Як військовий командувач я розумію, що коли наді мною вповітря є такі потужні літаки, як F-16, вони допоможуть мені й у повітрі, й унанесенні наземних ударів. After two weeks of consultation, the European Commission has announced the replacement(By June 5)EU-prohibiting the imports of wheat, corn, rapeseed and seeds to five EU member states, including Romania, but not transit.

The EU ban covers \$ 0.4 billion in Ukraine's monthly exports(close -up of general exports of this product by Ukraine), in April, Ukrainian agro -food exports to four countries that introduced banners fell by 68% -up to \$ 0.1 billion.

The reorientation of Ukraine to other countries has led to new delays and additional costs, according to conclusions, experts say.

However, the EU decision did not decide trade uncertainty. Countries have already urged the expansion and duration of restrictions, while other Emergency Member States are concerned about the consequences for free trade in the EU's inner market.On April 21, transit through Poland was restored. However, additional ones, including convoy and GPS trackers, were put forward. Ukrainian exporters have informed the transit delays and large queues at the border. In addition, exports that needed overload or waiting in ports remained difficult.

Recall that the prohibition began to protest farmers and the need to run into the market and damage to producers suffering from a low valuable background of activation Grain from Ukraine EU initiative on autonomous trade measures and "ways of solidarity".

Indeed, the physical volume of Ukrainian imports in the EU doubled from 7.9 million tons in 2021 to 16.0 million tons in 2022. One -third of additional import comes to five neighboring countries, with Poland imported an additional 2.4 million tons in 2022 compared to 2021, followed by Romania and Hungary(+1.3 million tons).

«Однак вплив цього припливу зерна на ринки сусідніх країн неочевидний», -стверджують економісти. Ринкові ціни на зерно впали у перші місяці 2023 року порівняно з піком навесні 2022 року, але так і залишилися значно вищими задовоєнний рівень.

Читайте також: For Ukraine, the EU decision is perhaps "the best of the worst," the experts say. It would be the best to have a ban, but the current agreement retains access to the EU and other countries through transit. And, formally, the solution. On the other hand, this decision requires a significant short -term re -orientation, which means additional losses in addition to those that are performed by exporters through prohibitions, is indicated in the conclusions.

"Not far from the village of Kirovske on the night of May 18 to 19, the employees of the Russian DPS detained the 29-year-old Crimean Tatar Mambeth Asan-Usta. They brought the man to the Ministry of Internal Affairs of the Russian Federation to draw up an administrative protocol of insurance and promised to return him to the car that remained remained. At the same time, the Russians did not do so, but brought out Mambeth because of the official output, where he was waiting for a Volkswagen minibus and people in the military form of masks. They attacked the man, tied and forcefully planted in the car. For a version of the abducted, he was taken to Simferopol, where in an unknown apartment began interrogation about the relationship of the man with Ukraine and damage to the village in the village of Puretsenko, Simferopol district. After all, there was an explosion in the morning of May 18, which is why a few cars with grain came off the rails. The occupation of the peninsula accused Ukraine of this incident. People in the military form continued to threaten the massacre of the Crimean Tatar, inclining it to sign unknown documents. They also wanted Mambeth to pass the polygraph, but the man refused.

I would like to point out that since the beginning of the occupation of Crimea in February 2014, the rights of citizens of Ukraine have been violated by the Russian Federation. The abduction of people, illegalization, fabricated cases, deprivation of the right to a fair court is the crime for which *r axis* should be punished.

The coordination headquarters are negotiating with the aggressor country for the exchange of services of all ages, including seizures.

About this [the one was talking](#) During a meeting with the family servicemen of the National Guard Service of Ukraine on a coordinating product on the management of prisoners of war.

"Who and how captured is not taken into account. There are stitches, they also need to be turned, "the headquarters noted.

The native people are concerned that the Russians sometimes fire our troops from the territory of the Ukrainian prisoners, using them as a "live shield".

"According to international humanitarian law, the responsibility for the captives of the dishonest who holds them. But we are doing our best to improve the conditions of detention under pressure from the International Community and to do everything possible for the safety of prisoners, "the headquarters representative emphasized.

