the necessary basis for our consistent obligations to Ukrainians about justice. It is obvious that the former Supreme Court's former chairman and other such situations in judicial system have a stiffer state policy regarding the requirements for judges, to all who work in the justice system and their liability for violations. Cordual violations.

The Verkhovna Rada of Ukraine appealed to the NSDC. Today we considered the appeals. The following. There must be verification of judges' integrity. And not just before the appointment. Unfortunately, time may change

people who have been a positive conclusion in the courts. And I think it is worth checking, in particular, using a lie detector.

It is very important: we have to strengthen the role of jury court, to expand cases of its application in Ukraine. And this is not just about democracy, it is about the fairness.

Separately discussed the issues of protection of business and investors in courts. Cefoundamental task. A strong economy is a protected investment, a cigarette protection of property rights. And it should be. If you need a separate mechanism that will protect the business, investors, we have to provide it. There are responsible proposals.

Of course, we discussed the tasks that we have to accomplish by the end of the year to fully implement each European Commission recommendation to start negotiating the Uevroseyuz. For each such direction, the NSDC gave the necessary protocol orders. I am sure that they all realistically fulfill them.

Today is exactly the year as Ukraine has acquired the status of a candidate for entry into the European Union, the goal is to start membership negotiations. Ukraine will definitely do its part of work.

Glory to Ukraine!