He also noted that at the present stage from captivity it is possible to return both the confirmed by Russia of prisoners and not confirmed.

"We have proposed some initiatives on confirmation-the answer to the aggressor. The aggressor country confirms the people through the International Committee of the Red Cross. Ignoring the Russian side of the mechanism of confirmation is a violation of humanitarian law," the meeting said.

It is also easier for lawyers and human rights defenders to find prisoners in Russia and by the occupied territories after they have received a sentence because then then they appear in the relevant Russian registers. Currently, the exchanged prisoners and those who are investigating are being exchanged.

"The exchange fund is replenished daily. Exchanges in any case depend on the front. Now we can manage risks, but it is too early to predict something - the war is still ongoing, "the headquarters representative summed up.

The Minister of Defense of Ukraine Oleksiy Reznikov congratulated the Marines with a vocational holiday.

Greetings to the head of the Ukrainian Defense Office [placed](#) in Facebook.

"The warriors of the three elements - the earth, water and heaven today celebrate their day. A day of night horror in the berets of the color of the storm wave, "Oleksireznikov wrote.

He recalled that during the years of ATO/OOS, Ukrainian Marines argued every time: where they have a position they are - there will be non - conversations.

"The start of the large -scale war was met at the forefront, where the titanic courage was shown and the enemy was difficult to describe the enemy. And today they are in the release of Ukrainian land from invaders. The enemy should be thoughtful: even at such a difficult time, we form new units of infantry, which will inevitably bring them closer to the Cobzon concert.

It is proud that I have friends among Ukrainian marines, proud that samples of wedge weapons come to them, proud to be Ukrainian near them.

Happy Holidays, Break!Semper fi!" - said Alexei Reznikov.

When some responsible and risky man was put, he demanded that they be sent him, not a young fighter.

When I asked the brothers of the cradle to tell about the combat episode from his life, they spread their hands, they say, "and they have all of us."

In that battle and got wounded, but did not leave the position, providing fire covering the wounded, which was very many. The price of his own life has retained his twin '..."

As [transmits](#) The Government Portal, this was emphasized by Viceremier-Minister-Minister of Reintegration of Temporarily-Coiled Territories Irina Vereshchuk on the air of one of the TV channels.

According to her, it cannot be argued that most IDPs have already received financial independence. Therefore, it is very important to continue to pay their own hooks and give your feet.

-My position remains unchanged-this year we have to keep the IIVPAC of IDPs,-said Viceremier-Minister.

The Ministry of Reintegration of the Temporarily Occupied Territories of Ukraine also reminds that the Ministry was developed by the Ministry and approved by the Government of the State Public Policy on Internal Movement for the period up to 2025, in particular, provides for IDPs from the state.

It is also noted that Russian occupation and terrorist troops continue to destroy the city systematically and methodically.

"Avdiivka has been with a dignity and steadily standing rashist invasion since 2014. In their pragmatism, the rashists resort to the tactics of the scorched earth. And the people who stay there - which are more than 1700 people - daily, they cause themselves to be a danger, "Pavel Kirilenko said, calling for civilians. - There are opportunities and means for evacuation. Colonel Yuri Ignatius Air Force Command of the Air Force of Ukraine.

Colonel Yuri Ignatus in the Ether of the Televahorfon ["Unin"] told about the preparation of Ukrainian pilots abroad.(<https://www.youtube.com/watch?v=WY8sDvZdWEA>).

— Авіаційна коаліція широка, українських пілотів навчатиме низка країн. Наразі триває процес підготовки людей до навчання на F-16. Створено передові групи, які виїхали до тих країн, що надали нам навчальні майданчики. Вивчається, як саме відбуватиметься дана підготовка, кількість пілотів, часові терміни тощо. У відрядження направлятимуть не лише льотчиків, а й авіаційних інженерів та офіцерів бойових управлінь. Старт навчанню даний — і це головне, — зауваживармієць.

Він уточнив, що всіх військових пілотів одразу ж відправити не можна. Адже комусь треба забезпечувати дії Сил оборони України. За час війни льотчики здобули певних професійних висот. Тому поїдуть за кордон підготовленими.

— Кожен курсант Харківського національно університету Повітряних Сил після випуску у своєму активі вже має по 200 годин нальоту. Далі в бойових бригадах вони вже опановують різні навички пілотування. Наразі ж іде мова про їхнє перенавчання на інший тип літака. Як порівняти з радянським MiГ-29, закордонний F-16 є більш автоматизованим. Але це не означає, що буде легко, — розповів речник Командування Повітряних Сил.

Говорячи про терміни підготовки на F-16, офіцер зауважив, що підготовку кожного льотчика варто розглядати індивідуально, враховуючи ті завдання, що виконуватиме його авіаційна бригада.

Minister of Defense of Ukraine Alexei Reznikov wrote Appeal to the Bashkir people and their true leaders. Next is a quote:

"When I was serving in the army, one of my best comrades was Bashkir.

Thousands of men from Bashkiria were killed or crippled.

The situation impressed me with my absurdity. And she pushed her to write a native to my friend, the whole Bashkir people and his true leaders.

Today's Ufa authorities, taking care of personal gain and working in the interests of Kremlin, send its people to death.

Bashkiri is one of the largest peoples of Russia, which is at the same time a uniform situation.

In modern Bashkiria there are three commemorative national groups - Russian, Bashkir and Tatars. The Republic of Bashkortostan has huge natural resources and developed industry. There is everything there to guarantee a high level of pre-production.

The main interest of Bashkir is obvious - to ensure national development in itself in itself, including - through the exercise of the right to self-determination of the truthful distribution of considerable resources in favor of the region.

To do this, you need to concentrate all efforts within Bashkirria and the protection of Moscow.

If you list the problems and threats to the Bashkir people, the cause of them is not Ukraine or Ukrainians. The roots of all reasons - in Moscow and in Ufa.

Instead, Bashkir is sent to die for a thousand kilometers for what.

No one but the Kremlin and its lackeys are interested in it.

This should be stopped as soon as possible.

The emergence of a number of so -called private military companies in the temporarily occupied Crimea is primarily associated with the increase in fear

among the Russian occupiers of the hardware of the Armed Forces of Ukraine.

The representative of the Main Directorate of Intelligence of the Ministry of Defense of Ukraine Andriy Chernyak told about it, [reports](#) GUR MOU.

"The invaders clearly understand that the fighting in the Crimea will be, and they will build fortifications, defensive lines - not only in the Crimea, but also in the Soviet Farms," - explained Andrey Chernyak.

The representative of the Ministry of Defense of Ukraine added that the leaders of the occupying power to the peninsula will worry because of disappointment by the Russian army: who knows whether it will be waded to protect their families and looted property in Crimea.

"These private armies have been designed to protect occupation administrations because of the realization that Russia's armed forces will be able to protect them. And secondly, they are not sure of the integrity of the Russian Federation. If Russia begins to "fall", then they will have "PVC", which will protect their wealth, families, " - said a representative of Ukraine's military intelligence.

According to Andriy Chernyak, the so -called Crimean PECs from various sources are financed: for example, the leader of the occupation administration of Crimea was collected by Aksyonov there and forced money to allocate money for his private army.

"On the one hand, Crimean businessmen are forced to do it, but on the other, they also want to protect themselves and their wealth. The invaders guarantee them that they are evacuated if they are evacuated, and everything will be well, "Andrey Chernyak said.

The representative of the GUR of the Ministry of Defense of Ukraine reported that the so-called "Aksionovtsi" fighters receive from 200 to 250 thousand rubles a month, train mainly on the bases of preference and temporarily occupied Kherson region, and the instructors for them are professionally trained by Russian military with combat experience: Several times a higher salary - from \$ 5,000 or more.

Novens to the Crimean PVC are recruited so as not to compete with his "Wagner": "They are recruited among the mobilized, created double - constraints with PVK and the Ministry of Defense. They are trying to attract the Krym population first, but in addition, they take measures throughout Russia, " - said the representative of the GUR of Ukraine."In totalitarian Russia, there

can be no paramilitary formations that would be subordinate to the power structures," the representative of Ukraine's military intelligence emphasized.

The spokesman of the Eastern Group of the Armed Forces Colonel Sergeycheriev on the broadcast of the TEMACHONPON told this "[Unin](#)".

— На Бахмутському напрямку протягом минулої доби було лише три бойові зіткнення. Щоправда, ворог був активний у плані артилерійських ударів — 404 рази. Тож про снарядний голод у них не йдеться. У цих боях було знищено 79 окупантів, дві самохідні артустановки «Гацінт» та

«Гвоздика», а також 9 гармат типу «Мста», Д-20 і Д-30. Окрім цього, знищено 7 БПЛА різних типів, —повідомив офіцер.

Він уточнив, що «вагнерівці» щодня зазнають величезних втрат: до 100 осіб вбитими та стільки ж — пораненими. Тому вони давно б відступили, але їхні ватажки гонять їх на українські кулі, виставляють за ними «загороджуvalльнізагони» тощо. Тож усі гучні «заяви» євгена пригожина слід розглядати в контексті гри на публіку.

— Усі ці місяці ми проводили ефективну оборонну операцію зі сточуванням можливостей ворога, знищували його бойовий потенціал. Не маючи переваги в особовому складі, ми успішно використовували слабкі місця ворога, нестандартні тактичні прийоми. В ході такої активної оборони за найменшої можливості міконтратакували противника. Іноді ми просувалися на 250–1000 метрів, але це був реальний успіх, а не вигадана пропагандистська брехня, як в окупантів, —зауважив полковник Сергій Череватий.

Ukraine has returned home with 12 other Ukrainian children exported to the territory of the Russian occupiers.

About it [reported](#) Presidential Commissioner for the Rights of the Child Mykola Kuleba.

"This rescue mission was very complicated, because 17-year-old Denis, after whom the baptized mother was, could not return to Ukraine. The Russians delayed all documents and phone. For two days, she was questioned by FSB representatives and threatened with a 15 -year detention. The woman was not allowed to be able to have a baptized son, but instead was sent to Minsk, lasted there for another day. Olga had to ask for help in the Red Cross that he was not engaged in such quotations, "he wrote.

Another challenge, according to Kuleba, was the return of 11-year-old Sergius. The orphaned from Vovchansk after a full-scale invasion of the Russian Federation was with a single native sister on different sides of the front. But 18-year-old Xenia was disconnected, and she decided to return her brother home. Like the previous cases, representatives of the minor service have remedied the reunification of the family, using psychological pressure tamanipulative methods. The girl had to endure a lot of trials to get her brother home.

"Fortunately, children and parents are already in Ukraine, everything is well with them. And to help the children recover from the stress experienced and a long road, we organized for a vacation in the attraction park. It is very nice to see their smiles, especially what they survived. Now we have to do everything possible to make children get psychologically and return to a normal life, "Mykolakolaba wrote.

The occupiers planned to conduct new "medical examinations" for children of

Is stated. That this procedure is a component of the state policy of the Russian Federation, directed by the genocide of Ukrainians. Thus, the Government of the Russian Federation has allocated more than 1.4 million rubles for "preventive medical examinations" in 2023. The process is managed by Putin for the rights of children Maria Lviv-Belov. On March 17, 2023, the International Criminal Court in the Hague issued a warrant for the arrest of Lviv-Belova and Putin for illegal deportation of Ukrainian children.

The National Resistance Center calls the residents of the Tot in no way to let the children on any "medical examinations" conducted by the invaders. This is more likely that children will be forcibly taken out for treatment to the Russian Federation, where they will eventually get to the Russian children's homes.

About this a high representative of the EU on Foreign Affairs and Security Policy - Vice -President of the European Commission Josep Borrel [stated](#)

Following the results of the European Union Foreign Affairs Council with the Ministers of Defense.

He also noted that Ukraine "made Putin's plans for the ambulance dispelled, and we must continue to support her protection."

According to Josep Borrel, "Ukraine's support is not exhaustion." "On the contrary, I show what we have to do: give it the tools needed for effective protection, and do it as soon as possible and in the most appropriate quantities. Ukraine is a strong support and the defense ministers are determined to provide it," the EU's High Representative and Security Policy said.

Text speech by high representative Josepa Borrel at a press conference

"The Defense Council today focused on our military support for Ukraine. For this purpose, we also had the presence of NATO Secretary General Jenstoltenberg, with whom we shared an analysis of the military situation in this war.

And, of course, all defense ministers have expressed their readiness to continue Ukraine. We have reviewed Ukraine support activities. First of all, the ESU mission of military assistance to support Ukraine [Eumam Ukraine]. Many European countries are taking part in it and 20,000 Ukrainian military will be held through these training centers. And at that rate, without a doubt, by the end of the year, we will reach the numbers of 30 thousand soldiers, which was twice as much as they were at first.

All defense ministers have agreed that it was an extraordinary success in which it was very important in all countries. 30,000 soldiers trained in a year - as I told you - it is twice as much as we thought at first.

In the field of material support, the latest data we have indicate that the European Peace Fund, we have called on member countries to provide military equipment for the amount of 10 billion euros. The Fund we manage in Brussels will allocate 5.6 billion euros.

Therefore, we offered an eighth package another 500 million euros, which is being constructed. I hope that obstacles to its approval can be paid this week during discussions in technical committees. But today I do not have unanimous consent. In this way, we will be able to increase the capacity of the European Peace Fund for Ukraine. Of these 3.5 billion euros, about half will go to other cylinders. The number has not yet been determined. But they will not only concern Ukraine, the need for many other parts of the world.

The third dimension of our support is the supply of ammunition. You already know that 20 March we have agreed to allocate 2 billion euros for the provision of Ukrainian artillery ammunition, and we set ourselves to set it a million of shells in the next 12 months.

And for this we have designated three lanes or three lines of action - three tracks.

The first direction of action was to ask Member States to give us their courses. That they do not expect to produce more, but make their contributions that already have. And the last numbers are really much better than those that were 10 days ago. Because today I can announce that this first track of the Member States has put 220,000 artillery ammunition and 1300 missiles.

Since this first track will be open by May 31, I think we can be able to allocate the goals of 1 billion euros for this purpose, because what has already been given, we estimate it at 860 million euros.

The second area of action is to go together in joint purchases for European and Norwegian defense industry. Eight of the 24 countries that joined the project of the European Defense Agency confirmed to intend to receive 155 mm ammunition. The project will be to manage the project. In addition, there are two more projects: one is headed by France, Aisha - Germany. The EDA project [or member states that head it] can hold 1 billion euros for the purchase of ammunition of this particular caliber.

And further, the third direction, the third course of action is an increase in the production power of the European industry. The internal market commissioner, Mr Tierry Breton, explained to us that the European industry has the potential for the production of the necessary ammunition, and it depends on the co -law - the Council of Ukraine and the European Parliament - to approve the proposal of the European Commission. We hope to reach a whole million shells for Ukraine over the next 12 months.

The Council gathered the Leading Council of the European Defense Agency, which I am honored to lead, and we discussed the learned lessons or the consequences of this aggressive war in terms of our military potential and European proof priorities. I would like to add that in addition to the military dimension today, more than 1.5 billion euro of macro -financial assistance is sent to Ukraine to continue supporting the functioning of the Ukrainian state. And I take the opportunity to remind you that if we add all the elements of support-military, civilian, economic, humanitarian, financial support, help to

refugees-if we add to the Abraile Ukraine from the European Union-and its Member States-undoubtedly supports the most. Ukraine. Because we have already exceeded the figure of 65 billion euro. This puts us in a truly relevant position of Ukraine's support, and we will do it.

We believe that Ukraine is protected effectively that it has made Putin's plans for a quick victory and we must continue to support her protection. Ukraine's support is not exhaustion and, conversely, show what we should do: give it the tools needed for effective protection, and do so as soon as possible and in the most appropriate quantities. Ukraine is a powerful support, and the defense ministers are determined to give it.

We also discussed the development of a strategic compass, "Josepborrell said.
